By domestic, we mean broadcasts which are intended, primarily,for reception in the same country/nation in which they originate. AIRWAVES and rrb, are international in scope, and the term 'domestic' should not be taken to imply 'USA' or even North American. Readers in other nations are encouraged to participate.

Appropriate topics include (but are not limited to)..

) Formats and programming.
) Engineering & technical matters and interests.

) Community broadcasting.
) Pirate broadcasting (especially non-shortwave, domestic pirates).
) Legislation affecting the industry, and its 'offspring' industries.
) Technologies affecting the industry, and its 'offspring' industries.
) General station information. Who is going on and off the air, and why.
) Radio's historical and cultural significance.
) DXing (long distance reception) on the standard broadcast bands.
) Radio's current and future trends.
) Political and news coverage and its impact.
) Job openings and help to those seeking work in the industry.
) Information on equipment and techniques involved in transmission and reception of broadcast radio signals.
) The International Scene and how broadcast radio is shaping up in the various nations of the world.

**********

One of the main goals of AIRWAVES/rec.radio.broadcasting is to act as a bridge between the radio broadcast professional, the listener, and those who are up-and-coming broadcast Professionals. Groups who often lack any real insight into each other's "world".

1) The radio professional. S)he lives *inside* the walls of radio. While dependent upon the listener (or more accurately the overall number of listeners) the Broadcast Professional (BP) is somewhat separated from the end user by virtue of his/her "point-to-multipoint" position. AIRWAVES offers the BP a glimpse into the real-world of the listener, un-filtered by consultants, ratings, trend-reports, trade pubs et-al. Sometimes that world is a little rougher than the broadcaster is used to, but that is the reality of 'the real world' sometimes. We do try to maintain a civilized environment, though, and filter out the most offensive brainless or off-topic posts (more on this below).

2) The radio listener. The listener is also in a similar (albeit inverse) position. The listener has relatively little actual input into radio programming. They often have only a vague idea of what makes a radio station tick. By communicating directly with broadcast professionals (and para-professionals) the listener gains some insight and understanding into the world of the broadcast professional.

3) The 'wannabe' broadcaster. AIRWAVES/r.r.b gives those with a strong interest (but little or no experience) in the industry the chance to interact with, those who have made it in the business. We also post resumes and 'help/positions wanted' ads for interested parties.

AIRWAVES/r.r.b is loosely moderated, as alluded to above.

Our philosophy of moderation is to 'err on the side of permissiveness'. We do not believe in censorship and never kill a post because We don't believe in the poster's opinions. We take great pains not to unduly

restrict dialogue or the poster's right to express him/herself, while
at the same time attempting to provide a professional-level
environment free of unnecessary noise (a daunting task).

```

Matters that may cause an article to be rejected, include...

* Articles which are not on (or reasonably near) the group's charter.

* Articles that are too long for submission as-is. We have a soft
limit of 8000 bytes (*kbytes) and a fairly hard llimit of 10,000 bytes
(10kbytes per article for the Digest. We will post longer files in
the newsgroup, but all sites may not carry longer items.

* Articles which are merely multiple repetitions of an identical answer which
has already been offered several times.

* Articles which contain 'miles' of quoted and multiple quoted text followed
by a few lines or less of original text. Please edit quoted text to a
minimum and try to adhere to the *50% rule*, that is 51 (or more)
percent of original text to 49 (or less) of quoted text.

* Articles that solicit for funds or contain blatant commercial content.

* Articles which are unwarrantedly offensive, abusive or contentious for the
sake of contention. Personal attacks and ridicule are considered such.
Discussion, even argument, of issues and opinions are welcomed and
encouraged. However personal attacks on individuals (no matter how
justified you might feel they are) are not part of our charter.

* * * * * * *

```

|_| |_|\___/ \_/\_/ |_|\___/ |_| \___/|___/\__|
```

1) Post via rec.radio.broadcasting as you would any other Usenet
group. Your articles will find their way to AIRWAVES as well.

2) Email your article directly to articles@airwaves.com. Using other
addresses to post will needlessly delay your article. You might
consider installing an alias in your mailer for emailed articles,
especially if you post a lot of stuff. See the end of this file
for all applicable addresses.

```

AIRWAVES has a program called RadioWatchers, which is open to any
readers who are interested. Basically RadioWatchers are volunteer
staff reporters who write about the goings-on in their market or area.

RadioWatchers are expected to maintain at least one posting per month,
more as news warrants. For a complete file on the RadioWatcher
program, send email to radiowatcher@airwaves.com and tell us
about yourself.

```

```

Archives of past Airwaves Radio Journals are kept for retrieval via
FTP, Gopher or via the Worlkd Wide Web. Below are the paths for
these archives.

FTP - radio.aiss.uiuc.edu /misc/rec.radio.b-cast/
Gopher - radio.aiss.uiuc.edu 7070
W.W.W - http://radio.aiss.uiuc.edu/~rrb/

AIRWAVES JOURNALS (and the previous incarnation as Internet Radio
Journals) are stored in sub directories, each with their own index file.
Our archive site also contains files from a couple of our
other lists, as well as some interesting information not published
in AIRWAVES/r.r.b. Most files are compressed, so if you are using
FTP, use the binary mode to transfer.

Our Web Site has many other radio/media and general links in addition
to the archives for AIRWAVES publications. Do check it out. Let
us know if you have any other interesting links for us.

We hope you enjoy the group. Remember, it is only as good as it's
contributors. So don't be shy :-). If you have a question, or answer,
even if you are not sure, post - post - post.

We are open to suggestions on how to improve this group.
Send them via e-mail to wdp@airwaves.com

Thanks to all who have, and continue to, participate.
We now return you to your regularly scheduled newsgroup :-).

## 1399. Airchecks

Newsgroup: rec.radio.broadcasting
Date: 1995-07-28 00:00:00 UTC
From: sbauer@tyrell.net
Message-ID: <3vab1m$7be@vixen.cso.uiuc.edu>
Source record: 30150

The question as to how long an air check tape should be could be answered in many ways. My personal feelings are short and to the point.

In 1974 when I applied for a job at a station that was changing formats from simulcasting Top-40 to country, I spent quite a bit of time preparing a 30 minute tape. The station manager and PD and I went in to the production room and the Manager loaded tthe tape on to the machine. He hit the play button and after about 45 seconds he touches the rewind button.

Well, I got the job and later asked him why he did not listen to more of the tape.

What he said has stuck with me and if I do an aircheck today, I still follow some simple rules.

Make the tape no more than two or three minutes long.

Don't waste time showing them you can mix music or music and jingles. Any goof ball can do that. Show them the best stuff you can in two or three minutes.

In most cases, they will make a decision in the first 30-seconds whether they are even going to consider you for the job.

Remember, you are not the only one applying for a job and these guys are busy. Make the best impression you can in two minutes and you'll do good.

in this case, "KISS" stands for keep it short stupid.

Hope this helps.

Steve

## 1400. airchecks/spoken word recordings

Newsgroup: rec.radio.broadcasting

I'm looking for recordings, transcripts, and documentaries on:

Billy Sunday
Aimee Semple MacPherson
Father Coughlin
Daddy Grace
Father Divine

If you know of any library or archive sources for material on these people,

I'd appreciate the tip. Video of any sort is also welcome.

Please e-mail me with any info. I can buy, we can trade, whatever.

Thanks for your help

Steve

The body of lawyer, Democratic Party insider and KGO talk-show host Duane Garette was found yesterday under the Golden Gate Bridge. Police are investigating the death as a suicide.

# 1403. KGO Talk Show Host Commits Suicide

Newsgroup: rec.radio.broadcasting
Date: 1995-07-28 00:00:00 UTC
From: donut@crl.com
Message-ID: <3vab1p$7bj@vixen.cso.uiuc.edu>
Source record: 30154

(Bill -- this may be a duplicate -- please replace the other article I sent you with this one)

KGO San Francisco talk show host Dwayne Garrett's body was found at the foot of the Golden Gate Bridge yesterday afternoon (July 26), the Marin County coroner's office confirmed this afternoon. He apprently jumped off the bridge.

Garrett was heavily involved in politics, and was the co-chair of Diane Feinstein's run for the U.S. Senate against Michael Huffington.

He joined KGO as a political analyst during the 1992 presidential election, getting the 7 - 10 pm weeknight talk show two years ago.

## 1404. Duane Garrett

Newsgroup: rec.radio.broadcasting
Date: 1995-07-28 00:00:00 UTC
From: radiobob@ix.netcom.com
Message-ID: <3vab1p$7bk@vixen.cso.uiuc.edu>
Source record: 30155
Cross-posted to: ba.broadcast,rec.radio.broadcasting

Like his politics or not, Duane was an amazing man. Al Gore's statement hit it on the mark: "Duane mastered more worlds than most men enter in a lifetime." He was a man of awe-inspiring passion, totally dedicated to everything he involved himself with and always kind. I was just an on-call engineer at KGO, but after the last presidential conventions, Duane remembered me with some souveniers and a personal note. What a shock...What a tragic loss.

# 1405. Duane Garrett of KGO...Will Be Missed

Newsgroup: rec.radio.broadcasting

The Marin County Corners office reports that KGO Talk Show host and political Analyst Duane Garrett has been found below the Golden Gate Bribge dead from an apparent suicide. Garrett was one of KGO's "shining stars" he hosted a nightly talk show and worked on numeruos political campaigns. Staffers at KGO and his fans are in shock from the news. His body was found in the water under the north tower of the Golden Gate at 3;30 pm on July 26.

He will be missed!

God Bless His Family.

# 1406. Gaynor Retiring - Please Help Find Students

Newsgroup: rec.radio.broadcasting
Date: 1995-07-28 00:00:00 UTC
From: jwlovell@ix.netcom.com
Message-ID: <3vab1s$7bp@vixen.cso.uiuc.edu>
Source record: 30157

PLEASE HELP US FIND BOB'S STUDENTS . . .

Bob Gaynor, a premiere radio broadcasting instructor for the Dade County Public Schools, in Miami, FL, is retiring in early August '95. We are desperately looking for former students of his radio broadcasting program, which has operated for the past 20 plus years.

Bob Gaynor's students are now scattered all over the country and we need your help in tracking down others that may not know of his impending retirement. <>PLEASE<> check with the members of your station staff to see if they were a student of Bob Gaynor in Miami.

There will be an charity award ceremony in late August or early September, with proceeds going to the March of Dimes, and will kick off a yearly Bob Gaynor Award for the person who has done most for local radio in the Miami-Ft Lauderdale Market. If anyone on your staff is a former Gaynor student, please have them contact me via e-mail or by phone as soon as possible.

Many thanks,
John Lovell (aka John Donovan - WKIS-FM)

## 1407. Harvey in the Morning..

Newsgroup: rec.radio.broadcasting
Date: 1995-07-28 00:00:00 UTC
From: wkm1@nestor.cc.bellcore.com
Message-ID: <3vab1s$7bq@vixen.cso.uiuc.edu>
Source record: 30158

Does anyone know what happened to John Harvey, alias "Harvey in
the Morning"?

He's been on Magic, 102.9, WMGK, Philadelphia for ever, and before that
he was on another Philly station.

I turned on the radio, and someone else was on. I called to find out
if he was on vacation, and was just quickly told, "He's gone."

Clues, anyone?

## 1408. Jocks...

Newsgroup: rec.radio.broadcasting
Date: 1995-07-28 00:00:00 UTC
From: wayfish@ix.netcom.com
Message-ID: <3vab1t$7bu@vixen.cso.uiuc.edu>
Source record: 30159

So whats going on with the Jocks of America?

What's going on in your market? What are you talking about? What are your opinions on the biz? The formats? What's affecting you?

I'm Doug Yoel from WBAB (Long Island). I'm just a part-timer, but I'm very involved with our Morning Show, programming, etc. There's alot of strange things happening in the LI and NY markets right now. WNEW changed format to "Rock Alternative" which has not yet defined itself. Somewhere between AAA and Hard Alternative (with some traditional AOR mixed in). Then there's Q104 which is "Pure Rock" but plays mostly alternative. Z100 is mostly alternative now. WDRE has went under ANOTHER format change (back to it's classic WLIR new wave/alt format of the 80's). Lots of changes.

Hot topics here are (in addition to all the national stuff): Darry Strawberry sniffin up the Yankee's baselines...The tornados (Yes, Tornados on Long Island!)...and our Jones Beach Concert series.

We have some cool promotional things going on. BLUES TRAVELER will be in for a free show with our listeners...HOOTIE AND THE BLOWFISH did one last month.

Enough from me. What's going on with you guys?

-Doug

## 1409. Los Angeles: KLSX to change formats?

Newsgroup: rec.radio.broadcasting
Date: 1995-07-28 00:00:00 UTC
From: bnunes@netcom.com
Message-ID: <3vab1t$7bv@vixen.cso.uiuc.edu>
Source record: 30160

I've just heard a rumor through the grapevine that Los Angeles'
classic-rock station, KLSX 97.1, will be changing format next week.
The word I got is that it's going to another talk station, and
the only programming holdover is going to be Howard Stern.

This makes no sense to me -- here in LA we already have KFI, KABC
and KMPC!

Has anyone else heard anything about KLSX?

# 1410. Monmouth/Ocean NJ Ratings

Newsgroup: rec.radio.broadcasting
Date: 1995-07-28 00:00:00 UTC
From: TRRadio@aol.com
Message-ID: <3vab1v$7c0@vixen.cso.uiuc.edu>
Source record: 30161

Here's the Spring ARB numbers in #46 market - Monmouth/Ocean, NJ

| Station | Fa94 | Sp95 | Format |
|---|---|---|---|
| WJLK-FM/WQNJ | 5.8 | 6.1 | Soft Rock |
| WADB | 4.0 | 5.5 | Easy Listening |
| WXRK | 4.7 | 4.6 | Classic Rock/K-Rock NYC |
| WKXW | 4.1 | 4.5 | NJ 101.5/Talk/Oldies |
| WABC | 3.5 | 4.1 | Talk |
| WZVU | 2.7 | 4.1 | Oldies |
| WPLJ | 4.1 | 4.0 | Hot A/C |
| WAXQ | 4.0 | 3.9 | Q-104/Hard Rock |
| WCBS-AM | 2.3 | 3.4 | News |
| WFAN | 3.9 | 3.3 | Sports |

Among the local market stations--

| | | | |
|---|---|---|---|
| WJLK-FM/WQNJ | 5.8 | 6.1 | Soft Rock |
| WADB | 4.0 | 5.5 | Easy A/C |
| WKXW | 4.1 | 4.5 | Talk/Oldies/NJ 101.5 |
| WZVU | 2.7 | 4.1 | Oldies |
| WOBM-FM | 4.5 | 3.3 | A/C |
| WRDR | 2.0 | 3.1 | Adult Standards |
| WOBM | 2.4 | 2.8 | Adult Standards |
| WJRZ-FM | 3.1 | 2.1 | Hot A/C |

Comments--
Winners:
WJLK's change from A/C to Soft Rock has vaulted them to #1 the last two books. They also benefit from a LMA with WQNJ giving them a signal which covers the whole book area.
WADB stops a downward trend over the past two books to move to #2. A musical adjustment gets some of the credit, with some newer A/C tunes.
WZVU's Oldies format makes a big jump.

Losers:
WOBM-FM takes a big hit, losing over a point. The other Southern Ocean county station, WJRZ-FM also takes a point drop.

I would like to second the recommendation on the Sony TCM 5000 series machines. They are rugged and durable with quality sound. I was responsible for keeping a pool of about 12 machines running and found that most problems were quickly fixed. And of those problems, we never experienced component level failures. If taken care of they will run a long time.

OK, I'll grant you that ground conductivity makes a big difference. But I think that even if you removed
the oversimplification, we could make do with a lot fewer 50,000 watt stations. Maybe we ought to
look at actual measured data as opposed to theory. Kind of an AM version of ERP vs. input power.

## 1415. Quebec tv?

Newsgroup: rec.radio.broadcasting
Date: 1995-07-28 00:00:00 UTC
From: Stuart_Troutman@HP-Chelmsford-om1.om.hp.com
Message-ID: <3vab23$7c7@vixen.cso.uiuc.edu>
Source record: 30166

Item Subject: cc:Mail Text

During my recent annual visit to Lake Champlain, NY/VT, I had a
chance to scan over a small regional cable tv service, and I'm wondering
about Canadian tv networks, or more precisely, Quebec tv:
I found four Montreal channels (2 French, 2 English), each
apparently affiliated with a different network. One was obviously the CBC
station (in English), another was "CTV" (also English), a third was "SRC"
(in French), and the fourth (also French) was something like VQM or QVM or
QTV.
Can some more enlightened Quebecoisie help me out here?

## 1416. all sports free fall

Newsgroup: rec.radio.broadcasting
Date: 1995-07-28 00:00:00 UTC
From: kevin sylvester <insidetrack@toronto.cbc.ca>
Message-ID: <3vab23$7c9@vixen.cso.uiuc.edu>
Source record: 30167

hello everybody.

this is kevin sylvester calling from the CBC Radio show "The Inside Track"

I was intrigued by the recent discussion about how all-sports stations are doing across north america.

The FAN (Toronto's all-sports staion) just lost the rights to broadcast Maple Leafs Hockey games, and there is some questions about the stations future. and it seems that what looked like a no-miss format just a couple of years ago is failing just about everywhere.

Is there anyone in this newsgroup who has experimented with all-sports formats at their stations.

We're looking at doing a story on their decline, and would be interested in talking to anyone out there who has a story to tell.

You can message me at insidetrack@toronto.cbc.ca

Thanks,

Kevin Sylvbester

Source record: 30168

I'm with Tom regarding the Music sweep syndrome...My station (KBOY-FM, AOR) has 3 stops an hour...with one 30 minute sweep from :52-:22. It's been my policy never to spotlight "commercial-free" blocks, because the spots are a fact of life...99% of the time they're there on the air...don't draw any more attention than neccesary to the presence or lack of presence of the neccesary evil. Besides, we don't want to knock the presence of spots...all stations these days need to sell RESULTS to their clientele, not just spots.

Best Regards,

Bill
Medford, OR

I've always wondered what it would be like to run the schedule this way:

Spot#1,Song,Spot#2,Song,Spot#3,Song,Spot#4,Song,Spot#5,Song,Spot#6,Song,
Spot#7,Song,Spot#8...then, 23 minutes commercial-free.

I'm serious!

My reasoning? Well, if listeners happen to know this pattern, they might decide NOT to tune out at the commercials, thinking, "Well, they'll be back to music in 60 seconds, so I won't bother to flip around." You'd just have to make sure to put killer, low-burn songs within the SPOT,SONG,SPOT part of the hour, which I suppose *might* be difficult with some/most formats. I just think it might get more people listening to the commercials...and, isn't that the major purpose of radio? :)

I think it might work, if it's done in a slick way...a dead segue here, a "more music in 60 seconds" sweeper there, a "23 MINUTES COMMERCIAL-FREE COMING UP SOON!!!!!" sweeper here, jock-talk there.

> Speaking for myself, I found the shorter commercial breaks much less
>intrusive, and I wish they would come back.

This brings to mind a couple of things which I've been thinking about
lately:

1) I don't know about other markets, but I suspect they are similar to
Boston in this regard: I've noticed that most of the Boston
stations have managed (unintentionally I'm sure) to get their
commercials synchronized. For example, I believe all of the
remaining AC stations run a looooong break at :52 almost every hour
during the daytime. So, changing the station won't help. While
talking with a coworker yesterday, it came up that what these
stations really appear to be doing is training their listeners to
put on tapes or CDs rather than listen to the radio, which surely
can't be good for advertisers.

2) It also occurred to me that, if RDS (or its DAB follow-on services)
ever get sufficient market penetration, stations in large markets
will find it disadvantageous to continue to broadcast the format
indication in their RDS data. Consider: if everybody has RDS
radios, and every broadcaster sends a format indication, then the
minute a commercial set comes on, it will become trivial for
listeners to find another station playing the same format, and so
few people will listen to the commercials at all (unless the
broadcasters keep their commercials synchronized). This could be
an especially great problem in markets like Boston, where there are
two country stations both fighting over about 2% of the audience,
and where there are still three primary AC outlets and twelve (!)
more strong out-market ones (which ones depending on where you
are).

Here's the list of what I consider to be the AC stations with
sufficiently strong signals in Greater Boston (roughly defined as the
interior of I-495), with the home markets in brackets:

92.1 WNHQ Peterborough [Manchester]
93.3 WSNE Taunton [Providence] (AH)
94.9 WHOM Mt. Washington [Portland, Bangor, Montpelier, Glens

Falls, NH Seacoast, etc. :-)] (SA)
95.7 WZID [Manchester]
96.1 WSRS [Worcester] (SA)
98.5 WBMX [Boston] (AH)
98.7 WRGW Somersworth [NH Seacoast]
99.5 WSSH Lowell [Boston] (SA)
101.9 WCIB Falmouth [Cape Cod] (SA)
102.1 WZEA Hampton [NH Seacoast]
103.7 WZPK Berlin [NH Lakes, Portland, Montpelier (!)] (AH)
104.5 WXLO Fitchburg [Worcester] (AC-OL)
105.1 WWLI [Providence]
106.1 WCOD Hyannis [Cape Cod] (AC-OL)
106.7 WMJX [Boston] (SA)

I'm not kidding about WZPK; I actually heard them (on tropo, no less)
giving the weather for the Lakes Region, Portland, and Montpelier!
WHOM is primarily a Portland/Seacoast station (how do you serve a city
of license that has less than ten year-round residents?), but there
are few places in Northern New England where one can escape its
signal.

Source record: 30171

>From the grapevine comes:

Sunday's Orange County Register radio section, Gary Lycan asked if anyone would listen to a youth-issues FM talk station in the Southland.

Confirmed sources [and not janitors or bottle-cork washers] have told me that KSLX [97.1, 29.5KW ERP] is making the move to talk. Here's part of the line-up: Susan Ulsen -- she was the youngest Brady in the television series, Mother Love [WOW!] and the man whose guest part in the Roseanne show was cut, Kato Kalin.

No word if or when the jump will be made. KSLX has the Howard Stern show, and is looking for a niche in the LA market. The station is avail to listeners in North County San Diego. [broadcasts from Mount Wilson, the antenna farm in the mountains of LA.]

This should be interesting. KMPC tried a Gen-X show when they switched from sports to talk. The evening show was quickly cancelled when the numbers didn't add up. Besides quality programming on Public Radio, there are no FM talk shows in Los Angeles or San Diego.

Item Subject: cc:Mail Text

For those who follow the utility variety of radio news, there are now three limited-broadcast FM signals providing pretaped travel info for the Lake Champlain Transport ferry services between northeastern New York and northwestern Vermont:

90.9Mhz: between Plattsburgh NY & Grand Isle VT

89.3Mhz: between Port Kent NY & Burlington VT

90.5Mhz: between Essex NY & Charlotte VT

I only picked up the 90.5 signal myself, which was clear immediately near the ferry docks at either side of the lake, as well as throughout the ferry trip itself, of course. The LCT staff told me that the transmitters were located inside each of the dock ticket booths, so this can't be a very powerful system. (I was staying at a lakefront house just up the street from the Essex dock, and could just barely pull in the signal there.)

Source record: 30175

Hello all,

As promised now that I found the article from, The Sun Chronicle, Saturday, July 22 1995, here is an update on the sale of WARA-AM, in Attleboro.

Local radio station WARA-AM owned by the same family for 45 years has been sold to a New Bedford chiropractor. The agreement was reached between Dr. Michele Merolla and Back Bay Broadcasters Inc. Terms of the sale were not released.

Merolla will take control of the station on July 31. Once the FCC approves the license transfer, the sale will be complete.

Merolla said the station that presently a regional news, sports and talk outlet will return to much more local coverage of the area.

Peter Ottmar, chief executive operator of Back Bay said in a prepared statement he was pleased to mak the sale to a local buyer. "i haven't been doing a good job at WARA the past few years, Dr. Merolla will d a better job than I have" Ottmar said.

Ottmars family has owned the station for 45 years and said it's time to move on and up. Back Bay also owns WBNW radio in Boston and WPNW and WWKX in Providence. Ottmar said, "My people can focus on what we do best. Running our major operations. Back Bay has a focus and it doesn't include WARA"

WARA is presently the Pawtucket Red Sox flagship outlet, also plans to add Pawtucket high school football and other school sports. It carries Attleboro High School football games as well as other sports.

The station droped on Monday an all-night business report and replaced it with all-sports talk show on satellite.

Dr. Merolla has radio experience, he worked in news at then WPAW in Pawtucket.

This is Dr. Merolla's second attempt to purchase a radio station. A couple of years ago negotiations to buy WPEP in Taunton were unsuccessful.

Thats about it in a nutshell. I got this information from the Sun Chronicle, article written by Nathan Webster, Chronicle staff..

Re: WLW

Quoting from Newsweek magazine of May 12, 1934...

"In the white house one night last week, President Roosevelt touched a gold key. President Wilson had used it to open the Panama Canal twenty years ago. It was supposed to open the world's most powerful radio station, the 500,000 watt plant owned by the Crosley Radio Corp. of Cincinnati. When the key was pressed, no crooners crooned and no bands blared, because it took nearly an hour to warm up the twenty station power tubes that cost $1,650 each"

The WLW transmitter was/is in Mason, Ohio, about 22 miles from Cincinatti. To operate the 500kw beast, 33kv were fed into the transmitter site...enough power to light a city of 100,000 in those days. The stories of Mason residents suffering electrical problems because of WLW are legendary. Reportedly, there was so much free radiated energy, that light switches no longer worked properly. When residents turned their lights off, they kept on burning due to pick up of RF from WLW

The WLW operation was granted under an experimental license. The verbage read that the station was licensed to operate at 50kw regularly, and 450kw experimentaly. Interestingly, an experimental "X" call letter was never issued.

Super power operation was from May 1, 1934 to March 1, 1939. WLW appealed the FCC decision not to extend 500kw authority,but lost in the US Court of appeals

In 1936, several other stations began applying for super power status, most notably WHO in Des Moines. However, in 1938, the US senate adopted the "Wheeler" resolution.."..expressing it to be the sense of that body that more stations with power in excess of 50kw are against the public interest. " Hearings continued until late July of that year, ultimately ending with the FCC rulemaking withdrawing the WLW 500kw authorization.

What can I say. I'm a radio history buff:-)

We just moved into "digital" studios here in SF and bought the SADIE system along with Audio Vault from B.E. We run on a 486 with a gig of SCSI drive ( would like more drive space, though). It does everything you could ask for and even some things you may not need, like give you CD mastering capabilities. We burn our own CDs here so, yeah, we'll be using that, too. It's reasonably priced and one of the guys from BE came out and gave us a nice tutorial on the thing. E-mail me if you want more info.

From: apollo@aros.net
Message-ID: <3vcmre$rmd@vixen.cso.uiuc.edu>
Source record: 30182
Cross-posted to:
rec.video.satellite.tvro,rec.video.satellite.dbs,rec.video.satellite.europe,rec.video.satellite.misc,rec.radio.broadcasting

I thank all of you who have BETA tested SATFIND! I have received many suggestions and fixed the problems some of you have had. I have also added a few more features!

As a recap, the software allows you to type in your geographical coordinates, lets you pick from a list
of satellites, then does the math to tell you at what elevation and azimuth to point your dish. You can
then PRINT this information to a printer.

The "LIST" of satellites is a DATABASE that you control. I allows you to ADD, EDIT, and DELETE from
the list. You can PRINT the list too.

The list currently has the North American and Europe Satellites in it as of July 1995. You can delete or
add to this as you see fit.

If you would like the "fixed version" to continue to BETA test, or just want to be one of the TESTERS..
try to FTP it at:

ftp://ftp.aros.net/pub/users/apollo

and grab SATFIND.ZIP

let me know...

email me at

apollo@aros.net

thanks!

Chuck Condron

Matt Bartlett asks for the revised EBS test script. To my knowledge, the FCC hasn't released the revised script, but that they are working on it, because stations complained that since the tone can be legally shortened to 8 seconds, there was time leftover after the test intro script and the extro script. In other words, when it was the 20-25 second tone, you could do a test in a 60 second spot... Now it takes less than :60.

I believe there are some stations who want the script re-written so that tests can be conducted in a :30 second spot.

But why are you waiting until september to use the shorter tones...????

# 1437. Future Role of Engineers

Newsgroup: rec.radio.broadcasting
Date: 1995-07-30 00:00:00 UTC
From: AaronB67@aol.com
Message-ID: <3vf4ui$ji0@vixen.cso.uiuc.edu>
Source record: 30004

What does the future hold for Radio Station Engineers?

With the multitude of Duopolies and mergers taking and already having taken place in the radio industry the future of radio engineers has never been more in question than it is today. As station's are bought up by large groups, what kind of engineers will these group owners most desire to have on staff when they have these monster groups? What talenst will they need to posess in order to excel, talents they may not now have?

Simply focusing first on an engineers technical abilities and expertise is no longer enough. Let us start there however. There was a time when any good engineer simply had to posess the knowledege to troubleshoot and repair transmitters and studio equipment. Those skills however just are not enough in today's broadcast environment. Today's transmitters are more efficient and with the emergence of solid state transmitters, require less maintenance. If a station owns solid state transmitters an engineer may not even need the knowledge to tune a transmitter as they once did. As more and more station's enter the computer and digital age, it becomes apparent that today's engineer must posess the knowledge and skills to deal with such equipment.

An engineer must now be the station;s computer specialist. For some long time, older engineer's this is a game of catch, as many have ignored the computer age. An engineer has to deal not only with hard disk based automation systems and the like, but the traffic department, programming department, sales department computers and the networks that many stations now have. Simply knowing how to fix a transmitter is no longer a skill of prime importance it seems, and neither is fixing cart machines and tape decks, simply due to the fact that many stations do not even have such equipment. Today's engineer has to have greater knowledge of Windows, Novell, Sound Cards and the like than he does need to know how to change a tube. Similarly the increased use of ISDN and Switched 56 means an engineer needs to know more about digital telco transmission than perhaps a simple Marti hop.

Next we must focus on the interpersonal skills an engineer must posess. No longer can an engineer just sort of hide in the tech shop until something goes wrong. Today's engineer must take it upon himself to become invloved in all aspects of station operations. Engineers must understand how the sales department works, how they sell and how the engineering department can help sales boost the bottom line. The same is true in regard to the Engineer's relationship with the program director, production director etc. Engineer's must now be willing to serve on the front line with everyone else. of course those department must also realize that the station engineer is an integral part of the organization, as important as the Program Director or Sales Manager.

Engineers must learn how to manage their departments, their budgets and of course themselves. Today's Engineer must make it his or her business to be an integral member of the station's management team or else be seen as unneccesary unwanted added cost in today's leaner scaled down business world. It is imperative to all of us as Engineers that we realize that the broadcast environment has changed and in order to survive and thrive, we must change along with it.

Until next time.....

Aaron Brodbar

Chances are it was a translator for a station on another frequency. Nevada is full of them.

I just consulted my FM Atlas (a great travelling companion -- $16.50+ shipping from FM Atlas,
Esko, MN 55733-0336), and found no translators on that frequency in Nevada or adjacent California, but that doesn't mean one isn't there. No listing of translators is complete, near as I can tell. You might have received KSEG in Sacramento, which I believe is a Classic
Rock station. Or you may have received a station from far away on skip, which happens often this time of year, and is most audible in places like Nevada, where there is relatively little local interference. Skip is often remarkably clear. Stations 1000 miles away sound like locals.

>Incidentally, the reason I want to make contact with the station is to see
>if they can tell me the name of this one tune that has kept bugging me since
>July 6 when I drove around this area to see Mono Lake. The announcer said it
>was by Dave Grisman. It may have been Dave Grisman Quintet as well since
>during my 3 hour drive through Nevada I heard several Grisman tunes.

Well, Grisman is something of a staple these days with "Smooth Jazz" stations. You might try
calling KKSF's Bay Line in San Francisco. They are remakably helpful with things like this. I don't have their number handy, but their URL is http://www.tbo.com/

Good luck.

## 1439. Simon Geller

Source record: 30007

I'm looking for a listing of the top 10/top 20 radio group owners in the U. S., ideally ranked by the total number of listeners the stations reach.

The most recent source I have is from a March, 1994 issue of Broadcasting and Cable magazine. Does anyone have a listing for 1995? The list I have has CBS in first, followed by Infinity. Now I think Infinity is in first place followed by Evergreen, etc.

If you have this information or know where I can find it I would appreciate your assistance; feel free to email me directly. thanks in advance to any help anyone can offer.

From: richwood@commspec.com
Message-ID: <3vf4um$jib@vixen.cso.uiuc.edu>
Source record: 30009

BN>This makes no sense to me -- here in LA we already have KFI, KABC
BN>and KMPC!

BN>Has anyone else heard anything about KLSX?

Why does this surprise you? Major markets often have a dozen music stations playing similar music. Why would you begrudge a Talk station the same opportunity to lose money?

A growing trend is to lose your shirt trying "Young Talk." No one seems to realize that we've lost nearly 2 generations for AM and young FM listeners have a very short attention span. "Madonna is wearing her metallic pasties today. Now back to the rumor that Keith Richards posed nude for a magazine. That's all the news that's important to your life today." Kewl dude!

Rich

# 1443. Re: KLSX moves to talk on Monday

San Diego Radio Watcher (chris@terminus.wccs.saic.com) writes:
> KLSX, classic rock in Los Angeles at 97.1 will make the move to
> talk effective Monday.

KLOS did a better job with AOR music, anyway.

Talk on FM still sounds kind of strange, though, like drinking
beer in church . . . :-)

>
> Here's the known lineup:
>
> Howard Stern <already on
> Susan Olsen & Ken Ober <Susan is the youngest Brady from the TV series

So?

> Kato <Umm, there's enough jokes already
> Heidi Fleiss <ditto

This is starting to sound like the supermarket tabloid station :-)

> Mother Love <Returns to radio

She did a stint on KFI around 1988-90 or so, when that station
switched to talk. She also had a short-lived TV show in LA after that

Like Stern, you will either like her or not.

> Vox <The "Rock and Roll" Psychic
>
> [With Stern as a lead in, there will be a built in audience. Will they
> make a transistion to the others? Mother Love is a draw, but the two

It remains to be seen. I'm not convinced that Kato, Heidi and "Cindy Brady"
have all that much to say in the first place, or that they can deal with
running talk shows. But, everyone's gotta try it once . . .

> Sorry, I guess that's enough cynicism for now.

This is the way it is in our area (Ashland, Ky). Two companies
(Adventure Communications and Kindred Communications) own most of the
stations. Adventure owns 4 FM stations in this market (WBVB 97.1,
WKEE 100.5, WFXN 106.3 & WMLV 107.1). All their stations are safely
"politically correct" and lame. They even broadcast the same thing
(The FOX classic rock) on two of the stations (106.3 and 107.1). In
addition, this company owns 4 AM stations as well.
Kindred I have an even bigger beef with. They have owned the 100KW
93.7 for some time, and failed in the ratings with their oldies
format. The only good station in Ashland, WCMI 92.7 and 1340 AM (good
progressive classic tock) they bought up to dump their oldies onto,
and went country with 93.7. They totally abandoned WCMI FM and it's
fromat (even though it was succeeding well for a small 3KW station, a
3 share in the Arbitrons, a 9 share in Ashland) for their oldies
garbage that was only getting about a 5 in the Arbitrons on a freaking
100KW station!
My biggest problem with this, is that this market already has too many
country stations as it is. And, WCMI was Ashland's only radio
station. Now, all stations identify with Huntington, WV, where
Adventure and Kindred are based.

> talking with a coworker yesterday, it came up that what these
> stations really appear to be doing is training their listeners to
> put on tapes or CDs rather than listen to the radio, which surely
> can't be good for advertisers.

The placement of commecial breaks at the same time (:52, etc) is a result of Arbitron methodology. If you can keep a listener for seven minutes into a quarter hour, you get credit for the entire quarter hour.

Cramming commercials into the last quarter hour is a trick purportedly designed to maximize time-spent-listening, (thus increasing average-quarter-hour shares without having to increase cume) and take advantage of the belief that for some reason, the fourth quarter of the hour seems to have the lightest listening.

There are some advertisers who won't buy on stations that do long music sweeps, but not many. Most slavishly follow the Arbitron numbers without paying much attention to how stations manipulate programming to game the system.

Well, I know some people who run a station where there almost never more than one or two spots between 9pm and 11:30 pm, and no spots at all from then until six the next morning.

They do not choose to promote this as a "music sweep" or "commercial-free" program because they feel that commercials are an essential part of good radio programming, that they should always be cast in a positive light, and that using terms like "commercial-free" paints a picture in the listener's mind of the commercial as castor oil, a loathsome burden to be tolerated for the sake of good music.

What say y'all to that?

From: Dan Johnson <Dan.Johnson@bev.net>
Message-ID: <3vf4uv$jir@vixen.cso.uiuc.edu>
Source record: 30019

I need to get ahold of some new CD decks. I'm sure you know about the Denon's or similar ones with the enclosed CD case. The case works just like a 3.5in floppy disk... well. At WPSK we've jsut spent 100s of 1000s of dollars on new boards, people, building, etc. There's basically no money left.

Instead of taking this news as defeat, I'm looking for creative ways to trade out for them. Denon decks are not sold through just anyone. How can I find someone to sell them to me who needs to do some advertising? Anyone have a creative idea?

I've pursued the possibility of talking to Media America for spots to pay for these new decks. Media America is a company that supplies spots (national ads) for radio to run in exchange for a syndicated show. Basically, anything seems possible, but who's willing to take the time to go through it for me.

If you know of somewhere who might be willing to go through these motions for me, I'd appreciate it.

Thanks,
DanO

> dpsher@planetx.bloomu.edu
> WSQV / WBHT / WMGS / WARM

The only format to interchange is a DAT cassette ( in my opinion).
DCC and MiniDisc are using compressing algorithms. DDC uses PASC and
MD uses ATRAC. Both algorithms are good if you not plan to send this
sound through another compressing device like MUSICAM Codec, APT-x STL
or something like that. When you will "cascade" DCC or MD with MUSICAM
or other you will have some strange effects at the and.
>From the other side WAV is not the only one format in hard disc
recording domain.
Keep your production in DAT format and you will be as compatible as
possible.

I had the opportunity to talk to the current chief engineer at WLW about a year ago. While our schedules did not match up for a tour of the old transmitter site, I did get to see it from the outside. The original building is still standing and some of the original equipment is still inside according to their CE.

A couple things from the old site are still visible. One is the famous "diamond" shaped tower that's also used by another famous station,WSM Nashville. I believe they are both Knox towers, and possibly the last two left. The other still visible artifact is the fountain in the front of the building which was used to cool the high power transmitter in the "super station days". I understand that the fountain has recently given in to the elements and years gone by, and no longer hold water. The site is just down the road from the VOA Bethany station which I understand was recently closed. I did however manage to get a tour of that facility before it's demise. Quite fascinating!!

The Moon River Organ was sold and relocated to a Resturant/Bar near Hamilton,OH - the place is now closed.

The 500,000 transmitter PAs and Modulator cabinets are still in place in the back of the WLW transmitter building in Mason, OH. The control systems and power supply components contained PCBs and were removed for proper disposal. The big 500 is still a very impressive sight, I have had the pleasure of walking across the "front porch" and providing a commentary on the old equipment for a couple of visiting tour groups.

## 1460. Bob Aaronson's new show

Newsgroup: rec.radio.broadcasting

AW>I heard that Bob Aaronson just began a brand new radio show. I
AW>herad it the other morning, it was on WOR overnight with an
AW>800#. Is this national and if so is it the fourth show from
AW>the WOR Network?

Allan,
Yes, The Bob Aaronson Show is on the WOR Radio Network. No, it's
not the fourth show. It's the ninth. In addition, we've just acquired
"Online Tonight" and renamed it "Online Today." It's a "100% Geek-free"
Computer show that airs Sunday 2-4P on WOR and the WOR Radio Network.
It's host is David Lawrence. That makes 10.

Rich
Director - WOR Radio Network

# 1461. Chicago Radio Watch:7-29-95

Newsgroup: rec.radio.broadcasting
Date: 1995-07-30 00:00:00 UTC
From: JJB92@aol.com
Message-ID: <3vf4u1$jgl@vixen.cso.uiuc.edu>
Source record: 30184

The Grim Reaper Cometh......

Fallout from the Spring Arbs....

Terry Jacobs (TJ) and Bill Cody (Wild Bill) of dance/top 40 WBBM-FM were relieved of their morning show duties after only 10 months in town. Station GM Don Marion pulled the plug after the duo fell out of the top ten morning shows in Chicago.

Replacing the "Wise Cracks" as their promotional billboard put it are two other members of the B96 staff-George McFly (unclear if he is related to the Michael Fox character in the Back to the Future series) and Frankie "Hollywood" Rodriguez. Before the change, George handled the evening shift while "Hollywood" was the night time jay. This is George's second tour of duty at the station. He originally worked at B96 from 1990 through 1992 before moving to LA to try his hand at acting. Apparently, the move was not fruitful as George returned to B96. In typical radio logic, "Hollywood" is originally from New York.

Further on down the dial, adult contemporary WTMX-FM (101.9) brought in a couple of comedians from Nashville to take over their morning show. Jim Patterson and Carl Fulkenberry replaced long time Chicago radio personality Brant Miller at "The Mix". Abysmal ratings continued to plague the station-Jim and Carl finished 21st in the morning ratings with an anemic 1.7 share. Kathy Hart, fill in jock at the station, will hold down the fort while a search is made for a morning successor. Barry Keefe will continue to handle news while Andi Kuhn continues on traffic. Jim and Carl lasted about six months in the market before being removed.

News of the sports world......

Vince Lloyd, longtime Cub announcer on WGN radio will return to the WGN microphone for six games in September. Vince, who teamed with "the Good Kid", Lou Boudreau, will be filling in for current radio play by play guy Thom Brennaman who will be handling football games on Fox Television.

Ex Bears never die-they just land jobs in radio......

Continuing what is becoming a scary obsession with Chicago Bear football, the sports talk stations continue to add ex-Bears to their payroll. Sports talker WMVP has added not one, not two but three ex-Bears to their lineup to fill us in on their views of the team. Former quarterback and whipping boy Bob Avellini, former guard (thanks for 1985) Tom Thayer, and Coach Ditka's favorite player, Tom Waddle will all appear at various times on various shows to give Chicagoans the perspective they can't get anywhere else.

WSCR currently employs Gary Fencik as their "football expert" and ex-linebacker Doug Buffone is a frequent fill in host on the station. The Score is down one Bear having lost Ron "Chico" Rivera to WGN where he hosts a weekend talk show.

WGN, which broadcasts the Bears games, has added Dan Hampton to the broadcast booth for the weekly game of a lifetime. "Danimal", as he has known to the Bear fans, replaces Dick Butkus in the GN booth. Dick, while a hall of fame player, could only master the art of the grunt and yell in the booth. No doubt that Dan will be a big improvement. Just keep Jim McMahon away from the area.....

Speaking of WGN, the station has once again picked up DePaul Blue Demon basketball. The station will cover a full slate of games-up from a limited number of games last year.

Sign of things to come????

Chicago Sun Times Michael Sneed and ex-Channel 2 (CBS) reporter Mary Laney will host a news orientated talk show on all-news (except when covering the White Sox, Bulls and evenings when they talk sports) WMAQ on Saturdays from noon till 2 pm. The show is experimental for the time being.

An angry man........

Howard Stern has been especially nasty towards his Chicago competitors over the past few weeks. Howard, who had been praying for the death of the father of Mancow Muller, mornings on rocker WRCX-FM (103.5), launched an attack on Evergreen Vice President Larry Wert. Howard said he "hopes Larry Wert gets the deadly AIDS virus and gives it to his whole family-like he bleeds into their food and they all die". Howard continues with lawsuit against Evergreen for breach of contract regarding their decision to drop his program which had been on WLUP-AM.

By the way, John Muller, father of "Mancow" passed away last week after a battle with cancer.

The Smithsonian Institution / Radio Smithsonian is currently producing a radio series titled, "Black Radio: Telling It Like It Was." The series will be distributed by Public Radio International to stations across the country in January of 1996. Lou Rawls will be the host.

Tapes and other contributions can be submitted to:

Jacquie Gales - Webb, Producer, Smithsonian Institution, Radio Smithsonian, American History Building, 12th and Constitution Avenue, Rm BB40, NW, Washington, D.C. 20560

Tell 'em you heard about their program from Radio Active !

If the aircheck you contribute is used, you will be listed as a contributor in a letter distributed during the series airing.

If you'd prefer, you can e-mail me with your snail mail address or phone number, and I'll have them contact you.

From: mikedow@gate.net
Message-ID: <3vf4u7$jh8@vixen.cso.uiuc.edu>
Source record: 30192

Can someone let me in on where the countdowns shows stand today? I work for a CHR in West Palm Beach, Florida and asked my Program Director. HE didn't know. Here's what I think I know...

1. American Top 40 with Shadoe Stevens folded about a year ago.

2. Casey's Coast To Coast? Is it still on anywhere? Are the still producing it?

3. America's Top 10 with Casey Kasem. Is it still on television?

4. The Weekly Top 40 was still on last time I checked (about nine months ago) on Z-100 in Miami.

5. Dick Clark's Countup? What happened? BTW, is Rock Roll and Remember still in business? Does anyone carry it in South Florida? I used to follow the show on Sundays on WHYN in Springfield, Massachusetts.

6. Didn't Scott Shannon once have a radio and TV syndie countdown?

7. Did I miss anything else?

## 1470. Classical Music Broadcasting towards Europe ?

> some radio stations are using Sony's MiniDisc system as a cart replacement, so
> you might try that - note that it uses compression though.

I could understand compression being a problem on PCs, where it adds time to access the file (at least to display a wave form), but what's the drawback to compression on a MiniDisc or DCC? I thought that the playback and record devices would have hardware compression/decompression so that the extra access time would be negligible.

I was thinking about the MiniDisc, but I've had nothing but bad experiences with Sony, and I don't like their idea of not licensing the technology to anyone else (although they are starting to now, they waited approximately 5476285643278956432785643287569432 years to do so).

As far as DAT, can you recommend a brand? I'm trying for a top-of-the-line home model, or a bottom-of-the-line pro model (cost has suddenly become a major factor).

This is especially spooky for me because I was on the Golden Gate bridge from 3:10 until about 4:00 that afternoon. I was vacationing in SF and roller-bladed from the Marina to the bridge. Since you can't skate on the bridge, I took off the skates and walked across. Right about the time I got to the North tower I watched a huge submarine cross under the bridge. As I leaned over to wave at the passing sub I noticed a bunch of flowers on the girder just over the rail and remembered that they had stopped posting the suicide count at 995+ because they didn't want people trying to be the 1000th. Then I looked down and thought about the amount of time it would take to hit the water, shuddered and stepped back. I couldn't help noticing on the walk back to the South end that just about every post had an Emergency/Crisis Couseling phone on it.

As you have probably heard, the Disney Corp is merging with ABC Cap Cities. One of the WCBS jocks mentioned he heard Paul Harvy say that he will try to remember the words of the Mickey Mouse Club song.

Guess I will start seeing mouse ears on WABC's transmitter tower in Lodi, NJ.

# 1478. San Francisco & San Jose Arbs

Newsgroup: rec.radio.broadcasting
Date: 1995-08-01 00:00:00 UTC
From: dk@crl.com
Message-ID: <3vkd41$p7h@vixen.cso.uiuc.edu>
Source record: 30028
Cross-posted to: rec.radio.broadcasting,ba.broadcast

On Friday, Brad Kava of the San Jose Mercury News reported the San Jose and San Francisco top rated stations 12+ Spring Arbitron:

San Jose

1 KGO 6.9 News/Talk, ABC
2 KBAY 5.2 Easy Listening, United (locally owned)
3 KOME 5.2 Modern rock
4 KSJO 4.8 Rock
5 KHQT 4.6 Rock (soon to simulcast SF's KFOG)
6 KLOK 4.3 Spanish contemporary (locally owned)
7 KRTY 4.3 Country, Empire (locally owned)
8 KCBS 3.8 All News, CBS
9 KNBR 3.6 Sports, Susquehanna
10 KEZR 3.3 MOR

San Francisco

1 KGO 6.9 News/Talk, ABC
2 KCBS 4.8 All news, CBS
3 KMEL 4.4 Urban rock (opinions may vary), Evergreen?
4 KNBR 4.1 Sports, Susquehanna
5 KITS 3.5 Modern Rock, Entercom
6 KYLD 3.5 Urban rock
7 KOIT 3.4 Easy listening, Bonneville (Mormon church)
8 KKSF 3.3 "Smooth Jazz" (opinions vary on this)
9 KIOI 3.3 MOR
10 KBLX 2.7 hmmm...lots of 70s soul oldies..., Inner City

According to Brad Kava, top-rated KGO (#1 for something like 25 Arbitron books) has slipped during the course of the OJ trial (carried live by Westinghouse's KPIX-AM-FM). KPIX is also PD's by Ken Beck, formerly of KGO. KGO's co-owned KSFO, variously known in SF as "Hot Talk" and "Hate Talk", places at 26th. Also, according to Kava, Spanish language contemporary KLOK made it to #4 in morning drive with a 5.9 share, a phenomenon which is being repeated all across the USA as (in my opinion) Spanish language stations are picking up English-speaking crossover audience of people bored with the same old music and mechanized styles.

# 1479. Walt Disney merges with ABC/Cap Cities

Newsgroup: rec.radio.broadcasting
Date: 1995-08-01 00:00:00 UTC
From: shoshani@wwa.com
Message-ID: <3vkd40$p7g@vixen.cso.uiuc.edu>
Source record: 30029

News Item just announced:

The Walt Disney Company has announced a deal to acquire ABC/Cap Cities for $19 Billion. The deal is expected to be approved, and to take place early next year. Analysts say that the deal is good for both sides. Cap Cities stockholders are to recieve one share of the new Disney venture plus a cash sum. The new venture will be named after Disney, and Michael Eisner will be the CEO.

---

Now for the editorial:

AAAAAAAAAAAAAAAAUUUUUUUUUUUUUUUUGGGGGGGGGGGGGGGHHHHHHHHHHHHHHHH!!!!!!!!!!!!!!!

I don't WANT Jay Marvin to have to wear Mickey Mouse ears!!

I have this nagging fear that certain controversial elements of various ABC-owned radio and TV stations are going to come under "remolding" attempts by the new owners. We all know what Jay would do: lace up his Doc Martens and walk. He's discussed this sort of thing before....

Just out of curiousity: I've got one of those GE Superradio IIIs. On a strong station it sounds absolutely wonderful when in "wide" mode. What's the IF bandwidth on those (assuming no modifications)?

I fully understand what you said about it being harder to fight interference if the IF is wide. This same Superradio has to be run in Narrow mode in my office (a computer software company) because all the RF interference swamps the tuner -- even on very strong stations like powerhouse 50KW WBZ -- if the IF is set wide. Sigh.

Let me start by saying IMHO. You may not agree with his bombast, it's
my opinion though:

So we first gave them AM stereo. Yawn. A couple of units got to
market, but were low quality, almost nobody bought them. (I bought one)

Then we gave them Diversity radios. Improves FM reception incredibly.
Yawn. Except for some Japanese luxury cars, A few aftermarket units
got to the dealers, people weren't interested in the extra expense (and
antenna) almost nobody bought them. (I bought one)

So we gave them FMx, round one had a few problems. Try number two
worked okay. Quite a few FM stations put it on, including the one I was
chief of.... Yawn. Only one or two units got to market, no body
understood the technology, Almost nobody bought them. (I bought one)

AMAX? AM? Sounds like crap....(AM on most contemporary car radios
does) why bother, it's AM? Yawn. No one wants to build one, sure I
think two Sony walkmans have the AMax standard, but people aren't
buying them. If I could find a car radio with AMax, I'd buy it, right
now! Other than this Denon TU-680NAB home stereo tuner I bought, I
haven't seen one for sale in stores. I want one.

RDS? The EIA is pushing for it, equipping FM stations far and wide with encoders at no charge to the stations...I have seen a few RDS radios, this Grundig 700 (a great portable) and a Denon car unit that works so badly I took it back out of the car and put it on a shelf.

Bottom line of this bombast? The car stereo manufacturers are in it for a quick & cheap buck, not interested in improving the state of the art, and until they are compelled to improve their product, there will be no improvement. Don't try to educate the consumer, you will just confuse him (or her).

Good. He'll add some much-needed excitement to that show, which has been dull, dull, dull since Eddie left. There used to be a lot of fun stuff on that show, but since EA's departure it all left. The opening theme song is gone. The fake commercials (rather hilarious) are gone. The "everyone running out and slamming the door" trailer at the end of the show is gone. Dull. And on top of that, the discussions are dull. Maybe they'll also come back from their permanent remote site at the Foxwoods Casino as well.

> WBZ was No.1 with 7.9 while WEEI was No.2 with 7.7.

Wonderful. Ordway canned a guy who had a show that had _found_an_audience_. Did he even BOTHER to look at the ratings before he went off and did that? It might be my imagination, but I would think that being 7th overall in the Boston market is quite respectable. WEEI's _never_ going to be #1 -- nighttime signal propagation patterns and a narrower potential audience will ensure that WBZ is in the driver's seat for some time. But it is obvious that sports talk in Boston isn't the dying format that it is in other parts of the country. [Either that shows that WEEI and WBZ are doing something right or that Boston has a uniquely ravenous appetite for sports talk.]

I guess I must be too old for his format, as I found myself switching to WBZ when MA's show came on. EA's show is also frequently too "schtick"-y for my tastes as well. I enjoyed Craig Mustard's fill-in.

> Ordway promises that more changes are in the works at 'EEI and
> the station will have a different on-air sound come September.
> There's talk of a possible two-host format during PM drive on 850.
> Midday voice Dale Arnold is working without a contract and
> PM-drive man Eddie Andelman is coming to the end of his deal soon...
> This could get interesting... Stay tuned....

Dale Arnold is, imho, one of the most respectable and level-headed voices on that station. Before I found a job where AM reception was possible in the office, I used to shift my workday around so that I could catch the first 30 minutes or so of Dale's show. I would be VERY upset if Ordway dumps him.

If he's going to ignore the ratings and shuffle people around that he doesn't like, then he should DUMP Imus. Maybe I'm in the minority, but I find that WEEI is only a good 20-hour-a-day radio station -- good to listen to any time EXCEPT 6-10 AM, when Imus is on. I don't want idiotic humor in the morning. I want information. Preferably a full post-mortem on the previous day's (or weekend's) sports activities. I'm sure that my viewpoint is very much in the minority. I understand that Imus pulls in ratings. Too bad. I put on an all-sports station to hear ALL SPORTS. In the meantime, WBZ will continue to get my morning radio time, as it has for the past 20 years.

By the way, I wanted to give a big thanks to you, Mark, for the absolutely wonderful job you do in covering Boston radio. I think you're a great asset to AIRWAVES/rrb. Please do keep up the great work!

The BBC World Service has the Proms (Henry Woods Memorial Promenade Concerts, I believe) on for a few weeks. I noted them today, in San Francisco, at 1400 UTC, on the Asia/Pacific service on 7180 from Hong Kong and 9740 from Singapore. If you want their full schedule (including European service and frequencies) look at:

http://www.bbcnc.org.uk/worldservice/

## 1486. CBS Radio Network glitch?

Newsgroup: rec.radio.broadcasting
Date: 1995-08-01 00:00:00 UTC
From: bob.frable@info-90.com
Message-ID: <3vkd48$p7s@vixen.cso.uiuc.edu>
Source record: 30036

Tonight on our local CBS Radio affiliate (WAEB, Allentown, 790 AM) the network apparently dumped out of a Sunday Night Baseball game (Yankees/Twins) exactly at 11:00 ET, even though the game had _not_ ended. The Yanks were hanging on, barely, and I later found out from WABC that they did win; however, what the hack was going on? Precisely at 11, BONG, de-de-DE-da-de, "CBS News, this is Rich" something or other. Was something going on at CBS, or was it WAEB's fault? They generally aren't known for dumping out of sports like that; they've had the Philly teams locally for many years.

Hope somebody knows what happened. Thanks.

Heres a rundown--

AT40 is DOA.

Casey has 3 different countdowns from Westwood One - Casey's Top 40 (CHR), Casey's Countdown (A/C), and Casey's Hot 20 (Hot A/C)

Rick Dees Weekly Top 40 replaced AT40 from ABC/Watermark - He has two versions - CHR & A/C.

Dick Clark's Countdown America and Rock, Roll & Remember - I'm not sure whether or not they are still on the air. There was a big deal when he re-started the United Network and took the shows back there, and the syndicator cut this shows off.

Scott Shannon's show is also DOA.

It's not the access times, it's the compression method used. Both DCC and MD
compress by leaving out some of the sound (lossy compression). Now, they both
sound a heck of a lot better than cassette or tape cart but if you run any of
them through another compression medium (eg send ATRAC'd MD thorugh Musicam
lines) then I understand that the sound gets all mucked up. Radio stations
like MD though as a cart replacement so it's a possibility. But even more
radio stations have DAT, so if you can, go with that.

>I was thinking about the MiniDisc, but I've had nothing but bad

>technology to anyone else (although they are starting to now, they waited
>approximately 54762856432789564327856432875694 32 years to do so).

Try a Denon or Otari MD then. It'll cost you though.

>line home model, or a bottom-of-the-line pro model (cost has suddenly
>become a major factor).

Avoid Sony consumer models like the plague, and go for a Tascam DA30 MkII
(1300 pounds here in the UK) or maybe the new DA-20 (800 pounds here).

Cheers,
Dave

Audio compression in a MD or DCC isn't like Stuffit or PKZIP data compression. Yes, it makes the files or transmission time shorter... but you can never get the original data back, only an approximation.

Audio compression algorithms (often called "lossy" compression) use various psychoacoustic effects to fool the ear into thinking that there's more sound than there actually is.

For instance: If you play a loud cymbal crash _immediately_ followed by a triangle hit, most people won't hear the triangle. It's still there... but a compression scheme wouldn't waste data on it.

If done subtly and carefully, audio compression isn't too much of a problem. MPEG Layers 2 and 3, Dolby AC-2, and apt-X all sound pretty good the first time through. I use a Telos Zephyr for voice transfers (MPEG L3), and while I can hear the artifacts -- I know what to listen for -- most of my clients can't. I've even used Zephyr tracks in a CD master.

But if you _stack_ the compressions (say, put a track thru a Zephyr... then edit it in an MPEG-2 workstation... then transmit it to another station via Digital Generations...) they start to confuse each other something awful. Even though each sounds okay, the algorithms look for things that might have been deleted in the past pass. The result gets very bad very fast.

Even passing a sound thru a robust compression scheme, editing or equalizing it, and then passing thru the _same_ scheme again can cause trouble!

So why take the risk?

Whether "compression" (a misleading term in this instance - read on)
is a problem depends on the intended use.

Both DCC and MD use data REDUCTION algorithms (PASC and ATRAC
respectively) which throw away part of the digitized signal chosen by
psychoacoustic formulas that deem them "inaudible". Audiophiles can hear
the difference, but they may be fine for broadcast use.

The potential problem is - what happens when a "data reduced" audio signal
is subjected to further processing down the line. It degrades, sometimes
audibly - especially in the case of MiniDisc.

NATIONAL RADIO CLUB
P.O. BOX 164
MANNSVILLE, NY 13661
315-387-3583

---

AUGUST 1995 EDITION

Preparations are underway for the 1995 National Radio Club, and DX Audio Service convention in Aurora (Denver), Colorado. The convention will be held over Labor Day weekend. For those who will not be able to attend, the DX Audio Service will be recording the most important elements of the convention. The tapes of the convention will be available through the National Radio Club's Publication Center. Price will be announced after total tape count is calculated.

Please note the new Internet E-Mail address, and the new FAX number. Efforts are underway to also improve the telephone system, and also provide audio through the Telos Zepher digital system.

The following is the list of what was on the August 1995 DX Audio Service magazine. The program is made available on cassette.

Time Content
-------- ----------

- 00:00.00 Introduction and address information by Fred Vobbe
- 03:22.66 Jerry Starr's AM Switch
- 09:13.67 John Bowker's Travellog - 1280 kHz (Part 2)
- 22:46.91 Jim Snowbarger's Bandscan - From Minneapolis MN with Skip Dabelstein (1010 to 1600 kHz).
- 35:19.35 Bruce Conti's IDXD - Feature is an aircheck of Radio 74 (88.8 mHz) in France, via Tom Walsh.
- 45:48.21 The DX Time Machine
- 46:24.32 Close of Side one.

- 00:00.00 Open of Side two by Phil Wayne, including vintage WKNR (Detroit) jingle.
- 00:00:02 Phil Wayne's Marketscope - AM Radio in Las Vegas
- Nevada during 1995 NAB Convention. Presented by
- Fred Vobbe. Part 2. Stations include KXNO-1140, KLAV-1230, KDOL-1280, & KENO-1360.
- 07:47.86 John Bowker's Historical Moments in Radio
- 12:21.22 The DX-Change (Buy/Sell/Trade)
- 13:24.44 Musings from the Members
- 20:46.03 Pete Kemp's Radio Roundup (tid-bits of information)

Read by Fred Vobbe.
- 25:41:24 Interview with Bill Pfeiffer about "Airwaves", a magazine on radio available on the internet.
- 45:12.43 Information about the National Association of DJ's.
- 45:02.10 Close of the DX Audio Service, with FAX and *NEW* E-Mail address. (See the end of this release).
- 46:34.82 Close of Side Two.

For further information contact Fred Vobbe, editor of the DX Audio Service, at the following addresses;

> [...]

Great piece. I think that this is unfortunately inevitable, as the engineer is seen by station management as the "technology go-to person" for anything more complex than a light bulb. It is also asking a lot of the engineer, because computer software, hardware, networking, and applications expertise is a whole field apart from the EE skills that a radio engineer needs. Smaller stations might be able to hobble along with an engineer who knows computers on the side, but larger ones really need two (or more) different people, each of which has the in-depth knowledge and experience for these separate disciplines. Besides, if the transmitter or some other piece of on-air equipment is dying simultaneously with the station's office computer network, the all-in-one engineer is going to put the computer network on the back burner and put all efforts into getting the signal back on the air. After all, although the sales department might not be able to record its sales or do some other kinds of work if their computer is down, if the signal isn't getting out, there's nothing for the sales department to sell. And there is always pen and paper. If the station has a computer specialist as well as an engineer, then both problems get solved in parallel. I'd call it an insurance policy.

GMs will figure this out eventually, but it will take a while, I fear.

One question related to the paragraph quoted above. What's the highest powered solid-state transmitter available? Last I knew, solid state was only good for relatively low-powered operations. Have they figured out a way to push 50KW or more through silicon yet?

Message-ID: <3vkd4h$p8d@vixen.cso.uiuc.edu>
Source record: 30046

>>The WLW transmitter was/is in Mason, Ohio, about 22 miles from
>>Cincinatti. To operate the 500kw beast, 33kv were fed into the
>>transmitter site...enough power to light a city of 100,000 in those days.
>> The stories of Mason residents suffering electrical problems because of
>>WLW are legendary. Reportedly, there was so much free radiated energy,
>>that light switches no longer worked properly. When residents turned
>>their lights off, they kept on burning due to pick up of RF from WLW

Is this actually true or just another urban legend? Would it be possible to
have a "million watt" radio station? How far would it broadcast? What are
the limits on power? Would an "omnipotent" station splash to other dial
positions? Is this possible on FM? Couldn't it be used for propaganda by
enemy nations in times of war?

>>Super power operation was from May 1, 1934 to March 1, 1939. WLW
>>appealed the FCC decision not to extend 500kw authority,but lost in the
>>US Court of appeals

The must have put up one hell of a fight. Makes the WOWO battle seem small by
comparision :)

>I am researching for an article on Simon Geller. . .

I know Bill doesn't like to get into long threads like this, but I think Geller is an original, and I don't think it's likely that his type of insurgent broadcasting again.

Here's one vote for a long thread of posts from the folks from New England on old Simon.

[Moderator's Note: I have no problem with threads of any reasonable length, provided they have something to say that is of interest to the general group. Otherwise it is best to gather a list of interested people. Who is this Geller, anyway? Bill]

# 1499. Re: Proposed Group W/CBS Merger

Newsgroup: rec.radio.broadcasting
Date: 1995-08-01 00:00:00 UTC
From: Mike McCann <74241.3116@CompuServe.COM>
Message-ID: <3vkd4k$p8l@vixen.cso.uiuc.edu>
Source record: 30049

With the FCC rules at the present levels, all CBS/Group W would need to do is plan to sell the 3rd FM they own in Houston [and they can probably keep it if they ask for an 18 months waiver as Evergreen did and wait for the rules to loosen].

The totals would then be 16 AM 18 FM and no more than 2 on each band in any of their markets.

However word is that Group W is eager to spin off much of CBS Radio to other buyers [Emmis has been mentioned as a partner/suitor/buyer]

# 1500. Boss Radio Lives at iRock.com!

Newsgroup: rec.radio.broadcasting
Date: 1995-08-01 00:00:00 UTC
From: "G. J. Goldwyn" <gj@irock.com>
Message-ID: <3vkd4l$p8m@vixen.cso.uiuc.edu>
Source record: 30050

I was just sitting here in the iRock.com studio chugging a six pack
of Dr. Pepper and listening to the on-air feed from 97.1 KLSX-FM,
Los Angeles, thinking to myself..."Man, ain't that a bitch!"

As a native of Southern California and a former airwave radio
broadcaster (KKOK, KINC, KVFM, KCSN, KIQQ and XEPRS,) I've seen
and heard a lot in the past few decades. I remember a lot of
radio trauma, like the end of KHJ, KKDJ, K-100, KCBQ, B-100,
KMET, KKHR, not to mention KQLZ, KNAC, and now KLSX, because I
basically didn't care about those three...

As KLSX bites the dust, I remember my post to this newsgroup months
ago asking if the classic rock format will itself, become the dinosaur.
Believe me, and you can tell by what I play on iRock, I'm musically
open minded. But the CR format SUCKS! I have to believe that
what Bob Moore has planned for the LA Greater Media outlet will suck
even more. That's not to say it won't draw big numbers...it's just
not creative radio to put a bunch of babbeling idiots on the air to talk
about sex, drugs, politics and religion.

I remember when radio was exciting as it shot out of the speaker.
But now, I find that I'm only able to excite myself. Do you want
to hear the future of radio? Then tune into iRock. Get yourself
a RealAudio Player and tune to http://www.irock.com

You'll be pleasantly surprised...

gj@irock.com
Boss Radio is back, and this time it's WorldWide!

# 1501. Tod Jeffers EMail Adrs? (Colmbus-Harsburg)

Source record: 30052

My name is maarten schutjes. I'm living in the Netherlands.
Over here we have an organisation wich is called 'the Jingle Society'
(in dutch: 'Het jingle genootschap'; try to break your tonque over that one).
It's an organisation that is currently very busy withpreservering the jingle
heritage of Dutch radio). For this and other projects they want to contact American jingle
companies like JAM, TMCENTURY, Thompson Creative, Drake Cheanault, Tuesday Productions and
others.. Preferrebly by e-mail.

Does anybody know their e-mail adresses. Please send them directly to
me at Maarten@Iaehv.Iaehv.nl.

Furthermore they like to get in contact with american jingle collectors.
So if you're one of them... your reply is welcome

I hope you can help us..

## 1503. A Job in Seattle?

>>> Doesn't anyone find it alarming that ONE company could own
FIVE FM radio stations in a single market?

Welcome to the Real World of the '90's. I spoke last week with
one of the best-known brokers in broadcasting ... his comment ...
"The choice is simple ... you own a market, or you get out of it!"

With the proliferation of signals (Docket 80-90, "move-ins", "up-
grades", etc., the markets are so fragmented ... one of the easiest
ways to make a decent return on the investment is to sell a couple
signals in "combo", at a premium.

Heck, I'm so ancient ... I even remember the "three year rule."
Which I still think was a pretty good idea, but, those were the
days when we maintained the fiction of "operating as a public
trustee."

# 1506. MOR/Nostalgia Radio

Newsgroup: rec.radio.broadcasting
Date: 1995-08-01 00:00:00 UTC
From: jbenson@tcf.com
Message-ID: <3vkd4r$p8v@vixen.cso.uiuc.edu>
Source record: 30056

Two satellite syndicators, ABC/CapCities (Stardust) and Westwood One (AM Only) claim between them nearly 400 affiliates of MOR/Nostalgia programming fulltime. Dozens of heritage stations, such as WPEN-Philadelphia, WQEW-New York and up-and-coming KKSJ-San Jose (a rebirth of KFRC-San Francisco) have continued to be successful.

There are also a few independent syndicators who deliver this programming via CD, reel, etc. (BPI, Bonneville, etc.)

In this market, there are 22 stations, and 250,000 people. Largely, a college town. Two of these stations program the satellite formats in this genre. One just made the switch, the other has been banging it out with mediocre results for 20 years.

I'm interested in your comments about these "players" and their formats. AM Only seems highly researched but of limited playlist selection to an upper demo that has heard, certainly, more than 600 songs in their life. Stardust seems to feel that if "Strangers in the Night" is played every 18 hours...so what? They also play "Sittin' on the Dock of the Bay" by Otis Redding for "flavor" they add...noting that "we're interested in lowering the demo to appeal to boomers, not just seniors."

Both formats, especially AM Only, are void of any "Big Band" nostalgia, while Stardust plays it and showtunes on a regular basis.

Jock wise, AM only appears "brighter" but less knowledeable of the music and the rapport with its audience, while "Stardust" sounds like sleepy-old announcers who might know something about some music...but aren't allowed to "personality-ize" it because, well, "talk's a turnoff in any music."

Then, there's the fact that they don't know so-called "current music" worth a tinker's damn...so they fake it.

Finally, I hear "mistakes" via satellite on this format, particularily from "Stardust." Often, you'll hear Manfred Mann and "Doo Wa Ditty" or Chicago "25-to-6-to-4" where the guy will either let it slide...or dump it and do three minutes apologizing for the mistake. They use TM/Century "Gold Discs" with no delete function. Crank 'em through Denon CD players manually. Miss a number and here comes....Alice Cooper, maybe!

Numbers appear so anemic, you can see through the plasma.

Do stations program this better "live" than via satellite? How about image? I know that stations don't buy this stuff because of programming excellence, but we're kinda held hostage, no matter what attempts are made to localize it.

It appears that current efforts by Natalie Cole, Humperdinck, Tom Jones, Sinatra, Ronstadt, Manilow, Connick, others are largely ignored for the "same old stuff."

Looking forward to any and all comments. Is there a future for this format? Why?

Best,

Joe Benson

The _biggie_ is the Museum of Broadcasting (formerly the Radio-TV Museum) in NYC, started with a big grant from CBS. They have videotapes and audio cassettes of just about everything, plus a couple of theaters continuously running classic programs, and a radio studio. They also have seminars and publish books.

I don't have their address any more (their new home is right near Rockefeller Center) but you can get it thru NYC information.

: all 3 stations had NO idea what I was trying to tell him when I called. Then
: I caught another 1080 in Louisville KY that forgot to cut from 10K. The

(and more sad tales)

I have a sneakin' idea who the 50K daytimer might be.. I seem to remember observing such shinanigins as those of which you speak. Since they only have 8 watts or so at night from a completely different site, it's pretty obvious when they do it. It's even more obvious when they get them both on at the same time, at least close to the 8 watter, which is about 15 miles from the 50K site.

I remember they had no modulation one day all day. An easily observable 20-30% harmonic distortion (I'm being kind) for a long period of time. Then there was the audio from their FM that was only about 10db down in the background. Probably a pot left up for days on end. The fact that the baby sitter couldn't figure out what you meant doesn't really surprise me.

We're just a bunch of old crabs sittin' around the cracker barrel reminiscing of days when the little men in the gray station wagons actually got excited about that sort of thing!

Contrast that with getting smacked for having the wrong shade of orange tower paint! Ah-yup..happened to me.

>QTV.

Well, this isn't really radio-related, but hopefully Bill will forgive
us just this once.

Over-the-air coverage of Canadian TVs in the Burlington market looks like:

2 CBFT Montreal (SRC, on cable)
4 CBOT Ottawa (CBC)
6 CBMT Montreal (CBC, on cable)
10 CFTM Montreal (TVA)
12 CFCF Montreal (CTV, on cable)
13 CJOH Ottawa (CTV)
17 CIVM Montreal (Radio-Quebec)
35 CFJP Montreal (Montreal)

Cable operators typically pull the CBC stations off satellite, which
is why they normally carry 2 and 6 rather than 4 even for those areas
which get 4 just fine off-air. I left out channels 7 and 9 (CHLT and
CKSH), both of Sherbrooke, which while listed in the main TV books,
don't get seen in the populated areas.

CH>Numbers: Art Bell is closing on 200 stations now. I heard him say the
CH>first of the week that station 192 had signed on.

Chris,
If you're impressed with numbers you might add that Bob Aaronson on the WOR Radio Network (live overnight, Eastern time) is "closing in on" 75 stations after only three weeks on the air. The real difference is that he's "closed in" on major markets.

Let me caution, again, against taking the talent's on air announcements too seriously. You'll recall that Larry King was still claiming 450 stations minutes before he quit. The real test of a network show is its profitability. Are the spots for gold coins and will kits or are they mainstream network advertisers?

Source record: 30071

The other day Howard Stern made fun of AIDS and blasphemed all in one breath... "praying" on the air that the management of WLUP/WMVP in Chicago get AIDS. You may recall that WLUP ran Howard's show on WLUP A.M. (now WMVP) but cancelled him for low numbers in Chicago.

Whatever their motives for canning Stern, I think his performance was in extremely poor taste. Recently, Stern made fun of the death of Selena, using the occaision to air hostile anti-Mexican sentiment.

It is my personal opinion that Howard Stern is an irresponsible broadcaster. It is also my opinion that he has a right to speak his opinions on the air, but I am grateful for my right to express mine on the net.

This is a very interesting way to look at this subject. It never really clicked with me that by promoting a "commercial-free muuuuuuusssiccc sweep", you cast a very negative light on your commercials. If there was some way that we could paint commercials in some positive way (which is probably nearly impossible since people really seem to hate commercials and reach for the preset buttons the second the commercials come on), we might actually be able to integrate commercials into the programming somehow.

>
>
Rob--

Most stations have very few advertisers at those times you mentioned, which is why they don't run commercials, or they run ROS or run of schedule spots or bonus spots for advertisers who have long term contracts. Most stations don't call attention to this, because they can't sell the time.

Actually, just within the past few days, I came across a Philly AM station while flipping around - 1310 WSSJ. First funny thing is that I remotely remember listening to this station in 1988, after I was annoyed with the turn(s) 98 WCAU
(the big CHR back then) was taking...AND, the way I remembered that I used to listen to this station is their jingle -- their ONE AND ONLY JINGLE!!!! I'm serious! Back as far as 1988 (if not further), they were using just ONE famil-iar "DOUBLE-U...SSSSS.....SSSSSSSSS.....JAAAAAAAAAAAAYYYYYYY!!" jingle... this was/is their only form of produced sweeper. They're mostly an AC station.. with some parts of certain days sold to ethnic programming (and it's also the new home of 4 hours of "Geator Gold Radio"..formerly occupying 15 daytime hours on the old 1540 WPGR).

Second funny thing about WSSJ, regarding commercials, is that (at least during the AC hours, as far as I know) they program it like: 3 songs, 2 spots, 3 songs, 1 spot, 2 songs, etc., etc. And, I actually find it much easier to listen!
Of course, they only play, maybe, 1 current hit an hour..and they play a lot of 60s crap...but, I think more stations should bring back this programming technique.

And, of course, they almost *never* dead-segue - it's always that one familiar jingle! :) ..And, I think there's only jock-talk, maybe, twice an hour.

|: no money left.
|:
|: Instead of taking this news as defeat, I'm looking for creative ways to
|: trade out for them. Denon decks are not sold through just anyone. How
|: can I find someone to sell them to me who needs to do some advertising?
|: Anyone have a creative idea?

This is a challenge. Somebody who sells the Denon pro stuff wants to
advertise to other radio stations, not to the general public in your city.
But you might be able to put together a creative deal:

Is there a local music or hi fi store that doesn't carry the line, but can
get a couple of units from Denon as an accomodation? They can use the
local ad services. I used this hack to get early Revox gear for one of my
studios.

Can you set up with a barter bank for space in one of the radio trade
papers (Radio World, Broadcasting, BE, etc)... and then swap that space
with one of the national broadcast suppliers? This may take a little extra
work, since the magazines are usually reluctant to give contra space to
someone who's already paying cash.

From: rdobrick@omnifest.uwm.edu
Message-ID: <3vkd5j$pcg@vixen.cso.uiuc.edu>
Source record: 30077

I've just returned from a two week vacation in and around London and Paris--
a week each.

A few personal observations about media in those domains--

American music, in the form of rock, rap, country, jazz, etc. is very
visible (audible) on radio, but it seems as if there is very little
presence of U.S.-based news, even on SW. This is depsite the fact that
Cable/Satellite TV is full of European versions of CNBC, CNN, Family
Channel, Nick, etc. Moreover, U.S. print media are very apparent in
European editions of USA Today and New York Times/Washington Post (as
the "International Herald Tribune").

AM seems to be pretty close to dead--almost everything significant in the
Paris area was on FM and in the UK it seemed that most AM stuff was
simulcast of FM--with one or two "talk" exceptions.

I expected to hear a lot of AFRTS and VOA on AM or SW, but there was
very little--at least in English.

With interest in American trends, it seems that there may be some
opportunities for U.S. involvement in EUropean radio

# 1528. WELI, New Haven, CT AM host, Ron Rohmer fired

Newsgroup: rec.radio.broadcasting
Date: 1995-08-01 00:00:00 UTC
From: rentadj@ix.netcom.com
Message-ID: <3vkd5k$pcj@vixen.cso.uiuc.edu>
Source record: 30078

WELI's veteran morning man of 36 years, Ron Rohmer, was fired last week. He'll be replaced by recently named PD, Russ Knight. This nearly completes a clean sweep of the WELI air staff.

WELI's going through some fairly sweeping changes and is another of the "community based" radio stations that's making a transition into more syndicated programming. WELI's recent ratings erosion, including the recently released spring book, has been an ongoing process. Time will tell if the recent changes will be allow them to shift towards younger and more desirable (in the advertisers minds) demographics.

Pat Ryan

# 1529. Ron Rohmer out @ WELI New Haven

Source record: 30079

Long time morning man Ron Rohmer is out at WELI in New Haven, pd Russ Knight is taking over the slot. The New Haven Register reports the station decided to extend hot talk to morning drive. Rhomer's ratings were still tops 12+, tied with Smith and Barber on WPLR, but the ratings for 25-54 demos were low. Rohmer's departure after 35 years at WELI will drastically change the image of the station.

> ~

Umm, listen again. That's not what they say.

On channel 2, they say "GBH 2" and on channel 44 they say "GBH 44" (audio).
The slides say (roughly, bad ASCII version here):

'GBH 44 'GBH 2
and
WGBX-TV Boston WGBH-TV Boston

Apostrophes as they are on the slides. First line is big graphics,
last line is medium-sized text.

> How come?

Trying to build a closer association between the two stations in the
public mind, I guess. After all, they come out of the same control
room, dishes and tape decks. Most of 'GBH's repeats are done on 'GBX,
for example.

>Anyone remember the superpower WLW in Cincinnati
>that used to run so much power the barn lights would light for miles
>around without having the electricity turned on?

No...sorry this is before my time.....but I remember talking to an
old HAM Radio operator that said the S meter in Central Pennsylvania
would take a big jump when they went from 50KW to 500KW at 12 Midnight.

>Anyone around who can tell stories about that?

I remember seeing pictures of the 500KW Xmitter. There was a
big bank of water cooled tubes, a pond outside the xmitter building
to air cool the water and a class B modulation xformer that was
30 feet high (one of the technical staff was in the picture standing
next to it). There was also a picture in the package that
was taken from the top of the 700-800 foot tower looking straight down at
the xmitter building (ah....). I believe this "stick" is still used by the
current WLW. I also believe at one point they put in a second tower to help
protect a Canadian station while operating at the 500KW.

>Whatever happened to the Big organ they had they used to play at
>night, I think they played Moon River didn't they?

Don't know what happen to the organ but I remenber Moon River and WLW
on the net (maybe even this news group...) several years ago.
I received this info and for some reason saved it.....

"The title of a book on WLW is "Moon River" named after a long
time program on WLW broadcast after midnight everynight.
Dr. Lawrence W. Lichty of the The Wilson Foundation (under the egis
of the Smithsonian) wrote his dissertation on the history of WLW,
it includes extensive information on the high powered experiment".

>What ever happened to the old RCA Transmitter that put out all the
>power? Last I knew the name plate was in the Public TV station
>studios downtown, Serial #1.

Well it maybe folklore.....but I understood it is/was still sitting
at the WLW Xmitter site.....perhaps waiting for the next call
to run 500KW on the AM band...:)

There was a nice atricle in Popular Communications magazine a few years back with some interesting pictures of WLW's 500 KW transmitter. I was out in Cincinnati a few years ago and up by the WLW transmitter site, the old building is there with some heavy equipment, although I didn't get a chance to talk to any of the chief engineers about the station. The Pop'Comm article had some interesting technical specs on the facility, very impressive for the late 1920's and early 1930's vintage that it was. Check out the article if you get a chance.

# 1536. Seeking Input for Shareware Sound Project

Newsgroup: rec.radio.broadcasting
Date: 1995-08-03 00:00:00 UTC
From: "William Pfeiffer"
Message-ID: <3vpv54$o9t@vixen.cso.uiuc.edu>
Source record: 30086
Cross-posted to: rec.radio.broadcasting,rec.radio.noncomm,alt.radio.college

Greetings folks.

I am trying to gauge interest in the following project.

I am talking to shareware developers now to create a piece of software for the Mac (and perhaps PPC) that will allow the user to assign sound files to individual keyboard keys so that they can be fired off by merely pushing a single key which corresponds to that sound.

It would be great for lower-budget stations or other operations that have a need to have a number of sound FX, wild-card sounds or even announcements available at the touch of a key.

I feel this is a great idea and my developers are asking me what the market (shareware) might be for such a project as this.

I need to know the following from anyone interested.

1) Write me and tell me that something like this would be of interest to you.

2) Tell me what shareware fee you feel you would be willing to pay for such software. Shareware usually runs from $5.00 for simple utilities and small games to $50 for more complex projects. I have not seen much shareware that is over $50.

3) What features are needed? So far the project will have a graphical user interface that will show each letter, number and punctuation mark, and the name of the soundfile that is bound to it. You change files by dragging with the mouse, or by using an open dialogue box. Each sample will have a way to control individual volume, so that each sample will be roughly at the same level. I am asking for a digital VU meter, front panel level control, bass and treble EQ and other bells/whistles. Since there are so many sound recording apps in freeware/shareware I have made no request for that feature. Do you think it is needed?

I am not asking you to commit to anything, just give me an idea of what market may there may be for such a product. I know that there are more complex and possibly more perfect solutions, but for those who have a Mac and need an inexpensive method to keep nearly 50 soundfiles at ready to be fired off at will, and don't want to spend a small fortune to do so, this, this project might be for you.

The more interest, the more likely I can get a developer to code this project. I was thinking that this would easily be worth $20 or $25 in

shareware fees, what do you all think?

Send replies to ...

shareware@airwaves.com

I may not reply immediately, but I will compile your replies for the developer.

Sorry, but at this time there is no plans for a DOS-based version, although if someone out there wants to code a DOS version, that would be nice..

Let me know

check out the Triad Radio Pages that I'm constructing on the World Wide Web. You'll find some nostalgic orientation including some graphics from old flyers and the magazine. I'm putting up some of the playlists to trigger your memories of the sounds you used to hear on the radio in the 70's. If you were a listener than you know that Triad was unlike any other show in content and presentation. The music selections leaned heavily toward the new, progressive, experimental, cutting edge. TRIAD was the first place Chicago area listeners got to hear groups like Kraftwerk, Can, Focus, Bob Marley and the Wailers, Tangerine Dream, Vangelis and many more. I plan to eventually have more sound bytes from interviews with artists like Donovan, Eno, Rory Gallagher, Anthony Braxton, Leon Thomas, John McLaughlin, Firesign Theatre and many others. There's a lot of work still to be done but I'd like you to check out how it's coming along. I'd also appreciate your comments and suggestions.

TIA - Saul

# 1540. Chancellor to Buy Shamrock for $395 Million

Newsgroup: rec.radio.broadcasting
Date: 1995-08-06 00:00:00 UTC
From: mward@crl.com
Message-ID: <403bg5$gtt@vixen.cso.uiuc.edu>
Source record: 30090

Dallas-based Chancellor Broadcasting has announced an agreement to buy Shamrock Broadcasting for $395 million. The deal, assuming it clears all the regulatory hurdles, would make Chancellor the 3rd largest pure-radio company in the nation.

Chancellor already owns 14 stations in Long Island, NY, Minneapolis, Cincinnati, Riverside/San Bernardino, CA, Sacramento, and Orlando. The Shamrock group, owned primarily by the Roy Disney family, owns 19 stations in New York, Los Angeles, San Francisco, Detroit, Houston, Atlanta, Minneapolis, Pittsburgh, Phoenix and Denver. Chancellor started in 1993 and shortly thereafter purchased KFBK-AM/KGBY-FM Sacramento, then bought the American Media group which brought it to the current size.

The combined group would bring Chancellor to 33 stations, 21 FM and 12 AM, and give the company duopolies in San Francisco (4 stations), Minneapolis (5 stations), Denver (3 stations), Cincinnati (3 stations), and Sacramento (3 stations), along with regional duopolies in New York (1 station in New York and 2 on Long Island) and Los Angeles (2 stations in Los Angeles and 2 in Riverside/San Bernardino).

Mike
(views and opinions expressed in my messages are my own, but this one is basically a rewrite of a Chancellor release ;)

# 1541. Kansas City Radio Watch (2-Aug-1995)

Newsgroup: rec.radio.broadcasting
Date: 1995-08-06 00:00:00 UTC
From: transvox@interstate.net
Message-ID: <403bg6$gtu@vixen.cso.uiuc.edu>
Source record: 30091

Written August 2, 1995

Suburban station KCXL(AM) has apparently received authority from the Federal Communications Commission to operate on a full-time basis.

The station, licensed on 1140 kHz to Liberty, began on-air announcements today about its new schedule. The announcements correctly point out that the signal will be audible near Liberty and Kansas City's northern suburbs.

KCXL, 500 watts daytime, has had authorization for 47 watts from 6 am until local sunrise. It is probable that the station's new nighttime power is either 47 watts or slightly less.

KCXL has also begun morning and afternoon drive news and traffic reports, supplied by Metro Networks' Kansas City operation. Several other Kansas City stations take the Metro Networks traffic feed, but, to my knowledge, only KNHN(AM) also takes Metro Networks newscasts. WDAF(AM), WHB(AM), and the Bonneville KMBZ(AM)/KCMO(AM) duopoly maintain their own news departments.

KCXL also recently installed a new transmitter. A published report about the transmitter in the Kansas City Star hinted at stereo broadcasts. However, KCXL's satellite-fed oldies format remains in mono at this time.

++++++++++

For those of you who browse my Web pages occasionally:

During the upcoming month, I will be making some changes. I am discontinuing the creation of HTMLized versions of Radio Watch reports. I think it's redundant now that Bill offers the same service on the AIRWAVES server. It will also relieve some pressures on my own time and free up server space for some other services.

This means the Mid-America Radio Monitor will be going away soon. If you have any URLs pointing to my Web pages, make sure the pointer is to:
<URL: http://www.interstate.net/~transvox/marp.html>

The Interstate Radio Dial and Kansas City Radio History will continue as before.

By the way, to my knowledge, no Kansas City-area commercial radio stations have Web pages.

# 1542. Las Vegas Radiowatch (Where is Dusty Street?)

Newsgroup: rec.radio.broadcasting
Date: 1995-08-06 00:00:00 UTC
From: beers@ix.netcom.com
Message-ID: <403bg7$gtv@vixen.cso.uiuc.edu>
Source record: 30092

The July 31 Las Vegas Review Journal features on the front page of its Living Section a 6 x 12 color picture and bylined (by Ken White) story about legendary Los Angeles jock Dusty Street. Street logged 10 years at new-wave KROQ, four at classic rocker KLSX and a year each at KLOS and KWST, all Los Angeles, before moving to Las Vegas six months ago to take on middays at KEDG The Edge.

Las Vegas's KEDG plays great modern rock, but has struggled with heavy turnover. Street lasted six months - longer than most. Now, she's working weekends in the market, confessing disillusionment with radio, and writing a memoir of her female perspective of the biz.

However, she's happy with her move to Vegas. "What I've found here has been worth the trip. I found new energy for my career, and the energy to do other things. God knows I don't have to do this all my life. I managed to stay unconscious enough to stay in radio most of my life," she says, laughing. "I have no gripes. Everything works out. Everything happens for a reason."

She's interested in drug rehab and wants to be a counselor. While in Los Angeles, she attended college toward a counseling degree.

# 1543. Ratings from #16 Market

Newsgroup: rec.radio.broadcasting
Date: 1995-08-06 00:00:00 UTC
From: StellaStar@aol.com
Message-ID: <403bg8$gu0@vixen.cso.uiuc.edu>
Source record: 30093

Alternate Headline: Veteran Minneapolis AM squeaks past upstart FM rocker...again. Thanks to Brian Lambert's column in the St Paul Pioneer Press for providing the published Arbitron numbers.
WCCO-AM, shouldered out of its historic market-leading position recently by KQ-92, has managed to hold onto a lead in the Minneapolis-StPaul market, in the Twin Cities book.
Changes this spring include sinking numbers for talker KSTP-AM and for "Smooth Jazz" KMJZ, which changed calls and format from KJJO (Country) just shortly after this book began.
Rising in the Twin Cities numbers were the Edge, (KEGE 93.7) and country WBOB.
The biggest change in numbers was a nice jump for a single station with dual transmitters. It may be in part due to an outside ad agency's multimedia campaign (TV, Billboards, you name it) for "Rev 105," which has a weak signal and uses two transmitters to get it into the metro area; licensed to outstate Lakeville and Cambridge, they're 105.1 WREV and 105.3 KREV, respectively. How do you arrange to get both "K" and "W" sets of the same calls, a very pretty combination you must admit...? Locate on the Mississippi River, which...broadcasting students?..right, is the dividing line between K- and W- prefixes.

Here are the published Spring Arbitron 12+ numbers, Mon-Sun 6-Midnite for the Twin Cities:

Ranking/calls/freq 1995 1994

1. WCCO-AM 830 12.9 12.0 Full Svc
2. KQRS-FM 92.5 11.7 10.4 Rock (AM Simul)
3. WLTE-FM 102.9 7.0 6.4 Lite (What else)
4. KDWB-FM 101.3 6.9 6.8 CHR
5. KEGE-FM 93.7 6.9 5.3 AAA

# 1544. ADMINISTRIVIA: Seeking More 'News' Posts

Newsgroup: rec.radio.broadcasting
Date: 1995-08-06 00:00:00 UTC
From: rrb@clm.aiss.uiuc.edu
Message-ID: <403bga$gu2@vixen.cso.uiuc.edu>
Source record: 30094

Greetings readers:

I would like to take this moment to ask for more posts of radio news and information to be sent to rrb/AIRWAVES. Not posts about 'news radio' but post with information about radio.

We get a fair amount already but I would like to personally encourage more 'late breaking stories' about mergers, sales, format changes, personnel changes, FCC news and other news about the industry. One of the major features of a service like this is its ability to get news to the public much faster than a paper trade pub. I would like to exploit this advantage and get more *informational* posts out to the readers.

With the addition of AIRWAVES-SELECT and AIRWAVES-ONLINE [See Footnote] to the roster, we need more informational posts to be sent.

Also, I would like to see more RadioWatcher activity. If you are a RadioWatcher, and have not contributed recently, please feel strongly encouraged to do so now.

Please take the time to start posting any information, even strong rumor (although you should able it AS rumor) and send to the group. We want to see as much immediate information as possible

The submission address for direct email posting is...

articles@airwaves.com.

William Pfeiffer
Moderator: rec.radio.broadcasting/AIRWAVES RADIO JOURNAL
wdp@airwaves.com * airwaves@woodtech.com * rrb@clm.aiss.uiuc.edu
Web: http://radio.aiss.uiuc.edu/~rrb/

[Footnote: AIRWAVES-SELECT is a 'news and information only' version of AIRWAVES RADIO JOURNAL. AIRWAVES-ONLINE is a real-time world-wide-web server containing all the articles from AIRWAVES in clickable format. For more information about any of these, write me. Bill]

I definitely don't see ABCers wearing Mickey Mouse ears anytime soon.
WHTZ (Z100) is a Shamrock Broadcasting company, who's primary owner is
Roy Disney.

..I just don't see Z100 PD Steve Kingston wearing mouse-ears..let alone
anyone else in the place.

> Guess I will start seeing mouse ears on WABC's transmitter tower in
> Lodi, NJ.
> 
> 

Nah...it will be mouse ears on the ABC Logo--it even fits.

Actually, this is probably not a deal which will hurt anybody because both companies are pretty good companies. But I can't wait to see the NYPD Blue pavilion at Disney World.

## 1548. Walt Disney merges with ABC/Cap Cities

SH>I have this nagging fear that certain controversial elements of various ABC-
SH>owned radio and TV stations are going to come under "remolding" attempts
SH>by the new owners. We all know what Jay would do: lace up his Doc Martens
SH>and walk. He's discussed this sort of thing before....

I think you have a point. WABC hardly fits the mold of Disney. I guess Bob Grant won't be able to refer to Mickey as "that damned liberal rodent." I suspect the "hate radio" aspect of WABC might be mellowed a bit. We all must remember that Mickey, Donald and Goofy don't look like downwardly mobile white males. They'll be perceived as imigrants. Grant doesn't like imigrants.

Rich

: Cities.

Considering that the Disney family still controls significant amounts of stock in the Walt Disney Company, and considering that the various permutations of the Disney family own other broadcasting companies such as Retlaw and Shamrock, is there a trust violation here? For instance, Shamrock owns 4 stations in the SF Bay Area; with ABC the Disney company will own 2 more. In Los Angeles, Retlaw owns TV channel 9, and with ABC will also own channel 7, KABC(AM), and KLOS.

>
>So we gave them FMX (snip).... Yawn. Almost nobody bought them. (I
bought one)

>AMAX? (snip) Yawn. No one wants to build one, (snip) people aren't
>buying them. (snip) I want one.

>RDS? (you get the idea)

Not to mention Dolby B-FM. Lots of installations, nobody bought one of
them either.

John makes a very good point. And next, we have the singularly most
expensive and sweeping 'upgrade' to radio broadcsting technology
yet...Digital Radio (DAB,DAR, Whateveritisthisweek)...A technology that
again requires consumers to purchase something they already own (a radio)
but in a 'new' and 'wonderful' form. Will anyone buy one?

One difference of note: The other "upgrades" required only a moderate
investment on the part of the broadcaster (except, of course, AM
stereo). Some are even free (RDS). Digital Radio could well be the most
expensive upgrade yet, and while promising CD quality sound, what does
the listener really want? Quality sound or programming they want to
hear?

And then there's HDTV...HD, but still TV....Hmmmmmmm...

Message-ID: <403bgg$guh@vixen.cso.uiuc.edu>
Source record: 30101

Item Subject: cc:Mail Text

Does this Bloomberg news network in New York (at least I assume they're based in New York?) have either a general Internet address or a www site?
Anybody else seen their little early-morning newsinfo programming on the USA cable channel? It's a full-time crammed graphical screen with about 6 or 8 separate sub-"windows", each running active text and/or graphics displays of news, sports, weather, business stuff, with one large window devoted to a live-action camera display (which is where the commercials and the audio are directed). The rest of the screen remains active even during the commercials. (Wow.)
I've only seen it recently between 6AM and 7AM (I switch to USA only slightly more frequently than to QVC or Home Shopping Club or the Inspirational Channel).
The other morning, Bloomberg's Boston weather info was completely inaccurate (I mean, not even close).
(...I'm really not quite as bored as it sounds, I have a new baby who I have care detail for over certain stretches of time, so when he's guzzling formula, I'm often scanning the radio/tv dials.)

>at 11, BONG, de-de-DE-da-de, "CBS News, this is Rich"
>something or other.

Sounds to me like WAEB is running a local automation system that kicked into the network (news) too early. ;)

I used to help program the automation computer at my last station, WQKT/WKVX (Wooster, OH). We had to block out hours of programming for whatever the main source was...for example, if we had a football game at 8, we mapped out the computer for the studio board, then mapped it out for the satellite network (ABC/SMN) the hour AFTER the game was over. If the game went into OT, and we forgot to remap, we were treated to the SMN top of the hour news and had to dive for the computer and switch it back. ::chuckle::

If there wasn't a live operator on WAEB's end that night, they might have never known... or by the time they figured out and someone got to the computer, it might be too late and the game would be over. Maybe they need someone on their FM side to keep an eye on it?

Mike

## 1553. CBS/Group W radio?

Another dumb question (I specialize in these):

Will Group W radio stations (like WBZ-AM Boston) still be "Group W"
stations (whatever that means), or will they now (or soon) become CBS Radio
affiliates (like WCBS-AM New York)?
For the moment anyway, WBZ still carries some ABC Radio Network
programming.

Message-ID: <403bgm$gut@vixen.cso.uiuc.edu>
Source record: 30105

I've seen the list, and it's impressive. For an honorable mention,
how about the 50kw station from Oklahoma City, 1520 KOMA?? The
original list was geared to the coasts -- and major population centers.
But for those growing up in the western U.S., there was nothing in
town after sunset -- and FM was still an infant.

KOMA was -- and still is -- a blowtorch from the plains.
There were greats on the station: Machine Gun Kelly, Charlie Tuna,
J. Robert Dark, and others.

In the 60s [I remember them well, thank you] and 70s, points west of
Oklahoma City after sunset were glued to "Million Dollar Weekends"
and 15 - 20 news [news at 15 past and 20 before the hour] and the
best T40 the western U.S. could handle.

Today nearly 30-years later, I still get a thrill pulling in 1520 KOMA,
and am pleased it's playing oldies. Nothing like listening to the
Monkees on a skywave fade.

Interesting question since someone just wrote and asked why we
program classical music on HCJB shortwave. Anyhow, we offer two
programs per week:

Classical Favorites on Monday to Europe and the Andean region at
18:30 UTC, to the South Pacific at 10:00 UTC, to the Americas at
2:30 and 6:30 UTC (Tuesday).

Inspirational Classics on Thursday to Europe and the Andean
region at 18:30 UTC, to the South Pacific at 10:30 UTC and to
the Americas at 2:30 UTC (Friday).

Good listening --Ken MacHarg

HCJB - THE VOICE OF THE ANDES - QUITO, ECUADOR

HCJB is a major international Christian shortwave radio station
broadcasting from Quito, Ecuador in South America. Thanks for
listening to The Voice of the Andes.

---
ENGLISH FREQUENCY SCHEDULE : Effective 9 May 1995 at 1600 UTC
---

THE AMERICAS: 0030-0500 UTC on 9745 kHz eastern North America
0500-0700 UTC on 9745 kHz western North America

1100-1500 UTC on 12005 kHz to The Caribbean
1130-1430 UTC on 15115 kHz to North America
1130-1600 UTC on 15115 kHz to South America
1330-2100 UTC on 6080 kHz to the Andean Region

EUROPE: 0700-0830 UTC on 11615 kHz
1700-2000 UTC on 15490 kHz

SOUTH PACIFIC: 0700-1130 UTC on 5900 kHz

GENERAL NOTES: All English releases are also carried on 21455 kHz USB in 13 meters. English is also broadcast on the USB frequency of 15540 kHz in 19 meters at the following times: 0030-0500, 0700-0930, 1000-1130, 1200-1600, and 1800-1830 UTC.

Acutally, we use the DCC machnies a lot. At $299 from Radio Shack, we can throw them away if we get tired of them and we can afford enough of them to have a meaningful presence in the studio. They also do a great job of playing back analog cassettes.

And I wouldn't yet sound taps on the format. Phillips has a lot of money to spend.

# 1558. Re: Duane Garrett of KGO...Will Be Missed

>Former KGO colleague and nationally-syndicated talker Dr. Dean Edell did a
>truly heart-felt tribute to Garrett....and blasted, without mentioning names,
>another syndicated talkshow host who'd made a crack about suicides being
>cowards.

Actually, it isn't "former"... Edell does his now nationally-syndicated show from the KGO studios, and it airs live on KGO at its regular time, 1-2 PM PT. So while he is more than likely employed now by EFM Media (the company behind Rush Limbaugh's "EIB Network"), he's still there in San Francisco.

I was too busy getting stuff done at work to hear the tribute, which apparently aired on Friday (we tape his show and air it on weekends - that particular hour ran at 3 PM PT Sunday on KFBK). I'll have to dig up the tape before it hits the bulker for next week.

I happened to be in San Francisco the next day. Once I had settled in to my room at the B&B, I brought out the SRF-A1 and started sampling the dial. It was compelling to listen to the KGO anchors trying to deal with their grief and get on with the job at hand. They handled the situation very well considering what they must have been feeling.

plaws@comp.uark.edu (Peter Laws) writes:

>Can someone point me to the actual tones used? I know it's a combination
>of two, but what are they? I take it that this is about to change ...

853Hz +/- 0.5Hz and 960Hz +/- 0.5Hz mixed equally. The tones didn't
change (July 1 was the deadline) but the minimum duration did.
Transmitted tones may now be as short as 8 seconds and as long as 25
seconds. The old length was 20-25 seconds. The change mandated that all
EBS decoders be modified to detect tones in 3-4 seconds instead of 10-18
seconds.

The deadline is passed. Did you modify yours?

>enemy nations in times of war?

The RTL transmitter at Marnach in Luxembourg on 1440KHz is I believe rated at 1.2Megawatts. This for many years was used to carry the world famous programs of Radio Luxembourg which were beamed at the UK and was clearly audible throught the UK albeit with considerable fading. I have heard this transmitter from as far away as Corfu (off of the Greek coast) on a walkman! Sadly the programs of Radio Luxembourg are no longer broadcast and the Luxembourg transmitter now carries a German language program. Splatter was always a problem with Radio Luxembourg - the adjacent channels 1449 and 1431 KHz always suffer severe interference. I can remember a time when this transmitter developed a fault I could hear splatter as far as 1404KHz!

You mention propaganda - well of course any cross boarder broadcasters can and often do, do this. Nazi propaganda was broadcast in English during the second world war beamed at the UK from transmitters in Germany and the (then 200Kw) station in occupied Luxembourg.

Very high powers on FM are less effective as the range is theoretically not much greater than line of sight as FM signals do not usually skip or follow the curvature of the earth. Here in the UK the largest FM stations I know of - those carrying the BBC's national programs - are 250KW which give a coverage radius of about 100 miles - the main reason for the power however is probably to reduce 'dead' areas within the coverage area rather than extending it.If you can get hold of a copy of the World Radio and TV Handbook have a look at some of the powers listed for European broadcasters particularly on Long Wave, some of which I seem to remember may be as high as 2MW.

>John Francini

Solid-State FM is available up to 10kW (some companies are paralleling them for 20kW).
Solid-State Medium Wave AM up to 1MW (yes, one-megawatt).
Not aware of any higher powers in solid-state Shortwave.

I know that the local CBC outlet here in Saskatchewan (CBK, 540 KHz) has been using a solid-state 50 KW transmitter since 1989 -- it's a Nautel Electronics AMFET 50. This is an exceptionally clean-sounding unit; it uses pulse-width modulation. Nautel is a Canadian company which got its start manufacturing solid-state LF NDBs for the aviation industry, and their AM transmitters are apparently an outgrowth of this line. CBK's standby, incidentally, is still a hollow-state Continental 317-C.

I suspect that there are quite a few other 50KW solid-state units on the market now -- Harris is one name that comes to mind. Perhaps there's someone else out there who can provide more details ...

This is a joke right ?

All New MW Transmitters in Powers to 50,000+ watts are Solid State.
Harris has a DX-1000 available thats 1,000,000 watts of digitaly
modulated solid state MW AM.

Most Companies will not sell a tube transmitter for FM below 2500 watts.
Hassis has 30 Kw available in Solid State.

I the last several years I have seen VHF TV Stations replacing old tired
RCA Transmitters with New Harris Solid State transmitters in the 30Kw class.

I would say the Solid State is here to stay...

I'm looking for a position in engineering....will consider relocation
for the right offer. Any hints/leads?

General Qualifications:
FCC First Class Radiotelegraph Operator's License.
FCC General Radiotelephone Operator's License.
Expert voice and data communications knowledge.
Advanced electronics troubleshooting and operating abilities.
Wide range of hardware familiarity and expertise.
Computer programming and operating skill.
Able to adapt quickly to new technologies and circumstances.
Excellent communications skills.
Strong human relations and time management skills.
International experience, including remote locations for extended
periods.

Experience:
Broadcast Engineer
Madison Broadcasting Group (10/94 - 8/95)
Responsible for the operation and repair of high-power AM and FM
broadcast facilities.
Performed engineering duties including component-level repairs to all
electronic systems, routine maintenance and periodic inspections.
Developed and implemented plans to ensure regulatory compliance.
Provided technical advice, training and support on data and
communications systems.
Installed automation packages, signal processors, satellite earth
stations, remote links, telemetry systems, computers, modems, software
and distribution networks.
Configured and operated videotape editing bays using Sony and
Panasonic equipment.
Researched and selected station accounting, traffic, automation and
production software.
Maintained satellite, microwave and wire programming and data links.
Provided computer hardware and software support at all levels.
Experienced in tower work, including antenna placement and inspection.

Radio-Electronics Officer
United States Merchant Marine (2/89 - 10/94)
Chief electronics officer on board civilian US-flag ships.
Installed, operated and maintained equipment including two-way
satellite voice and data systems, GPS and navigation gear, radar, MF,
HF, VHF and UHF transceivers, telephony and NBDP installations, PBX
systems and industrial-grade cargo sensors.
Installed and administered a Novell Netware LAN with external data

links.
Developed custom C++ and Dbase applications for unique shipboard needs.
Performed component-level repairs on all shipboard electronic systems.
Proficient with industrial control systems, cargo sensors and plant automation.
George J. Molnar

Certifications:
United States Coast Guard Radio Officer's License.
US Department of Defense Secret Clearance.
FCC First Class Radiotelegraph Operator's License.
FCC General Radiotelephone Operator's License.
FCC Amateur Extra Class License.
Completed Red Cross First Aid and CPR courses.

Post-Secondary Education:
University of Rochester (Political Science).
University of the State of New York (Electronics Engineering).

: of ERP vs. input power.

Actually I think both of you have valid points. There *are* FCC curves that do show the coverage areas by frequency -- theoretical, of course, but much better than just talking pure wattage. I once saw the large version of these charts in the government documents repository at the University of Missouri.

: I think what we need is less AM stations left on autopilot doing nothing
: but simulcasting an FM because the owners are too stupid to know how to do
: anything else.

And it seems that Fred is one of the people trying to do something about this.

: I can show you lots of areas that would have NO radio service without
: the clear channels and DON'T in the daytime. NC (North Carolina mountains
: along highway 28 is an example. I thought the SuperRadio had died. SSSSSS!
: Total multipath and distortion on 3 stations I could get on FM.

Also note that, several months ago, when WABC went off the air for maintenance, that KKOB at 770 kHz in Albuquerque forwent the opportunity to go nondirectional at night. The reason given was that large areas of the Arizona and New Mexico would be without service.

: And 50,000 watts at 1600 isn't as good as 1000 watts at 540!

True, absolutely true.

A memory from my past: Columbia, Missouri has two AM stations: KFRU at 1400 and KTGR at 1580. KFRU is 1,000 watts; KTGR has 250. We used to drive in from the north all the time (we lived in Iowa for several years). You could pick up KTGR at Kirksville. You couldn't get KFRU until about Jacksonville or so. That's a discrepancy of about 40 miles.

KTGR had a newer antenna system and didn't have to fight interference from another station on 1580. KFRU and

Centerville, Iowa's KCOG (500 watts) hashed it out on US 63 at least to Kirksville.

There are many, many, many factors governing how well an AM station can get out: antenna pattern, ground conductivity, co-channel interference, etc. I am left wondering, though, whether it isn't time for the FCC to take a long, hard look at duplicative programming in the same market the way it did back in 1967 (or so) when it mandated the end of AM/FM simulcasting.

# 1570. PHOENIX: STATION SALES

Newsgroup: rec.radio.broadcasting
Date: 1995-08-06 00:00:00 UTC
From: Michael Hagerty <Michael_Hagerty@azfamily.com>
Message-ID: <403bh5$h02@vixen.cso.uiuc.edu>
Source record: 30120

MAC America Communications, Inc. has bought KTWC(103.5)...a station
that has operated under a joint
marketing agreement with MAC America since its sign-on
in May 1994.
KTWC is currently a broad-based AC/MOR hybrid featuring
a wide range of artists from Johnny Cash to Joe Jackson
to Frank Sinatra...often back-to-back in the same set.
No word on any adjustments to format. The station pulled a 1.3 12+ in
the spring Arbitron.
MAC America currently owns KESZ(99.9), KTVK-TV, Phoenix Magazine and
the Desert Production Center.
Terms of the purchase were not disclosed...the deal is
pending FCC approval.
And...KMLE(107.9)station manager Shaun Holly is quoted in Wednesday
(8/3)'s editions of the ArizonaRepublic as
saying that Chancellor Broadcasting has in fact made an
offer for Shamrock broadcasting. Shamrock owns KMLE and virtually all
of the old Metromedia and Malrite radio chains.

: Long time morning man Ron Rohmer is out at WELI in New Haven, pd Russ
: Knight is taking over the slot.

This sad move completes the FM-izing of WELI. When WELI and WKCI/WAVZ (or whatever the little duopoly AM was then being called) co-located in late 1993, I was filling in from time to time as a talk show host on their evening phone-in show.

I told everyone who would listen that it was time to hunker down, and get the resumes out, because the FM --- which was promised to be subordinate to the locally-oriented AM --- would take over. By the time I did my last fill-in last Thanksgiving, the FM was on in the lobby, and WELI was an "oh, by the way." Shortly thereafter long-time WELI G-M Stan Shields quit, taking a lot of the soul of the station with him.

Ron was a consummate pro. He lived in a trailer behind the station, and gave the place his life --- insiders know just how true that statement is.

I suspect Ron will land on his feet. He's got a great voice, a terrific commercial delivery, and can make it on that.

As for the station ... watch for a sale soon. No inside info, but they're going to let it go. For all intents and purposes they already have.

Amazing! Rhomer is an odd but interesting talent. For years, I'm told he
lived in a trailer next to the station.

Years ago, when I was working part-time on WELI, I followed Rhomer on the air.
I introduced myself. Rhomer looked up from his drink, opened one eye and said
"who the f*** cares."

Obviously, he didn't.

Mike

What on earth were you listening to? I can only think of one station in London that has a simulcast on AM and that's Virgin. Even that station has differences during the day because the AM is national and the FM is London only so the programming changes to reflect this.

AM here is growing back in popularity, mainly due to Virgin 1215, BBC Radio 5 Live and Talk Radio UK who are all on AM. Even Atlantic 252 on longwave from Ireland has a sizeable audience. Far from dead!

Cheers,
Dave

Depends. In Britain, BBC Radio 4 devotes quite a lot of time in its news and current affairs discussion slots to US news, especially stuff which is economic, or affects us. Examples: Bosnia arms embargo, Whitewater, OJ Simpson :-(, Japan/US trade disputes.

> AM seems to be pretty close to dead

Don't know about Paris, but in the UK there are three national AM stations - BBC Radio 5, TalkRadio UK and Virgin 1215. TalkRadio is crap in my view.

In London there are several regional commercial stations on AM - Spectrum Radio, which broadcasts in many minority languages e.g. Arabic, Hindi and Punjabi, Viva (Programming aimed at women), Premier (family value, ChristIan), London Country Radio (guess what), London Newstalk and Capital Gold (60s and 70s hits). Not dead by a long shot. Outside London, most commercial AM has gone to a "gold" format, in some cases well done, in others, not.

> I expected to hear a lot of AFRTS and VOA on AM or SW, but there
> was very little--at least in English.

AFRTS concentrates its efforts on areas where English is not the local language. Its main European outlets are on AM in southern Germany, and FM in Belgium, Spain, Italy and Greece. AFRTS has not used sw for several years.

VoA is difficult to hear in the UK in English. SW is as much a minority interest here as in the US.

> With interest in American trends, it seems that there may be some
> opportunities for U.S. involvement in EUropean radio

We have ownership rules as well :-)

For a better look at the UK broadcast scene, look at alt.radio.uk

I hate to disagree with you, but you are in a very small minority. When WFAN in NYC began, they had sports talk in the morning with Greg Gumbel, and it was a disaster. When WFAN moved from 1050 to 660 and got Imus, that's when the station took off and Imus deserves a large part of the credit. He gets other listeners into the sportsradio tent and makes money for the station. Besides, you have 20 other hours of the day to hear and talk sports.
On the other side of the coin, WIP in Philly does a sports talk show in the AM--it's not one of their more competitive time slots.

# 1580. WOI Use of Marconi 2kw Marine Set

Newsgroup: rec.radio.broadcasting
Date: 1995-08-06 00:00:00 UTC
From: forsling@iastate.edu
Message-ID: <403bhh$h0o@vixen.cso.uiuc.edu>
Source record: 30130

Talk about the old days of radio! We do need some help. WOI at Iowa State University is examining documentation of its early history, which begins with physics department experiments around 1911. An article in a recently discovered amateur radio publication of 1916 describes play-by-play football broadcasts from Iowa State in that year. The question: were these broadcasts voice or code? It's a question that's not as easy to answer as it might seem because, believe it or not, Iowa State did provide livestock and commodity market information via code in the very early radio days. The answer may lie in learning about the transmitter, which according to the "Hawkeye Radio Bulletin," was a new Marconi 2kw Marine Set. We'd be grateful for any information anyone may have about this transmitter and particularly the answer to the question, "Voice or code?"

Regards.

HY>does anybody know what will happen to the cbs radio network now that
HY>westinghouse has bought cbs?

Hymie,
This is just speculation, but it appears that Westinghouse's
interest is in the O&O's. The Westinghouse CEO repeatedly emphasized
the value of the stations. The network is low on the list, as it
probably is for Disney and ABC.

HY>does the fcc still forbid owning television and radio, like when g.e.
HY>bought r.c.a. (which owns nbc) some years back?

The FCC appears to care only about dirty words and Howard Stern
(he'll be a profit center for them if they ever collect the fines).
With the impending passage of the Telecommunications bill, we'll be
able to own anything, anywhere and do anything with it (except use
dirty words). Gotta protect the kiddies from the language they use on
the streets.

Rich

No such animal in FCC regs. GE decided it wanted out of the radio business, both the network and the stations. There is only the station limits, 25AM/25FM/12TV and the restriction on foreign ownership of stations that Westinghouse/CBS has to deal with, and they don't have to at this point.

I don't even believe that there will be a duopoly problem since Westinghouse doesn't have any and CBS has only one or two. They are in cities where Group W does not have an outlet.

The only problem is in New York where WINS, (Group-W), and WCBS both have an all news format. My guess is that since WCBS is the clearer channel, WCBS and WINS could swap dial positions and WINS will remain all news while WCBS clears network programming with some local talk programming. Amazingly most of the network O&O's don't carry the bulk of their own network's programming.

WCBS-FM has an oldies format and WNEW just went alternative rock. Although it may be off the wall, WINS is at 1010 and was once a rock and roll station in the 50's and 60's. WCBS-FM at 101.1 could solidify the oldies image by becomming WINS-FM, but the "CBS-FM, The Golden 101" image is pretty solid. Such a change could backfire if seen as exploitive.

KQV-1410 Pittsburgh definitely deserves an "honorable mention" on the list of great Top 40 stations. They were an ABC O&O through the Sixties and early Seventies, and had a lot of great talent (Fred Winston, Gary Gears, Kris Eric Stevens) that did well on the Pittsburgh "farm team" and later went to sister station WLS/Chicago. KQV got mauled by Heftel's new 13Q in 1973, ABC sold the station to Taft, and they went all-News in 1975, bowing out of the AM Top 40 race rather early as those things went.

Unlike WABC, WLS, or even WFIL, KQV didn't have the national or regional AM clear-channel signal that many Top 40 giants did (KQV was, and is, 5000 rather directional watts on 1410), and so it seems that few tapes of them have survived over the years, much to my chagrin.

KQV was also the home of a disc jockey who used the air name Jeff Christie in the early Seventies...today he's known by his real name, Rush Limbaugh!

I'm looking for an opening in engineering, and will consider
relocating for the right offer. Any leads?

George J. Molnar
633 East Walden Court
Highlands Ranch, Colorado 80126
Tel: (303) 470-9752 Fax: (303) 683-1408
Internet: gmolnar@nexus.interealm.com

General Qualifications:
FCC First Class Radiotelegraph Operator's License.
FCC General Radiotelephone Operator's License.
Expert voice and data communications knowledge.
Advanced electronics troubleshooting and operating abilities.
Wide range of hardware familiarity and expertise.
Computer programming and operating skill.
Able to adapt quickly to new technologies and circumstances.
Excellent communications skills.
Strong human relations and time management skills.
International experience, including remote locations for extended
periods.

Experience:
Broadcast Engineer
Madison Broadcasting Group (10/94 - 8/95)
Responsible for the operation and repair of high-power AM and FM
broadcast facilities.
Performed engineering duties including component-level repairs to all
electronic systems, routine maintenance and periodic inspections.
Developed and implemented plans to ensure regulatory compliance.
Provided technical advice, training and support on data and
communications systems.
Installed automation packages, signal processors, satellite earth
stations, remote links, telemetry systems, computers, modems, software
and distribution networks.
Configured and operated videotape editing bays using Sony and
Panasonic equipment.
Researched and selected station accounting, traffic, automation and
production software.
Maintained satellite, microwave and wire programming and data links.
Provided computer hardware and software support at all levels.
Experienced in tower work, including antenna placement and inspection.

Radio-Electronics Officer
United States Merchant Marine (2/89 - 10/94)

Chief electronics officer on board civilian US-flag ships.
Installed, operated and maintained equipment including two-way satellite voice and data systems, GPS and navigation gear, radar, MF, HF, VHF and UHF transceivers, telephony and NBDP installations, PBX systems and industrial-grade cargo sensors.
Installed and administered a Novell Netware LAN with external data links.
Developed custom C++ and Dbase applications for unique shipboard needs.
Performed component-level repairs on all shipboard electronic systems.
Proficient with industrial control systems, cargo sensors and plant automation.
George J. Molnar

Certifications:
United States Coast Guard Radio Officer's License.
US Department of Defense Secret Clearance.
FCC First Class Radiotelegraph Operator's License.
FCC General Radiotelephone Operator's License.
FCC Amateur Extra Class License.
Completed Red Cross First Aid and CPR courses.

Post-Secondary Education:
University of Rochester (Political Science).
University of the State of New York (Electronics Engineering).

Ditto!
A true incident. I was working for a major station in a major city (I
won't say who to protect my rear) anyway, the AM blew off the air and
was running on the 50's vintage backup at 200 watts or so. About that
time I had just finished installing some bug ridden sales software on
the network and was attempting to sort it out (a lost cause). Now we
had a management call. The decision was made that I would continue to
work on the software problems, rather than attend to the ill
transmitter and out of service transmitter!!!
Management felt that running at 4%(!) power was less important than

office software.

My. How times have changed.

4 hours later on my way home was I able to locate and repair the problem in the ATU that caused the low power output. Got out of there at 2 A.M. and was expected to show up the next morning at 08:30 with a smile for nose count.

It's going to get alot worse before things improve.

# 1589. FRB Responds to FCC Ruling Denying the Voiceless a Voice

Newsgroup: rec.radio.broadcasting
Date: 1995-08-08 00:00:00 UTC
From: frbspd@crl.com
Message-ID: <4074pe$8mj@vixen.cso.uiuc.edu>
Source record: 29958

FCC Rejects Low Power FM as a Voice for the
Voiceless and Rules Against
Free Radio Berkeley

After much the delay the Federal Communications Commission issued a ruling and decision in the case of Free Radio Berkeley. Rejecting in total the concept of a low power (under 100 watts) FM broadcast service, the FCC went further to state, in essence, that low power FM as a voice for the poor, disenfranchised and minorities would not be in the public interest. Recognizing that their fine schedule, under which they assessed a $20,000 fine against Stephen Dunifer, had been rejected by an Federal Appeals Court in the District of Columbia, they moved to a impose a statutory fine of $10,000. The case now goes back to Federal Judge Claudia Wilken who refused the FCC's motion for an injunction to silence Free Radio Berkeley. Another hearing/status conference is scheduled for Friday, September 22, 1995 in Oakland Federal District Court.

Luke Hiken, attorney for Free Radio Berkeley and Stephen Dunifer, commented, "In spite of the Court's request for guidance, the FCC's opinion reasserts the Commission's commitment to represent solely the interests of corporate media monopolies. In double speak, reminiscent of the Pentagon, the FCC suggests by allocating spectrum space entirely to the commercial corporate giants they assure the greatest "diversity of voices". They explicitly acknowledge that minorities and the poor do not have a representative voice on the air waves and, yet, indicate that such a state of affairs is in the "public interest".

Adding to this, Stephen Dunifer stated. "Such bald-faced temerity is what we can count on from an agency that is a captive of corporate media monopolies. As I have said before and will continue to say, 'the FCC can kiss my Bill of Rights'. In light of pending legislation which will allow unlimited ownership of media and communication resources and the most recent media mergers, our fight to liberate the airwaves becomes all the more important. Virtually every person to whom we explain our position supports the democratic right to communicate in a free and open manner. If the FCC wishes to take such an indefensible position, then so be it. With the help of the National Lawyers Guild Committee on Democratic Communications, my attorney Luke Hiken and others, we are going to exercise every legal option available to us. Further, our campaign to reclaim the airwaves will be intensified on all other fronts. This is a struggle for fundamental democratic and human rights".

Speaking for the NLGCDC, Peter Franck commented, "In the very week that Disney bought ABC and Westinghouse bought CBS the FCC kept its head in the corporate sand and claimed that its ban on low power community

based micro radio made sense and was constitutional"!

"Since radio and television were invented the issue has been how to ensure that the airwaves are used in the public interest, and that they are a tool of and for democracy. These developments (the latest mergers and the ruling in the Dunifer case) all prove that the 60 year experiment with government regulation of corporate media is a failure. A relatively weak government can't and won't compel the commercial media to do anything that weakens their profits. Only media like micro radio, free of excessive regulation, cheap, owned by the people who broadcast and by their communities can use the airwaves in the spirit of the First Amendment".

"In the era of mega media mergers the notion that a ban on micro radio is constitutional is laughable. We will continue to fight until the right of communities to broadcast is clearly recognized by the courts".

Allen Hopper, another member of the legal team stated. "After six months from the denial of the injunction motion and 2 years from requesting a hearing from the FCC, they have finally ruled, and their decision provides remarkable insight into the government's complete lack of understanding of the reasons for the communication revolution represented by micro radio. The FCC actually asserts that their complete capitulation to mega-watt corporate stations and complete ban of locally-originated micro-radio broadcasting is necessary to ensure more diversity on the airwaves. The FCC has furthermore completely ignored Judge Wilken's admonitions that the new technology represented by micro power radio would seem to require the FCC to reevaluate its rules. The FCC instead insists that its prior hearings into translators (low power FM transmitters which rebroadcast an outside signal to a community) gave it all the public input it needs to decide this issue. We look forward to finally having the opportunity to present to the court our full argument as to why in the FCC's obligation to serving the public interest demands that they permit micro power radio".

Reply-To: gregbo@netcom.com (Greg Skinner)

Hot 97.7 Says Goodbye to San Jose

Shortly after midnight, August 7th, KHQT, also known as Hot 97.7, signed off the air after over seven years of successfully serving the San Jose area. This move was in preparation for the simulcast of San Francisco-based KFOG 104.5. Recently, Susquehanna Broadcasting, owners of KFOG, purchased KHQT for $8.2 million.

Hot 97.7 listeners gathered in KHQT's parking lot on the morning of August 6th to give thanks and support to the KHQT staff. Many listeners also phoned in to express their regrets and wish the staff well. Several former KHQT staff members returned to participate in the sendoff.

Hot 97.7 began broadcasting the Dance/CHR format in February 1988 from a warehouse in Mountain View. Their popularity grew quickly in the San Jose area, until they became known as "San Jose's Hot 97.7." They provided many services to the San Jose area, including several community outreach and radio internship programs.

Hot 97.7 DJs Lisa Fox, Jerry Hart, and Greg Lopez will be moving on to KMEL 106.1. Other staff members are pursuing positions with KMEL and other SF Bay Area stations. Several weeks ago, Elvis and JV, Hot 97.7's "Morning Doghouse", left Hot 97.7 to do the morning drive at "Wild 107" KYLD 107.7, which is also simulcast on KYLZ 99.1.

PD Bob Perry gave a heartfelt speech to the staff and listeners during the last few minutes of the broadcast. In his words, "what's going on here ... is about people, people who have given their lives ... in order to help and entertain the people in San Jose."

Hot 97.7 closed its broadcast with Boyz II Men's "It's So Hard to Say Goodbye to Yesterday."

Westinghouse has weakened the programming at KDKA by hiring "amateur" talk hosts, reducing news staff and coverage, and other money saving moves. The parent company is in some financial difficulty.

Will this merger similarly lead to a weakening of CBS?

KDKA doesn't even carry the CBS Morning show, choosing to show an assortment of Disney cartoons. I guess that will change now. But, what else will?

# 1600. Re: MOR/Nostalgia Radio

In <3vkd4r$p8v@vixen.cso.uiuc.edu> jbenson@tcf.com (Joe Benson) writes:
[snipped comments on syndicated/local MOR/Nostalgia formats]

>Looking forward to any and all comments. Is there a future for this
>format? Why?

I think there is, but maybe not as a pure MOR/Nostalgia. I spend upwards of 40 minutes on my commute each day from Maryland to Virginia, passing straight through DC. As a 26yo male who fits more "generation x" stereotypes than he breaks, my dial should be firmly welded to WHFS (alternative rock). But with the tightening (or CHRing) of the station/format, I often find myself beyond mind numbingly bored with it.

That's when I hit SCAN or start running through the presets. Of course, age-approprate standards like WPGC AM and FM are both in my scan pattern, along with WAMC and WPFW, the NPR and Pacifica outlets. But my guilty pleasure in the morning is WWDC(AM), and the Eddie Gallaher Show ... big band, swing, forties, nightclub music: this morning I heard everything from Artie Shaw to new Barry Manilow to the Captain and Tennile to the Inkspots ("Java Jive") to Peggy Lee. In the part I snipped Joe said that people were ignoring Harry Connick Jr., Barry Manilow, Tom Jones, etc. as "the 'same old stuff'", but I think it's more a matter of not knowing what to do with it. The last Tom Jones album should have been all over alternative rock and CHR, and any programmer willing to build a demographic up should look at some bizzare hybrid of folk, hip hop, alternarock, world music, jazz, CHR, and nostalgia ... it'd probably be more than difficult to sell at first, and it'd never be number one in the market, but you could get a really high TSL from the cocktail/swinger /retro generation that's floating around out there.....

T.Carter Ross
(the .sig already says it, but I'd better reitterate, these are my opinons alone, not my employer's, and god knows I'm not a spokesperson for "my generation".)

area??

>you're impressed with numbers
Yes, Rich, I am. I'm pleased that there are quality programsinstead of the
re-tread of the day talk shows I hear so much.

>taking the talent's on air announcements too seriously

You indicated King had 450 stations prior to his show going off; but I
believe that Bell 'telling` the truth -- like you are with 75+ stations
for Bob.

> spots for gold coins and will kit
Haven't heard the gold coins/will kits, but it's usually the C.Crane
radio company, Absolute Flowers, and his [Bell's] eight page newsletter.

I'm :-) that live shows are on -- and now a choice between Bell, Bohannon,
and Bob.

# 1602. RDS/RBDS Broadcast on FM

Newsgroup: rec.radio.broadcasting
Date: 1995-08-08 00:00:00 UTC
From: Samuel Maldonado <samuelc@spin.com.mx>
Message-ID: <4074pp$8n6@vixen.cso.uiuc.edu>
Source record: 29971

I am interested in purchasing the following items:

FM tunners microcontrolled tunning for FM-II band
RDS decoders IC's
RDS/RBDS coders
RDS receivers low cost
RDS receivers profesional (brand name)

Thank very much for your responses Samuel C. Maldonado.

# 1603. Reel - To - Reel Users Survey

Newsgroup: rec.radio.broadcasting
Date: 1995-08-08 00:00:00 UTC
From: RobABass@aol.com
Message-ID: <4074pq$8n9@vixen.cso.uiuc.edu>
Source record: 29972

I would appreciate it if all replies to this survey, could be sent directly to my e-mail address, and then I will post a summary after a couple of weeks.

When replying, it is NOT necessary to use cut and paste to copy these questions back to me in your reply. When you want to answer a question, simply type the question number, and then your answer. i.e.

#1. I use Ampex GM 456, and I stay with this brand.
#4. A, E, and

Questions:

1. When you engineers Bias your station's tape decks, what brand of tape do you most often Bias it for? Do you change from brand to brand, or stay with one brand?

2. For those of you who stay with one brand, do you only bias it once, or do you bias it for every reel individually, in order to compensate for variances between batches of the same brand?

3. Those of you who stay with one brand of tape, what do you like most about it?

4. What is your most commen use for open reel tape machines at the present time: (choose all that apply)

A. Recording programs for later broadcasts (i.e. syndicated shows or interviews for local community service talk-shows)
B. Editing music to make it longer/shorter/remove certian lyrics
C. Commercials and Promos recording/production (note: please do not choose this for an answer, if all you are doing is taking pre-recorded spot reels from outside studios and dubbing them to carts)
D. Recording music reels for your normal music format.
E. Recording air-checks of station air-talent
F. Recording listener phone calls
G. Other (please specify)

5. Do you think you will always have a need for reel - to - reel decks, or do you plan to phase them out for digital workstation technology?

6. What brand tape machines are being used at your station, and what do you like most about them? If you have thought about

upgrading to newer open reel decks, what brand would you choose?

7. For those stations using MX5050's from Otari, when you Bias
the machine, do you:

A. Adjust bias trim so that when you switch back and forth
between the 1k and 10k tones, the tone levels balance
out
B. Over-bias the machine and then use the EQ trimmers
to re-gain the high frequency response.

8. If you use option B, by how many dB do you over-bias before
going to the EQ trim?

Thank you for participating in this survey. Depending on how many
responses I recieve, I anticipate posting some results within a week
or two.

Thanks again!
Rob

"The WonderShow of BBC Radio" actually pre-dates Monty Python by a couple of years. In 1967 EMI released an LP of sketches from the program. You might be able to find it at a used record store. The cast included John Cleese, Tim Brooke-Taylor and Bill Oddie (later of The Goodies), David Hatch and Jo Kendall (I'm told she's Felicity's older sister.). The stuff is hilarious. Good luck in finding a copy.

>the presence of spots...all stations these days need to sell RESULTS to
>their clientele, not just spots.
>
I have to agree with you on this "music sweep" business... I'm a weekend/
fill-in type at WPGU-FM (Champaign-Urbana, Modern Rock) and we also do 3
stopsets an hour, with a 30-ish minute music sweep between :50 and :20, and
have a few impressions.

First off, I don't think more is better. With 3 stopsets an hour, they're at
least a manageable length and the listener isn't as prone to tune out during
a break. Q-101 up in Chicago strikes me as a good example of what not to do.
They run a 45-min music sweep, and then the remainder of the hour is maybe a
couple songs and 2 very long stopsets. Don't look for the TSL to be very high
there, especially if the listener tries to come in at the wrong part of the
hour.

Second, the phrase "commercial-free" just grates on my nerves. It singles out
the commercials as something BAD, and that's not the kind of message that is
good to send to clients and potential clients. Therefore we sell the sweeps
as "30 minutes of non-stop modern rock." It keeps a nice balance between
continuity and actually being more than a jukebox.

And while I'm on the subject, let me point out one of the worst offenders:
WBLI (106.1 FM) on Long Island. They're an AC station and they sell "106
minute commercial-free music sweeps." IMHO, not good. It makes them no
better than popping a tape in the deck, and is rather off-putting to a
potential client. Of course I tuned out during the breaks :)

On AM broadcast and HF broadcast, I believe Harris has put solid
state transmitters together over 100KW, possibly up to 500 KW. These
are, as I recall, combined digitally modulated transmitters where there
are a bunch of RF amplifiers that are turned on and off according to a
digital code representing the audio.

# 1607. Urban bits & pieces

Newsgroup: rec.radio.broadcasting
Date: 1995-08-08 00:00:00 UTC
From: MHz@bitstream.mpls.mn.us
Message-ID: <4074pu$8nf@vixen.cso.uiuc.edu>
Source record: 29976

Reply-To: MHz@bitstream.mpls.mn.us

Bits and pieces from the urban radio realm:

*Atlanta's Hot 97.5 dumps the WQUL calls and is now WHTA.

*Terri Avery is now overseeing both Radio One AC properties in Maryland: WWIN-FM/Majic 95.9 Balto and WMMJ/Majic 102.3 DC. She's splitting her week between the two stations. WMMJ PD Lawrence Gregory Jones just left to return to Houston for mornings (and probably future programming duties) at KMJQ/Majic 102. Also departed: WWIN-FM MD Chris Reynolds.

*The new Warner Bros. Prince single, "I Hate U," leaked the weekend of 7/28 on stations in Philly, Pittsburgh, and Balto, eventually hitting DC and Chicago, too. WB took its time in delivering C&Ds midweek. The song is scheduled to go to radio late this month.

*Larry Berger (ex-WPLJ) is out as PD of KSOL/San Francisco. MD Karen Yamamoto resigned immediately following Berger's sacking. New OM/PD is Bob Hamilton of co-owned KYLD/KYLZ.

*Michael Saunders returns to radio after a brief dabble in artist management. The former WPEG/Charlotte PD is in at Detroit's #1 WJLB. Former 'JLB PD Steve Hegwood is now at Atlanta's new youth-driven Hot 97.5.

*George Hamilton Cook is the new PD at Radio One's newly-acquired WKYS/DC. He comes, most recently, from market-leading WWWZ/Charleston, SC.

*Market-leading stations in the to-date released spring ARBs (12+):
WVEE/Atlanta
WTTH/Atlantic City
WWWZ/Charleston, SC
WGCI-FM/Chicago
WWDM/Columbia, SC
WFXE/Columbus, GA
WJLB/Detroit
KBXX/Houston (churban; but that's just a nice way of saying urban, without saying Black)
WJMI/Jackson, MS
KIIZ/Killeen
KPWR/L.A. (churban; see above :) )
WIBB-FM/Macon, GA
WHRK/Memphis
WBLX-FM/Mobile
WRKS/NYC
WDAI/Myrtle Beach
WQUE/New Orleans

WOWI/Norfolk
WQOK/Raleigh (tied)
WCDX/Richmond
KMJJ/Shreveport
WPGC-FM/Washington, DC (churban, see above :) )

They are Blau-Knox towers, and quite a few built by the company are still standing, though few of them are so impressive. Of the "Diamond" shape there are just four stations, I believe. In addition to WSM and WLW, WBT in Charlotte has three of them (one is a replacement); and WADO in New York has one. The WADO site, originally WOV, is across from the Meadowlands Arena on Paterson Plank Road in New Jersey.

For what it's worth, the WSM and WLW towers are among the tallest AM towers in the country. Both are in the 800-foot range. The tallest belongs to WKY/930 in Oklahoma City, and #2 is WNAX/570 in Yankton, SD. WNAX, though only 5000 watts (one tenth WSM and WLW), serves prairie ground that is very conductive, and reaches most of ND, SD, IA, NE and MN with its ground wave. Only KFYR/550 in Bismark, ND, also a 5000-watt station, covers more ground.

This is probaly the stupidest question to ask, so Please, NO FLAMING ME!!

I had heard from a friend that WLW was the official station of the U.S.
Governemetn, and that if the U.S. ever went to war, or we were attacked
that WLW could flip a switch that would put them at full power, and they
would be able to be heard all over the country. So that all us Americans
would listen to WLW for updates on the big war. Any Truth to this?

Probably not!!

Don, here's an item from _Famous First Facts_, a reference book found in many libraries:

Nov 25 1920 - 1st FOOTBALL GAME (COLLEGIATE) BROADCAST was presented by (WTAW) of College Station, Tex. The game was played on Thanksgiving Day between Texas University and the Agricultural and Mechanical College of Texas at College Station. At that time the station was operating under an experimental license and had the call letters 5XB. A spark transmitter was used and the transmission was in code. This was the first play-by-play broadcast of a football game.

I'm not familiar with the transmitter you named, but since the 1920 broadcast by 5XB was in code, I suspect the Iowa State 1916 broadcasts were too.

_Famous First Facts_ appears to be accurate in most of its radio entries, so if indeed these 1916 broadcasts did take place, it would seem this fact isn't widely known.

Other sources report that an experimental station at the University of Minnesota "attempted to air football games using a spark transmitter and regular telegraph signals" in 1912 and that the first football game (Pittsburgh vs West Virginia University) was broadcast by Harold Arlin on KDKA in the fall of 1921. Perhaps the KDKA broadcast was the first voice broadcast.

# 1614. ADMINISTRIVIA: Posting Guidelines for this forum

Newsgroup: rec.radio.broadcasting
Date: 1995-08-08 00:00:00 UTC
From: EDITOR@airwaves.com
Message-ID: <406ak4$nfh@vixen.cso.uiuc.edu>
Source record: 30131

It has become time for me to set out the basic guidelines for posting
to the rec.radio.broadcasting newsgroup, and some basic explanations
of what the group is for, and about.

Newsgroup rec.radio.broadcasting (rrb), and email digest
AIRWAVES RADIO JOURNAL (ARJ) are designed to provide a public forum
for the dissemination of professional-level information and
conversation pertaining to radio broadcasting. By
professional-level, we mean discussions of matters of interest to
radio broadcast professionals and those with a strong and serious
interest in radio broadcasting. We do not limit participation to
broadcast professionals, but do require a certain level of maturity
and intelligence when posting here.

In order to keep the forum from erupting into flame-wars and to keep
it on topic, rrb and ARJ are *moderated* forums. This means that all
posts must be approved prior to publishing. This document is designed to
give readers a feel for what is acceptable to publish here but is not
designed to be an all-inclusive charter.

In order to be accepted for inclusion in rrb/ARJ, a post must have the
following minimal attributes.....

1) All posts must have a valid name attached to them in some way.
This means one of the following...
a) A *real name* (your actual name) This is preferred.
b) Your *on-air name* (you must include the station/network at
which you use that name)
If your Internet host doesn't include a real-name as part of the"
From: line, then you should add it to the end of your post.
If you are posting sensitive information, and don't want your
name used, let me know and I'll try to cover for you.

2) All posts must have a valid 'SUBJECT' line.
This means that the subject line must accurately reflect the
content of the post. As a thread drifts from the original
focus, the subject line should be changed to reflect that shift.
Posts without a Subject: line or ones which use a bogus
subject may not be posted.

3) All posts must pertain to the charter of the group, *RADIO* broadcasting.
Occasionally a post about TV will be OK'd if it appears to
have a broad interest to radio people. However, this is considered an
exception and is not encouraged.

4) All posts must have a valid return address. Posts with email addresses that bounce may be excluded as a means to curb forgeries.

5) All posts must be submitted as "ascii-text".
Binaries, MIME and other attachments are not post-able to netnews.

6) All posts must be formatted to an absolute maximum of 78 columns. The standard for a text-terminal is 80 columns. We specify 78 to allow for quoting in followups. Failure to do this will result in "line damage" which is the uneven wrapping of lines that are too long.

7) Quoting of previous article text should be kept to a minimum and *never* exceed 49% of the entire article. Never quote the signature files from previous posts. Only use the bare minimum needed to make your points. If replying via the Digest, "please" never quote the entire (or substantial portion of) the digest.

8) Please distinguish between the 'followup' and 'reply' functions of your newsreader. Followup sends your response to the group, reply sends it to the poster via email. When replying to a personal request for information which is of limited or no real interest to the entire group, please email to the poster. There is no purpose served by posting replies to very personal requests to the entire globe. However, if the requested information is of potential general interest, then please do post.

9) When posting Help Wanted or Positions Wanted, please include a Full *REAL* name, Company name, postal address, FAX and/or voice phone and (if applicable) email address.

10) When asking for, or offering, information about a local station or personality, always give a little background. Remember most people are not familiar with your market. If you use a station's slogan, always include the calls and city too.

11) Commercial postings are a delicate issue. Some would like to see none of it, others seem to take the tack that mild commercial posts are OK provided they are not too 'in your face' and are part of the flow of conversation. The moderator makes all final judgements on acceptability of commercially-motivated posts. If you are in any way connected with the company you are posting about, you *must* disclose that affiliation even if you are not an official spokesperson. Avoid blatant commercials. Make your points in conversation. Never overtly bash a competitor's product. Be nice, it will be to your ultimate benefit.

12) Remember that you, the poster, bear all responsibility (if any) for copyright, libel, trademark and other matters when posting to the Internet (not just to this group). Please try your best to be accurate in your posts. If you post your opinion, make sure it is cabled as such. Please try to obtain permission when reprinting from copyrighted sources. Always give attribution of your sources when available. Summarize when possible to avoid potential copyright issues. So far copyrights have not become a problem on the Internet,

but as the net grows, it may become more of an issue.

13) Flames are not permitted on this forum. A flame is defined as "personal insult or ridicule". It is perfect;y fine to argue the points or opinions raised by a poster, but not to personally insult the poster. In other words it is acceptable to say... "Your stated opinion is stupid..." NOT "You are stupid for having that opinion..." It is fine to articulate and argue points of view, but make sure you counter it with another point-of-view and not just hit people over the head. Calling of names is also considered a flame. We have conversations here, not shouting matches.

Also avoid posting...

* Known false or misleading information.
* Items that you know are a violation of copyright.
* Overtly profane posts (profanity is not forbidden, just use discretion).
* Loooong signature files. 4 to 6 lines is a good soft-limit.

...VERY IMPORTANT... ...VERY IMPORTANT... ...VERY IMPORTANT...

Every poster is responsible for what (s)he posts. I make no effort to verify authenticity of postings and any copyright, slander or other legal matters arising from a public posting belong with the poster. Please use discretion when posting potentially damaging information to this, or any public, forum.

Thanks for reading. Hopefully this will clear up some of the misunderstandings about posting to rec.radio.broadcasting. For a more inclusive charter of this group, send email to rrb-charter@airwaves.com .

After taking a 30 day medical leave of absence, WSIX-FM (ctry) midday personality Chuck "Hoss" Burns says he will retire from the station after developing AIDS. Burns was diagnosed HIV positive ten years ago. On August 15, WSIX will broadcast a daylong tribute and radiothon for Burns featuring Garth Brooks, Tracy Lawrence, Martina McBride and Diamond Rio. Proceeds from the radiothon will go to the pediatric AIDS unit at St. Jude Children's Hospital in Memphis.

Bill Vogel, Sr., former owner of WGNS Murfreesboro has died. He was 72.

WRLG-FM Smyrna will begin simulcasting its modern rock format on WYYB-FM Dickson. Smyrna is about 15 miles south of Nashville. Dickson is about 40 miles west of the city. Thunder 94, as WRLG is known, hopes to improve its coverage of the Nashville area.

Friday August 11 The Nashville Network cable tv morning "Ralph Emery Show" will feature Carl Geisler who does mornings at KIKK Houston, TX.

# 1618. New England Radio Watcher: Down to the River...

Newsgroup: rec.radio.broadcasting
Date: 1995-08-08 00:00:00 UTC
From: fybush@world.std.com
Message-ID: <4074om$8lb@vixen.cso.uiuc.edu>
Source record: 30135

*WLYT, 92.5 in Haverhill MA, has taken a dive into "The River." That's the station's new nickname as of Monday morning, 8/1. Format for the 35kw powerhouse 35 miles north of Boston is the AAA-80s pop sort of mix they've been using for the last few weeks. A call letter change is reportedly in the works. This is an exciting breath of life for a station that's been largely ignored, despite a solid class B signal that rimshots Boston and is solid in the Merrimack Valley area along the Mass-NH border, where the other FMs (WSSH 99.5 Lowell, WEGQ 93.7 Lawrence) are now operating out of Boston, at least as far as studios are concerned.

*The big media deals of the last two days are having their aftershocks in New England. The ABC-Disney deal won't change much, since ABC has been busy selling its properties here. WPRO AM-FM Providence went to Tele-Media a year or so ago, and CapCities/ABC's several newspapers in Connecticut have been sold off as well. CBS/Westinghouse is another story. The deal creates an immediate AM-FM-TV combo in Boston - Group W's WBZ AM-TV and CBS's WODS FM. Look for "Oldies 103" to move from downtown Boston to BZ's newly-expanded building. Westinghouse also ends up in line to get WPRI-TV 12 in Providence, which CBS has applied to buy from Narragansett Broadcasting. Since WPRI-TV and WBZ-TV have significant overlap, a waiver will be needed.

*Layoffs at WGBH: Boston's public broadcasting behemoth is laying off 25 staffers, citing budget problems. Meanwhile, listeners upset over planned schedule changes that will reduce daytime classical programming in favor of news are forming a listeners' group to protest the move. The big issue: the planned cancellation of Ron Della Chiesa's afternoon "MusicAmerica" program.

*A weird one bites the dust: Anyone puzzling over my description a few weeks ago of WCYY Biddeford ME/WCYI Lewiston ME (Portland market) as an AAA/CHR hybrid need no longer wonder; that format is history. The station, known on air as "WCYY," has flipped to a modern rock format. Quite a combo when paired with sister station WBLM 102.9, the 100kw AOR giant in Portland. I *do* have 45 minutes of the old format should anyone be curious...

-=Scott Fybush - fybush@world.std.com=-

# 1619. PHOENIX SPRING ARBITRONS

Newsgroup: rec.radio.broadcasting
Date: 1995-08-08 00:00:00 UTC

PHOENIX SPRING '95 ARBITRONS
as published locally...all numbers are 12+
(winter book)---->spring book

1. KTAR(620)News/Talk 9.6--->8.9
2. KMLE(107.9)Country 7.7--->7.5
3. KNIX(102.5)Country 5.7--->7.3
4. KKFR(92.3)CHR/Urb. 5.2--->5.4
5. KFYI(910)Talk 5.3--->5.1
(tie)
5. KOY(550) Adult Stds. 6.0--->5.1
7. KUPD(97.9)AOR 4.9--->5.0
8. KKLT(98.7)A/C 4.1--->4.4
9. KOOL(94.5)Oldies 3.2--->3.9
10.KHTC(96.9)70's 2.8--->3.3
11.KDKB(93.3)AOR 3.7--->3.2
(tie)
11.KSLX(100.7)Cls. Rk. 3.4--->3.2
13.KESZ(99.9)A/C 3.7--->3.1
(tie)
13.KVRY(104.7)A/C 3.5--->3.1
15.KYOT(95.5)Jazz 2.3--->2.9
16.KZON(101.5)AAA 2.7--->2.2
17.KEDJ(106.3)Mod Rk 2.4--->2.1
18.KTWC(103.5)AC/MOR 1.2--->1.3
19.KVVA(860)Spanish 0.7--->1.1
20.KOOL(960)Oldies 0.7--->1.0
(tie)
20.KSUN(1400)Spanish 0.8--->1.0
22.KMJK(106.9)Urban 1.3--->0.9
23.KISO(1230)UrbanAC 1.0--->0.8
(tie)
23.KCWW(1580)Country 0.8--->0.8
25.KGME(1360)Sports 0.8--->0.7
26.KPHX(1480)Spanish 0.7--->0.6
27.KXAM(1310)Talk 0.4--->0.5
28.KFNN(1510)Business *--->0.4
(tie)
28.KUKQ(1060)Alternative *--->0.4
(tie)
28.KBZR(103.9)Rock *--->0.4
(tie)
28.KHOT(100.3)Talk 0.7--->0.4
32.KVVA(107.1)Spanish *--->0.3

Summary:
Despite losing 7/10ths of a share(no Suns basketball, OJ boredom setting in), KTAR continues it's commanding[nearly 4 point] lead over rival KFYI.
KNIX roars back from its worst book in history...making it a 0.2 difference between it and KMLE.
KOY's nearly full point loss can be attributed to warm weather, as the 50+ snowbirds head back to the midwest...the numbers will rise again in the fall and winter books.
KOOL-FM continues its strong resurgence now that it has the oldies format to itself.
The first winning book in nearly 3 years for Bonneville's FM in Phoenix. K-Hits(KHTC)took a solid half-point bounce into the top ten.
Last year's success story, KSLX, continues its downward trend. In the fall, this was a 5.1...now it's a 3.2.
Down books as well for AC's KESZ and KVRY...both dropping to a 3.1 while mainstay KKLT moves up slightly to a 4.4.
Smooth Jazz KYOT moves up to a survival number....almost a 3 share....but sister
KZON drops a half point.
No Howard Stern effect in Phoenix yet. The two stations that carried him during this book are both down...KGME from a 0.8 to a 0.7 and KHOT from a 0.7 to a 0.4. KHOT's performance was so disappointing(the 0.7 was for its previous incarnation as heavy metal KZRX) that KHOT is now simulcasting KEDJ...which has added Stern in AM

drive...resulting in a triplecast for Stern's morning show.

# 1620. Kansas City Spring 1995 Ratings

Newsgroup: rec.radio.broadcasting
Date: 1995-08-08 00:00:00 UTC
From: transvox@interstate.net
Message-ID: <4074op$8le@vixen.cso.uiuc.edu>
Source record: 30137

Written August 4, 1995
==========
Disclaimer:

Source for 12+ numbers is the Kansas City _Star_, August 4, 1995;
source for 25-54 rankings is a report on WDAF-TV, August 1, 1995.
By subscribing to this Usenet newsgroup, to this mailing list, or by accessing this "World Wide Web" page or "Web" pages linked to it, you give your assent to the assertion that Usenet, this mailing list (AIRWAVES Radio Journal), and/or "World Wide Web" pages associated with the Mid-America Radio Page qualify as a journalistic news medium for the purposes of this report. Other comments and observations are solely those of the author, based on his background in the Kansas City market.

The rest of this article shouldn't be so boring.
==========
Country KFKF(FM) has regained bragging rights to the number-one position in the Spring 1995 Arbitrons in Kansas City, pushing AM competitor WDAF, "61 Country", into third place.

Urban contemporary KPRS(FM) holds steady in second place, though with some slippage in the 25-54 age group. Oldies KCMO-FM continues its march upward, now in fifth place 12+ and third place 25-54.

Smoooth jazz (misspelling deliberate) KCIY(FM), "The City", zooms up to a 4.3 share in its first book since the format began March 30. That's the highest share earned by the station at 106.5 since the 1988-89 heyday of Rock-40 KXXR(FM).

Individual Station Profiles:

KFKF(FM) (94.1): Not just number-one in the 12+ "vanity" numbers, this longtime country station is also number-one in 25-54. Give credit to the end of KFKF's duopoly with another country station, KKCJ. All KKCJ ever did was drain audience share from KFKF, allowing WDAF to slip into first place. KFKF's new duopoly partner, young country KBEQ-FM, does seem to appeal to a different audience. (8.2 Spring 1995, 7.5 Winter 1994; 8.2 average 1994)

KPRS(FM) (103.3): Number two once again, this time for the 45th anniversary of the AM station (now KPRT) where KPRS originally started. An institution in Kansas City's African-American community, "Hot 103 Jamz" does seem bland compared to urban stations in other cities such as San Francisco, where I recently visited. However, Kansas City generally is bland compared to San Francisco, so I guess this makes sense. (8.1, 8.9; 7.8)

WDAF(AM) (610, 5 kW-U): Has the "Flatlands Godzilla" been caught flat-footed? In May, I mentioned a "ticking time bomb" in the winter book: the station's low shares in the 25-54 age group. It's even worse now. In the winter book, "61 Country" placed 10th in the 25-54 demo. In this book, WDAF slipped to 12th. (7.3, 9.8; 9.9)

KCFX(FM) (101.1): A bit off from its winter performance. This is the second book under the 70s classic-rock format, which really isn't all that different from "The Fox's" previous classic-rock paradigm. It's still number two in the 25-54 age group, the same ranking KCFX had in the winter book. (6.2, 6.5; 5.3)

KCMO-FM (94.9): Kansas City loves oldies, and "Oldies 95" pretty much has the market to itself except for a 500-watt suburban AM station, KCXL. This is KCMO-FM's highest share in at least 13 books. Moreover, KCMO-FM ranks number three 25-54. It's the top performer in the Bonneville duopoly. (6.2, 4.9; 4.8)

KBEQ-FM (104.3): It's the first book under the Sconnix-EZ duopoly with KFKF(FM), but "Young Country Q-104" seems to have been affected not much at all. A steadier performance this time out compared to past surveys. It appears KFKF and KBEQ-FM are serving mutually complementary audiences without much overlap. That seems strange, since the station's playlists are nearly identical these days. I guess it's all positioning. (5.8, 5.9; 5.9)

KLTH(FM) (99.7): What can you say about a station whose performance is as successfully unobtrusive as its soft-contemporary format? *The* choice when you need music on hold for your phone lines. (5.5, 5.4; 5.7)

KMBZ(AM) (980, 5 kW, DA-N): This news/talker continues to gain strength--up a full percentage point from the Spring 1994 book. I credit the station's improved news commitment and a good, interesting selection of local talk hosts sandwiching Rush Limbaugh, who once was fired from KMBZ. (5.5, 5.2; 5.0)

KQRC(FM) (98.9): The "Rock" is on a roller-coaster ride, with a much-improved performance from a flat winter book, good enough for ninth place. Its hard rock/sorta-modern rock format no doubt is hurting KYYS, KISF, and perhaps even Lawrence rimshot KLZR (KLZR did not appear in this survey). (5.3, 3.9; 5.0)

KMXV(FM) (93.3): Down a bit from Spring 1994. It was one year ago that "Mix 93.3" dumped hot adult-contemporary for a contemporary-hit format. The station has gotten progressively dancier. Between that and the general industry trend away from contemporary-hit formats, KMXV seems to be beating the odds with style. Oddly enough, I noticed no contemporary-hit stations at all in San Francisco--and a CHR station in San Jose is about to go away. (4.5, 4.0; 4.0)

KYYS(FM) (102.1): "KY-102" just got rid of its program director. KYYS isn't saying why, but the station's motivation for the move seems clear. Sharper competitors are stealing share with newer concepts. KYYS GM Mike Campbell was quoted in the Kansas City Star as saying, "My expectations are that we will continue to be a great AOR station."

Hello! Mike! There *is* no such thing any more.
Hmmm...maybe the real problem *wasn't* the PD. (4.4, 4.5; 4.8)

KCIY(FM) (106.5): "The City" has a tough act to follow with this book's performance. It did even better in the 25-54 demo, ranking sixth. However, the 106.5 frequency has a history of being the home of stations that rise rapidly only to fall just as fast, such as KKCI in the early 1980s and KXXR, which jumped from a 1.1 in the spring of 1988 to a 6.7 in the spring of 1989 (after a 7.0 the preceding winter). (4.3, 1.3; 1.8)

KUDL(FM) (98.1): The long-term trend for this gold-based adult-contemporary station seems to be downward in the 12+ numbers. Of course, it's not selling 12+, and it's no doubt targeting female listeners. However, it may be in a similar pickle to KYYS: a one-time solid format gradually being niched to death by newer competitors with more sharply focused formats. (3.9, 5.2; 4.8)

KISF(FM) (107.3): "Kiss 107.3" is hanging in there despite numerous challenges, including a weaker signal, not being able to call itself a modern-rock station because Lawrence's KLZR got there first, competition from KLZR despite the "Lazer's" decidedly non-laser-like signal, and remnants of KISF's former contemporary-hit image. KISF does seem to be working on the lattermost problem. Its positioning now sounds almost exactly like San Francisco modern rock pioneer KITS(FM) (Live 105): just substitute "new rock revolution" for "modern rock revolution." (3.1, 2.6; 3.2)

KXTR(FM) (96.5): "Classical KXTR" has stirred up quite a controversy among the breakfast-linen set with its spiced-up approach to morning drive. Why, host Don Crawley has dared play show tunes and --GASP!-- he played Irish music on St. Patrick's Day! Why, the gardener had to go out to the cemetery because the vases had flipped over from KXTR listeners spinning in their graves. Why, there just had to be at least three letters a week to the Kansas City Star complaining about what was going on at KXTR. OK, OK, I'll stop it now other than to note the station's performance does seem to be softening a bit, down a bit from the previous spring. (2.9, 3.5; 3.2)

KCMO(AM) (810, 50 kW-D, 5 kW-N, DA-N): The weakest performer in the Bonneville duopoly, apparently not helped by occasional live broadcasts from the O.J. trial (which are also being carried live by Foxed-up WDAF-TV). During the 1970s and early 1980s, KCMO was Kansas City's news leader. With those call letters and that signal, how could it fail? Well, Gannett tried hard to fail and succeeded--Bonneville is trying to pick up the pieces, it's clearly evident, but what can KCMO do that KMBZ isn't doing? (2.3, 3.6; 3.3)

KFEZ(AM) (1190, 5 kW-D, 1 kW-CH, 250 W-N, DA-N): Steady compared to last spring and up a bit from its 1994 average, the stereo nostalgia station no longer has any competition in this format. To think that this station was once "Your 24-Hour Dancing Machine" back in 1978! (2.3, 2.9; 1.8)

Other Stations:

* KPRT(AM) (1590, 1 kW-D, 47 W-N) African-American gospel and talk. (1.7, 1.4; 1.8)
* KCCV-FM (92.3) Gospel. (1.0, unavailable; 0.7)
* KCCV(AM) (760, 6 kW-D) Gospel with homophobic hate talk. (0.7, unavailable; 1.3)
* KBEQ(AM) (1030, 1 kW-D, 500 W-N, DA-2) Fulltime relay of Chuck Harder's People's Radio Network. (0.7, 1.0; 0.8)
* KNHN(AM) (1340, 1 kW-U). Satellite talk and CNN news. (12+ share not available, 1.1; 1.0)
* WHB(AM) (710, 10 kW-D, 5 kW-N, DA-2). Farm and country, largely relaying KMZU(FM), Carrollton, Missouri. Along with KCMO, Kansas City's other wasted blowtorch. (12+ share not available, 1.0; 0.8)

# 1621. Sacramento Radio News - 8/1/95 (catching up and then some)

Newsgroup: rec.radio.broadcasting
Date: 1995-08-08 00:00:00 UTC
From: mward@crl.com
Message-ID: <4074oq$8lg@vixen.cso.uiuc.edu>
Source record: 30138

Greetings from the Sacramento Valley!

I don't have the latest (Spring '95) numbers handy. Briefly, though - once again number one, for about the 21st straight book, is my employer KFBK (AM 1530 "News Radio 1530"). We're down about a point and a half from the Winter '95 book, but still on top of number two by about a couple of points. I'll dig up the numbers and post them shortly. We're also number one in the 25-54 "money" demo once again. I'll leave the commentary to certain short order restaurant reviewers.

*Bob Keller and his "Cafe" program return to local radio. The show was most recently heard on KQPT (100.5 FM "The Point"/album rock). It returns to radio via KSEG (96.9 FM "The Eagle"/classic rock). (Bob, you're running out of stations on the FM dial... ;)

* "Magic 1380" is reportedly no more. According to an article in the Sacramento Bee, they're set to switch the former KSMJ (AM 1380 R&B, sports, talk) to all sports as "The Score 1380" (KMJI) tomorrow. It's more of an evolution than a revolution for the AM sister of KSFM/FM 102. It's been running the "Sports Byline USA" program with Ron Barr and that network's overnight sports talk shows for some time, and has been the home of San Francisco Giants baseball for some time as well. The satellite-driven R&B music will be replaced with satellite-driven sports talk for the most part, with morning drive filled by the "Bob & Tom" show out of WFBQ/Indianapolis. Middays will see a syndie sports talk show hosted by Jim Rome (XTRA Sports 690 in San Diego). Afternoon drive will reportedly eventually be local, pitting the station straight up against the PM drive sports talk fest on KHTK ("Hot Talk 1140") with Tim Roye and Grant Napear. The local PM drive show on 1380 would be the market's third local sports talk show (KFBK's "Sports Talk" with Marc Moser at 7 PM is the other). Rounding out the schedule, including the aforementioned "Sports Byline" network shows, are play by play choices including the Oakland Raiders, Stanford and UCLA.

This makes the new "Score 1380" the market's first all-sports station since KSAC/1240 left the airwaves last year, with ratings only slightly better than the sub-1.0 level shown by the current Magic 1380. KHTK has a sports-oriented focus, but isn't billing itself as a sports station.

KMJI is also the third set of call letters for 1380 in as many months. They flipped from KSMJ to KIMN recently, and have done it again to KMJI. Odd, that they'd choose call letters that look even more like "Magic" now that they're dropping that handle. ;)

* Construction continues at 1440 Ethan Way, Suite 200, for the studio facilities for KHYL (101.1 FM "Cool 101" Oldies). The now Chancellor Broadcasting owned station, sister to KFBK and KGBY (92.5 FM "Y92" Hot AC), is

currently on Marconi Avenue near Fulton. Expect the move to happen by September. The hammer and nails are flying fast and furious. ;)

*In the Radio With Pictures department: KCMY Ch. 29, one of two Home Shopping Network stations in the market (KFTL Ch. 64/Stockton is the other), drops HSN. They're running an infomercial network called "InfoMall", and also become a second outlet for programs produced by ABC affiliate KXTV Ch. 10. Ch. 29 reruns the noon edition of "News 10" four times from 3 to 5 PM, and will also run other Ch. 10 programs ("Pulse", etc.). But Ch. 10 apparently is unable to LMA the station like KCRA Ch. 3 (NBC) has done with KQCA Ch. 58 (UPN), and fully program it. At least for now, anyway.

Ch. 10 isn't really promoting the new connection heavily. The only mention I've seen so far was a brief live reference to it at the end of News 10's midday show, the one being repeated on Ch. 29.

Mike
(the views and opinions expressed are not necessarily those of KFBK, etc.)

# 1622. San Diego Radio Watcher: 8.4.95

Newsgroup: rec.radio.broadcasting
Date: 1995-08-08 00:00:00 UTC
From: San Diego Radio Watcher <chris@terminus.wccs.saic.com>
Message-ID: <4074or$8lh@vixen.cso.uiuc.edu>
Source record: 30139

Here's the latest round of news from the San Diego market:

Weaving Webby Worlds: KFMB is on line [well, sort of]: To visit
the site, point your browser to:
http://www.cts.com/browse/comptalk/kfmb.html
It's being maintained by Larry Piland, host of the Saturday show,
"Computer Talk Live," of 760, KFMB.

Monday will be the official announcement of Roger Hedgecock's web
page. The KSDO host has promised to have many links, and be "very
colorful." When known, I'll place it in my web page [address and
shameless plug at end.]

August is here, and the pigskin season will soon be flying. Notable
changes in the airwaves as KCBQ-AM [1170, 50kw/1kw DA] picks up the
[city] Raiders football. This, along with NASCAR auto racing,
Unlimited Hydroplane racing, and San Diego CISL Sockers.

XETRA sets the fall broadcast team for the San Diego Chargers. A surprise,
but a good selection, by management is Chet Forte! Part of the "Loose
Cannon" show, he'll have 20 opportunites to show he has color capability
with the team. He joins the team of Lee Hamilton and analyst Jim
Laslavic. [XETRA 690 50kw DA, relay KWNK Simi Valley 670]

Here's the station list for the Chargers and UCLA networks. Xtra Sports
690 is the flagship station. [thanks the to Xtra Sports for helping
out. http://www.xtrasports.com ] There may some additions to both
networks before the seasons begin.

Charger network (August) UCLA network (August)
XETRA 690 San Diego Football and Basketball
KBCO 1190 Denver XETRA 690 San Diego
KBLU 560 Yuma KAMP 1430 el Centro
KENO 1460 Las Vegas KAVL 610 Lancaster
KGME 1360 Phoenix KCIN 1590 Victorville
KHTK 1140 Sacramento KCKC 1350 Riverside
KPSL 1010 Palm Springs KGME 1360 Phoenix
KWNK 670 Simi Valley KISN 570 Salt Lake City
KWST 94.5 el Centro KMJI 1380 Sacramento
KWNK 670 Simi Valley

Could KIIS-AM, Los Angeles, be heading for a sports alternative? I've
been e.mailed that Don Imus will soon join the station, as it splits
programming from the FM side; plus will offer some sort of sports
package. That would give the LA basin three stations to choose from:
Number one XETRA 690, and the attempt of the KMAX 107.1 trio stations.

As noted last week, KLSX [97.1 FM] became "Real Radio" with a talk format.
Ken Leighton, of the Escondido Times Advocate pointed it out right:
this attempt has been done successfully by an AM station in the LA area.
The station, which has many critics, but has the numbers, and is appealing
to a wide age group. KFI [640 50kw] pummels the competition into submission,
and currently, are way out in front with the listening audience.

I'll insert a bit of editorial comment here: the recent media mergers
disturb me. When big companies own news media, will their report reflect
that? Will CBS be inclined to expose a Westinghouse mess in a defense
contract? Can ABC review a Touchstone movie the same way? Does NBC
ask GE if it's ok to report a negative item? In the same vein, does
TV Guide give preference to FOX? There are no independent networks left
in the U.S. now, how SAD for the fifth estate. I'll entertain views
at my e.mail box.

The San Diego/Los Angeles Radio is averaging 20 hits per day! Thanks to
all who have left comments. I fine tune the HTML so all viewers can
download it quickly -- but AOL's is a problem. Those not on the
webby world, can receive an ASCII version by e.mailing me.

# 1624. Re: ABC to become a Mickey Mouse operation

Newsgroup: rec.radio.broadcasting
Date: 1995-08-08 00:00:00 UTC
From: jcrose@tiac.net
Message-ID: <4074ot$8lk@vixen.cso.uiuc.edu>
Source record: 30141

Video Trivia:

Disney and ABC go _way_ back.

In the early 50s, ABC/TV was looking for a blockbuster program to build their entire schedule around (they were still operating in "spin-off from NBC" mode). Disney had gone into hock just to build a model of his proposed theme park in Anaheim, and was desperate for financing.

Walt gave ABC (Goldenson?) "The Wonderful World", which let them capture Sunday nites away from Ed Sullivan. The network, in turn, put together a financing syndicate for Disneyworld.

Other early ABC/Disney successes included the Mickey Mouse Club, Zorro, Spin & Marty...

When Disney jumped to the _color_ NBC network in 1960, ABC was already well established.

I have an old vinyl LP, on BBC Records, that contains a compilation of
their best skits. Hilarious stuff ... this is where John Cleese got his
start. I doubt it's been re-released on CD though.

I don't know if Bloomberg is on the web because their own system is Data General main/mini based
and completely proprietary. They sell information to most banks and brokerage firms through leased
multi-media terminals and probably don't want to give it away free.

We are a Bloomberg affiliate bothin Tulsa and Las Vegas meaning that we have the terminals in both
radio stations as well as access to their long form programming. (They own WBBR in New York).

It's the best news service you can have.

The TV signal is available on DSS (along with the radio signal on alternate audio) and while I won't
apologise for their weather, I will say it is usually better than you describe.

From: Randall Berry <rberry@CapAccess.org>
Message-ID: <4074p1$8lt@vixen.cso.uiuc.edu>
Source record: 30145

I was wondering if anyone has had an experiance with the typical
500Z syndrome where the Cathode/Filiment pin becomes unsoldered. I have a
pair that have been tested for good emmision but the pin is loose on one.
I am curious as to the possibility of resoldering it myself. I have
contacted Eimac and the date code shows the tubes well out of warantee
they refused to repair even for labor costs. I would hate to have to buy
a new pair when these will work fine.

Is there any way to re-solder these pins I'm planning on using
Silver Solder of course but my concern is the heat, could it possibly be
damaging the envelope or the internal componants?

Any assistance would be helpful. Thanks in advance.

Probably nothing will happen to CBS Radio. I don't think the FCC forced GE to sell the radio stations and network; I think they just wanted out of a marginally-profitable business. Remember that NBC is just a drop in the bucket compared to GE's worldwide businesses. It's likely that GE bought NBC simply to help control their own public image.

Historical note: This is not some sudden entry for GE, Westinghouse, or Disney into broadcasting. GE and Westinghouse founded and owned RCA which started NBC. Disney had a deal with ABC in the 1950s where ABC would help finance Disneyland and Disney would provide programming to ABC. (The "Mickey Mouse Club" and the nightttime "Disneyland" TV shows among them.)

Than who will provide the necessary cash flow to pay down the enormous debt that Westinghouse/C.B.S. is going to assume for this sale? Westinghouse has said they will sell some part of their organization to provide cash to help but if yesterday's (8/1) announcement is correct the newly merged company is going to rely heavily on broadcast (ie: radio) to keep the dollars flowing the the lenders happy.

True, a great portion of this deal depends heavily on what the federal government is going to do as far as lifting the ownership caps but with things being the way they are in Washington I feel it is a done deal.

>hymowitz@zeus.towson.edu

Westinghouse can keep it if they want it. There never was a rule barring common ownership of tv and radio networks (as opposed to stations). RCA sold NBC Radio Network because they just didn't want to be in the radio business. BTW, waivers for cross-ownership of radio and TV stations have been granted. I work for a company that got two of them...one to buy a TV station, then one to buy a second FM in the market.

As to what Westinghouse will do with CBS...right now nobody who knows, will say...and nobody who says, knows. But speculation is rampant that Westinghouse will go after CBS' comparatively fat cost base with a vengeance.

Here's the reuters report which adds details to Gerry Garcia's passing.

For the last two hours the only phrase going through my mind is
"What a long strange trip it's been"

---

LOS ANGELES (Reuter) - Jerry Garcia, the lead guitarist of veteran
rock band the Grateful Dead, died of apparent natural causes Wednesday,
the Marin County Sheriff's Office said.

Ken Frey, a detective at the sheriff's office, said Garcia was found
dead at 4.23 am (723 EDT) by staff members at Serenity Knolls, a drug and
alcohol treatment facility at Forest Knolls in California. Attempts to
revive him were unsuccessful.

Garcia, 53, had suffered from diabetes and general ill health for
several years.

An American cultural phenomenon for more than a quarter century, the
Grateful Dead was one of the leading bands of San Francisco's 1960's
flower power movement.

They extended their reach over the ensuing decades becoming one of the
world's most popular draws on the concert circuit even though they rarely
had hit albums.

The group was formed in 1966 and was one of the icons of the 60s and
70s. Jerry Garcia along with fellow guitarist Bob Weir, bass player Phil
Lesh and drummer Bill Kreutzman were original members. Drummer Mickey Hart
joined in 1967.

Garcia, born Jerome John Garcia in San Francisco in 1942, was the son
a band leader. He dropped out of high school at 17 and worked as a
salesman and teacher in California before forming the Warlocks rock group
in 1965. The following year the Warlocks became the Grateful Dead.

Message-ID: <40f3tp$rei@vixen.cso.uiuc.edu>
Source record: 29857

John Giese and Bill Andres are out of a gig at Citcasters'
classic rocker KSLX(100.7).
The Arizona Republic quotes the Spring '95 Arbitron book as showing
them tied for 12th place in morning drive with a 2.9...up 0.1 from
the Winter book.
KSLX GM David Pugh is quoted as saying he didn't believe the show was
ever going to break through.
Weekender J. David Holmes(late of KUPD), takes over the morning show,
which is described as being "music intensive".
Ironically, Bill Andres says it was the lack of personality and
content that doomed his and Geise's show..which had been a hit at
crosstown AOR KDKB(93.3) in the 70's and 80's. "We weren't allowed to
do anything on the show. If they went to the trouble of putting us
back together, why didn't they let us do a show?"
PD John Sebastian had gushed over the duo's performance in a memo
analyzing the fall '94 book.
Overall, KSLX pulled a 5.1 share 12+ then.
The spring book released last week shows the station at a 3.2.
Giese and Andres were fired Monday 8/6. Sebastian left for vacation
in Hawaii on Friday 8/3.

# 1641. Low Power FM (Was FRB Responds to FCC Ruling...)

Newsgroup: rec.radio.broadcasting
Date: 1995-08-11 00:00:00 UTC
From: Tom Desmond <wsu@mimi.itg.ti.com>
Message-ID: <40f3tr$rej@vixen.cso.uiuc.edu>
Source record: 29858

I read with no great surprise the news that the FCC issued a ruling against Stephen Dunifer and his Free Radio Berkeley (104.1 FM) in their quest to get the FCC to legalize low power FM broadcasting (under 100 watts). FRB currently broadcasts in defiance of FCC regulations.

I feel a certain amount of sympathy to Mr. Dunifer in this effort, although I think there may be some issues he has not really fully thought out. I do recall that a Low Power FM (LPFM) service that would have been a corollary to LPTV was considered during the 1980's, and was rejected by the FCC following loud screams from the NAB. Some of the motivation was a desire to keep down competition (although the competition from LPFM would have been minor compared to what 80-90 brought in). But I also recall that there were concerns about LPFM station networks popping up, which would have been fed off of satellite feeds. Many probably would have been of a conservative religious nature. How would Mr. Dunifer feel if the FCC authorized his baby, only to see the frequencies get sucked up by networks of hundreds of satellite fed evangelical stations? Probably not very good. But, the FCC cannot discriminate based on proposed programming without stepping all over the First Amendment. And I suspect that many small entrepeneurs (sp?) would jump in, as well. Much of the programming that would result could be drastically different from Mr. Dunifer's vision.

Aside from this, LPFM stations would still have to comply with the FCC's spacing requirements, which I think would preclude these stations from operating in most major urban centers (Mr. Dunifer's station is on a second adjacent channel from stations at 103.7 and 104.5 in the local area, if my memory is correct--the FCC would never authorize this sort of spacing, even for low power stations). This would undermine Mr. Dunifer's intended goal for these stations ("A voice for the voiceless"--primarily the urban poor). With improvements in today's receivers, perhaps these spacing requirements could be revisited, but that process could take years.

Lastly, the corporate consolidation of the media that concerns Mr. Dunifer (and many of the rest of us) will not pass by LPFM, if it is authorized. And when Infinity or Evergreen offers a community broadcaster a large chunk of money for their frequency, how many will be able to exist. How many people remember the community stations that once existed on commercial frequencies in places like St. Louis and Seattle? Once the frequencies became valuable, the non-profit groups started receiving offers to be bought out--and most of them eventually took the offers. Why should LPFM be any different?

All this having been said, I do think that LPFM could be a worthwhile service. LPTV, after all, has given opportunities to people who otherwise would not have been able to afford to own a broadcast station. Why not offer the same opportunity in FM radio? But there are real problems that need to be worked out to make it a viable service.

Tom Desmond

Is there a future in this format? You betcha! The demographics say that it has arrived and some fear that the listening audience may age to nonexistence, but the tail end of the baby boom seems to like the format just fine and so do many younger listeners. We are running the ABC Stardust programming on WZXS-FM in Topsail Beach, NC and are doing quite well with it. A growing retirement community on the NC coast is helping, but so is the fact that local merchants seem to like to run it in background over any other station in the area.

Look at your market demographic trends and your competition. If someone has an availability with competition for this format in their market, I believe that it can be a wonderful revenue product.

Is it just me, or has anyone else noticed an interesting trend in the recently-released spring Arbitrons?

Take a look at the numbers for your local 70's station. Notice that, in almost all cases, the musicbox "7-in-a-row-with-no talk, let's play the same 300 Doobie Brothers/Elton John/Fleetwood Mac/Eagles songs over and over and over again" stations are either flat or DOWN in the ratings. By complete contrast, the few existing examples of a "real" 70's format (personality, phones, energy, and a broad playlist) have posted substantial gains this book. A few noteable examples of personality 70's stations that have done quite well:

KHTC (K-Hits 96.9) in Phoenix: 3.3, up from 2.8 in Winter '95

WLEE in Richmond...4.0 in it's first book, up from 2.8 as a (previously) traditional Oldies station

and...the grandaddy of 'em all...

KIMN..."The New KIMN 100FM" in Denver...bringing it back the right way in the Mile-High City"...3.8 in it's first book, up from a 2.5 as Magic 100 (which played the 70's, but without the all-important personality and energy elements of KIMN) Folks, that's better than a 50% increase in the FIRST BOOK!

Is there any question that the future of the 70's Oldies format lies with a broad playlist, personality jocks, and FUN RADIO??

Bob Steele, legendary morning man, will be inducted into the Radio Hall of Fame in Chicago on October 29th.
Jack Buck KMOX St. Louis will also be enshrined.
Steele spent more than 50 years at WTIC Hartford and now in his 80's, still
does a four and a half hour program on TIC one saturday a month.
Steele's 60th year at WTIC will be celebrated in 1996.

<snip>

>10. WFIL Philadelphia 1966-1970s

>So, waddya think about this????

I'd disagree about choosing WFIL in Philly over WIBG. "Wibbage's"
heyday was more the late 50s and early to mid 60s, but the deejays
were (and, in many cases, are) local legends, unlike their more
anonymous, cookie-cutter-type counterparts at 'FIL. Several Wibbage
Good Guys are now playing pop classics at Philly's WPEN (Joe Niagara,
Jerry Stevens, Bill Wright, Sr.), and I believe Hy Lit is still around
in Philly radio.

To me, it seems like choosing WFIL over WIBG is like choosing WINS or
WMCA in NYC over WABC.

# 1648. Latin American Travel Advisor

Newsgroup: rec.radio.broadcasting

HCJB, the Voice of the Andes, is pleased to announce the addition of a new travel feature, produced by the publishers and editors of "The Latin American Travel Advisor." These monthly programs on Latin America's most powerful shortwave radio station will help business and holiday travelers obtain the latest information on travel conditions, health, safety, the economy and other details regarding Latin America.
Robert and Daisy Kunstaetter publish the informative quarterly newsletter "The Latin American Travel Advisor" designed for the busy, discriminating traveler. Now their experience and insights are available to HCJB listeners on a monthly basis.
Tune in for "The Latin American Travel Advisor" on the third Friday of each month during the "Studio 9" program at 7:30 and 17:00 UTC in Europe, 9:00 UTC in the South Pacific, and 1:00 and 5:00 UTC (8 p.m. and 12 a.m. (Saturday) Eastern Standard Time) in the Americas. On other Fridays of the month, hear HCJB's "Travel Latin America" feature.
For a complete HCJB English Language Service program schedule, write to: HCJB, Casilla 17-17-691, Quito, Ecuador, or send e-mail to "english@mhs.hcjb.com.ec" For more information on the Latin American Travel Advisor, write to: Box 17-17-908, Quito, Ecuador, or e-mail to "rku@pi.pro.ec".

Frequencies: (effective September 1)

North America

11:30-14:30 UTC on 15115 kHz
00:30-7:00 UTC on 9745 kHz

South America

Randy,

Yes, they can be resoldered. Check the "Hints and Kinks" column in QST
back in the 70's (index at your local library) for details ... it may also be
in "Hints and Kinks for Radio Amateurs" by ARRL at your local ham radio
bookstore. The information also applies to 4-400, 4-1000, 3-400, etc.

73,

... Joe Subich

On Wednesday August 9 at 4;50 Pm I could not get WFAN from New York City. On my radios with analog dials, I just got a buzz. On my personal stereo with a digital tuner WQEW (1560 AM) came in on 660 AM. I assume that happened because they share a transmitter site. I called up the station. they said there was technical difficulties, but didn't elaborate.

1. Does anybody know what the problem was.

2. Did anyone do any dxing on Wednesday afternoon. Sometime after 6 PM the station came back.

Message-ID: <40f3ub$rf1@vixen.cso.uiuc.edu>
Source record: 29869

Hello everyone,
A few days ago I posted a brief sysnopsis concerning the history of WLW, Cincinnati. In it I said that during the 500kw period (1934-39), WLW operated with 50kw regular authorization and 450kw experimental, and that the station was not assigned an experimental "X" call sign.

Today I received a note from a reader in Hawaii who recalls listening to WLW (while in Hawaii) during the superpower days. He says he distinctly remembers hearing the call sign W8XO over WLW during the 500kw era. Thanks Chuck!

BTW, if you've wondered about the daytime coverage of 500kw in 1934, Chuck goes on to say that he often heard the station in Hawaii...during the day!

Regards,
Rick

Source record: 29984

* Take Me To The River....:

After weeks of speculations, WLYT-92.5FM in Haverhill finally
switched to a full-time AAA format on Tuesday, August 1st. Gone
is its longtime 'Lite Rock' AC sound. It has
also adopted a new popular moniker -- "The River" -- used by many
AAA stations around the country. This permanent change comes
after a few weeks of having a hybrid AC and AAA mix which
was no doubt a transition stretch from full-time AC to
AAA orchestrated by its new PD and midday jock Joanne Doody.
Doody who came to 'LYT this past spring is well known to
Boston listeners. She hosted a midday show at
AP WFNX 101.7FM for 10 years before being let go by that station
earlier this year.['FNX wanted younger/hipper on-air sound].
Another familiar voice on 'LYT is night-time DJ/MD Mike Mullaney
who came from neighboring AAA WBOS 92.9FM.

Here's 'River's weekday line-up :

6a-10a Jerry Wood
10a-3p Joanne Doody(PD)
3p-7p Bob Stewart
7p-12a Mike Mullaney(MD)

Eventhough 92.5 is located north of Boston and primarily
serves So. New Hampshire(Portsmouth/Dover area) and NorthEast
Mass.(Lawrence/Lowell), its 25KW signal gets a very decent
reception in Greater Boston. "The River" is planning a media
ad blitz(print,TV,billboards,promotions,etc) so I am sure we'll
be hearing more about them shortly...

* Another duopoly on the way....:

With last week's(8/1) announcement of CBS Inc. and Westinghouse
Electric Co. mega-merger, expect Boston's Group W's WBZ AM 1030
and WBZ-TV4 and CBS Radio Group's WODS 103.3FM to be all under
roof at 'BZ Soldiers Field Road studios in Brighton in a few months
from now. Oldies WODS 103.3FM is currently located in downtown
office building on Winter Street,

WODS-WBZ merger(expecting official FCC approval in 1/96) will
create the record 6th duopoly here. What will this mean to Boston
listeners? Not much really. Both stations are very well run. There
no real need to fix anything. WBZ is a powerhouse full service station
will likely stay with its winning formula of all-day news,
night-time talk, weekend afternoon sports and, yes, Boston Bruins

hockey for the next 5 years...For the past 8 years with its oldies format, WODS has been getting very solid ratings in the 25-54 group... Also, now that Group W will have its hands on CBS' 'ARRO' format, it would make sense if another FM signal(105.7?) is acquired here, it could potentially go in that direction...Stay tuned...

* Sports Shorts :

- American Radio Systems' all-sports WEEI AM 850 has finally signed its midday host Dale Arnold last week(7/31) to 1-year deal and an option. Dale Arnold will also do play-by-play for all Bruins' home games on regional cable outlet New England Sports Network. Arnold's Bruins work also means that his 'EEI's schedule will probably not change after PD Glenn Ordway reshuffles rest of station's line-up and personalities...Stay tuned...

- August 4th,1995 brought Infinity's WBCN 104.1FM's first venture into sports programming during its illustrious 27-year history of mostly playing rock music.
Exhibition game between NFL's Patriots-Lions from Foxboro Stadium proved to be a lot of hype more than anything. Luckily it was saved by a superb work of longtime Pats' play-by-play voice and WBZ's morning sports anchor Gil Santos.

After 4 months of promising state-of-the-art sound from the field during its 'STEREO' broadcasts. brand new parabolic mics didnt work.o Also, the sound of pre-game and post-game shows with 'BCN's morning sports resident Paul 'Tank' Sferuzza and weekend jock Bill Abbate was of low production quality. Tank and Bill did relatively good job of keeping things light and entertaining(it's sports, afterall :-)

WBCN promises to have eveything in place with this weekend(8/12)'s game against the Vikings at Foxboro...Unfortunately, I wont be around to hear it but I have my spies...:-)

# 1655. Buffalo/Toronto Radio Watch(8/8)

Newsgroup: rec.radio.broadcasting
Date: 1995-08-11 00:00:00 UTC
From: ag365@freenet.Buffalo.EDU
Message-ID: <40f3t1$rdn@vixen.cso.uiuc.edu>
Source record: 29985

Reply-To: ag365@freenet.Buffalo.EDU (Carl K. Gorney)

Up & down the dial in the #40 market:

*The Buffalo Sabres are skating to a new home,as of next season.

Starting as of the 1995-96 season(and for the next several season),WWKB (1520,hot talk;The Big 1520)will serve as the Sabres new flagship station. Alan Pergament noted in his Sports on the Air column in Saturday's Buffalo News that KB gave the programming time to carry the games free-which means the Sabres will produce the games & pay the talent,with the ads to be sold by a division of Empire Sports Network(the regional sports network here). For the last 5 years,WGR(NewsRadio 55)paid a rights fee for the games-but the landscape had changed so much it's thought than an equitable rights deal was tougher for the team to get.
Also,CJRN(710;Niagara Falls,Ont.;full service)will become one of its affiliates-probably because 'KB's signal can't fully serve most of the Golden Horseshoe area(from Niagara to Toronto),as someone noted to me in private conversation.
For the time being,game highlights will remain on Tom Bauerle's WGR morning show-according to WWKB GM Terry Rodda,that's because it's a money maker and the audience is accustomed to having it there. Later in the season,that may change-Pergament said that 'KB is expected to drop Howard Stern's show in January and being a local program which would be a better fit for the highlights.(IMO,it would be committing suicide-Stern's the only one giving KB decent #'s anywhere.)
And,you'll have to get used to a new announcing team. Rick Jeanneret,who did the radio play-by-play for over 20 years,moves over to Empire in that same position-with Jim Lorentz joining as analyst.(Jeanneret & Lorentz are actally reuniting,as they did games on WBEN in the late 80's when 'BEN held the rights. Beacuse of its contract with the Bills,'BEN couldn't bid on them this time around.)Some of the names being bandied about for the play-by-play post:Rick Peckham,who did over 10 years with Hartford(also,ex-Rochester Americans PBP voice-and an area native,to boot),Don Stevens(current Amerks voice),Pete Weber(Bisons PBP voice,has done some hockey),Paul Hamilton(WGR Sabres beat reporter-also worked on Amerks games)and Fred Pletsch(worked with the AHL's Cornwall Aces-and Ted Darling's son-in-law). As for analyst,current analyst Larry Playfair and his predecssor,Danny Gare,are said to be in the running.

*The axe man hath arrived at WBLK(93.7,urban AC). Thanks to its lousy performance in the spring book,its morning team has been shown the door-according to Tony Violanti's Friday column in the News. Don Allen Jr.(who just came aboard a few months ago)and Kim Fox were fired-in addition to Bryan Scott's contract not being renewed earlier this year. Frank Dawkins(known as "The

Morning Man)is now in AM drive. Even its ratings took a big hit-the 25-54 weeknight audience dropped nearly 3 share points(9.1 to 6.5);in the same book, WSJZ(Smooth Jazz 92-9)exploded from a 3.4 to a 10.2('SJZ has taken out ads touting the increase-they're #1 at night in that demo,it says).
'BLK PD Eric Faison said that since the station is being redirected to an older audience,changes would be needed. My take on it:If you were going to do urban AC,why not do it in one fell swoop instead of almost a year & a half?

*While I'm on the axeman,it also dropped at CKEY(FM 101 The Planet), taking out PD Kerry Gray(but still leaving him in PM drive)and MD Charlene Camroux. Jeremy Price steps in as PD,and Marica Macro is added as the promotions director.

*Bill Saurer is the new GM of sales at the Rock Network(consisting of classic rocker WGRF(97 Rock)and modern AORer WEDG(103.3 the Edge)).

*Why we dig the Buffalo News(_NOT!_):Lauri Githens's Buzz column of Thursday made reference to a WBFQ in Indianapolis(BTW,Lauri,it's WFBQ)and Pergament first saying that River City "owns or programs AM stations (WW)KB, WBEN-AM and WGR" and then saying that it "only has a sales & marketing agreement with WGR". Well,Perg,which is it? (FYI,it's the latter.)

And you wonder _why_ I do this?

TTYL...

# 1656. Kansas City Radio Watch (10-Aug-1995)

Newsgroup: rec.radio.broadcasting
Date: 1995-08-11 00:00:00 UTC
From: transvox@interstate.net
Message-ID: <40f3t1$rdo@vixen.cso.uiuc.edu>
Source record: 29986

A consulting engineer who's worked in the Kansas City market sent me a message expressing doubts about KCXL's on-air announcement August 2 that it had received full-time authorization with low power at night.

He pointed out that WRVA in Richmond, Virginia, also at 1140 kHz, had clear-channel authorization and was readily received in the Kansas City area.

All true. But it does appear KCXL indeed is fulltime.

It took some doing: the KCXL nighttime signal can't be heard on either of my GE Superradios at my location more than 20 miles from Liberty, KCXL's city of license and transmitter location. But it can be heard on my NAD 4300 tuner and, finally, that's how I confirmed it.

KCXL is an oldies station, programmed primarily from the Jones Satellite Network's oldies service.

(Aside to the National Radio Club: Next time you quote from one of my articles, please give me credit. You failed to do so for my report on KGNM in St. Joseph -- regarding *its* low-power authorization -- some time back.)

*****

The Kansas City _Star's_ gossip column today (August 10), written by Hearne Christopher, Jr., reported on rumours that Indianapolis morning team Bob and Tom, presently syndicated to several stations, would soon replace the morning show on 70s-classic-rock KCFX(FM).

In the newspaper article, KCFX general manager Bill Newman discredited the rumors. Appallingly, however, Newman was quoted as saying, "We'll do some misinformation occasionally. We'll put the (wrong) word out."

The newspaper put the word "wrong" in parentheses. Even so, I always thought "misinformation" was another word for "lying". No wonder the radio business has such a shady image sometimes. Disgusting.

Newman did tell the newspaper he still plans on keeping morning host Lauren Holiday. (Maybe based on his admission of "do(ing) some misinformation", she'd better float some resumes.)

# 1657. New England Radio Watcher: New Station...

Newsgroup: rec.radio.broadcasting
Date: 1995-08-11 00:00:00 UTC
From: fybush@world.std.com
Message-ID: <40f3t2$rdp@vixen.cso.uiuc.edu>
Source record: 29987

*A drive home along Mass. Route 2 Sunday night turned up one surprise -- the long-dormant CP for 97.3 A in Orange, Mass. is now on the air. The CP was issued with the consecutive calls WFUB (yes, it was the last one issued before Purdue University's now-legendary WFUC-FM, since changed to the prosaic WBAA-FM :-). A recent call change turned 97.3 into WJDF...which, interestingly enough, are nearly identical calls to Massachusetts' other 97.3, the 50kw Portuguese powerhouse WJFD in New Bedford.

Programming on this thing is satellite AC -- at least it was doing that on a Sunday night, and sounded pretty automated overall. That puts WJDF in good company with the other FMs along that stretch of route 2. WCAT-FM in neighboring Orange is satellite hot AC, and WINQ-FM 97.7 Winchendon is satellite CHR. WCAT-AM in Orange is mostly satellite talk with a bit of local origination weekdays. And the recent (1994) upstart WPVQ-FM 93.9 Turners Falls is satellite country.

The shame of it is, the fairly decent (5800w 98') WJDF signal is quite respectable into Greenfield, some 20 miles west on Rt. 2...and that's bad news for the two Greenfield AM/FM combos, both of which are trying hard to stay local. WHAI AM-FM is a simulcast full-service operation, with Red Sox baseball, local and CBS news, and a heritage that dates back six decades. WRSI-FM is a truly innovative locally-programmed station that was doing AAA before anyone knew that's what it was...and they can probably be excused for running sister big-band AM WGAM 1520 off the bird. By themselves, the Greenfield stations and Orange's WCAT-AM could probably eke out a living in the economically depressed upper Pioneer Valley...but with all this satellite trash littering the dial, I have my doubts.

This leaves very few unbuilt Massachusetts CPs. I think WBSO 650 in Clinton (40 miles west of Boston) has been cancelled now. WFPB 91.9 in Falmouth is a very recent CP, as is the yet-without-calls 91.1 Nantucket that will be public radio. WCDJ 102.3 in Truro (outer Cape Cod) is getting pretty stale, and may well expire before it can be built. Everything else is either on, or dark and near-death (like Leominster's WCMX 1000 and Worcester's WNEB 1230 -- though the latter could actually return this fall).

*There's One Born Every Minute: Family Stations has actually found a buyer for the now-dark 1060 WBIV Natick license. Loyal readers will recall that 1060 had been owned by a company called SRN Boston, which traded it for Family's CP for 890 WBMA Dedham-Boston. SRN built the 890 facility by modifying its old 1060 facility in Ashland, Mass., and then sold 890 to Douglas Broadcasting, which now operates it as sports-talk WBPS. That left Family with a useless

1060 license...useless because SRN and Douglas refused to let 1060 diplex on what had been its transmitter site. Land values in the area are extremely high, and the NIMBY factor still higher, so the odds that anyone will be able to erect the 5+ tower array needed to bring 1060 back on with its old 25kw day are pretty slim.

All that notwithstanding, someone named Alexander Langer actually spent 71 thousand dollars to buy the 1060 license. There's no indication that Langer owns any other broadcast properties...and I can't wait to see what he tries to do with 1060. My bet is that we'll never see that thing on the air here again.

*A more productive sale: Eastern Media, the owner of WESO-AM/ WQVR-FM Southbridge MA, has spent $125K to buy WARE-AM 1250 in nearby Ware. Seller is Quadra Communications. WARE has a decent signal, and as the only thing on the air along route 9 between Worcester and Springfield, it owns what little local market there is.

*More to come in a separate post about my weekend excursion to the Lake Placid NY area...

-=Scott Fybush - fybush@world.std.com=-

# 1658. West Palm Beach Ratings

Newsgroup: rec.radio.broadcasting
Date: 1995-08-11 00:00:00 UTC
From: Mike@gate.net
Message-ID: <40f3t4$rdq@vixen.cso.uiuc.edu>
Source record: 29988

Here are the ratings for West Palm Beach, Spring 1995

Avg
No. Share Age Station
1. 8.5 39 WIRK (Country)
2. 8.2 48 WEAT/Sunny 104.3 (Light A/C)
3. 7.1 36 WRMF Personality A/C)
4. 6.9 68 WRLX/Relax 92.1 (Easy Listening)
5. 6.7 65 WJNO/Newsradio 1230 (News/Talk)
6. 3.9 34 WKGR/Gater 98.7 (Class Rock)
7. 3.3 26 WPBZ/Buzz 103.1 (Z-Rock*)
8. 3.3 29 WEDR/99 Jamz (Urban)
9. 3.0 67 WJBW/Jukebox 99.5 (Nostalgia)
10. 2.9 29 WOVV/Star 95.5 (C.H.R.)
11. 2.6 69 WDBF (Nostalgia)
12. 2.2 58 WBZT (Talk/Rush, Imus)
2.2 48 WOLL/Big 106 (Oldies)
14. 2.0 36 WBGG/Big 104 (How. Stern/A/C)
2.0 34 WHQT/Hot 105
2.0 46 WLVE/Love 94 (Contemp. Jazz)
17. 1.9 44 WKIS/Kiss 99.9 (Country)
18. 1.7 67 WTMI (Classical)
19. 1.6 34 WZZR (Rock)
1.6 41 WIOD (News/Talk/Neil Rogers)

*format switch to Alternative after the end of the rating period

The big winner was Sunny 104.3 after buying a huge TV schedule. Tradition morning winner WRMF is down substantially after the departure of morning fixture Kevin Kitchens. Kitchens left for San Diego but will return to Sunny sometime this month. WRMF receently hired "Murph in the Morning" (sorry, I forgot his full name, but the article mentioned Chicago) to compete. The fall book should be the most competitive in market history.

WJNO was helped again by O.J. while crosstown talker WBZT's nationally syndicated Don Imus and Rush Limbaugh programs slipped considerably.

WPBZ, after a very successful book, switched from Z-Rock to an Alternative sound. They are currently running jockless but are having on air "auditions" on the weekends.

# 1659. Toledo Radio Update (Johnny D. is Back)

Newsgroup: rec.radio.broadcasting
Date: 1995-08-11 00:00:00 UTC
From: ewarner@bgnet.bgsu.edu
Message-ID: <40f3t6$rdr@vixen.cso.uiuc.edu>
Source record: 29989

Reply-To: ewarner@bgnet.bgsu.edu (elizabeth warner)

Former WRQN 93.5 night guy, Johnny D. is back in Toledo. Johnny D. who was doing mornings in Cleveland just two weeks ago has ended up back in Toledo for WVKS 92.5. KISS-FM. Johnny D. was filling in for the vacationing morning mouth, Denny Schaffer. On Friday morning, while Johnny was doing the morning show for 92.5, he called his boss in Cleveland and quit his job LIVE on the air in Toledo.

Johnny D. will be doing the afternoon show in WVKS, replacing Music Director, Curt Cruse. Cruse will remain Music Director of WVKS, and become music director of WLQR (101.5), and be the middday host there too. Curt will be replacing former WLQR afternoon girl Andie Mckay, who is now doing middays at WVKS.

This is probably old news but WSPD has added G. Gordon Liddy, and Jim Rome to their daily schedule.

BTW: In case some of you are confused. Johnny D. quit his job in Cleveland, while he was on the air in Toledo. I'm just too damn lazy to change it.

-Craig

One additional tidbit left out was that the AMAX standard the NAB so gracefully endorsed was not asked for or approved by the NRSC, who were at the time developing side band applications for RDS in the AM band. With the lovely (highly for profit) NAB making engineering decisions, you get no AM RDS, and no 8 or 9kHz receivers, you get either 10kHz (TOO WIDE) or 3kHz (TOO SKINNY) bandwidth... Those guys should stick to scamming us manufacturers for their booth spaces.

For immediate release...Contact Rob Brown or Bob Gowa (510) 254-4456

AMI NEWS welcomes Bob Gowa to the newly created position of Director of Operations, effective August 15, 1995. Mr. Gowa has held talent and management positions at radio stations in Los Angeles, San Diego and San Francisco, including K101, KGO, KSAN, KMEL and KROQ. He was most recently a news and traffic anchor with Metro Networks in San Francisco.

AMI NEWS, serving U.S. radio since 1968, is the nation's leading producer and distributor of ski reports and recreational programming.

# 1662. Re: Blau-Knox towers (was: WLW)

Newsgroup: rec.radio.broadcasting

There's another Blau-Knox still standing - for now. WFEA 1370 in Manchester NH has a diamond-shaped tower at its transmitter site alongside the F.E. Everett Turnpike in Manchester NH. There's also a shorter, "flagpole"-style tower for directional use. Rumor has it 'FEA wants to tear down the old beauty and put up a more "modern" two-guyed-tower array.

Ah, progress.

>enuff to hear if the call letters have changed.

Scott Fybush and I have been talking recently about how much this station impresses both of us. So far as we know, the callsign is still `WLYT', but the way they are doing their legals suggests that a call change application is probably sitting on someone's desk at the FCC. Judging by the spot load and marketing, it is clear that they are NOT attempting to be a Boston rimshot, but rather are actually serving their community at a time when both of the other Merrimack Valley FMs (Granum's WSSH-FM Lowell and American Radio Systems' WEGQ Lawrence) are being programmed out of and for Boston. They appear to be honest about wanting to actually operate the station (as opposed to one theory which had them switching formats in a calculated attempt to get Granum to buy them out). I find the station much more interesting than WBOS, even though I live in Boston, a marginal area for WLYT (which still transmits from the top of the WHAV(AM) stick in downtown Haverhill).

We'll have to see how long they can keep this up.

# 1664. Caravelle Transmitter

Newsgroup: rec.radio.broadcasting
Date: 1995-08-11 00:00:00 UTC
From: MMGA25C@prodigy.com
Message-ID: <40f3tc$re5@vixen.cso.uiuc.edu>
Source record: 29994

In the last 1096's Remco (the toy company) manufactured an in-home AM transmitter called the "Caravelle". It operated with probably less than a watt on a nine volt battery. It was a blue plastic contraption and you could turn a dial and transmit on any frequency in the AM band.

Does anyone know where I could find one of these relics today.

Please let me know

-
H L SCHROTT MMGA25C@prodigy.com

BI>The only problem is in New York where WINS, (Group-W), and WCBS both have
BI>an all news format. My guess is that since WCBS is the clearer channel,
BI>WCBS and WINS could swap dial positions and WINS will remain all news while
BI>WCBS clears network programming with some local talk programming. Amazingly
BI>most of the network O&O's don't carry the bulk of their own network's
BI>programming.

Steve,
Don't forget that WINS is embarking on a major upgrade of its transmitter site. I seriously doubt that WCBS would be relegated to running the network's shows. Remember when WNEW was required to run NBC shows. It's generally agreed in the city that WCBS and WINS should stay just as they are. Let one of them abandon news and you'll see another all-news competitor in no time. Together, they offer different approaches (both good) to all-news programming. Sort of like CNN and CNN Headline News.

For what it's worth, WCBS' signal where I live (the Village) and where I work (Times Square) is almost non-existant. WINS bombs in in both locations. Personally, I'd concentrate on getting WINS up to full power with a rebuilt site. Get rid of that stereo, too.

Rich

## 1666. What's the latest on DAB?

Source record: 29997

I am looking at a possible future networking scenario, and am looking
for a decent solution to delaying program for replay at a later time.
This need is brought around by time zone differences, between different
states.
The needs include high audio quality (FM Broadcast), reliable, no manual
driving of the device, etc. Basically I want a black box that sits in a
rack, with stereo audio inputs and outputs, with the input coming out the
output a precise time later, say 0 to 4 hrs.
What do people use now for time zone turnaround? What's currently on the
market that does this? (And where do you get it?).
Please reply to this group, or direct to me:

# 1668. Need tips on selling air time

Newsgroup: rec.radio.broadcasting
Date: 1995-08-11 00:00:00 UTC
From: "Janik, Edward" <janik@spss.com>
Message-ID: <40f3tg$re9@vixen.cso.uiuc.edu>
Source record: 29998

I have the opportunity to sell time for a brokered radio show which airs
two evenings a week on a local suburban radio station. The question
I have is, aside from hoofing it from local business to local business,
which has pretty much already been exhausted, how do I approach
large corporations like, say, Annheuser Busch or Coca Cola or NBC
or Chrysler or whoever in order to sell them air time on this show?

I have zero experience in selling air time, though I have done on-air
and behind-the-scenes radio work. This is a totally new area for me,
and I'm really interested in learning how.

So... what department would I ask for when I call the company? What
info are they most interested in? How do I make buying air time on
the show appealing? How do I get them to write the check?

Any advice would be greatly appreciated... please e-mail me at
janik@spss.com or post your reply to rec.radio.broadcasting. I will
be very grateful for any/all advice and/or information.

-Ed Janik

# 1671. PHOENIX: KSLX CANS MORNING TEAM

Newsgroup: rec.radio.broadcasting
Date: 1995-08-13 00:00:00 UTC
From: Michael Hagerty <Michael_Hagerty@azfamily.com>
Message-ID: <40k1uq$g85@vixen.cso.uiuc.edu>
Source record: 29801

John Giese and Bill Andres are out of a gig at Citcasters'
classic rocker KSLX(100.7).
The Arizona Republic quotes the Spring '95 Arbitron book as showing
them tied for 12th place in morning drive with a 2.9...up 0.1 from
the Winter book.
KSLX GM David Pugh is quoted as saying he didn't believe the show was
ever going to break through.
Weekender J. David Holmes(late of KUPD), takes over the morning show,
which is described as being "music intensive".
Ironically, Bill Andres says it was the lack of personality and
content that doomed his and Geise's show..which had been a hit at
crosstown AOR KDKB(93.3) in the 70's and 80's. "We weren't allowed to
do anything on the show. If they went to the trouble of putting us
back together, why didn't they let us do a show?"
PD John Sebastian had gushed over the duo's performance in a memo
analyzing the fall '94 book.
Overall, KSLX pulled a 5.1 share 12+ then.
The spring book released last week shows the station at a 3.2.
Giese and Andres were fired Monday 8/6. Sebastian left for vacation
in Hawaii on Friday 8/3.

# 1672. Best Legal IDs.

Newsgroup: rec.radio.broadcasting

From: WCHSNews@aol.com
Message-ID: <40k1us$g87@vixen.cso.uiuc.edu>
Source record: 29802

Almost eveyone likes some form of jingles, so I thought I'd solicit comments on what people like in the way of legal IDs. To get things started, here are mine:

Since I'm a techno-nerd, I enjoy the legal put out by WAMC/Albany, New York:

Dry Voice: "This is WAMC, Northeast Public Radio. WAMC 90.3, Albany; WAMK, 90.9 Kingston; WOSR 91.7, Middletown; WCAN, 93.3 Canijoharie; WANC, 103.9 Ticonderoga, New York; WAMQ, 105.1 Great Barrington, Massachusetts; 88.9 W205AJ Oneonta; and 93.1 W226AC, Renssailer/Troy."

When I worked for WSPK/Poughkeepsie we used to do:

#include <std.special.effects.zaps.lasers.wooshes>
"Serving New York, New Jersey, Pennsylvania, Connecticut, and a little bitty piece of Vermont. This is 104.7FM - WSPK/Poughkeepsie-- K-104!"

Any others?

# 1674. Non-Commercial Station

Newsgroup: rec.radio.broadcasting
Date: 1995-08-13 00:00:00 UTC
From: speasley@cyberspace.org
Message-ID: <40k1uu$g89@vixen.cso.uiuc.edu>
Source record: 29804

Hello. If there is a FAQ for my question, please let me know where I can obtain it... Also, I'm sorry about any weird text arrangements; I have a lousy connection.

My question is this: my high school is looking to set up a low power (30 watts or less) radio station, to play music and maybe some other stuff. I was wondering what are the FCC hoops that we'd need to jump through? This would be a non-commercial station (hence the subject), and probly be run only during school hours. So, if anyone out there would be kind enough to respond, I'd appreciate it a lot.

-Seth Peasley
speasley@cyberspace.org

[Moderator's Note: There are no more licenses below 100 watts, thanks to a somehwat recent change in regulations. Also channels are scarce. But this is not undoable if you are not in a heavily cngested area. Anyone care to help Seth? Bill]

# 1675. Question about a Reel-to-Reel Deck

Newsgroup: rec.radio.broadcasting
Date: 1995-08-13 00:00:00 UTC
From: henrydc@aol.com
Message-ID: <40k1uu$g8a@vixen.cso.uiuc.edu>
Source record: 29805

Reply-To: henrydc@aol.com (Henry DC)

Hey everyone... it's me, the broadcasting student, again. I hope this post isn't off topic for the group, but I figured this would be the best place to ask since you're all professionals. I recently responded to a post on another local newsgroup, regarding a reel-to-reel tape deck that was for sale. I thought I'd post it here, and ask what you guys thought about it (if it's a good buy, worth it, etc..). He's offering it for $100....

"It's a "TAPE DECK" which means that it is designed to be used with a stereo amplifier system. There are two jacks on the front for plugging in microphones and there's a jack on the front for plugging in earphones. On the back there's RCA jacks for connecting to an external amplifier. It has three speeds: 15, 7 1/2, and 3 3/4 inches per second. It takes these reel sizes: 5, 7, and 10 1/2 inches. Frequency response at 7 1/2 inches per second is 30 - 28,000 Hz. The unit is designed to be stood up vertically. i.e. the reels are vertical.

It has two VU meters. Is 4-track, 2-channel. Four heads: erase, record, playback and reverse playback. With the 10 1/2 inch reels installed it's 21" high, 22 inches wide and 8 inches deep.

It was bought in 1975 at a cost of $975. I have quite a few 10 1/2 inch tapes, I guess about a dozen. As many 7" as well.

As far as condition, it's in fair condition. It wasn't used too often over the years so the moving part of the capstan assembly is sluggish and requires some lubrication. For instance, when you press the play button, the capstan must be manually pushed against the capstan shaft. Once the capstan is against the shaft it plays or records normally. I think with some constant usage, it should loosen up or maybe some WD 40 would help. It's a very good quality machine."

Any ideas? Thanks in advance...

Drew Durigan (VUBS79A@prodigy.com) wrote:

: Take a look at the numbers for your local 70's station. Notice that, in
: almost all cases, the musicbox "7-in-a-row-with-no talk, let's play the
: same 300 Doobie Brothers/Elton John/Fleetwood Mac/Eagles songs over and
: over and over again" stations are either flat or DOWN in the ratings.

It depends on the comparisons you make and the demos you are looking at. KCFX in Kansas City may appear flat in the 12+ numbers. However, it's number two in 25-54.

There is an artificial factor working in the case of KCFX: Kansas City Chiefs football. Chiefs football broadcasts, promised to be this season in stereo, will doubtless boost "The Fox" even more.

When I was in San Francisco two weeks ago, I really became quite enchanted with "Big 98.1", KBGG and its personality-friendly, broad-playlist approach. There's *nothing* like that here, except for six hours on Saturday night from KKJO(FM) in St. Joseph (which I've written about in a couple of previous Radio Watches from Kansas City).

: Is there any question that the future of the 70's Oldies format lies with
: a broad playlist, personality jocks, and FUN RADIO??

We'll see. It really takes four books to make a trend.

>Is there any question that the future of the 70's Oldies format lies with
>a broad playlist, personality jocks, and FUN RADIO??

Drew, you're right on the money. Remember that 60's oldies stations draw upon people who listened to radio in the 60's-- almost exclusively top 40 listeners. So they have the whole genre to themselves.

But 70's radio was split between those who listened to top 40 and those who listened to AOR. So right off the bat, you don't get all of the potential listeners from the 70's. And since classic rock is already going after the AOR 70's listeners, it makes sense to do a top 40 approach. And that means personality, variety and fun.

# 1680. Re: All 70's Stations

While reading article <40f3tt$rem@vixen.cso.uiuc.edu>, I noticed that
VUBS79A@prodigy.com (Drew Durigan) said the following:
>KIMN..."The New KIMN 100FM" in Denver...bringing it back the right way in
>the Mile-High City"...3.8 in it's first book, up from a 2.5 as Magic 100
>(which played the 70's, but without the all-important personality and
>energy elements of KIMN) Folks, that's better than a 50% increase in the
>FIRST BOOK!

IMHO it also has a lot to do with the fact that they had a listener vote earlier
this year and the listeners voted for NO DISCO on the station. Prior to that,
THREE Denver radio stations programmed a disco block on Saturday nights.

>All New MW Transmitters in Powers to 50,000+ watts are Solid State.
>Harris has a DX-1000 available thats 1,000,000 watts of digitaly
>modulated solid state MW AM.

Now, I am going to point out here that these units use many, many
redundant output modules, instead of using a single 50KW device. This
is a very advantageous thing, because it means that any component failure
in the PA will result only in a minor power reduction, and you can pull
the module out and fix it on the bench at your leisure. This is really
nice. You can't believe the number of late-night calls this eliminates.

The bad news here is that there are now enormous combiner networks involved.
I haven't ever seen one fail, but it's only a matter of time, and when it
does, I really don't have a clue what we're going to do about it.

>Most Companies will not sell a tube transmitter for FM below 2500 watts.
>Hassis has 30 Kw available in Solid State.

Hey, our local noncomm still is using a tube exciter. It's one of those
RCA units designed for the 40 MHz band, which RCA redesigned after WWII
by changing the 6146 driver tube to a frequency doubler. Drifty as hell,
but amazingly enough, it sounds better than the BE exciter I brought in
the last time I overhauled it.

: Former WRQN 93.5 night guy, Johnny D. is back in Toledo. Johnny D.
: who was doing mornings in Cleveland just two weeks ago has ended up back
: in Toledo for WVKS 92.5. KISS-FM. Johnny D. was filling in for the
: vacationing morning mouth, Denny Schaffer. On Friday morning, while
: Johnny was doing the morning show for 92.5, he called his boss in
: Cleveland and quit his job LIVE on the air in Toledo.

Zapis Communications is pursuing legal action against him.. he was under
contract. Sheesh... Leaving Cleveland to go to Toledo? :> (Just kidding,
Craig...)

: BTW: In case some of you are confused. Johnny D. quit his job in
: Cleveland, while he was on the air in Toledo. I'm just too damn lazy to
: change it.

: -Craig

It's a good thing the D-Man left. The Big Show, with Johnny D and Lee Anne
Sommers, was little more than a clone of Howard Stern, with two exceptions:
Lee Anne didn't take all the crap from Johnny that Robin Quivers takes from
Howard, and Johnny is nowhere near as intelligent or funny as Stern. I do
like Lee Anne and hope she stays on the morning beat, tho. But if I wanna
listen to Stern, I listen to Stern :>

Oh... I will have more on the morning changes in Cleveland soon. Q94's
Corey Deitz is now on Lite Rock 106 1/2 in Cleveland, and I
want to get him back on RRB as soon as possible... finally, someone who
might actually be willing to help me do the Radiowatcher reports! :) :)

(For those with temporary amnesia... Corey came up here from Richmond,
Virginia.)

# 1684. The World According to Gates/Turner

Newsgroup: rec.radio.broadcasting
Date: 1995-08-13 00:00:00 UTC
From: San Diego Radio Watcher <chris@terminus.wccs.saic.com>
Message-ID: <40k1vc$g91@vixen.cso.uiuc.edu>
Source record: 29814

CBS news reported on Saturday afternoon that Bill Gates and Ted Turner
met to discuss a possible buy-in of Turner Broadcasting by the MS owner.

With the inflush of cash, another run of CBS by Turner is possible.

Then, we could program our PC radio cards on Win95 software that would
default to CBS/Turner/MS owned stations.

We'll call this story "Fire on the Footbridge." Seems the cables for both WCBS-AM and WFAN-AM travel from City Island over to High Island via a little footbridge. The afternoon you were listening, said footbridge had a fire, and knocked both stations rig
ht off the air. I can tell you that being suddenly thrown off the air is a little like being dead, or maybe in suspended animation -- you feel pretty damn helpless! Any way, yes, both stations made it back on in about an hour and a half. BTW: Arbitron
estimates that WFAN cumes about 535,000 people in the 3-7 p.m. daypart. While WCBS-AM cumes about 855,000. That's from the Spring New York book.

I would guess your radio got 1560 on 660 because of an image problem in the radio, not because of a shared transmitter site. If your "personal stereo" uses a 450 kHz IF, 1560 would be the image frequency, when tuned to 660 kHz. Do these two stations share common transmitter site? If they do, it wouldn't cause this problem, IM problems would be more likely. In any case, with one transmitter off the air, it would be no different than any other single transmitter site.

Regards,

John Byrns

WFAN does not share with WQEW, (xmtr location Maspeth, Queens), they share with WCBS from a small island off of City Island in the Bronx. It is not High Is. as is commonly thought, that was the original CBS 50kw site when it was the first WABC.

You got WQEW due to some sort of image frequency inside your receiver. Modern AM sets use a 450kHz IF, not 455 as it had once been. If you tune in 660, your radio's oscillating at 1110. 1110 - 660 = 450. 1560 - 1110 = 450.

That WFAN transmitter used to drop dead from time to time when it was WNBC, and they had the money to take care of it. I don't think either Infinity, or predecessor Emmis, really does. At least when it was WNBC they used to fire up the old Continental standby after 5 minutes, (it took that long to get on even though the fils were kept hot). Boy did that old clunker sound good on a wideband receiver.

I've never known any AM station studio to monitor what's going on at the transmitter. They only know the engineers are there working on it.

Evidently WFAN had a fire at their transmitter site just outside NYC.
Their transmitter and tower are located on an island called "High Island"
which I believe is north of the city.

Here's what is happening in the 15th market

Dead Radio: When the news broke of Jerry Garcia's death, KSCA [Los Angeles 101.9] broke into non-stop Greatful Dead music on Wednesday. Also, Chuck Taggart of public radio KCRW had a two-hour requiem called "To Lay Me Down: A Tribute to Jerry Garcia." [KCRW 89.9 FM] Both stations avail in North County San Diego.

Watt's New? KFI's Bill Handel did a live remote from the Watts section of Los Angeles today. It was 30-years ago today that the uprising began.

If imitation is a form of flattery, then Mr. KFI of KFI should be proud. Last Saturday on KFMB San Diego, behind the scene producer Kevin Boyle became Mr. KFMB. The tongue-in-check barb was good. [I find it amazing that Mr. KFI, from a long line of KFIs, has the same name as the station he works for. news:alt.fan.mr-kfi ]

Pinch Hitters! What does KFMB [760, 5kw/50kw DA] have in store for week-enders and fill-ins Mike Berger and Jeff Prescott?? The San Diego radio-staples have been on FMers KGB, and XETRA-FM [91X]; and Xtra Sports 690. Ken Leighton speculated in his Friday radio column in the Escondido Times-Advocate that perhaps Stacy Taylor's contract would not be extended in December. [I hope that Taylor stays with KFMB. He's refreshing in the afternoon, and not political as Roger Hedgecock]

Berger and Prescott do morning duties next week for Hudson & Baurer on Monday and Tuesday.

Ross Talk: Previously mentioned Roger Hedgecock is in Dallas, Texas, attending the "United We Stand" convention. On Thursday, Hedgecock interviewed Ross Perot. Hedgecock, who is calling this remote, "Holding the Feet to the Fire" has an encore Saturday afternoon on 1130 KSDO.

Roger's crosstown duties at radio w/pictures KUSI has been axed. The guest commentary section of the news was eliminated.

>From the same station, John Ireland moves to KCAL Ch. 9, Los Angeles. Ireland is half of the morning team at the number one sports station, XETRA-AM [690, 50kw DA]. The Mason/Ireland show will continue on, according to Ireland, when he moves to Los Angeles. The station, owned by Disney, is opting for more sports coverage. [Disney owns several sports franchises now][It's not known if the new Disney/CapCities-ABC will force the sale of the VHF station either. When merged, one company would own two AM, one FM, and two VHF [7 & 9] in LA.]

I told you so: I called one right: Last week, I told you about Xtra's Chet Forte being added for color in the San Diego Chargers broadcast team. I reported that it would be a good fit -- and columnist John Maffei of the Blade Citizen agrees: "Chet Forte's debut as the third man in the booth on XTRA's Chargers radio broadcast last Monday was surprisingly good."

"There is no question Forte will be better than the departed Pat CurrForte being added for color in the San Diego Chargers broadcast team.
I reported that it would be a good fit -- and columnist John Maffei of the Blade Citizen agrees: "Chet Forte's debut as the third man in the booth on XTRA's Chargers radio broadcast last Monday was surprisingly good."

"There is no question Forte will be better than the departed Pat Curran."
[It's hard to be humble, most printed outlets brashed Nobel for the decision.]

Departed: On the FM side of the house at XETRA-FM [91.1 100kw '91X`], VP Kevin Stapleford has left the station. The Escondido TA reported that he started at 91X in 1983. He worked as an unpaid intern answering phone lines and worked his magic to become VP. But, the TA and SD Tribune reported that their were "disagreements." Afternoon dj Mike Halloran now has PD duties.

20/20: Reported in Wednesday's SD Tribune was that NPR announced re-structuring plans that'll save $2.2 million. That's fancy-talk for saying 20 positions at the Washington studios are being canned. Perhaps someone from NPR.org could comment on this -- if anyone is still working there. This in light of proposed Congress cuts. [In Websters, Congress: a seasonal assemblege of amphibious reptiles for reproduction.]

Comment to non-radio media readers of rec.radio.broadcasting in the Southland and San Diego areas; and all areas. Umm, what gives: you read the reports, and you use material from mine [and others]. Please, give credit where credit is due. Likewise, if I call your reporters, please give the courtsey of responding. I broke three weeks for LA and San Diego, and was listed as "published source." [KMPC/Art Bell, KIIS-AM/Don Imus and KLSX venture into talk] I, for one, verify all stories, or if they are rumors, I call 'em that.

KMPC started the Art Bell show Monday night. That makes station number 200 for the overnight syndicated show, and the largest market he is on. Congratulations to you Art!

This just can't suck enough: Don Imus is viewing the Internet via America On Line. I-man, I'm begging you, have Fred send my hat please!

In the TA this week: Hugh Grant's -- umm, well, umm, -- partner? -- Divine Brown did a promo for KXEZ, Los Angeles [100.3] saying that was the station she and Grant were listening to when, umm, well, you know. [lo-blow comments][opps]

Web Weaved: it has over 600 access, it's been placed in three areas as "the place to visit" and it's updated twice a week. The Southern California Radio Log is a hit! Check it out, URL in my .signature.

Giving credit for which it is due: David Alpern of Long Beach contributed to this post. Thanks David! mailto:DALPERN@sbamail.usc.edu . Plus, thanks to all those who have sent in info.

# 1695. Buffalo/Toronto Radio Watch(8/11)

Newsgroup: rec.radio.broadcasting
Date: 1995-08-13 00:00:00 UTC
From: ag365@freenet.Buffalo.EDU
Message-ID: <40k1tk$g61@vixen.cso.uiuc.edu>
Source record: 29872

Reply-To: ag365@freenet.Buffalo.EDU (Carl K. Gorney)

Up & down the dial in the #40 market:

*First,some corrections of note:
-WBLK(93.7;urban AC)claims that Don Allen,Jr.-whom,along with Kim Fox,
is no longer in AM drive,was not fired but resigned due to health reasons.
-Jeremy Price is the new music,_not_ program,director at CKEY(101.1;
FM 101 The Planet).
Since I got the false info from Tony Violanti's column last week,the only
thing I can say to him is:_Thanks...so much!_ :>

Now,on to other business:

*CFNY(102.1,Toronto,modern;102.1 the Edge)music director John Jones has
left that post to join Canada's answer to MTV,MuchMusic(owned by Moses
Znaimer,who also owns CITY-TV(ch.57)and Bravo!(the new cable arts network))
as its flow director. (Don't ask me what it means-the best guess I can give
is it's the same as a music director). Replacing him will be Kneale Mann,
who had the same position at St.Catharines' CHTZ(97.7 HTZ FM;album rock)-he
used to jock there a few years ago. 'HTZ's MD spot is still open,and night
jock Kristy Knight is said to be the front-runner for the post.

*CKEY has shifted its schedule around a bit. The State of Independents
show(with music from local unsigned bands)now airs Tuesday nights at 8pm,with
Charlene Camroux & Todd Ouellette still hosting. Camroux also does East of
Midnight,starting at-well,midnight. It's a more eclectic mix of music,with
requests as well. The Outer Limits show now airs on Fridays & Saturdays-DJ
Iain host Fridays,and it's Kerry Gray's turn on Saturdays live from the
Network nightclub in downtown Buffalo.

*WKSE(Kiss 98.5)is back with its B.O.Geo promotion-where you get to sit
with 3 fellow people for 11 days(the length of the Erie County Fair)-and
whoever lasts the longest gets it. This time(the 3rd year they've run the
contest),there's a new twist-you can now make a donation to a local hospital
in the name of one of the contestants,and whoever stays the longest(and raises
the most money)gets the Geo.

*Business First,in today's(Aug.14th)edition,has some memos in its 5th
Coast column to pass out.
-"To WGR management:Listen to The Fan(CJCL,590),Toronto's all-sports
station. It somehow manages to provide intelligent sports coverage without
the ex-Coach's(Chuck Dickerson)caterwauling."(..or Art Wander's know-
nothingness,IMO. But,didn't Toronto Life get The Fan in its year-end issue
last year?)
-"To Anthony Violanti:You can stop writing about alternative radio.

Hardly anybody cares. Really."

TTYL...

# 1696. Las Vegas Arbitron

Newsgroup: rec.radio.broadcasting
Date: 1995-08-13 00:00:00 UTC
From: beers@ix.netcom.com
Message-ID: <40k1tl$g64@vixen.cso.uiuc.edu>
Source record: 29873

Review Journal, 8/7, article by Ken White, reports the spring Arbitron:

12-Plus, all the time:

KJUL Nostalgia 9.8
KSNE A/C 8.7
KWNR Country 6.7
KLUC CHR/Urban 6.7
KEDG Modern Rock 5.6
KOMP Rock 5.3
KMZQ A/C 5.2
KFMS Country 5.0
KXTZ CHR/Urban 4.8
KKLZ Class. Rock 4.6

Only the top 10 were reported. Close to my heart: KLUC was down a point while 'new kid on the block' KXTZ 94.1 JAMZ was up a point, bringing the two stations to within two points of each other. (I am half of 94.1 JAMZ's morning show). Great PR that must have gotten KLUC's goat: Boys II Men, TLC & Montel Jordan played Vegas Friday night... Saturday's paper had Boys II doing a charity basketball game earlier Friday, decked out in 94.1 JAMZ t-shirts, with color and b&w photos showing our station plain as day!

# 1697. St. Louis Radio Watch

Date: 1995-08-13 00:00:00 UTC
From: SSimon9@ix.netcom.com
Message-ID: <40k1to$g66@vixen.cso.uiuc.edu>
Source record: 29874

Editor note: The author was the Radio/TV Columnist for the St. Louis Suburban Journals in the 1980's. Currently works at KDNL-TV News, St. Louis.

SIMON SAYS

KMOX, which has long been dominant in St. Louis sports broadcasting, now finds themselves on the out as EZ Communications' KSD AM/FM began broadcasting St. Louis Rams football last Saturday (8/5) from Seattle. The broadcast was average, with former CBS, ABC, Turner Sports and Phoenix Cardinals announcer Gary Bender teamed with former Rams and Notre Dame great wide receiver Jack Snow on color.
KMOX countered the loss in their sportscasts with a unique promotional kicker. Leading up to the game, when mentioning the game, they would remind listeners that they could catch KMOX's Joe Buck calling the game on KTVI, Channel 2.

In other notes about the "Voice of St. Louis", Don Marsh, who had been anchoring weekends the past year on the 1120 AM powerhouse after 23 years at Channel 2, signed on the dotted line with KDNL-TV on August 5th, and began anchoring August 7th, when the station switched from FOX to ABC.
Channel 2, now owned by New World, took the FOX net.

Bill Rieker, formerly with KMOX in the 1980's as a part-time news anchor, was heard this morning on the big 1120 with Barbara Whitesides on Total Information AM. He had been with WIBV-AM, Belleville.

Mark Klose was axed two weeks ago at River Cities' WVRV-FM (The River) and immediately resurfaced in the afternoon at smooth jazz KNJZ (100.3).

Two Chief Engineering openings in the River City: KEZK/KFNS, and KMJM.

How does a radio engineer break into the field?

This really happened.

I hold T-2, GROL, GMDSS/M/O and Ship Radar. At interview, the manager at a [call withheld ... OK, it ends with Q] Chicago stn said: "Fill this out. Some people think a GROL is worth something." She holds out a Form 755 for Restricted Permit. "Can you speak English? Send this in with 35 bucks and we'll talk." The conversation is rather insulting BTW.

I said, No can do. Fedreg 47 CFR 13.11(a)(3) prohibits me from holding T-2 and RP at the same time.

She sez "No RP, can't work. Period. Go away." Help. I'm over-qualified and I can't get in. On the other hand, I'm underqualified in that I need the experience.

Ouch! "Disneyland" was on ABC midweek, (I think Tuesdays). It became the "Wonerful World Of Disney" after it migrated to NBC on Sunday nights. I believe that the main reason for the move was that NBC offered color while it took ABC 3 or 4 more years to finally begin any color programming, (ironically with Hanna-Barbera cartoons; "The Jetsons", "Flintstones", etc. and others like "Beany & Cecil" from Bob Clampet).

BTW, "Spin & Marty" was not a seperate show, only a segment of the "Mickey Mouse Club".

Source record: 29879

While I was in London recently, I paid a visit to the BBC store in the World Service Office--they had some cassette anthologies of the show for sale--possibly some CD's, too.

One of the show's gags I remember:

BBC "QUEENS ENGLISH ANNOUNCER VOICE: "This is a cold meat joke warning--a cold meat joke follows immediately--

VOICE 1--That Woman, wearing slices of cold meat, is removing them one by one!

VOICE 2--Yes, it's the Dance of the Seven Veals!"

Since we're on the subject of Albert Brooks and radio, I just want to add that Brooks was a writer for Gary Owens' 3 - 6PM show on KMPC 710 Los Angeles in the '60s.

Also, he was on the Howard Stern show earlier this year.

If you want a new technology to take hold, you have to take something away, and the broadcast industry is not in a postion to do that. To prove my point look at the record industry.

Columbia invents the LP and RCA the 45 single. They also have manufacturing divisions that make the record players for their new formats. They give away free patent licenses to any company that buys the new presses for the formats they make. They also want to push the new format so they give away the patents for needles and the speed to other record player makers.

Phase two. They want to phase out the 78RPM album, (4 to 6 records), for the new formats. While continuing to make 78RPM singles, Columbia and RCA issue albums only on 33 1/3 RPM LP, and begin including tracks recorded only for the album, something not done with 78RPM albums. They increase the number of tracks from 8 sides to 12 cuts as well. RCA still issued book type albums, but of 45RPM EP's. Next comes the phasing out of the 78RPM single, first they delay the 78RPM version, then only release the bigger hits on 78, then none.

The same repeats with the intro of the CD. Only this time the delay is with the CD in the begining until the new plants are built or refurbished for CD production. Then it's bonus tracks, then the delay of the LP

format, and now only the biggest hit albums will eventually get out on vinyl. How long before the LP is totally gone? Not much longer.

Television was not able to take hold until the NTSC standards were adopted, and they were the standards RCA, the biggest manufacturer of home electronics and the owner of NBC, set. Color TV took 15 years to get up to speed because by then RCA was not the biggest maker of TV's, Philco, Motorola, and Zenith were. They also didn't hold the studio equipment monopoly either. When they did, stations couldn't afford the price of Color so they were swamped with the making of black and white cameras and monitors and couldn't gear up to make color broadcast equipment cheaper.

The broadcasting companies and the broadcast equipment manufacturers do not own the majority of the receiver manufacturers, or even the plants the make them for all the brands out there any more. Free licenses for patents are unheard of these days, the last one I know of was the Phillips permit of their cassette tape format in 1967 and that was years after they had been the sole maker of them for 5 or 6 years.

The only way a new modulation standard of broadcasting could be made to take hold is to replace something already out there. Maybe the FCC's new unlimited station ownership might do this. If someone owned duopolies all over the place and decided they wanted the AM band to go digital, they could force it by making all their better coverage outlets get experimental permission. If you have 50 ot 60 staions you might just be able to have the leverage with the FCC to get them. They would then do DAB only simulcasts of their other AM station, which would go to a music format, of course.

Next step would be to buy up as many receivers of the new format that were made and practically give them away to listeners at public A-B listening comparisons held in shopping malls. Finally, it would be to convince another broadcaster in the same markets to do the same with their stations, just like RCA convinced CBS to compete with NBC in the development of TV broadcasting, and the cross licensing of the 45 and LP record formats by their respective record companies.

It would take a lot of money, sure, but proportionally it would be close to what RCA and CBS spent in 1947 dollars for the development of commercial TV and 45 & LP records in their investments.

> One difference of note: The other "upgrades" required only a moderate
> investment on the part of the broadcaster (except, of course, AM
> stereo). Some are even free (RDS). Digital Radio could well be the most
> expensive upgrade yet, and while promising CD quality sound, what does
> the listener really want? Quality sound or programming they want to
> hear?

Well the state of AM radio programming these days is the pits. If you could get better than FM sound you might decide to do something with music programming on AM.

> And then there's HDTV...HD, but still TV....Hmmmmmmm...

You have to offer something with HDTV you can't squeeze into 19 inches, or even 40 inches. Like it or not, cable will have to set the pace since they can do things with content broadcast TV would get in trouble doing. And I'm not just taking sex or language. Specialty programming would be unprofitable on broadcast TV, but not on cable.

A lot of people tuned in when "Wide Wide World" took us on remotes all over the country on Sunday afternoons. The more profitable Hopalong Cassidy movie running in competition still made more money, but people wanted TV do more on the scene remotes after that show. When it came to those Telstar broadcasts, they ran free and grabbed a lot of curious viewers away from local programs, but sponsors still paid for those scheduled "Name That Tune" reruns.

# 1705. Re: AMAX: Enhanced AM - what happened?

Newsgroup: rec.radio.broadcasting
Date: 1995-08-13 00:00:00 UTC
From: Alfredo.Torrejon@amd.com
Message-ID: <40k1u4$g6p@vixen.cso.uiuc.edu>
Source record: 29882

What percentage of the AM stations in the US are actually using the equalization dictated by NRSC standards? All the AM stations in Austin sound mushy when listened to on an AMAX receiver but sound fine on a homebrew receiver that has a relatively flat frequency response to 11KHz, so I assume that they are not complying with NRSC. I've seen NRSC audio processors in broadcast equipment catalogs, so I know that they exist and that they are pricey! Does anyone know what filter configurations are commonly used in these processors to attenuate audio above 10KHz? What equalization do Mexican and Canadian AM stations use?

# 1706. Arbitron Visit

Newsgroup: rec.radio.broadcasting
Date: 1995-08-13 00:00:00 UTC
From: caldwe33@futures.wharton.upenn.edu
Message-ID: <40k1u5$g6r@vixen.cso.uiuc.edu>
Source record: 29883

Last week, I went to visit Arbirton in Maryland with some co-workers (Y100 Philadelphia). Like the previous time, you sit in front of a computer for eight hours "looking" through the scanned-in books you have selected through a sort.

Some interesting insights:

Numerous people filling out multiple books (exact same handwriting) from the same household (nothing new...)

One book where the person used only frequency references. Somehow the Arbritron folks credit all of the listening to San Francisco stations, even though there was no mention of the person being on vacation. They said they were aware of the problem and would re-credit all of the listening to Philadelphia stations.

A few people who insist they are still listening to "Eagle 106" (they have been Smooth Jazz now for over two years)...

Multiple books where only time references are written down. No station names. Consequently...no one gets credit!

And how's this for a crazy example of how our ratings system can sometimes be a bit inaccurate:

Listing:

1:20 to 1:40 Y100, KYW, WYXR

This person has indicated they listened to all three stations between 1:20 and 1:40. Would you believe the middle station receives NO credit?

Here's how they break it down: There is 20 minutes of listening and three stations listed. Each station receives 6 2/3 minutes of listening. So Y100 gets listened to from 1:20 to 1:26.5 (and receives 1 QH). KYW gets listened to from 1:26.5 to 1:33. (NO credit). WYXR is listened to from 1:33.5 to 1:40 (1 QH).

KYW receives no credit because they don't have five minutes of listening in any of the four quarter hours. We saw this numerous times and felt it was inaccurate to assign the quarter hours in this way. The station that is second in top of mind receives no credit, but the station that is third does...

Visits to arbitron are always interesting. You are able to see all of the comments people write. Many from ignorant folks, many from programmer-wanna-bes. Make a trip sometime...see how folks use your radio station. How they write down their listening (Y100, 100.3, or

"that Y station).

Sean Caldwell
Y100 Creative director and voice-over dude.

# 1707. Posting Ratings... (was Re: West Palm Beach Ratings)

Newsgroup: rec.radio.broadcasting
Date: 1995-08-13 00:00:00 UTC
From: MTFH12A@prodigy.com
Message-ID: <40k1u6$g6s@vixen.cso.uiuc.edu>
Source record: 29884

Posting these station's ratings is most appreciated. However, if you don't make it clear what frequency any station is on, it makes it difficult to do any analysis of how the different bands (AM/FM) are doing. If you include a slogan (ie: Country 106) it's pretty easy to see it's an FMer. Otherwise . . . ?

Please include frequencies. Thanks

[Moderator's Note: When posting ratings of any city, the band (or frequency) *AND* the format is essential for anyone to make heads or tails of what you are posting. Also, notes such as 'daytimer', 'carries [enter team name here]', carries [enter syndie talk host], or any other notes which can better explain why a station might be getting ratings. The notes are not essential, but the format and band are. Also *PLEASE* don't post anything other than the 12+ numbers and the Drive Time top-10. Please credit your source. Bill]

[ACTUAL PRESS RELEASE!]

CBS Radio Station Bans Ad for Shearer Comedy CD--
Says "O.J. on Trial: The Early Years" in Poor Taste

HOLLYWOOD (August 4)--CBS owned-and-operated KNX ("All News Radio") today refused to air a 60-second commercial for comedian Harry Shearer's latest CD, "OJ. on Trial: The Early Years," calling it in poor taste.

The compact disk, which recently received 31/2 (out of four) stars in The Los Angeles Times, lampoons the events of the ground-breaking double murder trial and many of its prominent personalities, including Judge Lance Ito, defense attorneys Johnny Cochran and F.Lee Bailey, and witnesses like Brian "Kato" Kaelin and Rosa Lopez.

In a letter faxed to Shearer's manager, Harriet Sternberg, KNX Senior Account Executive James Olerich stated, "KNX does not make light of this tragic event."

Sternberg immediately attacked the CBS decision as provincial, noting that KNX, which has achieved a record audience with gavel-to-gavel coverage of the trial, is "not standing by any of the First Amendment rights that guarantee every American, including entertainers, freedom of speech. Their decision is simply
mind-boggling," Sternberg said.

"The parodies on Harry's CD have been aired on television programs like NBC's 'Late Night with Conan O'Brien' and 'Later with Greg Kinnear,' as well as CNN and E! Entertainment Television," Sternberg added.

Shearer, whose vocal talents on "The Simpsons" and bass guitar virtuosity
as Derek Smalls in "This Is Spinal Tap" have made him a legend in Hollywood,
remained baffled by the CBS decsion and went into seclusion.

Shearer has now put the question of where to advertise before his legion of fans on the Internet's World Wide Web, where the best idea wins a free copy of the CD.

The Harry Shearer WWW site is at http://www.pobox.com/harry

In response to the messages looking for locations where CoolEdit is
available, here is an excellent source:

The Buddy Project is on the Internet at URL:
http://www.buddy.org/index.html

The CoolEdit file is available in the Softlib section of the Website
and is available for download in .ZIP format, meaning you'll need some
form of Unzipping software (PKUNZIP, etc.).

If you don't have a graphic web browser, but do have FTP download
capability, the FTP address is:
ftp://www.buddy.org/buddy/checkout/cooledit.zip

If at all possible, check the entire Buddy Project area. It is a
very good site and has some excellent downloadable software selections.

Message-ID: <40k1uf$g7e@vixen.cso.uiuc.edu>
Source record: 29893

Program Directors, please note:

The Dade County Public Schools (Miami, FL) has had an excellent radio broadcasting instructional program for over 25 years. It is an adult and continuing education program that is now located at the Miami Lakes Technical Education Center campus.

The program stresses production, news and on-air skills and includes daily live broadcasts on 91.3 WLRN-FM, the local public radio NPR affilliate (100K watts/stereo). Graduates of the program know the basics as a minimum and quite a few are ready to work without having all the additional training that seems to be necessary for so many of the people coming out of the XYZ schools of broadcasting.

I have just taken over instructional duties for the program and intend to continue the history of excellence the program has achieved. If your station is looking for new talent, please store my e-mail address and let me know of positions available. I'll pass them along to my graduates.

Contact me at:
e-mail: jwlovell@ix.netcom.com
phone: (305) 557-1100 ext. 238 M-F 8A-4P ET
station: John Donovan
WKIS-FM
9881 Sheridan Street
Hollywood, FL 33024

Students from the program are good (though a bit green). We're always looking for placements. Save the addresses above and let us know if you have any openings. Thanks.

John Lovell, Instructor
Radio Broadcasting Program
Dade County Public Schools

You can check out the Job Search Web Page here at the AIRWAVES
site. We offer free help wanted (hiring) or positions wanted (looking
for work) notices to anyone offering or looking for any facet of radio
broadcasting help.

To check out this service, point your web browsers (Netscape 1.1N is
the prefered browser for the AIRWAVES pages) at the following URL....

http://radio.aiss.uiuc.edu/~rrb/job.html

You can also look at the SBE page (www.sbe.com) for their ads.
However I dont know whether their service is free or not.

If you have never posted a job-related item to the Web Page, please
read the following information file for full particulars.

Best of luck to you.

William Pfeiffer
Moderator: rec.radio.broadcasting/AIRWAVES RADIO JOURNAL
wdp@airwaves.com * wdp@wwa.com * airwaves@woodtech.com
Web: http://radio.aiss.uiuc.edu/~rrb/

---

Rec.radio.broadcasting and AIRWAVES MEDIA WEB have begun a free job
placement service for media positions.

This service is open to anyone seeking employment in radio broadcasting.
OR
Anyone offering employment in radio broadcasting.

This includes all facets of the industry from Air Talent and Board Ops
to Program Directors, General Managers Sales Reps and Engineering Staff.

Note: Other than a cursory check, no effort is made to verify the
credentials or legitimacy of an person or organization who posts
here. Double check everything before you believe anything.

Still with me? Good... Here is the deal...

1. Send email to EMPLOYMENT@AIRWAVES.COM.
2. Use a descriptive subject that says one of the following...
o A) Help Wanted: Brief Description of opening.
o B) Position Wanted: Brief Description.

Note: You must use one of the above (A or B) as the beginning of
your subject line or your message will be returned. This is required
for sorting of you messages for easy retrieval. Obviously Help

Wanted means you are offering a position, Position wanted means you
are looking for work.

** Please Include Job Description In Subject **

Example...

- Help Wanted: Air Talent, New York City area
- Position Wanted: Engineer, 20 years Experience

3. Letter should be no more than 100 words (I won't do a word count,
but brief and to-the-point will give the best impression)
4. Include your....

o A) Full Real Name
o B) Postal Address [Strongly encouraged, but no need to give
your home address, A PO Box or business address preferred]
o C) Voice and/or Fax Phone (voice preferred)
o D) Email address
o E) If offering a job, your company name and title.

5. No resumes, but you can include a URL to your web or FTP site if there
is material there (resume, picture, sound clips etc) that might be of
assistance.
6. If and when you fill your request, write and have your listing removed. It
will be removed in 30 days anyway.

7. To look at the listings... point your Web Browser at..
http://radio.aiss.uiuc.edu/~rrb/job.html

It may take a few days to get your ad online.

Please address any other questions, problems or ideas to my *personal*
email address EDITOR@airwaves.com.

A Caveat For The Job Seeker

We look at every item before posting to see if it appears legitimate.

However we take no responsibility for any contact made via this
service. You are doing this at your own risk. This is a publicly
accessible global resource and can be read anonymously by potentially
millions of web surfers. Do not take unreasonable chances, especially
for individuals seeking employment. Please verify all respondents'
identities by calling their company or station at some publicly
accessible number and verifying the person's identity.

Especially if your ad says you are 'new talent' or 'looking for my
first commercial break', be extra aware of scams which masquerade as
job opportunities. Never send any money to anyone. Don't divulge
much information on any first call (even less if the means of contact
is email). Not to be sexist, but female talent should be extra
careful about scams...

If this is too serious a risk for you, don't use this service.

But, as they say, nothing ventured nothing gained.

I hope you are successful

---

Good.

Some of us work hard and play by the ruules, some of us don't want to work that hard.

Thoreau talks about people who want to engage in civil disobedience must be willing to pay the price. In this case, the price is $10,000.

This isn't about free speech. This is about not liking the rules and not working within the system to change them because that would be too hard.

What these clowns ought to do is to save up some money (which usually comes from getting a job) and buy a station. There are plenty available.

>he's the most reasonable guy to begin with, but that was so far out of
>line Infinity ought to just write the FCC a check. Geez.

What did Howard say? I mean, I have heard him say a lot of things over the years that on out context
sound just horrible, but when you hear the whole conversation, it doesn't
sound as bad.

Don't get me wrong. He may have gone over the line this time; I don't
know because I haven't heard what he said yet. So please no flames.

Someone please post the conversation, or as close to the whole thing as
possible, not just an out of context comment. That way we can make an
informed judgement on the severity of the situation.

Thanks!

Message-ID: <40p5i1$e9g@vixen.cso.uiuc.edu>
Source record: 29751

All,

I'm intrigued by the sports radio boom (for lack of a better description). In my locale, we have KNBR, San Francisco's "Sports Leader," but I'd like to know about WFAN, WSCR, KTIK in Nampa, Idaho, and any other sports stations around the country. I want to hear about the main programming and personalities, particularly focusing on how the hosts and the listeners can stand to have thirty-second "conversations" on the same subjects month after month. How can people talk sports for twenty-four hours in a place like Idaho, which doesn't have local team interest? Is there a special appeal to the radio, or do people simply not have friends to talk sports with? And this is coming from a sports fanatic and avid sports talk listener.

If anyone can satisfy my curiosity and give me some insights/opinions on the previously listed stations, please post in the rec.radio.broadcasting newsgroup or e-mail me at:

Bigger1@ix.netcom.com

Thanks,

Steve G. in Fremont, CA

>last time I overhauled it.

Which radio station is that? Here in Austin, TX, we have KAZI at
88.7MHz, which broadcasts in mono and has a slight amount of power supply hum
amplitude-modulating their carrier. My guess is that their exciter doesn't
have a wide enough bandwidth to handle any subcarriers. On a car radio, their
signal sounds pretty good because they don't suffer from as much picket-fencing
as their stereo competitors.

About 30 years ago in Detroit, my father was good friends with a disc jockey by the name of Robin Walker - real name Bob Franklin. Over the years, contact was lost and I am trying to locate him. At last I knew (mid 70's), he was in Louisville, KY working as a morning man. He had a wife Sue and daughter Ellen (now early 30's, I would imagine). Have you seen Bob/Robin? Please email me and let me know where he's hiding these days. Thank you so much in advance.

it is distributed mostly off line, since most on line folks are way ahead of this non-technical publication. thanks for feedback-howard freedman email: jdtp81a@prodigy.com

AUGUST 1995

volume 2

iRADIO-INTERACTIVE RADIO

THE FIRST PUBLICATION DEVOTED

EXCLUSIVELY TO RADIO AND THE INTERNET

iRADIO WELCOMES KNX,KNBR,KKSF,KDFC,

KCBS-AM,WBIG, ONLINE MEDIA &

PREMIERE RADIO NETWORKS

In the last issue of iRADIO, we discussed why radio

stations should continue to get on the Web. This is

probably a good time to explain the differences between

"browsing" (exploring) the Web, and actually putting

your station on the Web. "Browsing" the Web simply

means looking at existing Web sites. Putting your station

on the Web is where you create a Web site to "represent"

your station.

Don't spend thousands to put your station on the Web, or

you're wasting money! The easiest, most cost-effective way

to put your station on the Web is to "trade" with a locally

based Internet service "provider." The "provider" will

maintain, house, and operate all the equipment needed to

service your Web site and E-mail. You will also need a

"Webmaster" to build and maintain the content on your
Web site. The "provider" will either have an internal
Webmaster, or recommend someone they regularly use.
Using a local "provider" and Webmaster is the best way to
maintain and control your Web site.
To find a local Internet Service Provider, check the special
"computer" sections in your newspaper and the "freebie"
publications at local computer stores.
To put your Web building plan in motion, select at least two
people from your station to head up the project.We suggest
your Engineer or computer guru, and the Marketing or
Program Director. Then, set goals for your Web site, plus
a time line and a budget. If you trade with a local provider,
the only likely area of expense will be the Webmaster.
iRADIO's 10 Web Site Starting Features
1. Station logo (gee, what a concept!)
2. Listener welcome - format description
3. On-air talent line-up / program schedules
4. Station phone numbers, address, contacts, etc.
5. Basic sales information
6. Hot play lists
7. Monthly Promotion / events calendar
8. Merchandise information
9. Frequent listener club registration
10. Instant E-mail to station
Common Web Site Design Mistakes
---
- Using too many large graphics, which load so slow,
users will give up!
- Providing only the same basic information already
found on your station.

- Never updating or changing the Web site.

- Trying to get too much information in the Home

Page, (the first page).

- Over extending / promoting E-mail for all talent

without the ability to keep up with the required

responses,(a nightmare).

iRADIO's Tips to Creating Great Radio Web Sites

---

- Give listeners fresh information and entertainment

above and beyond what's on your station.

- Show pictures of your talent. You'd be amazed at

the desire to see what your talent looks like

(use phony pictures to avoid scaring listeners if

needed!)

- Include Interactive features like trivia contests, hidden

"find our morning show" pages, live on line "chats"

with bands or your talent, etc.

- Forced listening features that drive 'em back to

your station!

- Creating compelling features and updates that draw

listeners back to your Web site weekly, or daily!

- More sophisticated features include audio and video

clips, e.g. new CD samples, show highlights and

promos, etc.

iRADIO Simple Glossary

---

Webmaster -The person who builds and maintains

the content on your Web site.

Chat-Live, instant, "cyber-conversations" taking place

between two or more persons simultaneously.

(A.K.A. "chat rooms" , see Real-Time)

Real-Time- The phrase used to describe an event
happening live and instantaneously, such as
"real-time audio."
Link or Links- A direct connection to another Web site.
(A.K.A. "hyper-link")
Yahoo- The most popular listing service on the Web.
Used to "search" for key topics or words.
Vaporware -A hi-tech term used to describe
over-exaggerated and non-existent products
or services (A.K.A. B.S.)
Server -The computer that provides the service
for your Web site and E-mail. (A.K.A. "host computer")
FAQ- Frequently Asked Questions
The next issue of iRADIO is a special NAB Convention
edition. We will review "getting started on the Web,"
plus more iRADIO tips to creating great radio Web sites,
and the best ways to generate "traffic" (hits) for your site.

# 1734. 500 KW WLW Daytime in Hawaii ?

Newsgroup: rec.radio.broadcasting
Date: 1995-08-15 00:00:00 UTC
From: BROCKRADIO@aol.com
Message-ID: <40p5ii$ea3@vixen.cso.uiuc.edu>
Source record: 29761

In regards to WLW being heard in Hawaii during the daytime, it might have been possible close to Hawaiian sunset (the so-called critical hours), but I doubt it could be received, even on a high grade multi-tube consumer radio, at 12:00 noon. For point of reference, I regard "daytime" reception as anything heard during the period between
10:00am to 2:00pm local at the receivers location. This allows for minimum sky wave
effect on medium and long waves. Granted there was much less man made QRN, and no Hawaiian station was even close to 700Khz during WLW's 500kw operation, and stranger things have happened DX wise, but based on years of DXing here in the islands, it would have been a very rare occurrence. For example, the great circle distance from Honolulu
to Cincinnati (Mason, OH) is 4432 miles. Honolulu to Tokyo is 4334 miles.Very close. Add an extra 500 miles and you get the great circle path from Honolulu to Seoul.
The following stations are close in distance, frequency, and power, to the WLW to Honolulu path:
JOAB 693 Khz 500 kw Tokyo
JOIB 747 Khz 500 kw Sapporo
JOUB 774 Khz 500 kw Akita
HLSA 603 Khz 500 kw near Seoul
HLKA 711 Khz 500 kw near Seoul
HLCA 972 Khz 1500 kw near Seoul
Due to locals on 590 and 690 Khz lets rule out JOAB and HLSA.
I have not been able to hear so much as a carrier from any of these stations during the daytime hours while I have lived in Hawaii. This includes both Metro and outer-island
deserted beach locations.They all BOOM in at night. (HLCA can be heard on a regular 10 khz spaced car radio, with no modifications, even in downtown Honolulu).On the other hand, Longwave signals from Russia on 180 Khz (150 kw) can be heard as a carrier all day in the summer, and I have heard audio at 12:00 noon from this LW Station during the winter. The first US mainland signals I hear are always KFAX 1100 Khz, and KTNQ 1020 Khz, as carriers, about three hours before local sunset. I have heard audio from JOIB and JOUB as late as 90 minutes after local sunrise. Equipment: Palomar Loop, Home-Brew Tuneable RF pre-amp,Sony 2010 and Hammarlund HQ-140X.

> 910-CNN.

Thanks for sharing, Bill. I have the dubious distinction of having worked at one time or another at *all* of the above stations. When I left Hartford in March, WTIC was doing some major equipment upgrades, especially to their production facilities, and the place smelled of an impending sale.

'TIC is a remarkable station that has been able to capture the minds of Connecticut residents since 1924. Much of their success during my lifetime can be summed up in two words: Bob Steele. But even since his but-for-once-a-month retirement, the station has done well owing to its unshaking commitment to news.

When a storm threatens or something happens in Connecticut, radios turn to 1080 ... period. And it will be a generation before that changes, if it ever does.

ARS has found the jewel for its crown.

# 1737. WREK on the NET WWW demonstration

Newsgroup: rec.radio.broadcasting
Date: 1995-08-15 00:00:00 UTC
From: selbie@cc.gatech.edu
Message-ID: <40p5im$eab@vixen.cso.uiuc.edu>
Source record: 29764

For about a year, WREK Atlanta 91.1 FM, the Georgia Tech student radio station has been experimenting with Internet broadcasting. This has led to the 'still in testing' software called WREK-NET which is in use on many of Georgia Tech's computing facilities.

Although the WREK-NET client software isn't available to the public just yet, a WWW demonstration of WREK-NET is now accessible.

Now users from all over the Internet can have "free samples" of WREK by using our WWW WREK-NET demonstration page.

After clicking on the "Run" link and waiting a few moments, the last 20 seconds of what was heard on WREK get's downloaded to client Web browsers as a soundfile.

It's been tested and verified with a variety of Web browsers (Netscape, Mosaic) as well as a variety of platforms including UNIX, Windows, and Macintosh.

# 1738. A sad day... KJAZ calls it quits... Again.

Newsgroup: rec.radio.broadcasting
Date: 1995-08-15 00:00:00 UTC
From: rrb@clm.aiss.uiuc.edu
Message-ID: <40r1gt$otv@vixen.cso.uiuc.edu>
Source record: 29765
Cross-posted to: rec.radio.broadcasting,rec.video.satellite.tvro,rec.music.bluenote,ba.broadcast

It is a dark dark day for those of us who have learned to depend on and love the very special jazz sounds from KJAZ satellite radio.

For 3/4 of a year, KJAZ has been broadcasting strictly on satellite in glorious discreet stereo from the San Francisco Bay area. At one time, KJAZ was on FM *AND* satellite. The FM was sold and the cash used to fund KJAZ's satellite transmissions.

As of today, there is a repeating loop tape from the president of KJAZ telling everyone that the station is insolvent and is suspending operations immediately. Despite corporate support from Microsoft and others, the funding was just too little.

KJAZ had just the right blend of jazz for my tastes. Easy to listen to, mainstream but not too mainstream. They were big on listenable jazz that would fit with your day to day life. Not screeching and 'how many notes can we get between A and A-flat' style of jazz (which in my opinion KLON <the only remaining full time jazz on satellite> plays *way* too much of) and yet not the bland, neutered, 'smooth jazz' (known in radio circles as NAC). Not that NAC is bad, but KJAZ had a way of remaining a straight-ahead jazz station without falling to ether extreme.

I had come to depend on their sound while working on the computer, reading a book or even as a companion while sleeping. They had replaced, for the most part, my listening to "Classical Collections" and "WFMT" on my dish.

I guess it just goes once again to prove that even as fine a station as KJAZ was, money talks and ONLY money talks. Now another stereo pair of subcarriers will go silent. Another fine station will go dark and another nail in the coffin of creative and interesting radio will be driven in. One would think that Microsoft could have footed the bill altogether and not even missed it...

I feel like I have lost a friend.

# 1739. Baltimore RadioWatch 8/13

Newsgroup: rec.radio.broadcasting
Date: 1995-08-15 00:00:00 UTC
From: James Purther <73124.3307@compuserve.com>
Message-ID: <40p5gm$e6k@vixen.cso.uiuc.edu>
Source record: 29823

>From Charm City...

While first mentioned as just a rumor and logical possibility in a previous RadioWatch two weeks ago, now Baltimore radio's worst kept secret is 70's station "The Colt" (WOCT-104.3) has signed Brian Wilson to do mornings. Brian Wilson, once a dominant morning show host on the very same 104.3 (then B-104, WBSB, CHR in the mid to late 80s), was the PM drive talk show host for WCBM (680) but resigned two weeks ago. Wilson starts on 8/14 and is expected to play a factor in the morning ratings war. It also solidifies Colt's line up (mornings was a weak spot) as well as shakes up a daypart that had fallen into a lull.

In an ironic coincidence, Don O'Brien, Brian Wilson's co-host of Brian and O'Brien on B-104, will be the guest host of WQSR's morning show "Rouse and Company" also starting 8/14 while Steve Rouse and co-hosts are on vacation. Don O'Brien has guest hosted before and this had been planned well before Wilson's start date was announced. Brian Wilson and Don O'Brien did not get along off the air.

WRNR (Annapolis-103.1, Progressive Rock) juggles it's line up. Debbie Mann does mornings, Damian Einstein is in middays, Sean O'Mealy afternoons, Bob Here takes evenings Monday thru Wednesday while John Hall is on Thursday thru Sunday, & "The Phil Zone" is on nights. WRNR's "free-form rock & roll" has had a loyal following but not much ratings success against progressive WHFS and AOR's WIYY and WGRX. Though rumors have it changing formats to fill the classic rock void or a hybrid Rock 40 format, present programming staff is heavily committed to progressive.

And Metro Traffic loses another anchor. Don Wicklin head to WBIG-Washington D.C. as their new Morning Show Producer. Lou Kreiger (long time market vet) and Gerry Burke (from Shadow Traffic in Philadelphia) are the new anchors filling the missing spots. Lisa Callahan also left Metro to be the new afternoon personality at WJHU.

Stay tuned,

Jim Purther
Metro Networks-Baltimore

# 1740. BALTIMORE: Brian Wilson's back on 104.3

Newsgroup: rec.radio.broadcasting
Date: 1995-08-15 00:00:00 UTC
From: Todd Fisher <toddf@zonie.pdial.interpath.net>
Message-ID: <40p5go$e6l@vixen.cso.uiuc.edu>
Source record: 29824

Brian Wilson officially debuted this morning (8/14) on Baltimore's
104.3 THE COLT.

It's a return to FM morning drive for Wilson, who was formerly paired
with Don O'Brien (Brian And O'Brien) during B-104's heyday during
the mid 1980's.

Brian actually took the air Friday morning for a little warm up...
and had the market buzzing for his official debut this morning.

# 1741. Chicago Radio Watch: 8-12-95

Newsgroup: rec.radio.broadcasting
Date: 1995-08-15 00:00:00 UTC
From: JJB92@aol.com
Message-ID: <40p5go$e6o@vixen.cso.uiuc.edu>
Source record: 29825

Summer doldrums have set in..apparently the heat of Chicago has resulted in a slowdown in news.....

Jock musical chairs.....

Brian Middleton and Julian Perez have been promoted to the evening and night slots formerly handled by George McFly and Frankie Rodriguez on dance/top 40 WBBM-FM (96.3). As you will recall, George and "Hollywood" Frankie Rodriguez were promoted to the morning show. Julian uses "Jumpin" as his nickname. Perhaps there is medication for his condition.....

Say it ain't so.....

Robert Murphy, former morning man at WKQX-FM and most recently at talker WLS-FM has left Chicago. Robert, apparently tired of the winters in Chicago took his act and moved it to WRMF-FM in Palm Beach Florida. I am sure Howard Stern is quaking in his boots now that he has Murph to compete with.

An investment even better than Netscape Communications...

Back in 1955, Bill Florian purchased WNIB-FM (97.1) for $5,000. NIB mostly plays classical music along with a smattering of jazz and has a nice competition going with WFMT-FM (98.7). Published reports noted that Bonneville International, which is wholly owned by the Mormon Church and owner of light rock WTMX-FM, is very interested in the station. Some insiders speculate that the station could draw around 50 million dollars. However, Bill Florian continues his desire to own the station. Does every man have his price?

Sports news.....

As noted during the last Radio Watch, sports talker WSCR-AM (820) was down one Bear since the departure of Ron Rivera. Problem solved; they have added former Bear Dennis McKinnon to their staff to help analyze the beloved Bears. Dennis will appear on the post game coverage along with Mike Murphy. Memo to current Bears-if you want to guarantee employment after football, win the Super Bowl. Tom Thayer, Garry Fencik, Ron Rivera and now Dennis have all landed spots talking about the Bears in Chicago radio. It's not what you say, it's the fact you won a Super Bowl.

Also at SCR, the coach, Mike Ditka has reupped for more Bear analysis. Coach Ditka will be on twice a week during the morning show as well as holding court for an hour and a half lunch show from a local restaurant.

Rumor mill, rumor mill

Due to the lack of news, here is an unsubstantiated, but fun to speculate rumor picked up on.....

Evergreen Broadcasting, which owns among other stations entertaining talker WLUP-FM (97.9) and sports talker WMVP-AM (1000) is apparently considering a plan to simulcast Steve Dahl on the FM side for his morning show. The move would be a huge vindication for Steve. No word as to where Kevin Matthews would go, but it is likely that Evergreen is concerned about the recent slide in the ratings at WLUP. Steve and Bruce Wolf continue to deliver impressive numbers on WMVP during their morning drive show.

# 1742. Mid-Missouri Radio Watch

Newsgroup: rec.radio.broadcasting
Date: 1995-08-15 00:00:00 UTC
From: transvox@interstate.net
Message-ID: <40p5gp$e6q@vixen.cso.uiuc.edu>
Source record: 29826

Back from a quick trip to my hometown market (and I don't mean the IGA store)....

* The 'Good News Journal', successful applicant for translator K280EJ, is now asking for $17,000 in donations to get the rebroadcaster on the air. K280EJ, at 103.9 mHz, is intended to replace K228CR at 93.5 mHz. K228CR had to leave the air when Boonville rimshot KTLH(FM) came on the air one year ago.
The Columbia translator rebroadcast "Christian"-contemporary KLTE(FM) from Kirksville. The new K280EJ translator was observed on the air for tests the first week of July, evidently using K228CR's Tiger Hotel site. It has not been back on the air since.
In its August issue, the 'Good News Journal', says the money is needed for an "upgrade [to] current translator equipment and antennas."
The newspaper also plans to sell spots on the Columbia translator, asking churches and likeminded businesses to purchase one-year packages. Commercial or other messages can be inserted on translators for 30 seconds each hour.

* The winner for the rights to St. Louis Rams football in mid-Missouri is country station KCLR(FM), licensed to Boonville but based in Columbia. "Clear 99" is also carrying the complete package of pre-game, post-game, and coaches' shows. Columbia's KFRU(AM) continues with the rights to Kansas City Chiefs football.

* I don't have the specific numbers, but an operator in the market provided some general information about the outcomes of this spring's Arbitrons in Columbia. The winner in 12+ numbers once again was KCLR(FM); however, shares for all stations except Jefferson City's KTXY(FM) dropped. KTXY, the only contemporary-hit station in the market, more or less, managed a 10.0 share, a big win. Country stations KCMQ(FM) and KLIK(AM) also did well. New oldies station KOQL(FM), in a time-sales arrangement with gold-based adult-contemporary KPLA(FM), evidently cannibalized some of KPLA's audience share. Legacy news/talker KFRU(AM) and album alternative KBXR(FM) also took a hit in the book. Soft-adult-contemporary KTLH(FM) did not get enough listeners to appear in the survey.

# 1743. New England Radio Watcher: WXRV

Newsgroup: rec.radio.broadcasting
Date: 1995-08-15 00:00:00 UTC
From: fybush@world.std.com
Message-ID: <40p5gr$e6s@vixen.cso.uiuc.edu>
Source record: 29827

*As I courageously predicted in this space two weeks ago, 92.5 in Haverhill MA (30 miles north of Boston) has new calls. They started using them Monday August 14...and in keeping with the station's new non-ID "The River," they're WXRV. The former calls, WLYT, had been buried very quietly and quickly at the top of the hour only, ever since the format change August 1. The format is still evolving -- it had started as almost a straight AAA, but it now incorporates a lot of 80s pop as well. Fun to listen to, and more lively than AAA rival WBOS 92.9.

*Jerry Garcia's death was marked here with daylong special programming Wednesday on classic rocker WZLX, frequent Dead tunes on AAA WBOS, a rerun of an old "Rockline" show featuring Garcia on New Hampshire's WGIR-FM and Providence's WHJY, and almost nothing from heritage rocker WBCN, now that it's leaning more modern. BOS followed up with 5 hours of special programming Saturday night, and WZLX did a couple of hours that night as well. I have tapes of much of the coverage -- anyone tape their locals doing Garcia programming?

*Unlike my colleagues at the Globe and Herald, I _do_ admit when I've goofed, and I do make corrections. In an earlier post, I had described brand-new 97.3 WJDF Orange MA as satellite AC, based on a few minutes of listening while driving through on a Sunday night. I stand corrected. I'm told the station is live and local, and that it signs off at midnight daily. Glad to hear it.

*Reports from Lowell, 25 miles northwest of Boston, suggest that there's a new TIS on the air there, on 1610, with info about the Lowell National Historical Park. I'm told it's only testing, which would explain why I didn't hear it up there Saturday night. I wonder how it interacts with the 1610 TIS in Nashua NH, 12 or so miles away.

*And, from the ever-popular Unconfirmed Rumors Department, comes word that WTIC-FM in Hartford is already ID'ing at the top of each hour as "An American Radio Systems station." Curious...considering that so far all ARS has officially done is announce its *intent* to purchase WTIC-FM and AM from Chase for $42 million. Until the telecom bill passes...or until ARS applies for and is granted a waiver to own 3 FMs (WTIC, WZMX 93.7, WRCH 100.5) in the Hartford market... it's my understanding that ARS can't even LMA WTIC-FM, much less own it. I haven't heard the new ID myself

(Hartford's a bit out of range here in Waltham), but my network of keen-eared spies with high-mounted Yagis and good receivers is checking it out as I type.

*Waltham's own WRCA, 1330 AM, has been sold -- again. SMY Media of Chicago unloaded the 5kw full-time leased-timer to ADD Radio Group (Peter Arpin) for $1.7 million. Arpin also bought WZEA-FM Hampton NH a few months back. Wonder what his plans are? WRCA also manages the leased time on Greater Media's WMEX-1150...mostly Haitian Creole and Spanish on both, although WRCA runs a few hours of veteran Boston DJ Bill Marlowe on weekends. Bill's all over the dial anyway, with the spots he voices for Tommy Floramo's restaurant ("The meat falls off the BOOOOOONE!") and Giant Glass ("New England is GIIIIIIIIIIIANT country!")

*Finally, a big "wake up, guys!" to Broadcasting and Cable magazine, which just this week (August 14) sunk its teeth into the hot new story that Stephen King is buying 2 more radio stations in Bangor, Maine. Uh, folks...we had that here the week of June 10! But then, B&C is notoriously sloppy about radio...this week's issue also notes Family Radio as the buyer, rather than seller, of WBIV Natick MA. B&C also regularly transposes AM and FM, mangles calls, and runs info straight out of the Yearbook that is clearly outdated. Oh well...that's why I *also* read M Street, FMedia!, Inside Radio, and a few others...

Retlaw *wishes* they owned KCAL(ch-9) Los Angeles,but they don't.

Retlaw TV and Disney TV stations are run by completely different groups.
The Retlaw stations are controlled by Don Drilling who married Walt
Disneys Daughter.

Retlaw stations....
KJEO CH-47 Fresno
KIMA Yakima WA.
KEPR Pasco WA.
KLEW Lewiston ID.
KIDK Idaho Falls ID.

Even this is an old list,I believe money problems forced the sell off of
some of these stations in the early '90's. KMST Monterey was sold during
these"problems".

Take Care,
Mr.News

"I survived Retlaw Broadcasting"!

# 1746. BBC Radio "Internet and Music" Programmes

Newsgroup: rec.radio.broadcasting
Date: 1995-08-15 00:00:00 UTC
From: Rob Taylerson <rta@dircon.co.uk>
Message-ID: <40p5gt$e6v@vixen.cso.uiuc.edu>
Source record: 29830

Dear All,
I'm producing a week of programmes for BBC Radio to be
transmitted in late November on "The Internet & Music" .

The programmes will include features on IUMA(The Internet Underground
Music Archive), Dreadzone,FSOL as well as info on getting started and
where its all going.

I am still lacking a British version of IUMA/Virtual radio ie. a UK based
organisation promoting music/bands purely over the Net. Most of these
types of
companies are Californian based and it would be good if anyone connected
to a UK
group could get in touch with me.

Also If anyone would like to suggest any album/singles that are Net
related for use in the progs as undersores etc i would be very grateful.

Finally if anyone(UK based) thinks that what they are doing(Net/Music
related) should be covered in the progs then there's still time to be
included!

Email me at rta@dircon.co.uk

The three Connecticut River Valley stations are:

100.5 WUVR Lebanon
107.1 WBFL Bellows Falls
105.5 W288AM Keene

these are all owned by a company called ``Radio South Burlington,
Inc.'', which I'll bet any money is the company that owned WXXX-FM
South Burlington back when it was good. The whole network (such as it
is) is run out of WUVR's studios in Lebanon; it is a surprisingly good
set of stations considering their location and local competition.

Interestingly enough, the edition of the FCC FM database that I am
looking at also shows another Keene translator, W240AM, licensed to
West Keene on 95.9. This one is owned by the ``Harvest Broadcast
Assoc.'' so I suspect it is not relaying the WUVR network. WBFL was a
Brian Dodge station, so this is hardly surprising.

Unless it's been sold without anybody noticing, WLYT(FM) and WHAV(AM)
in Haverhill are still owned by ``Northeast Broadcasting Company,
Inc.'' Your guess is as good as mine as to any relationship between
the two. (WHAV is LMA'ed to Eastern Media, who own Spanish-language
daytimer WNNW, 1110 in Salem, N.H.)

I talked with a WLYT jock on the phone last night and he confirmed
that a call change is in the works but couldn't say what it would be.

I doubt it very much. The Conn. River valley stations are modern rock (I think) WLYT iskind of a mishmash of minor hits by artists whose careers nose dived in the 80s (ie Steve Miller, Journey, etc.) "The River" isn't particularly indicative of format any more than "Q-105" is.

I think the station in Bellows Falls is WBFL. At least it used to be. Last time I heard them (6 mo or so ago) they sounded VERY automated.

I'm all in favor of hard work, but this seems to be stretching some air talent beyond reasonable limits. The River has a music intensive format which will require a lot of listening, research, and bookkeeping by the programming staff. But they are taking on 5 hour airshifts in addition to that load. Want to bet that the midday and evening personalities sound a bit distracted at times?

Congratulations. You probably have a very good voice.

Before sinking $3k into a course like that, however, I'd check do two things:

a) check with the local stations. Ask how many IBT graduates they actually have on the air.

b) check with the local recording studios. Plead to talk to their casting director or head producer -- tell 'em you're looking for advice, not a job. Ask what they think of the school, and if it'll teach you anything useful.

Some broadcast schools are worthwhile, if you've already got the talent and drive. They'll teach you some technique, help you build a reel, and push you out the door.

Many of them are just in the business of generating tuition checks.

Some air talent went to these schools. Some didn't, but get a commission for recommending the school. Most of them got their education elsewhere.

: Ever heard of the national institute of broadcasting in Toronto?

No.

: (Yonge & St. Clair) I called this ad about "voices wanted" and they
: gave me a call, I went in and tried out ($25 studio fee....

First red flag: a legitimate job offer will not require any kind of
"studio fee" or "audition fee". This is a sham.

: of myself trying out) and the next morning i called in, apparently, I
: got accepted (one of 11/19 people, but there were only 5 spots so it
: was on a first come first serve basis provided you were one of the 11)
: and now i can take their course ($3000)

Second red flag: you're "chosen" to be asked to fork over $3000. Consider
that community colleges in your area probably offer announcing courses
costing *far* less then this "school".

: taken the program etc.? I'd like to know what I'm getting into before
: paying next year's tuition.

RUN the other way. If you're seriously interested in announcing, do what
countless thousands have done: take a college course in radio production,
start contacting every station in your area, and eventually you'll get
hired. Don't spend the $3000; you will regret it.

# 1753. Conservatives Talk Shows Fear Minority Voters

Newsgroup: rec.radio.broadcasting
Date: 1995-08-15 00:00:00 UTC
From: jackmor@iglou.com
Message-ID: <40p5h6$e7c@vixen.cso.uiuc.edu>
Source record: 29837

Sunday, August 13, 1995

The focus of attention Thursday on one of the "conservative" talk shows on a San Francisco station was a local program being conducted by, among others, Catholic Charities, League of Women Voters, and La Raza.

The program is designed to reach out to immigrants, encourage them to apply for US citizenship, provide classes in English and US history/government so that they may be able to pass the citizenship test, and then, when they have succeeded in becoming citizens, register them to vote.

The host and every caller for at least an hour were up in arms at the prospect of such a program succeeding. They were concerned that it would foul the electoral process, create hordes of new liberal voters, and even lower property values in California. The host continually urged his Catholic listeners to warn the Church that they would withdraw their support unless Catholic Charities pulled back from the program.

In the past "conservatives" have continually excoriated California im-migrants, particularly those from south of the border, for not becoming citizens. Now, with the threat that many of these legal immigrants might actually become citizens and even register and vote, the "conservatives" are up in arms and predicting doom. They are angered and terrified at the prospect that the minority population, which will soon comprise a majority, may actually become politically active and begin to vote in what they see as their own best interests. That is hardly an un-American thing to do, so why do "conservatives" condemn a program which seeks to encourage and help people to become full-fledged participants in the American process?

Incidentally, as might have been expected, the host continually referred to this as a program to make citizens and voters out of illegal aliens. He is either terribly ignorant or simply using hyperbole to make his point. The program is obviously reserved to legal immigrants because illegals are not allowed to apply for citizenship.

Source record: 29838

Hello from Ecuador,
I saw the recent posting on Airwaves from an educator in Miami, and want to let you know that we here at HCJB are always looking for more broadcasters in English, Spanish and other languages.
We would not take someone right out of high school, but students may want to be made aware of these opportunities.
HCJB is an international Christian shortwave radio station broadcasting in 17 languages. We also have local AM and FM here in Quito. We need program producers, writers, news people, etc. We are light on DJ type work, heavy on magazine format production, and topical programs (travel, science, cooking, Latin American culture, etc.)
We have several opportunities:

1. Summer missionaries--this is for people who have completed at least one year of college. We take people in all areas.

2. Working Visitors--this is for people with some experience in their field who come here for a minimum of one month, maximum of one year to work in their field.

3. Full-time people--just what it says, people who come for a 3 year term, renewable, to work in their field.

HCJB is a Christian missionary organization. Those who come here (1) must be Christians who share the organization's beliefs and philosophies, which would best be described as representing the evangelical branch of Protestant Christianity. (2) all people who serve here raise their own support from churches, individuals, etc., (3) all people who come full-time must also either speak Spanish or go to language school. This is not a requirement for categories 1 and 2 above.

HCJB is different from the general U.S. domestic radio station for several reasons. First, we are international, thus our news, for example, is very different than what you hear on domestic commercial stations. We are very Latin America and world focused in our newscasts. Perhaps more like NPR, but with more of a global emphasis.
Second, we do very little DJ type work--1 1/2 hours per day. Otherwise, our own productions are more along the line of 30 minute programs focusing on Latin American culture, news, environment, travel, plus program son science, issues and ethics, cooking, letter box programs, etc.

Third, we are different from your usual Christian-formatted station in that we do not provide wall-to-wall teaching and preaching. Instead, our local productions feature a wide variety of programs, as indicate above, with a very subtle inclusion of Christian messages. Not that we don't carry teaching programs like Billy Graham, etc., but they do not fill our schedule. Working at an international station like HCJB, VOA, the BBC, etc., is very different because programming is more varied, more international, etc.
So, I hope you can use this information to alert students and others that such opportunities exist. They might also want to know that the Voice of America has internship opportunities for college students.

KQRC, 98.9 FM The Rock in KC has just started their own web page approximately in the last week. Nice design of graphics and e-mail for many of the staff. No real audio or similar type hookup yet, but their engineer McGyver will probably get around to this as soon as it is feasible. (he did the design of the web page.) Good use of station promotion also on the page. If you would like to check it out the address is:

http://www.accunet.com/therock

Thought I would pass it along...Take good care all..

Bob,
Thanks for your post about the Las Vegas Arbitron. It's been a number of years since I've been to L.V. Does the KENO (1460 AM) call survive? I have a number of airchecks from KENO's "glory days" in the mid-'60s when they were the *only* pop music act in Vegas. Back then, there were 7 AMs and 3 FMs in town. KENO air talent in those days included the likes of "Coffee" Jim Dandy, Mark Lane and Jeff Colson. The station, to my recollection, regularly scored 60 shares in the old Hooper and Pulse ratings (whatever that was worth then).
As a high school and college kid living in L.A., I used to bring airchecks of L.A. stations (notably KRLA/Dave Hull) to the guys at KENO, which they'd study with great interest.
In those days, KENO operated out of a building at Flamingo and Paradise Roads, at that time on the edge of the desert. The KENO building's long since been been plowed down, the towers relocated and that whole area has been developed.

WS> All this having been said, I do think that LPFM could be a worthwhile
WS>service. LPTV, after all, has given opportunities to people who other-
WS>wise would not have been able to afford to own a broadcast station. Why
WS>not offer the same opportunity in FM radio? But there are real problems
WS>that need to be worked out to make it a viable service.

Tom,
Most of the LPFM discussion centers around someone's "right" to broadcast. A free speech sort of thing. Physics being what it is, I wonder how even a tiny minority of 280 million Americans will be able to have their very own radio voice without jamming the daylights out of everyone. There are about 13 million people in the New York area. Let's say just 1 million want to broadcast. Or, even 100 thousand. Where do we put them and who decides whose opinions are more valid than someone else's? Which courts will we set aside to litigate the free speech complaints of those who didn't get a frequency?

The same issue would apply to everyone wanting to have a newspaper voice. We'd be buried in paper. I guess there's something sexy about having one's opinion on the air, even if there's no one to listen because we're all broadcasting at the same time.

I am going to be broadcasting a local sporting event from an
arena approximately 10-15 miles from my station. Now, here is the
complicated part:
There MAY be a phone line in the press box, but if there isn't, I
need some way to get the signal back to the station. The station doesn't
have a Marty, but I may be able to get my hands on one (for a large
rental fee).
What should I do? Is there any way to get the signal back to the
station without renting the Marty if the phone line falls through?

Thanks alot!

# 1763. Re: Question about a Reel-to-Reel Deck

Newsgroup: rec.radio.broadcasting
Date: 1995-08-15 00:00:00 UTC
From: jcrose@tiac.net
Message-ID: <40p5hr$e94@vixen.cso.uiuc.edu>
Source record: 29847

In article <40k1uu$g8a@vixen.cso.uiuc.edu>, henrydc@aol.com (Henry DC) wrote:
[edited]
|: I recently responded to a post regarding a reel-to-reel tape deck.
|: He's offering it for $100....
|:
|: ...It has
|: three speeds: 15, 7 1/2, and 3 3/4 inches per second. It takes these reel
|: sizes: 5, 7, and 10 1/2 inches. Frequency response at 7 1/2 inches per
|: second is 30 - 28,000 Hz. The unit is designed to be stood up vertically.
|: i.e. the reels are vertical.
|:
|: It has two VU meters. Is 4-track, 2-channel. Four heads: erase, record,
|: playback and reverse playback. With the 10 1/2 inch reels installed it's
|: 21" high, 22 inches wide and 8 inches deep...
|:
|: As far as condition, it's in fair condition. It wasn't used too often over
|: the years so the moving part of the capstan assembly is sluggish and
|: requires some lubrication. For instance, when you press the play button,
|: the capstan must be manually pushed against the capstan shaft. Once the
|: capstan is against the shaft it plays or records normally.

Capstan problem first:
There's a solenoid inside, that pulls the idler assembly against the capstan. Either the assembly's bearing or the solenoid piston itself is probably full of a mixture of grease and dust. Likely, it'll need a thorough cleaning and relubrication. Treat it like any precision machine... but be careful not to get lube on the rubber parts.

Some Tascams and others used brass sleeve bearings on the idler assembly. These _can_ sieze, and would need to be replaced. But if the machine works properly when you push the idler in, and there's no particular wobble or play in the assembly, that's probably not the problem.

Specs problem second:
Who told you the response is 30 -28k at 7-1/2? The best pro decks never claimed better than 17k or so, -2dB, at that speed. While it's possible to get a response reading out to 28k, it involves a lot of jiggering with the specs (wide deviation and very low recording level, meaning _lots_ of noise).
I'd trust the machine more if it had reasonable specs.

OTOH, a 1/4-track reversing deck is definitely a consumer configuration. (Specmanship goes on all the time there.) So don't expect rugged built-to-last performance.

Summary:
Probably a good playback deck for your existing broadcast tapes. At $100,
it's pretty hard to beat. But don't expect to use it as a record deck for
professional production... at least, not without changing the heads to 1/2
track and thoroughly re-aligning it.

Peggy,

What exactly were you "accepted" for...the privelege of spending $3,000 on their "course"? There's nothing wrong with taking a broadcasting course, but these people disguised their ad as type of a help wanted ad. Seems a little misleading at best. Actually the best broadcasting course won't cost you a penny and they'll pay YOU about $6 an hour to learn. If you know the basics, apply at small town radio stations. It'll be hard work but you'll learn the business from the inside out. If you don't know the difference between a cart and a cassette, or you don't know how to thread a tape recorder, then take a good broadcasting course. Check some of the community colleges in the Toronto area. Many of the knowledgeable people in this group should be able to suggest one. If, however, you expect your first job to be at a Toronto station making $75,000 a year, forget it and consider law.

An old Billboard article I just read stated that in the 70's, pop
music branched off into three groupings (with some overlap):

1. AOR and near AOR (Led Zepplin, ELO, etc.)
2. Soft rock ((Barry Manilow, Carpenters, etc)
3. Disco

According to a story in today's SF Examiner, they have one more trick up their sleeve: working with NPR stations to program jazz overnights. With NPR's precarious funding situation and the 50,000 KJAZ record collection, owner Ron Cowan believes there might be a match possible.

Personally, I think this new development has a *much* better shot than the cable service, since cable audio is being eliminated in favor of jukeboxes like DMX.

Hi Scott:

A couple of things come to mind. Be VERY carefull when renting Marti gear. You don't mention in your message where you are located, but in a lot of major markets UHF Marti frequencies are very closley coordinated operations to avoid interference problems. One sure way to incure the wrath of fellow users of the Marti spectrum is to 'cream' someone else remote being stupid. Believe me, I've been on both ends of that stick.

Second, again not knowing where you are at or anything about your terrain problems, you >MAY< be able to use one of these new low power 900Mhz digital jobbies. They'll easialy talk 15-20 miles over >OPEN< terrain with a pair of Yagi antennas. I've pushed them to 45 miles hilltop-to-hilltop over an engineered path using 8' parabolic reflector antennas. You may also be able to use one of these (or a low power - 2watt Marti) to someplace where there is a phone line.

At any rate, NOTHING can touch a good closly coordinated Marti repeater system for what you are talking about doing.

Both Humber College in Rexdale and Mohawk College in Hamilton offer good basic radio training - for a lot less money than the commercial operations.

That assumes that you want to be a DJ. If that's the case, you should realize that there are less jobs every year. More stations are mechanizing to a great degree every week. At least one station in Hamilton runs off a hard drive for more than 50% of their time on air. In other words, record the liners once, and run them forever.

Commercial radio is notorious for poor pay. Most people starting out are forced to take straight jobs on the side just to live. You cannot survive on $6 an hour. Assuming that the station you sign on with doesn't decide to pay Federal minimum wage, which is less. Or doesn't expect you to work for free.

If you are more interested in journalism, you can look at Ryerson, who have a massive reputation. You should also look at working for any of the local non-commercial stations. (CHRY,CKLN,CIUT) The training you will get there is good enough to (eventually) get you into CBC.

I have been a program director for many years. I can't recall anyone I have hired that learned anything at a professional broadcast school.

If you want to get into radio, find an overnight weekend position for minimum wage at a small station. You'll learn more from the experience than you ever will in a broadcasting school.

Make yourself available to the program director. Follow their guidance. Ask for their critique. Ask to learn production skills on your own time. Become an invaluable fill-in for them. You'll be much better off.

As you improve, make tapes for other stations and keep applying for openings. Don't get disgusted when your turned down. Ask everyone for advice.

Save your money. Learn on the job. It means much more on a resume than broadcasting school.

[Moderator's Note: I think it is safe to say that Broadcasting Schools are not all worthless. Sure 6 weeks on a job is better, but some need even the basic stuff to be able to do *that* much. My problem is with schools who talk about the 'glamor' of radio. As anyone who has done radio, especially entry level radio, knows, it is *ALL* hard work. Bill]

>From the San Francisco Examiner, Tuesday, August 15th:

"A year after it left the FM airwaves, pioneering Bay Area jazz station KJAZ suddenly signed off again Monday, as financial troubles brought what may be a final halt to its programming." KJAZ told listeners on cable systems Monday that it was going out of business.

Alameda-based KJAZ, founded in 1959 as the nation's first commercial jazz station, sold its 92.7 FM frequency for 6-million dollars last July. The Examiner quotes KJAZ owner Ron Cowan as saying he could not subsidize the cable operation any longer. KJAZ was trying to continue operation on cable systems nationwide, through a combination of corporate sponsorships and listener contributions. The article quotes GM Vester Emerson as saying they didn't get enough listeners to contribute.

According to the report, Cowan plans to continue to maintain the vast KJAZ record library and its studios in his Harbor Bay Isle development in Alameda, in hopes of syndicating KJAZ programming through NPR.

Whoah, Cat, I'd heard you went off on these E-mail messages, but had never seen it myself. A few factual corrections:

94.1 JAMZ! did give away several hundred tickets to the TLC video - only it was to the Friday night shoot with TLC, not the Thursday night crowd scene pre-shoot (you're right, Thursday was a KLUC's).

Tony Thompson must have been good, to do your Club Rio thing, and show up at the basketball game to sign autographs (which he did). And I would have to include front page coverage of the game in the RJ and Henderson Home News, as well as both 'casts on channel 13 and 3, in calculating the total reach of our basketball game promotion.

Yes, KLUC did give away lunch with Montel Jordan. We did not.

Sorry, we did not see your banners at the concert. In fact, you were notably absent. We, on the other hand, had banners inside, our van & balloon outside, and most of our staff roaming the arena taping listeners.

The best is yet to come? We agree. But don't feel bad when it comes... the insurance gurus in Columbus probably aren't even going to ask you what format to play next, much less whether the format should be changed in the first place.

Yours in the spirit of friendly radio competition,

Bob Beers

Take a CELLULAR phone with you!!!!!!!!!!!! An old station I used
to work at started using their cellular for local ball games.
Depending on what deal your station has (or can get) with a local
carrier, it could be a very profitable situation--don't have to pay to
put a line in!!! Make sure you've got good equipment, though...don't
want the line to go dead while you're on!!

Good luck!!!

Barry Fraber has a great show!

What is the station carrying currently in his time slot?

Find other listeners that want to hear Barry. Find sponsors with cold cash to wave in the stations face, That always works.

Ask the program director if you can come and listen to a show over the satellite with him. Pin him down, without being obnoxious, to be sure he knows exactly what Barry's show is like. If the program director is liberal bring more sponsors with more money.

Write a letter to the editor asking if there are other Barry fans around.

Good luck! Don't give up!

>Classic Rock station in Dallas is more than flat..it is in the cellar of

>the book.

No, no, no....Classic Rock is NOT the same thing as the 70's format (despite the large number of "Arrow" and similar rock-leaning 70's stations which are starting to sound more and more like "wannabe" Classic Rockers.) A "TRUE" 70's station is one that plays the hits...ALL the hits from Grand Funk Railroad to Andy Gibb to the Carpenters to Barry White. They also throw in a good amount of personality and energy. This is the way it was in the 70's...in the summer of 1974, for example, you would find Barry White, George Mc Crae, Bad Company, Eric Clapton, John Denver, Elton John, and even Paper Lace...totally different musical styles, all in the Top 40 at the same time and all played back-to-back on Top 40 radio!! Completely different than the Classic Rock format.

# 1779. Looking for help w/ my airshift

I'm looking for new ways to say the same stuff we always have to
say during an air shift. So, e-mail me or post your ideas on how to
say that you are:

1. Starting a music marathon(or sweep, or set or whatever you call it)
Examples: Launching, Blasting Off
2. In the middle of or continuing a music marathon
3. Wrapping up a ... etc.
4. Rocking, Jamming,Wailing, Partying it up.....
5. Complete the following sentences:
(insert call letters), listen all day at work, _____
If the boss won't let you listen to PYX 106 at work, _____
(stage a hostile takeover, show his wife those pictures, buy up
half the stock and fire her, etc.)

I think this could be of benefit to all!

Hi Steve,

I am by no means an expert on programming sports talk stations. But I've observed a few things as a listener and observer of the format...

1) The most successful sports talkers are in major markets, have at least one or two major league franchise play-by-play contracts, and *generally* have a non-sports talk morning show. (Though that show is usually sprinkled with sports subjects, it isn't a "they should trade player Y to the Dodgers for player Z" type show.) Stations following this format include the aforementioned WFAN/New York. WMVP/Chicago also does this (though I don't know if they have any PBP contracts yet, and they're currently the number 2 sports talker in the market behind daytimer WSCR).

WKNR/Cleveland tried a non-sports talk morning show a couple of years back, with local radio knockabout Paul Tapie and ex-Ch. 3 weekend sportscaster Thor Tolo, which bombed so badly... I believe they have a more sports-oriented morning show now but don't think they have much in the way of AM drive ratings, despite better overall numbers than they used to have. (I'd like to see how much of their 6-midnight 12+ numbers are Indians play-by-play these days. ;)

2) Most sports talkers in non-Top 15ish markets are littered primarily with syndicated sports networks (One on One, Prime, etc.). Here in Sacramento, we have one station that just moved to the format, with a current schedule that is entirely syndie sports talk (Prime), except for the morning show that is a syndie show of other stripes. Another station here is heavily sports-oriented, has a PM drive live local sports talk show, runs One on One nights and overnights, and is the current rightsholder to the only pro team in the market (the NBA Kings), but does not call itself a sports station.

3) Sports formats are generally unproven outside of New York, it seems, with some limited success in other markets.

4) Sports formats in small markets seem to barely show up as blips on the ratings radar screens and are almost all syndie sports talk, with some play-by-play from either minor league teams or major league from network or nearby large market cities.

Mike

Source record: 29782

In keeping with Bill's request for more radio news items, I regret to have to report to anyone who cares that longtime Asbury Park, N.J. radio station WJLK AM & FM has left Asbury Park and moved to (yuck!) a shopping mall in Neptune. I guess it's OK for those who like to watch people doing radio, as they have a storefont window to a studio.

The Asbury Park Press sold the station a few years ago and the successor owners kept the old studios atop the now-deserted Press building in downtown Asbury Park until the recent move.

WJLK used to be an excellent, "full-service" station with extensive local news and sports coverage. (By the way, it was great both before and after I worked there!) Now it seems the same as about 90 percent of the stations I've heard in the '90s.

Pete Walton

THE AMARC-EUROPE UKRAINE SEMINAR FOR WOMEN RADIO TRAINERS

The AMARC-Europe Women's Network in conjunction with Radio Lux (Lviv) will be conducting a four-day seminar for women radio trainers in the Ukraine between 20 and 24 October, 1995. The aim of the seminar is to transfer radio training skills and to build a mutual support network for women involved in newly emerging community-based radio stations in Eastern and Central Europe. Experienced women trainers will be conducting workshops (in English and Russian) on women's programming, radio management, production skills, and pedagogical strategies. The training seminar is to be followed by a one day meeting amongst the participants which will serve to establish a plan of action, and to elaborate future projects within the context of the Women's Network of the World Association of Community Radio Broadcasters (AMARC).

ABOUT THE ORGANIZERS

AMARC-Europe is the regional section of the World Association of Community Radio Broadcasters. It is legally and financially administered by the Community Radio Association, the UK membership body for community radio, and is in the process of incorporation as an European non-governmental organization with headquarters in the UK.

While AMARC believes that local, independent radios are important tools for community and cultural development wherever they appear, this is especially so in Eastern and Central Europe. At a time when economic and political reforms leave people feeling disempowered and uncertain about an abstracted democratic future, local radio networks offer democracy on a tangible, community scale. In this way, they will play an important role in establishing attitudes and practices which are necessary for democracy and pluralism to play out on national and global levels. Consequently AMARC-Europe has placed special attention towards promoting community radio in this area of Europe by co-sponsoring (with the Open Society Media Fund) a series of study tours, training seminars, and events on independent media throughout 1995.

AMARC-Europe held its first pan-European conference for community radio broadcasters in Ljubljana, Slovenia in September, 1994 -- attracting 120 delegates from over 30 countries! The participants agreed to give high priority to the development of the AMARC-Europe Women's Network to meet the specific needs of women in community

radio broadcasting.

The Ukraine Seminar for Women Radio Trainers thus issues from AMARC-Europe's dual commitment to new and emerging community radio projects in former Eastern Bloc countries, and to women's active involvement in them. Women are under-represented in all sectors of radio in Central and Eastern Europe, as in the West. Community radio, however, can offer women not only the opportunity to give voice to issues that are of immediate importance to them, but also to present an alternative to mainstream media representations of women, which are often sexist, racist, or homophobic.

Radio Lux, a local, independent station in Lviv, Ukraine, has agreed to host what will hopefully be the first in a series of women's training seminars organized by the AMARC-Europe Women's Network.

COST OF SEMINAR AND ASSISTED PLACEMENTS

The cost of the seminar is 60ecu, which covers the registration fee, accommodation, and meals. There are, however, a limited number of assisted places available to women coming from Eastern and Central Europe. For women granted assisted placement, travel costs, accommodation, meals, and registration fee are provided by AMARC-Europe. Women eligible for assisted placement should come from one of the following countries: Albania, Armenia, Azerbaijan, Belarus, Bulgaria, Czech Republic, Estonia, Georgia, Hungary, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Moldova, Mongolia, Poland, Romania, Russia, Slovak Republic, Slovenia, Tajikistan, Turkmenistan, Ukraine, or Uzbekistan.

HOW TO APPLY

Interested individuals (for both assisted and unassisted places) are now being invited to submit an application to attend this important and precedent-setting Ukraine Seminar for Women Trainers. Along with a completed application form (provided below), please include a short description of the following (maximum 1 page):

1) Your present and previous experience in community, local, participatory, or independent radio.
2) How and where you propose to pass on skills learned at the Ukraine Seminar.
3) Languages spoken and understood (you should have a good knowledge of either English or Russian)
4) Your involvement (if any) in feminist or women's radio programming.
5) What training qualifications you possess (if any). **NOTE: you do not need training qualifications to take part in the Ukraine Seminar**

This criteria will be used by the Women's Network selection committee when choosing successful applicants. Completed

applications may be sent by post, email, or fax to the following address:

August, 1995.

Dear participants in "The FIRE-PLACE"

Since the announcement of the 4th World Conference on Women and the NGO FORUM, FIRE has been linking with women's media networks worldwide, so that the live broadcasts or 'RADIO FIRE-PLACE', located at the Women's Alternative Media Action and Service Centre, would be the product of a broad coordinated effort.

The FIRE-PLACE is a sound proof glass box with simple, friendly radio technology fit to broadcast through an international telephone line. Equipped with ppropriate technology consisting of a telephone interface, a mixer and five microphones, FIRE will broadcast your "on the spot" productions. Another feature of the FIRE-PLACE is that it will have four speakers outside the sound proof box so that women in Huairou can sit around and listen to the broadcasts simultaneously, and when not broadcasting, listen to productions on casettes brought by participants

The FIRE-PLACE live broadcats will: celebrate the work of women's own media; ensure wide coverage of the NGO Forum beyond that provided by other media; allow women and men to participate of the process without leaving their homes by listening women and provide a case study to support women's efforts to establish women's satellites and a broader voice in the world of shortwave one word radio towards the next century.

The results of the efforts, especially in response to the announcement of the FIRE-PLACE broadcasts on short wave has been great. Of the original emerging core group composed of AMARC, RCNA, TAMWA and WINGS, today we have a broad list of participants in the initiative.

They are the following: Asia Pacific Media Task Force (Fiji), TAMWA (Tanzania), International Women's Tribune Center, Women's Feature Service (India), AMARC: African Women's Desk and Latin American and Caribbean Women's Desk, Women and Development KULU (Denmark), SIPAM (Mexico), Agenda de Hoy (Puerto Rico), RED ADA (Bolivia), Centro de Comunicaciones Nuestra Senora Lujan (Argentina), Radio Tierra (Chile), Zimbabwe Broadcasting (Southern African Countries), Young Women's Caucus, Caritas Young Women Delegation, Found for Compassionate Society, Codehuca.

Some have also requested slots at the FIRE-PLACE to be able to receive phone calls from local radio stations back in their own countries in order to feed reports. These have been the following: AGENDA de HOY from Puerto Rico, Radio TIERRA from Chile WINGS and PACIFICA Radio from the USA, and Zimbabwe Broadcast Corporation for a regional short wave station for South African countries. You should remind your local stations that they have to call the FIRE-PLACE . We will give you the phone number in China as soon as we get it. FIRE does not have the capacity to fund those calls. A schedule of such calls will be organized.

Others, such as Women on the Line and 3 CR 855 Community radio from Australia, Women's Feature Service from India, AMARC's Latin American and Caribbean Women's Desk, Viqui Lofquist from the USA, and others have expressed that they will bring radio productions and music to play on "of the air" time so that women can listen to them through the loudspeakers at the FIRE-PLACE.

Some have asked for the FIRE-PLACE in order to do sound proof interviews. These have been Pacifica Radio and WINGS from the USA. This will not be possible outside broadcasting or telephone call time. This has to be programed also .

The FIRE-PLACE will be located outside of the Shooting School (zone #1 in the informal map by the IWTC). See you there on the 30th of August at 11:00 am for scheduling of the programs and other activites.

FIRE- PLACE broadcasts on shortwave on the frequencies of Radio For Peace International will take place from 12:00 noon to 4:00 p.m. (time in China) every day during the NGO FORUM-from the 30th of August to the 8th of September.

You can tell the audience in your country that they can tune in to the following frequencies on shortwave: 6.200 (on AM band), 7.385 (on AM band), 9.400 (USB band), and 15.050 (AM band). The times in Universal Coordinated Time are the following: from 1400 to 1800 UTC, and repeated at 0000 to 0400 UTC.

Contributions towards the initiative have been granted to FIRE by The Sister Fund, CARITAS - a Fund of the Tides Foundation, and the support of The Foundation for a Compassionate Society and Radio for Peace International...but it will be sucessful because

of your participation in it.

The FIRE-PLACE: VOICES WITHOUT BRACKETS...VOICES ON FIRE!

CORDIALLY:

Katerina Anfossi, Nancy Vargas and Maria Suarez

Source record: 29785

I agree with A.J.'s comments, and would add to Bob Steele some other names that may not be familiar to many. Along with Robert L. (for eLmer, as he has said <grin>) Steele go Paul Morency, Leonard J. Patricelli, Irwin Cowper, Walter Johnson, Bob Tyrol and others from the past - if I name one I'll want to name them all and there isn't room, unfortunately. Morency and Patricelli shaped WTIC from the late 1920's through the 1970's and their influence remains today as WTIC has maintained quality, reliablity and integrity, managing to keep the old while integrating the new.
I grew up with WTIC and miss hearing the station as I'm now in Maryland. I don't know if the station still calls itself "The Pulse of New England" but there is no better description in this listener's mind. Biased? You bet. My dream was to work for WTIC. I never made it but it certainly was something to aim for. BTW, the station also has an incredible history, which someone or a few someone's, had the foresight to set sown on paper. Bob Steele. Mornings just aren't the same without his voice.
What I wouldn't give to hear the old ID when the stations simulcast : WTIC, AM and FM, Hartford. Peace, Bob

If you are really interested in broadcast radio in your own area, you might wish to get involved in the AIRWAVES "RadioWatcher" project.

We are currently asking for individuals who are either active in the industry, or are very much involved in the happenings around their town/city/community and would like to become recognized as a "RadioWatcher" for AIRWAVES.

As a RadioWatcher, you will be responsible for reporting the goings-on in your locale, and will be, in effect, a staff reporter for AIRWAVES. While anyone can write an article for the Journal, RadioWatchers will be considered the de-facto correspondent in a given city.

As a RadioWatcher, you will be asked to keep an eye and ear out for news and schmooze about the broadcasting scene in your market. You are asked to submit at least one report per month (more if you choose) and will be kept on file here at AIRWAVES as an official member of the press (for whatever good that might be).

The purpose of this program is to create a base of volunteer staff reporters who's job it will be to keep a steady flow of good information about various markets coming in to AIRWAVES. It does not mean that the pages of AIRWAVES are closed to any of the other posters in net-land. It is just a way to assure that the readers will have something good to read, when the more casual posters are not available.

Q: What do I need to do?

A: RadioWatchers are basically the same thing as reporters. To remain on the RadioWatcher program, you are expected to be involved with

radio in your market, either by profession, or by a strong personal interest. You will be asked to report on any interesting goings-on in and around your market. Such as format changes, station sales, interesting trends, market ratings, and whatever else seems appropriate. The depths to which you dig for information is up to you.

It is important, though, that you are a true fan of radio, and not merely a fan of one sort of format. Your reports can have personal commentary, but should be based on actual facts (as you know them) rather than how those facts match up with your personal opinions.

In general, we need good, solid reporters who will do the job based upon their love of radio, and desire for more exposure. AIRWAVES is not a profit making entity, and so salaries cannot be offered. If you are a budding journalism student, or a seasoned pro, this may be a chance for you to show your stuff to the world. Airwaves is read across the globe via the Internet, and is available to subscribers of CompuServe, GEnie, AOL and on a host of BBS systems, via email. Your input will not go unnoticed.

At least one of our more prolific reporters tells me that he receives much email in praise of his posts and has made many interesting contacts as a RadioWatcher. We have also been told that our RadioWatchers have broken stories long before the trades get a hold of them. Not bad for a bunch of voluneers, huh?

So if you are interested, drop me a line and tell me about yourself. I will be in touch by return mail. Those of you who expressed an interest in the past, are encouraged to get back in touch. Those of you who are already RadioWatchers, thank you and keep up the great work. As AIRWAVES expands, your contribution will be even more important.

Greetings Readers:

It is time to post a general overview of rec.radio.broadcasting and its companion email digest, AIRWAVES RADIO JOURNAL.

The AIRWAVES Radio Journal is a periodic email digest dedicated to discussions about all facets of domestic broadcast radio. Subscriptions to Airwaves are free, and available to anyone who is equipped with Internet (or Internet gatewayed) email service. More details on subscribing to AIRWAVES RADIO JOURNAL is included later in this file.

All articles in AIRWAVES are ported to and from the Usenet newsgroup rec.radio.broadcasting (r.r.b) which was founded in April of 1992, as a means to further discussion of topics pertaining to 'domestic broadcast radio'.

By *domestic*, we mean broadcasts which are intended, primarily,for reception in the same country/nation in which they originate. AIRWAVES and rrb, are international in scope, and although much of the traffic here is USA-based, the term 'domestic' should not be taken to imply 'USA' or even North American. Readers in other nations are encouraged to participate.

Rec.radio.broadcasting/AIRWAVES has evolved into a place where broadcast professionals, para-professionals, up-and-coming broadcast professionals and involved listeners come to discuss ideas, share insights and opinions and basically exchange information of interest among one-another. Often these groups lack any real insight into each other's world. One of the main goals of AIRWAVES/rec.radio.broadcasting is to act as a bridge between these different groups of radio-interested parties.

1) THE RADIO PROFESSIONAL. (S)he lives *inside* the walls of radio. While dependent upon the listener the Broadcast Professional (BP) is somewhat separated from the end user by virtue of his/her "point-to-multipoint" position. AIRWAVES offers the BP a glimpse into the real-world of the listener, unfiltered by consultants, ratings, trend-reports, trade pubs et-al. Sometimes that world is a little rougher than the broadcaster is used to, but that is the reality of 'the real world' sometimes. I do try to maintain a civilized environment, though, and filter out the most offensive brainless or off-topic posts (more on this below).

2) THE RADIO LISTENER. The listener is also in a similar (albeit inverse) position. The listener has relatively little actual input into radio programming. They often have only a vague idea of what makes a radio station tick. By communicating directly with broadcast professionals (and para-professionals) the listener gains some insight and understanding into the world of the broadcast professional.

3) THE WANNABE BROADCASTER. AIRWAVES/r.r.b gives those with a strong interest (but little or no experience) in the industry the chance to interact with, those who have succeeded in the business. We have seen many a positive interaction between a newbie and a veteran, and many have written me thanking me for contacts they have made via rrb/AIRWAVES. We also post resumes and 'help/positions wanted' ads for interested parties at no charge.

Some of the topics covered in rrb/AIRWAVES include...

1) Formats and programming.
2) Engineering & technical matters and interests.
3) DXing (long distance reception) on the standard broadcast bands.
4) Community broadcasting.
5) Pirate broadcasting (especially non-shortwave, domestic pirates).
6) Legislation affecting the industry, and its 'offspring' industries.
7) Technologies affecting the industry, and its 'offspring' industries.
8) General station information. Who is going on and off the air, and why.
9) Radio's historical and cultural significance.
10) Old-time and vintage radio programs and talent.
11) Radio's current and future trends.
12) Political and news coverage and its impact.
13) Job openings and help to those seeking work in the industry.
14) Information on equipment and techniques involved in transmission and reception of broadcast radio signals.
15) The International Scene and how broadcast radio is shaping up in the various nations of the world.
16) Gabfesting and all matters of general interest to those involved in, or interested in, the general subject of domestic radio broadcasting.

---

AIRWAVES/r.r.b is loosely moderated, as alluded to above.

My philosophy of moderation is to 'err on the side of permissiveness'. I do not believe in censorship and I never deny a post because I don't believe in the poster's opinions. I take great pains not to unduly restrict dialogue or the poster's right to express him/herself.

If there is doubt, I post. If I can assist, I do so. If I can redirect to someone who CAN assist, I do that. It is my privilege to be part of this group and part of the radio broadcasting community. Although I have final say over what gets in the group, I often confer with a group of trusted posters when I am unsure of what to do in a given situation. I bend over backwards not to abuse the position to which I have been entrusted. Also, if I do deny a post, and the poster writes me with convincing argument as to why it should have been posted, I will often reconsider, and post anyway.

---

Here are some of the posting/writing guidelines which I ask you to adhere to...

* If you post a question that is of potential interest to others in the group, ask that replies be posted, instead of emailed to you. We all would like access to the answers. If you do receive email replies, post a summary

to the group. This forum is only as good as its posters and readers. Keep the info flowing. An exception to this is when you are asking for very specific information which would not be of general interest, such as inquiries into specific area radio stations or employment information. However in most cases, you would be surprized how many people benefit from what you may think is of no interest to others.

* If you email an answer to a poster's question, send a copy to the group's submission address, articles@airwaves.com , so we can all learn from your knowledge. When in doubt... POST POST POST! :-).

* PLEASE edit quoted text to a minimum! Most users of this group are fairly regular readers and do not need, or want, the entire text of a recent article in every reply. Of course, if the thread is not current, more quoted text may be appropriate. Often quoted text is required to make sense out of your reply. Please use it, but use it sparingly. Use your brain (and your editor :->).

* If your message is basically a one or two line "Me Too" or "I disagree" post, consider emailing it to the poster. However if you go into some details as to WHY you agree or disagree, then please post it.

* If you are replying to an article in the Airwaves Radio Journal, simply use your mailer's reply feature, and again, edit the text to *ONLY* the article you are replying to, and include the article's name in the Subject field. Subjects of "Re: Airwaves Radio Journal" are confusing and may result in needless delays.

* If you post about a local radio station or personality, realize that most of the readers will know little or nothing about it. Offer a little background, like location, station format, type of music played etc.

* Last but not least, avoid flames and personal insults. AIRWAVES/rrb tries to maintain a reasonably high brain to B.S ratio. It is fine to disagree, but please stick to the issues and avoid personal flames. Broadcast Professionals are looking for information and idea exchange. Most of them have no time to wade through reams of stupidity to find the occasional gem. That is why we ask that if you *must* make personal attacks, do it in email.

---

Matters that may cause an article to be rejected, include...

* Articles which are not on (or reasonably near) the group's charter (domestic radio broadcasting and related subjects).

* Articles that are too long for submission as-is. We have a soft limit of 8000 bytes (8 kbytes) and a fairly hard llimit of 10,000 bytes (10kbytes) per article for the Digest. We will post longer files in the newsgroup, but all sites may not carry longer items.

* Articles which are merely multiple repetitions of an identical answer which has already been offered several times.

* Articles which contain 'miles' of quoted and multiple quoted text followed by a few lines or less of original text. Please edit quoted text to a minimum and try to adhere to the *50% rule*, that is 51 (or more) percent of original text to 49 (or less) of quoted text.

* Articles that solicit for funds or contain blatant commercial content.

* Articles which are unwarrantedly offensive, abusive or contentious for the sake of contention. Personal attacks and ridicule are considered such. Discussion, even argument, of issues and opinions are welcomed and encouraged. However personal attacks on individuals (no matter how justified you might feel they are) are not part of our charter.

---

How To Post your article...

1) Post via rec.radio.broadcasting as you would any other Usenet group. Your articles will find their way to AIRWAVES as well.

2) Email your article directly to articles@airwaves.com. Using other addresses to post will needlessly delay your article and may cause it to be lost entirely. You might consider installing an alias in your mailer for emailed articles, especially if you post lots of stuff. See the end of this file for all applicable addresses.

AIRWAVES/rrb maintains a Non-Solicitation Policy. Articles which appear to blatantly solicit funds from readers for a 'cause' or a 'project' are generally rejected.

However, I generally * DO * accept the following...

o Product reviews: ... provided they are objective and informative and contain little or no 'motivational' language. All inquiries must be directed to the poster or an address of the manufacturer/distributor.

o Personal items: Such as old time radio tapes, a specific piece or two of equipment etc. sold at a low, hobbyist price or offered for barter/trade.

o Announcements for workshops, conventions, radio related flea-markets, etc.

o Personal recommendations of a product/company that appear legitimate. Especially when it is in response to another poster's inquiry.

---

AIRWAVES RadioWatchers

AIRWAVES has a program called RadioWatchers, which is open to any readers who are interested. Basically RadioWatchers are volunteer staff reporters who write about the goings-on in their market or area. RadioWatchers are individuals who are either directly involved in their local market radio goings-on (i.e.employed at a station) or are otherwise interested and connected to the radio scene in their markets. RadioWatchers should be interested in telling the world about the local happenings in their area.

RadioWatchers are expected to maintain at least one posting per month, more as news warrants.

For a complete file on the RadioWatcher program, send email to radiowatcher@airwaves.com and tell us about yourself.

---

- Subscribing to, and unsubscribing from, AIRWAVES Radio Journal -

All subscription matters are handled automatically. To accomplish this, send email in the following format (EXACTLY)...

To: subscribe@airwaves.com
Subject: SUBSCRIBE

* OR *

To: subscribe@airwaves.com
Subject: UNSUBSCRIBE

<In either case the body of your message is ignored by the server>.

---

AIRWAVES/RRB ARCHIVES

Archives of past Airwaves Radio Journals are kept for retrieval via FTP, Gopher or via the World Wide Web. Below are the paths for these archives.

FTP - radio.aiss.uiuc.edu /misc/rec.radio.b-cast/

Gopher - radio.aiss.uiuc.edu 7070

W.W.W - http://radio.aiss.uiuc.edu/~rrb/

As of now the web page has no pictures, but it does contain a bunch of links related to radio, television, other media and a bunch of non-media links. More are always welcome.

AIRWAVES JOURNALS (and the previous incarnation as Internet Radio Journals) are stored in sub directories, each with their own index file. Our archive site also contains files from a couple of our other lists, as well as some interesting information not published in AIRWAVES/r.r.b. Most files are compressed, so if you are using FTP, use the binary mode to transfer. Our Web Site has many other radio/media and general links in addition to the archives for AIRWAVES publications. Do check it out. Let us know if you have any other interesting links for us.

I can answer some basic FTP/GOPHER/WWW questions, but please don't ask me to give a complete tutorial in these systems. If you are in doubt, try asking your system administrator, or posting to appropriate newsgroups.

My address is wdp@airwaves.com Use it for any list-related conversations.

If you would like to send a letter of appreciation to the administrator of the machine on which AIRWAVES is processed, posted and archived, send that to Lance Moxley at clm@uiuc.edu. He has allowed rrb/AIRWAVES to exist on his machine and has allocated disk space to our archives and web site. Lance is an important, albeit silent, partner in bringing this service to you. In addition Greg Gulik, sysadmin of World Wide Access in Chicago has been very supportive since the beginning of rec.radio.broadcasting. If you have a moment, drop him a line to thank him for his continuing efforts without which none of this would have ever been possible. Greg's address is greg@wwa.com.

Please don't send problem reports to either of these men, they are very busy. Send any problems to me and I will deal with them. That is why I am here <grin>.

-=*=- ENJOY THE GROUP! -=*=-

I hope you enjoy the group. Remember, it is only as good as its contributors. So don't be shy :-). If you have a question, or answer, even if you are not sure, post - post - post.

I am open to suggestions on how to improve this group. Send them via e-mail to wdp@airwaves.com.

Thanks to all who have, and continue to, participate. We now return you to your regularly scheduled newsgroup :-).

William Pfeiffer Moderator - rec.radio.broadcasting - Airwaves Radio Journal

WORLD WIDE ACCESS

If you are looking for a very good, T1-connected, open shell Unix net account, in Chicago (but reachable via telnet from anywhere) I heartily recommend contacting World Wide Access. Accounts start at $60.00 a year (that is $5.00 a month) for unlimited time on line, full news and mail, Unix shell, compilers, etc. and 5 megs of disk space. He also has realtime full access Internet accounts which are about $20.00 a month for all the above, plus FTP/Gopher/Telnet/IRC/world-wide-chat/World Wide Web, 10 megs of disk space and all the goodies. For information, send email to greg@wwa.com and mention AIRWAVES/rrb.

No money has changed hands for this announcement, nor am I affiliated with World Wide Access. I am just an appreciative account holder and net.friend.

A few things brewing here in the lovely Ozarks.

First, the little station that could... did.

KTOZ AM the 500 watt daytime big-band nostalgia tea kettle on 1060 that has gotten a LOT of national and even global press because of its run-in with the Labor Relations Bureau (or whatever it is called) has won the battle... for now.

KTOZ has been in hot water recently because of its use of all volunteer staff (including station owner and GM Ron Johnson) while technically being a *for profit* corporation. The station barely makes enough to keep the lights on, and is serving a niche that is virtually unserved in the market, a format dubbed "Adult Variety" which spans the thirties through the very early sixties with emphasis on Big Band era music, standards and traditional jazz.

Well after video crews came in from CBS and NBC, and after dozens of phone interviews and more, the Labor Relations Board decided not to pursue the station any longer. As Mr. Johnson noted, "They don't like this kind of publicity...". Mr Johnson is also quoted as saying [paraphrased from newspaper account] "Now we might just go after them [the Labor Bureau]... CBS's Eye On America did a substantial piece on the station yesterday (Tuesday Aug 15) during the Evening News.

So the little tea-kettle station has gotten the US government to back down from its challenge and the "Adult Variety" music plays on at KTOZ-AM (not to be confused with separately owned KTOZ-FM, a grunge-rocker also in market).

---

Market-leading full-service/country powerhouse KTTS AM/FM (94.7 100kw @1100'/1260 Khz 5kw DA-N) is losing its news director. Dan Shelly is leaving the heritage station where he got his start as an intern and now heads up the market's only real radio news department. Shelly was second in line for a similar job at KMOX in St Louis, and is now heading to WTMJ the News/Talk Full Svc. outlet in Milwaukee Wisconsin. In the News-Leader article, it was mentioned that WTMJ is a 50,000 watt station. I had heard they had applied for 50/10 DA-2 but didn't know that the change had taken place (it would have required an entirely new antenna array) Does anyone in that area know if WTMJ has gotten the power upgrade from 5kw DA-N to 50/10 DA-2?

---

In another example of killing the goose that laid the golden egg, recent upstart dance/CHR KHTO (106.7 FM from rimshot Mount Vernon) seems to be abandoning its incredibly successful dance CHR, which was programmed by genius CHR PD Dave Alexander, in favor of a bland mix of low-energy modern rock hits and some pop-dance. Formerly KHTO (who goes by the false call letters KHOT - Hot 106.7) was KELE programming a soft-rock format, and losing its shirt until bought by Curt Boney as a duopoly with existing classic-hit KZBE (95.5 - B95). Soon after Dave Alexander took over, the station went through the roof and was an instant success, burying grunge-CHR KTOZ-FM (Channel-Z 104.7).

I hear that KZBE and KHTO were recently purchased by an unknown Chicago-based firm which may be the reason for the change. Currently this relatively small market is served by 5 rock stations, including KTOZ-FM which is all modern rock, and KXUS a faded market-heritage rocker that has been floundering in search of a sound for quite some time. Currently KXUS (US 97) is a strange mix of classic rock and modern rock.

---

Contemporary Christian noncomm KWND (88.3 12kw @ 600') is back on the air after a looooong stretch of being dark. They are much more preachy than commercial CCM competitor KADI (99.5 6kw @ 325') who is sounding more and more like a straight Hot-AC (albeit with different music) all the time.

---

Boliver AM station KYOO (1200Khz 1kw D) has now fired up an FM signal on 99.1. They simulcast some satellite delivered AC format and call themselves "The New COOL FM" or some such. I don't know where that FM is broadcast from, or with how much power, but their signal in the Springfield metro, and even a considerable distance north (in the direction of Boliver which is about 25 miles north) is absolutely awful. In fact their AM out covers the FM by a long shot. Nobody at KYOO seems to know, or won't tell, where the transmitter is, or how much power it has, but it cant be over 1kw @ a couple hundred feet, if even that.

As if this 80-90 market from hell needs yet another faceless signal that is barely audible, offers no real programming, but still messes up another frequency.

---

That about sez it for me.

From: Andrew Paul Dickens <apd2c@virginia.edu>
Message-ID: <40ujir$7j1@vixen.cso.uiuc.edu>
Source record: 29793

Get it. R2Rs are very expensive, new or otherwise. If
you have the extra hardware (price it) and the sound quality is
ok (test it), that seems to be a very fair price.

The cheapest deck that seems to meet our needs costs a
LOT more than that (of course, it has to be airworthy....)

I'm looking for a source for mic flags. I can't say I'm happy with the quality of the NAB ones we had at the last station I worked for. What other companies do this kind of work? I remember working at a station which got them from a place called Alladin Nameplate in Connecticut. Alas, I have no idea where in Connecticut.
If anyone is familiar with the 3D flags at WCBS-TV, I'd like to know who did those.

The program in question is probably "Perspective" from ABC News. Call or write ABC Radio News in New York.

# 1796. Re: A sad day... KJAZ calls it quits... Again.

Newsgroup: rec.radio.broadcasting
Date: 1995-08-17 00:00:00 UTC
From: galejim@ix.netcom.com
Message-ID: <40ujj4$7jc@vixen.cso.uiuc.edu>
Source record: 29796

If you're in the Monterey Bay area, check out KAZU, Pacific Grove--90.3 FM, 88.9 Monterey cable, 90.7 Santa Cruz cable, 89.9 cable in Gilroy. Jazz and vocals M-F 6-9 AM, Sat 6-11 AM, and M-F 4-6:30 PM. Also lots of blues and gangs of other musical styles.

Note, however, that if CPB (Corporation for Public Broadcasting) has its way, stations like KAZU will lose all funding, an effort to starve the little stations out and concentrate on the big ones in the "area"--i.e., KQED, which can't handle concentrated coverage on local events like earthquakes, the recent flooding, etc. I can't see KQED doing road closure announcements for Watsonville. KAZU can.

# 1797. J.P.McCarthy: A Legend Is Gone!

Newsgroup: rec.radio.broadcasting
Date: 1995-08-17 00:00:00 UTC
From: DBKE01A@prodigy.com
Message-ID: <40ujj6$7jg@vixen.cso.uiuc.edu>
Source record: 29797

Long Time Detroit Radio host J.P. McCarthy died at 4:50 PM EST Wednesday August 16th ... at the Sloan Kettering Cancer Center in New York.

He had been battling a form of "pre-Leukemia". McCarthy, 62, was the morning drive time host on Detroit's Super-Station WJR-AM for three decades. The station's 50,000 Watt clear channel signal brought J.P. into homes around the Great Lakes Region.

Detroiter's, Michigander's, and fans of good radio everywhere have lost a priceless treasure.

# 1799. Did KFOG really need KHQT?

Newsgroup: rec.radio.broadcasting
Date: 1995-08-17 00:00:00 UTC
From: searls@batnet.com
Message-ID: <40ujj9$7jj@vixen.cso.uiuc.edu>
Source record: 29799

Susquehanna Radio Corp., the company that owns KFOG/104.5 in San Francisco, just bought KHQT/97.7 to serve as a simulcasting translator for San Jose and South Bay. Susquehanna paid around $8 million for the license.

The reason: KFOG's signal is not very good in the South Bay, and KHQT's, though technically small, is closer and better.

There are several issues here.

First is the hole left in the market by KHQT ("Hot 97-7"), which was a successful Churban station, and (by all accounts) loved by its audience. No other station has picked up on the format yet, nor are there rumors to that effect. Clearly, Susquehanna could have made money by keeping the format, and it would have served the market with a proven winner.

Second is the viability of a San Francisco station, highly identified with its city and dial position (the ID is "104.5 San Francisco's KFOG"), serving another region's population from two different frequencies (and this is a region with an increasingly non-San Francisco identity). So far, KFOG seems to give little more than lip service to the South Bay. Weather, traffic and everything else are City-centric.

Third is the nature of the original problem. Did KFOG have an $8 million signal problem in the South Bay? The station broadcasts with 7900 watts at 1454 feet from a single bay antenna mounted on a mast that hangs down from the top cross-section of the Mt.Sutro tower in San Francisco. Just above it KKSF broadcasts with 7800 watts at 1470 feet from a two-bay antenna mounted on the same mast. In the horizontal plane both stations have identical computed signal contours. They are, technically, identical in size. It is clear to many listeners, however, that KFOG's signal in the South Bay is not the equal of KKSF's. The difference is not large, but small differences are more apparent where signals are weak in the first place.

But weak or not, I never hear people complaining about KKSF's lousy signal in the South Bay. And I don't see them spending $8 million to buy a second signal, just to take care of a coverage problem.

The only obvious difference between KKSF and KFOG is the antenna. A one-bay antenna like KFOG's radiates in all directions; if you could see it, it would look like a sphere. A two-bay antenna like KKSF's concentrates its energy toward the horizon; if you could see it; it would look like a donut. I believe KFOG's one-bay antenna is a poor choice for its site, which is nearly *inside* the complex metal structure of the Mt. Sutro tower. Its spherical signal probably

reflects more strongly off nearby metal objects than KKSF's -- simply because KKSF concentrates more of its energy outward, rather than upward and downward as well.

>From my own site on a ridge in San Carlos, with unobstructed line-of-sight to Mt. Sutro and the rest of the Bay Area, I can point my rotating outdoor antenna at Mt. Sutro and see the difference on the scope of my old Marantz tuner. KKSF's signal looks flat and clean. KFOG's has kinks in it. In fact, KFOG is the only major San Francisco station with kinks. The rest are all clean.

The M Street Journal carried a rare graphic with its news that KFOG would be simulcast on KHQT. That graphic showed coverage maps for both stations superimposed. This combined map gave the impression that, indeed, KHQT filled a blank in KFOG's coverage. But the curves on those maps are based on calculations of height above average terrain and power, not the real world with its complex terrian and signal shadows. Or local large objects that might influence signal quality.

To see the difference between abstraction and reality, take a look at the two coverage maps for KKSF's sister station, KDFC. You'll find them at <http://www.tbo.com/kdfc/engineering.html>. As you see, they only look about the same over the ocean (which is conveniently devoid of terrain shadows). In the real world of the Bay's complex terrain, KDFC's signal looks like a wierd stain.

There is no doubt that KHQT puts a better signal into the South Bay than KFOG, and that it reaches at least one area (Los Gatos/Saratoga) that is a bit shadowed from KFOG's Mt. Sutro site. But does it add $8 million worth of coverage? Is it worth the death of Hot 97-7? Is it a waste for a station that remains more identified with San Francisco than any other station on the dial (come on, even the call letters say "fog")?

I say the answer is no. And I say this as a KFOG listener who truly likes the station.

What do the rest of you think?

Doc

>to have their very own radio voice without jamming the daylights out of
>everyone.

True, there are interference possibilities. However, is the FCC's
refusal to authorize local programming on the 1 watt and 10 watt stations
they DO authorize (FM translators), the "least restrictive means" of
achieving the governement interest of preventing interference?
It seems to me that when this whole thing works out, the FCC WILL
authorize local origination on FM translators, forming a licensed LPFM
service, just as they did for TV.
The only way I see an unlicensed aural service working would be
to set aside frequencies allowing operation with no interference
protection. This is quite possible in the expanded AM band, since no one
is there yet. It would be difficult in the FM band. Such an unlicensed
service would require the use of FCC approved equipment to insure an
"equal footing" (power and antenna limits, etc.).
We'll see where this all goes.

Harold

Construction of the 91.9 station is finished-- I had the honor of touring their transmitter site last Sunday. They're waiting for program test authority from the FCC before proceeding.

Construction is almost finished on the new wider coverage WHRB Cambridge. The antenna is scheduled to be installed tomorrow, with equipment tests to take place in the next few days.

Source record: 29903

Well, unfortunately I do not have a lot of time right
now, but I would feel bad if nobody responded.

(I should just make an include file)

1) Read the industry journals - Radio World
especially. They'll give you a taste of what's going on.

2) Get some help. Since you will be non commercial you
can try to get some help from your friendly neighborhood radio
stations (I won't grumble about commercial status right now).
Be sure to check in with your local non comm stations.

3) Get some more help. Check in with a local college
station, or a HAM group, or anybody who has dealt with the FCC.

What to expect:

1) A lot of paperwork.
2) A lot of studies.
3) Cash flow problems.
4) A lot of engineering problems.

Getting on the air is not an insurmountable challenge.
However, it does take a lot of effort, time, and money. But
then again, staying on the air takes a lot of time, effort and
money. As you approach the problem, make sure you have a good
team... both student wise and in terms of outside help. You
will need people to market, to engineer, to motivate, etc.

Just because you aren't on the air doesn't mean you
can't have fun with it. Try sponsering some local bands, etc
to get some money.

Above all, get in touch with:
THE NATIONAL ASSOCIATION OF COLLEGIATE
BROADCASTERS. They can give you a lot more advice than I can.

Unfortunately, I do not have their address handy. But,
it's a name, right?

Also don't forget alternatives that will give you a
voice before the FCC moves. Many cable companies will carry
radio stations. For really local (a few blocks) you can use
"carrier current" broadcasting over the power lines.

I apologize for the tone and attitude of this
response. It's been a pretty bad... year, really. Oh, the

joys of running a commercial radio station.

Andrew Dickens,
GM, 92.7 WUVA

(Yes, we are a COMMERCIAL student radio station. No,
it's not all fun and games.)

Source record: 29904

Call EVERYBODY! Nationals usually buy with the
ratings, but if you are savvy you can get some spots by talking
to the regional managers.

Be prepared for a lot of rejection. Selling is tough,
no matter what the product.

Make yourself a kit with info on the station, a rate
card, sample schedules, even a few advertising packages. It
will make everything go a lot smoother.

Did your station buy the Arbs? If so, use the numbers
to tell the customer what kind of cost per point (dollars for
warm bodies) they are getting. Also use them to target
audiences by demo.

Do you have to manage the accounts (ie, produce, write
copy, schedule) or just sell them? If you need to manage, try
not to get encumbered by a lot of small contracts.

Think ahead. Start selling for Christmas NOW. Sales
for the future take longer to pay off in terms of commission,
but if you don't make them soon others may make off with the
business.

Well, that's all I can think to say right now. Good
luck! If you're sucessful, come work for us.

Andrew Dickens,
GM, 92.7 WUVA

>styles, all in the Top 40 at the same time and all played back-to-back on
>Top 40 radio!! Completely different than the Classic Rock format.

Interesting. I wonder why noone's thought of that here. Seattle's 70's
station, KJR FM 95.7, while very good, definitely leans toward the
classic rock sound.

Another station plays "Saturday Night Fever" on Saturday nights from
8pm-1am. This show focuses on late 70's disco but plays a little stuff
from the early 80's and a little late 70's stuff that isn't quite disco.
This show is excellent. Are other stations around the country doing
similar shows?

I'm looking for a source for mic flags. I can't say I'm happy with the quality of the NAB ones we had at the last station I worked for. What other companies do this kind of work? I remember working at a station which got them from a place called Alladin Nameplate in Connecticut. Alas, I have no idea where in Connecticut.
If anyone is familiar with the 3D flags at WCBS-TV, I'd like to know who did those.

Help?

I am doing some research for US radio clients interested in investing either directly or via joint venture in radio outside of the US. Can you recommend a source that will tell me about the industry in Latin America or South America? Who owns the stations, how much spectrum is available, what are regulations like? Are there foreign ownership limits?

Any info is a big help. Thanks

# 1809. Re: Sportstalk Radio in New York, Chicago, and Boise

Newsgroup: rec.radio.broadcasting
Date: 1995-08-17 00:00:00 UTC
From: rspengler <rspengler@micron.net>
Message-ID: <40ujk1$7k6@vixen.cso.uiuc.edu>
Source record: 29909

Having listened off and on to our KTIK Nampa-Boise, there is a small amount of interest in sports radio here. Besides carrying the One-on-One network out of Chicago, KTIK carries "the Babe" from 8 AM to noon, and some clown named Jim Roam out of XETRA San Diego from 1-4 PM. Then they have a local "Idaho Sports Talk" (local and boring) from 4-6 PM Mon-Fri. They also carry, during the season, the Boise Hawks, a single A farm team of the California Angels and local sports during the high school football and basketball season. Station is owned by the same outfit as owns the minor league franchise. The BIG problem with KTIK is their switching of networks and placement of inserted ads/promos. It really is irritating to have to listen to anywhere from 60 seconds to 4-5 minutes of dead air constantly. Or the live feed from XETRA during the Roam show with temps and road updates from LA LA LAnd. I've given up on him, though. What a bore. Tune them out at 1 PM. Then back later.

Cannot comment about ratings. They've been sports format for almost a year (was all news KANR and CNN Headlines previously), but have never seen any ratings published. They are building a new studio facility. And I've heard they plan to move from 1340 kHz (1 kw day and night) to 1350 kHz with 5 kw days N-D and 500 watts directional over Boise. But since they are licensed to Nampa (20 miles west), I have my doubts they will improve their signal anywhere. I live about 5 miles due north of their transmitter site.

That's about all from the land of "Famous Potatoes", or so says the license plate.

In the Mid Eighties Bobby Mitchell, then the morning mouth of WHYT and JJ the deep voiced afternoon funky man played a practical joke. During the late afternoon rush, when stations make their money, JJ broke the news (BS) that Bobby Mitchell was fired, as a result in protest he play the same Stevie Wonder song over and over, with a five min, monolog in between the song. It was great fun, however ABC / Capcities ran the station. The bosses of the Mother ship where in town, some WJR thing, they heared the drama(?) unfold. Mitchell went to Texas and Brother JJ went to New York. Proof again that you can't make a goofy out of ABC, until last week! Pun here folks! Oh yeah Sunny Joe did MD.

Ok Detroit Radio trivia remember CFXX The FOX, It could have worked. CKLW FM try under then PD Pat Hoilday to do a rock/Top40 FM in Windsor/ Detroit. It was pulled before it could work

Ratings 1985. enter fall ratings WMJC FM 94.7 fm great station 6.2 next book 2.8. Drop and yes a swich from AC/ Album Rock to Classic Rock. They have yet to regain the glory they once had.

CKLW is still a state of mind.

Mitchell was for me my morning
Ok, Pat Hoilday at the WLTI was good to.

# 1813. ADMINISTRIVIA: Posting Guidelines for this forum

Newsgroup: rec.radio.broadcasting
Date: 1995-08-17 00:00:00 UTC
From: EDITOR@airwaves.com
Message-ID: <40uk2n$84m@vixen.cso.uiuc.edu>
Source record: 29913

It has become time for me to set out the basic guidelines for posting
to the rec.radio.broadcasting newsgroup, and some basic explanations
of what the group is for, and about.

Newsgroup rec.radio.broadcasting (rrb), and email digest
AIRWAVES RADIO JOURNAL (ARJ) are designed to provide a public forum
for the dissemination of professional-level information and
conversation pertaining to radio broadcasting. By
professional-level, we mean discussions of matters of interest to
radio broadcast professionals and those with a strong and serious
interest in radio broadcasting. We do not limit participation to
broadcast professionals, but do require a certain level of maturity
and intelligence when posting here.

In order to keep the forum from erupting into flame-wars and to keep
it on topic, rrb and ARJ are *moderated* forums. This means that all
posts must be approved prior to publishing. This document is designed to
give readers a feel for what is acceptable to publish here but is not
designed to be an all-inclusive charter.

In order to be accepted for inclusion in rrb/ARJ, a post must have the
following minimal attributes.....

1) All posts must have a valid name attached to them in some way.
This means one of the following...
a) A *real name* (your actual name) This is preferred.
b) Your *on-air name* (you must include the station/network at
which you use that name)
If your Internet host doesn't include a real-name as part of the"
From: line, then you should add it to the end of your post.
If you are posting sensitive information, and don't want your
name used, let me know and I'll try to cover for you.

2) All posts must have a valid 'SUBJECT' line.
This means that the subject line must accurately reflect the
content of the post. As a thread drifts from the original
focus, the subject line should be changed to reflect that shift.
Posts without a Subject: line or ones which use a bogus
subject may not be posted.

3) All posts must pertain to the charter of the group, *RADIO* broadcasting.
Occasionally a post about TV will be OK'd if it appears to
have a broad interest to radio people. However, this is considered an
exception and is not encouraged.

4) All posts must have a valid return address. Posts with email addresses that bounce may be excluded as a means to curb forgeries.

5) All posts must be submitted as "ascii-text".
Binaries, MIME and other attachments are not post-able to netnews.

6) All posts must be formatted to an absolute maximum of 78 columns. The standard for a text-terminal is 80 columns. We specify 78 to allow for quoting in followups. Failure to do this will result in "line damage" which is the uneven wrapping of lines that are too long.

7) Quoting of previous article text should be kept to a minimum and *never* exceed 49% of the entire article. Never quote the signature files from previous posts. Only use the bare minimum needed to make your points. If replying via the Digest, "please" never quote the entire (or substantial portion of) the digest.

8) Please distinguish between the 'followup' and 'reply' functions of your newsreader. Followup sends your response to the group, reply sends it to the poster via email. When replying to a personal request for information which is of limited or no real interest to the entire group, please email to the poster. There is no purpose served by posting replies to very personal requests to the entire globe. However, if the requested information is of potential general interest, then please do post.

9) When posting Help Wanted or Positions Wanted, please include a Full *REAL* name, Company name, postal address, FAX and/or voice phone and (if applicable) email address.

10) When asking for, or offering, information about a local station or personality, always give a little background. Remember most people are not familiar with your market. If you use a station's slogan, always include the calls and city too.

11) Commercial postings are a delicate issue. Some would like to see none of it, others seem to take the tack that mild commercial posts are OK provided they are not too 'in your face' and are part of the flow of conversation. The moderator makes all final judgements on acceptability of commercially-motivated posts. If you are in any way connected with the company you are posting about, you *must* disclose that affiliation even if you are not an official spokesperson. Avoid blatant commercials. Make your points in conversation. Never overtly bash a competitor's product. Be nice, it will be to your ultimate benefit.

12) Remember that you, the poster, bear all responsibility (if any) for copyright, libel, trademark and other matters when posting to the Internet (not just to this group). Please try your best to be accurate in your posts. If you post your opinion, make sure it is cabled as such. Please try to obtain permission when reprinting from copyrighted sources. Always give attribution of your sources when available. Summarize when possible to avoid potential copyright issues. So far copyrights have not become a problem on the Internet,

but as the net grows, it may become more of an issue.

13) Flames are not permitted on this forum. A flame is defined as "personal insult or ridicule". It is perfect;y fine to argue the points or opinions raised by a poster, but not to personally insult the poster. In other words it is acceptable to say... "Your stated opinion is stupid..." NOT "You are stupid for having that opinion..." It is fine to articulate and argue points of view, but make sure you counter it with another point-of-view and not just hit people over the head. Calling of names is also considered a flame. We have conversations here, not shouting matches.

Also avoid posting...

* Known false or misleading information.
* Items that you know are a violation of copyright.
* Overtly profane posts (profanity is not forbidden, just use discretion).
* Loooong signature files. 4 to 6 lines is a good soft-limit.

...VERY IMPORTANT... ...VERY IMPORTANT... ...VERY IMPORTANT...

Every poster is responsible for what (s)he posts. I make no effort to verify authenticity of postings and any copyright, slander or other legal matters arising from a public posting belong with the poster. Please use discretion when posting potentially damaging information to this, or any public, forum.

Thanks for reading. Hopefully this will clear up some of the misunderstandings about posting to rec.radio.broadcasting. For a more inclusive charter of this group, send email to rrb-charter@airwaves.com .

# 1814. Boston Radio Watch 08-18-95

Newsgroup: rec.radio.broadcasting
Date: 1995-08-18 00:00:00 UTC
From: Mark Shneyder 2-4219 <nhmas@gauss.med.harvard.edu>
Message-ID: <4137q2$k8l@vixen.cso.uiuc.edu>
Source record: 29914

* A rude awakening :

If you woke up in Boston on Friday(8/18) morning and tuned in
to Infinity's WBCN 104.1FM, you heard the Howard Stern Show.
And yes, the listener line was jammed with listeners wanting to
know what the heck was going on. Here's what the deal was :
The ugly Patriots-Eagles exhibition game ended around 11:10p.
However,the post-game show with DJ Bill Abbate and morning
sports director Paul "Tank" Sferruzza extdended way past midnite.
(all the needless hype about how great the Patriots' new Pro Sports
Shop is took up half of the post-game show :-).
Instead of running the tape-delayed Stern show so late,
'BCN opted to rerun Thursday's show in the Friday morning
time-slot(6a-10a) normally occupied by Chalres Laquidara
who's out on vacation all this week. Also, this was probably a
good programming test to see how the usual morning WBCN audience
responded to Howard's antics.

* Boston Radio/TV Stations on the Web :

Here's the most up-to-date WWW list of Boston radio/TV stations :

AM dial :

WBNW AM 590 "Business 590" --> http://www.wbnw.com/biz/wbnw
WLYN AM 1360 --> http://www.wlyn.com

FM dial :

-Public/College/Non-commercial :

WMBR(MIT) 88.1FM --> http://www.mit.edu/activities/media/wmbr
WGBH 89.7FM --> http://www.wgbh.org
WBUR(Boston U.) 90.9FM --> http://web.bu.edu/COM/html/wbur
WMFO(Tufts U.) 91.5FM --> http://www.tufts.edu/~wmfo
WBRS(Brandeis)100.1FM --> http://www.wbrs.org

-Commercial :

WZLX 100.7FM "Boston's Classic Rock" -> http://www.wzlx.com
WCRB 102.5FM "Classical Radio Boston" -> http://www.wcrb.com

WXKS 107.9FM "12-in-a-row Hit Music Station" -> http://www.kissfm.com/kiss

Note : Looks like WBOS 92.9FM will have its own home-page at
http://www.wbos.com very shortly...

TV dial :

WGBH-TV2(PBS) --> http://www.wgbh.org
WCVB-TV5 "NewsCenter 5"(ABC affil) --> http://www.wcvb.com
WGBX-TV44(PBS) --> http://www.wgbh.org
WABU-TV68 (the new home of Baywatch.Yeh!) --> http://web.bu.edu/COM/html/wabu

* Other Market Items :

-Two weeks after dumping AC format in favor AAA, 92.5 in Haverhill,MA
changed its calls,also -- WLYT-FM(Lite 92.5) has been replaced by
WXRV-FM("The River"). However, it's obvious they are strictly
So.Hampshire/Merrimack Valley station and staying out of the Boston
market.(local ads/promotions, no Boston listener-line exchange)
Unlike Boston's AAA WBOS 92.9, which often sounds like a
sophisticated AC station with many number of cross-over(AC,AOR,CHR),
established artists on its playlist, WXRV-FM tends to venture out
more into the familiar, upbeat 80s poprock library(the 80s British
invasion) from artists who are no longer active or successful...
I do agree with Scott F. that 'XRV sounds more alive than
'BOS...at least for now.

- David Brudnoy, WBZ AM 1030's night-time talkshow who's been
doing the show from his home in Back Bay since January, is now
well enough to host his program from WBZ's Brighton studios
once a week...Back in November '94, Brudnoy revealed that he
was suffering from AIDS....

- American Radio Systems' all-talk WRKO AM 680 no longer airs
reruns of Rush Limbaugh's show at midnite. It now airs
ABC Networks' syndicated call-in show called "PrimeTime"...

* Sports briefs :

- The broadcast quality of the last 2 Patriots' radio broadcasts
on the new flagship WBCN 104.1FM has improved significantly since
the first game. Listeners can finally enjoy the full STEREO effect
from the field...:-). Veteran WBZ's Gil Santos' play-by-play work is
first-rate as expected(I have to say, every time he mentions WBCN
calls, it does sound like WB-Z-N to me :-)

Unfortunately, WBCN's $10.8 million(for 3 years)
investement doesnt seem to be paying off so far -- the Patriots
really look awful with no promise in sight,IMHO. (Ed.: I wonder
when any of the sponsors who paid $3,000 for a spot on WBCN radio
broadcasts will start asking for partial refunds).

- On Thursday, August 17,1995, the Celtics' flagship all-sports radio
WEEI AM 850 named very popular former Celtic forward Cedric Maxwell
as its new analyst on Celtics broadcasts for 95/96 season.
Still no word on who'll handle the play-by-play. Rumor has it
that Glenn Ordway who walked away from that job in May to
accept PD post at 'EEI is likely to come back to it.

- Speaking of 'EEI, the station is airing "The New WEEI...Coming Soon" spots a few times during the hour. The long-awaited program line-up shakeup promissed by Ordway, when he took over as 'EEI boss, will happen very shortly....Stay Tuned...

-Mark

# 1815. PHOENIX: GODDARD FULL TIME AT KNIX

Newsgroup: rec.radio.broadcasting
Date: 1995-08-18 00:00:00 UTC
From: Michael Hagerty <Michael_Hagerty@azfamily.com>
Message-ID: <4137q3$k8m@vixen.cso.uiuc.edu>
Source record: 29915

Buck Owens' Country KNIX(102.5) has named market legend Steve
Goddard as full time PM Drive personality.
Goddard, whose career has included stints in Dallas and
San Diego before moving to Phoenix 14 years ago, has been part-time
at KNIX for the past few weeks.
He was let go at Bonneville's KHTC(96.9) last November when the
station flipped from oldies to '70s music. Prior to
that, he was afternoons at the old Y95(now KYOT), KKFR(92.3) and was
part of the original air staff at
the old KZZP(now KVRY), where he did afternoons for
7 years.
Goddard got the news from KNIX PD Larry Daniels Friday(8/18), and
was told to begin his new shift the same afternoon.
As Clarke Ingram has noted in this group, Goddard is a
big talent, and has been on the beach far too long.
Congratulations to Steve!

# 1816. San Diego Radio Watcher 8.18.95

Source record: 29916

>From high atop the Sorrento Mesa and digitally relayed, here's the San Diego Report for this week:

Stacy Taylor, of KFMB [760 SD, 5/50kw DA] created a stir on the internet for San Diego listners of his show. It all started when producer Jack Landreth was showing Stacy a "chat" area on America On Line, and soon became the theme for discusion on Thursday. Taylor went on to explain to the listening audience what was the hype about on the type. It proved popular, because Landreth told me, "We temporarily jammed something because AOL called later to ask what we did to get so much traffic." Taylor promised to have another venture into the chat-room area. Proof positive that, Taylor's afternoon show is popular and in no danger.[The Stacy Taylor Show, 12-3 p.m. on KFMB]

What to do with a great signal, and fill a need for listners? In San Diego, 1170 KCBQ is home to a 50kw day signal that carrys far away from the transmitter in the daytime with rock and roll oldies. The "Good Times, Great Oldies" station is also becoming something else: a solid sports alternative to XETRA-AM. Knowing that Xtra Sports 690 has the talk show and hype department sowed up, KCBQ has gone down a different trail: sports for starved fans who want play-by-play.

The Oakland Raiders football season on 1170 starts tonight with the Minnesota Vikings. The station will broadcast all games except when the Radiers play the San Diego Chargers. XETRA-AM owns the territorial rights to those broadcasts.

Pigskin is in fashion this fall too, with the station picking up the USC football season. Plus, the sports section of today's Escondido Times-Advocate reported that the station is also broadcasting high school sports games from North County. This is exactly what KBNN [100.1, Julian] did last year.

Other sports packages on the station include the San Diego Sockers [soccer], NASCAR auto racing, and Unlimited Hydroplane racing. http://www.kcbq.com/

Last week I reported that KSDO's Roger Hedgecock was in Dallas attending the United We Stand convention. It's part of Hedgecock's "Holding the Feet to the Fire" series that has proven successfully for the afternoon political gab-fest. In addition to guest like Ross Perot, Roger had on Jessie Jackson, and Dick Armey.

This week and part of next Roger will be on vacation and guest hosts include San Diego Mayor Susan Golding, conservative Mason Weaver and California Congressman Bob Filner.

[I'm still compiling information about the FIRING of Brooke Daniles with her producer. She was suddenly let go on Monday. Currently, there a news program with Ken Kramer is in the spot. Lots of rumors, but no facts.]

Meanwhile, overnight radio is this market belongs to one station: KOGO. Reported in last Sunday's OC Register in Gary Lycan's column: Art Bell has a 10.8 share! I've been touting about how many stations Art Bell [200+] show is on, it proves one thing: give the audience a good live overnight show, they will tune in. In a related note, one good move on the Internet is that Myron MacLeod and Keith Rowland, the authors of individual Art Bell Home pages have combined forces for one! Check it out, with the complete station list at: http://www.artbell.com/art

When KKOS [Carlsbad] dumped the popular Dr. Demento show in July, David Tanny couldn't sit back. "I'm demented" he told me via e.mail. He started a letter campaign to various stations, contacted Ken Leighton, radio columnist of the Escondido Times-Advocate, and pleaded with members of the news:rec.music.dementia group. It worked, because last week XHRM [92.5 Baja, Norte California, Mexico] picked up the show. It's Sunday night from 11 p.m. to 1 a.m. Congragulations to David for getting a show back into circulation in the San Diego market.

This weeks little gem find: KiFM [98.1 SD] is the flagship station for Art Good's Jazz Trax. It fills the airwaves on Sundays at 4 p.m. This week, the guest will be Nathan East of "FourPlay" with the archive album, YellowJackets "Mirage A Trois" for 1983. The five-hour show is nationally syndicated, with playlist available via the internet. Next weeks guests include Pat Methany [my favorite!] followed by the 10th Anniversary Special September 3. I've heard the program compared to fine-art's "Adventures in Good Music," but on the Jazz side. It's education for the ears, and worth listening too. Check the web site: http://www.kifm.com/jazztrax.htm .

It's over 900-hits now. It's popularity amazes me. It's just a bunch of rag-tag electrons strewn together to make the most complete radio log for the entire southern California broadcasting empire. Check it out! For those not on the web, I can gladly send you and text version! Just e.mail me at my usual address. Those not satisfied, have double the electrons send back.

Thanks Bill for keeping those electrons in line!

As a graduate of a broadcasting school (Loyalist College in Belleville, Ont.)
I may be a little biased, but after 8 years in radio I have known lots of
people who have entered the business without prior experience and others
who have come from broadcasting courses and I truly believe that although
everyone is different, applicants with broadcast schooling have a slight
edge. As with everything, it all depends on what you put into the learning
experience.
As far as the N.I.B. goes, I have heard some unhappy stories and I would
suggest you investigate further. Any place that charges you to simply
apply seems a little suspect to me. There are plenty of excellent community
college broadcasting courses around and I would recommend Loyalist for one
as a good school to give you all the basics. Again I would stress that what
you get out of it all depends on what you put into it.
If you are really serious about a radio career you should know that the
entry level positions are shrinking extremely rapidly due to computerization.
But if you are prepared to go anywhere, do anything, get paid next to
nothing, and live your life in fear of being replaced by a machine, there may
be smalltown opportunities still out there.
Good luck.

"Ever heard of the national institute of broadcasting in Toronto?
I called this ad about "voices wanted" and they gave me a call, I went
in and tried out ($25 studio fee) and the next morning i called in,
apparently, I got accepted and now i can take their course ($3000)"

Peggy,
Be carefull. There are some very good, honest broadcast shools out
there. There are even more that are interested in getting their hands
on your tuition money that will teach you only that you were taken in.
I know nothing of the school of which you ask. Nothing strange
there, I'm in Miami, Florida. I also run the radio broadcasting
program for the Adult, Community and Continuing Education arm of the
Dade County Public Schools, located at Miami Lakes Technical Education
Center. The program has been in place for over 25 years.
Our program lasts one year, divided into three trimesters. Classes
run from 8am to 4 pm, Monday through Friday. We broadcast two hours a
day, one hour live in the afternoon and one hour taped for rebroadcast
at night, on the local public radio station, 91.3 WLRN-FM (100K
watts/stereo). Our format is NAC jazz and includes three 2-minute
newscasts per hour. Tuition per trimester in our program is currently
around $280, meaning the average student can attend our entire course,
buy textbooks and materials for under $1000.
We regularly receive students who have completed training at the
XYZ School of Broadcasting and arrive at our door for the training they
need to get a job. Unfortunately, they also have thousands of dollars
in student loans outstanding due to their attendance at their previous
"school". We also get about 15% of our students from colleges. They
have graduated with a degree in journalism, for example, but have no
on-air skills, so they come to us.
Our classrooms include a 2-track tape, 4-track tape and 8-track
digital production studios, three practice air quality studios and our
live studio from which we transmit to WLRN. We accept between 20 and
25 students at a time. Our classes are full and the waiting list is
currently at about 30 people waiting to enroll. We cover on-air music
and news, news writing, production, copywriting, producing, board
operation and voice over as the core curriculum.
The students run our "station." Third trimester students act as
program, production, music and news directors. They are also air and
news talent for our daily broadcasts. Second trimester students are
polishing their production skills and are becoming air qualified and
act as news talent. First trimester students are learning the
equipment and starting out on-air with news as fast as they are ready.
It has been a successful program. Virtually every radio station in

the Miami-Ft Lauderdale market has at least one of our graduates on-air. Every station has someone on staff, in promotions or running a board, producing, doing production or some other task. Quite a few of our graduates work at local production houses. Others are doing quite well in the voice over market.

Have the school give you the names of their graduates working locally - on air, doing voice over, whatever. Call those people and ask about the school. If the school can't give you any names, get out of there. Call the request lines at your local radio stations and speak to the air talent. Ask them to refer you to a school. Check with the adult ed. dept. of your local public school system, and with local colleges and universities, especially the community colleges. The other path, which many have followed, is to apply for work at a radio station. Start out in promotions or as a gofor. If you get the job, ask questions, pay attention and show them your interest. Look for someone to act as a mentor and will teach you to run a board. Get into the production studio (with permission) and practice doing an air shift in your station's format. Make demo tapes and ask for feedback from the airstaff and program director.

Good luck in your search for a school. I hope you're able to find what you're looking for.

>intelligent sports coverage without the ex-Coach's(Chuck
>Dickerson)caterwauling."(..or Art Wander's know- nothingness,
>IMO. But,didn't Toronto Life get The Fan in its year-end
>issue last year?)

I guess The Fan's new sister station deserves a mention:
The New Heartbeat of Toronto, EZ Rock 97.3 FM (Soft AC)
replaces the "old" Z97.3 - Toronto's Classic Hits.
Terri Michael (MIX, CHOM) and Mike Cooper (CHUM, CFTR) do
the morning show and Darryl Henry (HTZ-FM, MIX 96) does
afternoons. Telemedia bought the station for $17 million
and is going right up against Toronto's no.1 (CHFI).

## 1823. KABC-AM 790 Commercial sinks to new low

Newsgroup: rec.radio.broadcasting
Date: 1995-08-18 00:00:00 UTC
From: "Harvey M. Spencer" <hspencer@igate1.HAC.COM>
Message-ID: <4137qc$k98@vixen.cso.uiuc.edu>
Source record: 29923

I heard overnight talk show host Ira Fistel reading a commercial at about 11:30PM Wednesday night for one of the local nudie bars near the LAX airport in Los Angeles. The copy advertised the place as "rated No. 1 by Gentlemen's Magazine" and described it as the classiest gentlemens club in the area. It sounded by his voice that Ira didn't even know what the commercial was about. Even more embarrassing was the fact that he had internationally renowned newspaper cartoonist Paul Conrad on the show. Kind of brought the image of the show down. Maybe the new owner of KABC, Disney, considers this place family entertainment. I guess KABC is tickled (no pun) to get a real local commercial. Most of what they have at that hour is the usual "buy these tapes and lose your foreign accent" or "what a relief Gold Bond Powder was for my male itch problem".

# 1824. Re: Computers used in Radio Broadcasting?

# 1829. EAS on the Internet

Newsgroup: rec.radio.broadcasting
Date: 1995-08-18 00:00:00 UTC
From: Dave Biondi <dbiondi@eas.net>
Message-ID: <4137qh$k9f@vixen.cso.uiuc.edu>
Source record: 29929

I am heading up a project to bring the US Broadcast Emergency Alert System (EAS) to the internet. It is intended to allow broadcast EAS information to also be disseminated to specific local areas through specialized internet mail lists and also be used by local governments as a mass dissemination source of emergency activation type information. Other traffic would include interagency private, general public information, media releases, feedback to the agencies and public, and health and welfare information during disasters.

The beta of this website is initially using the Houston/Galveston EAS area, although operation is expected to expand to all of the US with the cooperation of many benovelant Internet providers in the EAS areas. We have acquired the domain eas.net and http://www.eas.net/ is up in a relatively generic form.

I am soliciting ideas and suggestions on how the site can be best utilized by the broadcast media in an emergency situation. The criteria for activation of the site, in an emergency, mirrors that for a broadcast EAS activation. So far the concept has been very well accepted, by the Houston/galveston area governmental and private agencies, as a very viable method of information distribution and coordination. We hope to have the site fully functional by November 1, 1995. Your input is welcome.

Dave Biondi
System Administrator, eas.net

>
>What do the rest of you think?

I'm just a listener and in fact I only travel to the Bay Area about once a year. But I can say that while staying in Santa Clara (next to San Jose) I noticed that KFOG had a terrible signal and there was no other station playing even close to the same type of music. If I lived in Santa Clara I would warmly welcome the better signal and would not really miss the absence of KHQT. Of course, a San Jose based station would probably be even better. By the way, didn't KHQT play basically the same stuff as Wild 107 (or was it 108?).

Probably most of you by now have heard that pioneer TV newscaster John Cameron Swayze died Tuesday at his home in Florida. He was 89.

Perhaps not so widely known is the fact the Swayze began his broadcast career in Kansas City.

Originally from Wichita, Swayze, who started out as a reporter for the Kansas City _Journal-Post_ in 1930, accepted an offer that year to read the newspaper's daily news report on KMBC radio.

Later, the _Journal-Post_ shifted its activities to WHB. Swayze read "bulletins" three times a day on WHB. In addition, he wrote a daily radio column in the _Journal-Post_, and was named the newspaper's radio editor.

In 1933, Swayze began reading newscasts on First National Television's experimental TV station, W9XAL, located in the Kansas City Power & Light Building (then the Midwest's tallest structure).

By 1940, Swayze was a full-time radio newsman, working again for KMBC (now KMBZ). In 1944, he moved to Hollywood as NBC's Western News and Special Events director.

NBC moved Swayze to New York in 1947 and, in 1949, became one of the first recognized TV personalities as host of the daily 15-minute "Camel News Caravan". In 1956, Swayze left the show and became the featured spokesman for Timex watches for more than 20 years.

Swayze's son, John Cameron Swayze Jr., said, "He managed to project a certain innocence, a feeling of promise, a genuine friendliness."

Message-ID: <4137qk$k9m@vixen.cso.uiuc.edu>
Source record: 29933

-- [ From: Jerry W. Tobias * EMC.Ver #2.10P ] --

I was really sorry to hear of the death of J.P. McCarthy. I got my start in radio in the Detroit/Windsor area in 1969 and I have some great memories of him and the area. Here is the press release:

WJR ISSUES STATEMENT REGARDING THE DEATH OF J.P. MCCARTHY
DETROIT, Aug. 16 /PRNewswire/ -- Joseph Priestly McCarthy died this afternoon at Memorial Sloan Kettering Cancer Center at 4:50 p.m. His family was with him when he passed away. He is survived by his wife, Judy and six children: John, Susan, Diane, Kathleen,Kevin and James. He was born on March 22nd of 1933.
J.P. McCarthy was diagnosed in early July with Myelo Displastic Syndrome, a blood disorder in which the marrow fails to produce enough red and white blood cells and platelets. He died from general organ failure.
WJR General Manager Mike Fezzey is deeply saddened by the death of J.P. McCarthy.
J.P. had hosted WJR's morning program since December of 1964. He was a part of the WJR family for 30 years. His impact on Detroit didn't end at the close of the broadcast day. He was involved in numerous charitable organizations and raised hundreds of thousands of dollars for PAL, The Police Athletic League. He chaired the American Cancer Society's annual fund drive and was on the board of many local charitable organizations.
J.P. was inducted into the Radio Hall Of Fame and he received the prestigious Marconi Award along with many other honors during his long broadcasting career. J.P. was the champion of the morning ratings for his entire broadcasting career.

# 1834. WJR "Emotionally Wrought" Over Death of J.P.

Newsgroup: rec.radio.broadcasting
Date: 1995-08-18 00:00:00 UTC
From: Radio/TV Dial Pages <lewismik@metronet.lib.mi.us>
Message-ID: <4137qm$k9n@vixen.cso.uiuc.edu>
Source record: 29934

6 AM from the Golden Tower of the Fisher Building - the Voice of the Great Lakes - WJR 760 Detroit, Dan Streeter begins the first Morning Show sans J.P.: "We are hurting here at WJR and you can help it better." Streeter continued, "This is the most difficult broadcast I've ever done. J.P. McCarthy ...is dead." Choking on the words, Streeter explained that though he was emotionally wroght, but that there doing this first broadcast after J.P.'s death is where he "wanted to be". And so began the hours of tribute to the longest running Morning Radio host in Detroit history - Joseph Priestly McCarthy.

News Director, Dick Haefner first reported the news to the WJR audience on Wednesday afternoon: "The doctor said that he died very fast and in an unpredictable manner. His wife and kids were at his bedside."

WJR's spokesperson, Ann Thomas relayed that "Joseph Priestly McCarthy died this afternoon at New York's Memorial Sloan Kettering Hospital Cancer Center at 4:50 PM. His family were all present including his wife, Judy and his five children. The cause of death was general organ failure due to his illness of myelo displastic syndrome."

Mike Feezey, General Manager of WJR is "deeply saddened" by McCarthy's death. "I talked to him Friday," Feezey said. "He was convinced til the end that he would beat it. His spirits were good."

McCarthy had been doing the morning program continuously for over 30 years, since December, 1964.

"Radio's best friend," Art Vuolo contacted in Atlanta said, "It was a shock that it happened so quickly. I talked to Dick Purtan who basically has been doing mornings for the past 30 years in Detroit, too. He was shocked" and fighting emotion on the phone.

"I'm proud to have made the last video of J.P. as a presentation for WJR in regard to the Michigan Association of Broadcasters (MAB) Lifetime Achievement Award," Vuolo said. "This was presented to him in February." Vuolo speculated from the consensus of the many that called him during the evening, as it occurred to each that the mornings would be void of J.P. McCarthy, "This will be a very big hole to fill."

WJBK-TV2 contacted Bill Bonds on vacation in Scotland, "J.P. was like a personal friend to us all." As Bonds lost his composure on the phone, he told of his sister visiting from Lansing and missing J.P. in the

mornings "so much".

WJBK's Warren Pierce worked for many years at WJR said, "He loved what he did. He said 'You'll have to drag me out of here.'"

Former Detroit Mayor Coleman Young said that McCarthy was "one of the good guys."

Ann Thomas, a spokesperson for WJR said yesterday that McCarthy was diagnosed with this rare and fatal blood disease in early July.

In a press release on Wednesday, Aug 2, J.P. McCarthy and WJR announced that McCarthy would be off the air for two weeks. During this time he would be receiving treatment for a potentially fatal disease - Myelo Displastic Syndrome. On-going treatment would have required bone marrow transplants. McCarthy said that this posed a problem due to the fact that he had no siblings for the proper match. However, he and his doctors were looking into other options. Donor testing turned out hundreds of volunteers at area hospitals. Testing was proceeding at several sites at the time of McCarthy's death.

Written remembrances will be posted and forwarded from the Radio/TV Dial Pages.

For anyone interested, here is the complete text from today's on-line version of The Detroit News (http://detnews.com)

THE GREAT VOICE IS SILENCED -- J.P. McCarthy Dead At 62

By Harry Atkins Associated Press

The great voice of the Great Lakes has been silenced.

J.P. McCarthy, a fixture on Detroit radio for more than 30 years, died Wednesday at a New York hospital. He was 62.

Chris Westerman, a spokeswoman for Memorial Sloan-Kettering Cancer Center, said the longtime WJR-AM personality died at 4:50 p.m.

Westerman said she was unable to provide any other information immediately. McCarthy had gone to the hospital to seek help in his battle with a rare blood disorder for which he needed a bone marrow transplant.

"I don't think God will make another voice or another talent quite like J.P. McCarthy," Dick Purtan, a Detroit radio broadcaster with WKQI, told Detroit television station WDIV Wednesday afternoon.

Joseph Priestly McCarthy became the absolute king of Detroit's morning drive-time for three decades with his mellow voice, keen Irish wit and a curiosity that seemed to reflect what was on the minds of listeners.

Next to Ernie Harwell, he was probably the best-known Detroit radio voice to folks listening outside the Motor City. WJR's 50,000-watt clear-channel signal reaches 38 states and half of Canada.

"My memory is that J.P. was a friend to everybody, on air and off," Harwell, the Tigers broadcaster whose firing by WJR caused a furor a few years ago, told WDIV. "We're all saddened, like each has lost his very closest friend."

That is how almost everyone felt about McCarthy, whether they knew him or not. His appeal was to both men and women, young and old, rich and poor. They liked him because he talked about things they talked about.

McCarthy was an inveterate golfer and could get everyone from Jack Nicklaus to Tom Watson on the telephone, hence on the air, to talk about golf. He also loved sailing.

When he started out in 1964 at WJR, which bills itself as "the Great Voice of the Great Lakes," McCarthy was basically a disc jockey. But over the years, the talk between records became longer and longer. The listeners apparently loved it, because his ratings were always the highest in the city during his time slot.

Later, McCarthy added to his workload by hosting the noontime "Focus" program, a look at life and living in the region. It had basically a talk-show format and the guests were frequently authors in town to plug their latest book. McCarthy took a speed-reading course and frequently stunned his guests with the fact that he had actually read their work before the interviews.

"J.P. has been an institution in this city," said WDIV anchor Mort Crim. "He was one of the most knowledgeable people in broadcasting anywhere in this country."

McCarthy had been ill for some time, but didn't want it made public. His listeners likely never guessed. On one of his last morning shows, July 25, he had former Michigan Militia leader Norm Olson on the phone.

At one point, Olson became irate at a question from McCarthy.

"I ought to hang up on you, the same way I did to a guy in Chicago a little while ago," Olson said testily.

"Why don't you just answer the question, Norm?" J.P. said.

>From anyone else, it might have sounded like a challenge. It might have ended the interview. But from McCarthy, it sounded like good common sense. Olson answered the question.

"He was one of the brighest people I've ever known," said Paul Carey, the former Tigers broadcaster. I'm just shocked that it came so quickly."

McCarthy was diagnosed early in July with myelo displastic syndrome, a blood disorder in which the marrow fails to produce enough red and white blood cells and platelets. It leaves a patient susceptible to severe infection.

The condition also often leads to leukemia, said Dr. Melvin Lester, a William Beaumont Hospital physician who had been treating McCarthy.

The station announced McCarthy's illness Aug. 2 and said he needed a couple weeks of rest and treatment. He also needed a transplant after none of his five children proved to be suitable donors. He had no siblings.

WDIV reported that McCarthy had been placed in intensive care at Sloan-Kettering on Monday night, after it was discovered he had walking pneumonia. Tuesday night, he took a turn for the worse and was put on a respirator to help him breathe, the station said.

Area hospitals in recent weeks had held marrow drives that attracted hundreds volunteering to donate bone marrow.

Last week's drive at St. Joseph Mercy Hospital in Pontiac brought listeners as well as friends.

"We all want to be able to help," Joseph Antonini, former chairman and president of Troy-based Kmart Corp., told The Oakland Press. Antonini's wife, Kathy, was a volunteer at the drive.

McCarthy had hosted WJR's morning program since December 1964.

"J.P. was Detroit, is Detroit," Detroit Free Press feature columnist Bob Talbert told WDIV. "There will never be another Detroit like the one J.P. gave us."

Other media personalities, friends and colleagues expressed sadness at McCarthy's passing and respect for his talent.

"It's impossible for me to believe that J.P. McCarthy -- a Detroit institution -- is dead," Detroit Mayor Dennis Archer told the station. "I grieve for my city, for his family, my children.

"He could ask the toughest questions and do it in such a way that you felt comforted."

Free Press publisher Neal Shine called McCarthy's death "the end of an era."

And, like others who were aware of the seriousness of McCarthy's illness, Shine said he still was shocked to hear McCarthy had died. "I don't think anybody expected this," he told WDIV.

# 1836. Seeking Limbaugh KFBK info/Joe Pyne Info

Newsgroup: rec.radio.broadcasting
Date: 1995-08-18 00:00:00 UTC
From: BAKALIE@ccabc.com
Message-ID: <4137qo$k9t@vixen.cso.uiuc.edu>
Source record: 29936

I am an associate producer for ABC News Productions. We are putting
together an hour long A&E Biography on Rush Limbaugh. I am looking
for radio tapes of Rush on KFBK Sacramento, 1984-1988.

Is there a radio collectors bulletin board on which I can post this request?

Any ideas you have would be appreciated.

I do have a second request too. Someone told me that Joe Pyne's son works
for a TV station in California - he uses the name "Pyne" but I don't know
his first name. I have tapes of Joe Pyne which I'd like to get permission
to use ... plus I heard that the son would be interested in the tapes, and
I'd like to put him in touch with the collector I bought the tapes from.

Thanks for your help!

RR>I guess it just goes once again to prove that even as fine a station
RR>as KJAZ was, money talks and ONLY money talks. Now another stereo
RR>pair of subcarriers will go silent. Another fine station will go dark
RR>and another nail in the coffin of creative and interesting radio will
RR>be driven in. One would think that Microsoft could have footed the
RR>bill altogether and not even missed it...

RR>I feel like I have lost a friend.

Bill,
I was also a fan of KJAZ and hate to see it go. However, the
satellite folks want to be paid, the staff needs money there's no money
coming in. What else can they do?

Money drives everything. Supposing your company asked you to work
for free because they were having financial problems? Even if you were
willing, how long could you go without being paid? I think that's the
situation KJAZ is in.

## 1838. SBE, etc. Certification: Important?

Newsgroup: rec.radio.broadcasting
Date: 1995-08-18 00:00:00 UTC
From: gmolnar@nexus.interealm.com
Message-ID: <4137qq$ka1@vixen.cso.uiuc.edu>
Source record: 29938

Here's a question likely to start a thread....

Just how important is it, professionally speaking, to be "certified" by SBE, or a similar organization? I mean, do employers (and peers) really care?

Or, is it more important to have FCC licensure? I know that the FCC has dropped almost every requirement for operatot/maintainer licenses in broadcasting. Does an FCC 1st telegraph and General 'phone hold a lot of weight anymore?

IMHO, I suppose the biggest thing is knowing which end of the soldering iron to hold....

Constructive discussion is welcome!

> Interesting. I wonder why noone's thought of that here. Seattle's 70's
> station, KJR FM 95.7, while very good, definitely leans toward the
> classic rock sound.

Which is kind of funny, considering that the original KJR (on the AM band) was nowhere near classic rock--I remember a pretty straight forward Top 40 format, taking into account Seattle area musical taste at the time (which tended not to favor Black and dance music real strongly).

> Another station plays "Saturday Night Fever" on Saturday nights from
> 8pm-1am. This show focuses on late 70's disco but plays a little stuff
> from the early 80's and a little late 70's stuff that isn't quite disco.
> This show is excellent. Are other stations around the country doing
> similar shows?

KDMX--Mix 102.9, here in Dallas-Ft. Worth does a 70's Saturday Night show that is pretty good--it's not limited to disco, but rather plays the full range of 70's pop music (plus an occasional song from 1980 thrown in, probably by mistake).

[of changes in the Springfield-Branson market]

: As if this 80-90 market from hell needs yet another faceless signal
: that is barely audible, offers no real programming, but still messes
: up another frequency.

Ahem.

*Now* do you see what I was talking about more than a year ago when I complained about BC Docket 80-90? :-)

(Background: I was describing how all the drop-ins near and around Columbia (Mo.) had obliterated my reception of most St. Louis stations from that location. Bill chastised me and away it went for a while, even getting tangled in the WOWO controversy!)

I will say that I think Springfield is probably the market that has been *most* afflicted by 80-90 drop-ins, upgrades, and move-ins. You have to wonder where all the money is coming from and how any of these guys can keep going.

(Albuquerque probably is in second-place with all the rimshots from Santa Fe plus some bona fide drop-ins)

Free enterprise is great until it works as advertised.

There's no turning back now, obviously, and liberalization of ownership limits will just keep some limping operations alive that would otherwise be nailed dead by market forces.

Does anyone remember a syndicated radio comedy series in the early 80's called the "Stoned Ranger?" I heard it on WPLJ-NY when they were still AOR.

The intro went like this: (Will Tell Overture under) ANNCR "A puff of smoke...a silver roach clip...a bag of munchies...another puff of smoke...and the Stoned Ranger rides again! RANGER "Hi-ho Gilbert. Let's blow this joint!" ("Qualude thunder" drum fill) ANNCR...
-Nobody believes me!

If you know anything about it or where I can get my hands on some tapes, please get in touch. (I'm sure it got stuck somewhere with Cheech & Chong in the constipation of "Just Say No"). I'm not a dead-head or a user; I just know funny radio when I hear it.

Thanx in advance,

I moved from an unrated market (Woodward, OK) to Tulsa,OK about three weeks ago. I would appreciate any assistance contributors to this newsgroup could give me in landing even a part-time position in this market. I have run into a plethora of stone walls (read: apathetic PD's) as I head to each station in town. Objectively speaking, I can do a more entertaining show than at least half of the guys on-air now. All the PD's have my tape & resume'. Now, how do I get them to take notice? Any and all suggestions will be appreciated.

A couple of corrections:

The Continental is actually newer than the Harris (if they still have
the same two). I was around WNBC when they put in those two(early
80s...I can't remember the year) replacing an RCA Ampliphase. Both were
very reliable! Perhaps you were thinking about the RCA? I also worked
at WNBC at the end, and never had problems other that during severe
thunderstorms, and even then we were only off momentarily. If memory
serves me, we used the Cotinental as the "main".

======================================================================

Yes, before the advent of television, there was still a source of
moving pictures. It was called RADIO. But unlike television, the
pictures we all saw in our minds were different for each "viewer". That
was the magic - the magic of imagination. We created our own pictures,
we invented the color, the sights, the scenery... all from the sound
that came over the big box.

We laughed at Fibber McGee and Molly, sat breathless on the edge of our
chairs with "The Shadow" and marveled at the sound effects of "The
Green Hornet".
```

Well, radio may have changed since those golden years, much of it for the worse, but thankfully the programs still live on; the magic is still around. This mailing list was created to help foster the enjoyment of those nostalgic radio shows for both the folks who remember listening to the originals, and those who would like to experience programming much different than today's musical and talk radio formats.

OTR is dedicated to discussions of those wonderful radio days and the preservation of those great shows. In addition we can discuss modern day attempts at radio drama, comedy and mysteries that air in various places.

Please feel encouraged to discuss anything and everything pertaining to the "golden days of radio" in this forum. Critiques, biographies, remembrances, availability of tapes and transcriptions; the forum is open and available to all who cherish the great history of the great medium, radio.

This is to let everyone know that AIRWAVES RADIO JOURNAL, the email reflector of rec.radio.broadcasting, now has a more concise, 'news-and-information' version of itself available for those who wish to keep abreast of developments in domestic radio broadcasting, from a broadcast professional's perspective.

AIRWAVES-SELECT is the name of this digest and it is a more tightly edited publication, containing only the 'informational' posts from AIRWAVES/rec.radio.broadcasting, with none of the conversational threads.

It is designed for busy professionals who don't have time to skim through all the information in r.r.b, just to get to the news posts.

As with AIRWAVES RADIO JOURNAL, AIRWAVES-SELECT is open to all, but is slanted toward the broadcast professional, para-professional and serious consumer of domestic broadcast radio. While most traffic is from North America, AIRWAVES-SELECT, like ARJ and RRB are international in scope and readers from nations other than the USA/Canada are encouraged to participate.

To subscribe to AIRWAVES-SELECT, send email exactly as follows...

TO: select-request@airwaves.com
Subject: SUBSCRIBE

(The body of subscribe notes is ignored)
---

You will receive a welcome file in return mail, please read the whole thing.

I hope you like AIRWAVES-SELECT.

# 1849. Duluth/Superior Radio Market

Newsgroup: rec.radio.broadcasting
Date: 1995-08-20 00:00:00 UTC
From: OTRMILLER@aol.com
Message-ID: <416eq8$huc@vixen.cso.uiuc.edu>
Source record: 29700

I live in Superior, Wisconsin, where many of the radio (and all of the regular television) stations are based in Duluth, Minnesota. Consequently, most of the stations refer to both cities during their station ID's, etc. The following is a detailed list of radio stations in this local market.

* AM RADIO DIAL *

KDAL 610 ... CBS station that has been broadcasting since circa 1940 ... currently airs news (local and MNN), sports (Twins baseball, Vikings football), and a "soft" music playlist with a lot of variety (ranging from the '50's to the '80's) ... carries The Jim Bohanon Show from Westwood One each weekday ... carries CBS news at the top of every hour.

WEBC 560 ... news-talk station that carries syndicated programs such as Paul Harvey, The Tom Leykis Show, Talknet (with Bruce Williams), Rush Limbaugh etc. ... carries ABC news.

WDSM 710 ... "total radio," airing talk (The G. Gordon Liddy Show, etc.), sports, and two premiere local talk shows: The Duke Skoritch Show and Open Mike with Lew Latto.

WWJC 850 ... gospel music station owned by Roger Elm.

KXTP 970 ... airs oldies from the '40's, '50's, and '60's (MOR/Nostalgia satellite "affiliate"?) ... broadcasts When Radio Was with Stan Freberg each weekday from 6:06 to 7:00 P.M.

WKLK 1230 ... rock 'n' roll oldies ... part of one of the major satellite networks, Pure Gold (?).

* FM RADIO DIAL *

WNCB 89.3 ... contemporary Christian radio 24 hours daily ... broadcasts in the Minneapolis area, although the somewhat weak signal can usually only be heard within the Minneapolis area and usually not surrounding areas, such as St. Paul.

WHSA 89.9 ... The NPR News & Classical Music Network ... signal broadcast from Wisconsin Public Radio in Madison to affiliates and auxilary stations around the state ... airs classical music during the week and folk and jazz music on weekends ... Michael Hanson airs Saturday Night Jazz each Saturday evening from 8:00 to 12 Midnight ... Hanson has been working at Wisconsin Pub. Radio (previously just WHA) for over 20 years.

KDNI 90.5 ... soft Religious music.

KUWS 91.3 ... Wisconsin Public Radio auxilary station, located and operated on the Campus of the University of Wisconsin-Superior ... mornings and

afternoons include talk from NPR and Wisconsin PR ... jazz music is hosted starting at 5:00 P.M., and the Dean's List (mostly composed of rapp) is aired before the station's sign-off at 12:00 Midnight ... broadcasts sports remotes from UWS events (hockey, basketball) ... Wisconsin Public Radio District General Manager is John Munson, and the news director is Mike Simonson ... the station will hold its first annual Radio Auction this fall.

WSCD 92.9 ... basically airs classical music, along with Garrison Keillor's A Prairie Home Companion each Saturday evening.

KQDS 94.9 ... classical album, heavy-metal rock.

KDAL 95.7 ... located at the studios of KDAL-AM with KDLH-TV ... "lite" music from the '70's and '80's ... Todd Ryan airs Friday night Super '70's from 7:00 P.M. to 12 Midnight and the Saturday Night Oldies Party with Dave Strandberg at the same time slot.

WKLK 96.5 ... oldies (same as WKLK-AM).

KDNW 97.3 ... soft religious music ... often simulcasts programming on both KDNI and KDNW.

WAVC 105.1 ... country hits.

KTCO 98.9 ... "kat country" hits ... obvious competitor with WAVC.

WSCN 100.5 ... college station ... news format.

KLXK 101.7 ... oldies from the Jones Satellite.

KZIO 102.5 ... contemporary hits.

KUMD 103.3 ... alternative music, public affairs programming.

WNXR 107.3 ... adult contemporary music.

USA Radio 107.7 ... country music.

I think that the market is well provided for a market of a little over 100,000 people in Duluth - Superior and surrounding areas. Lew Latto was owner of several major stations in the area until about 1993, when he sold WDSM, KXTP, and 99 WAKZ (now KTCO) to Ken Beuler, owner of KZIO. Beuler converted the rock format of WAKZ, a major competitor of contemporary rock station KZIO, completely to KTCO. The station now consists of a country format.

Garth Brooks and Reba McEntire helped raise more than 50-thousand dollars for the pediatric AIDS unit at St. Jude Children's Hospital in a radio tribute to retiring WSIX-FM {ctry} midday jock Hoss Burns. Burns announced he was leaving the station after developing AIDS. C.C. McCartney has replaced Burns on-air.

An on-air stunt turned sour for WYHY-FM {chr} morning men Brian Shook and Danny Wright. The two feigned a heated argument about one damaging the other's pickup truck, which ended when Shook shouted, "Shit! Shit! followed by silence. Midday man Matt Miller then completed the morning shift without referring to the incident.

Afternoon talker Dave Macy has moved to mornings at WLAC-AM {n/t}, replacing an all news morning show. WLAC sports host Charlie Mattos moves to afternoons following Rush Limbaugh, but won't be talking about sports necessarily.

WGFX-FM {Arrow} program director David Moore is leaving to program a classic rocker in Baltimore.

WKDF-FM {aor} morning personalities Big Dave and The Dook have been interviewed by KPRC-TV Channel 2 in Houston about their ad in a Houston newspaper soliciting calls from Houston fans about a possible move of the Houston Oilers to Nashville. WKDF has become Nashville's first radio station with a site on the world wide web at http://www.edge.net/kdf.

Randy Carroll, who does the morning show at KAJA {ctry} in San Antonio, TX, will be featured friday 8/25 on the Nashville Network cable tv morning show hosted by Ralph Emery.

News, Notes and Comments
by Scott Simon

Recently, there has been a lot of press concerning the operation of KTOZ-AM, Springfield, Mo. Specifically, it is operating as a commercial station, owned by a "for-profit" corporation.

The news media has failed to report several items that the owners of this station should research.

First, while the investigation by the Department of Labor has been tabled, they run the very high risk of violating federal Social Security laws.

Even though the labor is free, they are still liable for contributions to each person's social security account. The Social Security Administration will determine the person's number of hours worked, multiply that by the minimum hourly wage, then come up with the contribution the employer must make to that person's SSI account.

It is very disturbing that someone is exploiting people in the broadcasting industry. The purpose of a commercial broadcast station is to make a profit for the owner. And this owner, who isn't making a profit, doesn't have the decency to consider a person's worth when operating this station.

Mr. Johnson may have avoided a short-term confrontation with the Department of Labor, but he could also face a confrontation with the Missouri Dept. of Labor, and the Missouri Attorney General, Jay Nixon, who has taken an aggressive approach to violators of state law, pertaining to business and fraud.

Not paying these people violates Missouri fair labor and minimum wage requirements (each state has a law that is similar or separate from the federal law).

It is the wish of this columnist, who has been a station owner, that Mr. Johnson be prosecuted to the full extent of federal and state law. There are hundreds of radio stations in the country that struggle to pay bills each day, week, month, and year.

When an individual such as Mr. Johnson classifies paying a utility bill above the worth of an individual, it is proof that another non-professional broadcaster has lowered the standards that has made this industry an honorable profession.

To the person who wrote me about Mark Klose, formerly of "The River" in St. Louis. He was terminated by the station, in its direction to become a more music-friendly station. He was not dismissed due to lack of effort or malfeasance, rather, radio programming must be marketed to meet demographic needs, and research in St. Louis is revealing that personalities are becoming less important in 1995 than they were in 1990.

THIS JUST IN: Jon Sloane, an original member of the all-sports KFNS staff, was axed on August 16th. He has been replaced by Howard Balzer, formerly of the Sporting News for 12 years, and most recently, a host with a Las Vegas-based sports radio network.

Sloane leaves the station after 17 years on the air in St. Louis, 12 years as the Sports Director of KPLR-TV, two years at KXOK-AM (now religious KJSL), three years at KMOX radio, and the past three years at KFNS.

He will continue with his law practice with Selman, Glazer, and Koman, specializing in contract law, with a budding talent agency base.

The irony of this switch is that those two (and yours truly) broadcast together at KXOK. Hopefully, Mr. Sloane will harbor no ill feelings toward Mr. Balzer, both fine individuals.

Margie Manning has departed her position as Government reporter for KMOX Radio, and has become a Financial writer for the St. Louis Business Journal. An ad has been placed by the station searching for her replacement.

Don Marsh, weekends at KMOX for the past year, will remain at the station until September 3. He just hooked on with KDNL-TV as its main newscast anchor.

I will publish the St. Louis spring Arbitron 12+ shares in my next column.

Source record: 29706

Almost brand new Comrex 2XP has third line for private, 2-way communication with studio while on air, mix-minus, etc. Medical emergency forces me to sacrifice this unit. I paid about $2600.00 for this (documentable), brand new, and used it only about 120 hours on air, once per week, for three hours each. It's in PERFECT condition, and as I write this, is still under factory warranty.

I will gladly take a $1,000.00 loss and sacrifice it for $1500.00 + shipping, as I desperately need the money to fund my wife's medical needs. All the above is verifiable. This is not a commercial ad, as I do not sell this equipment. In fact, I purchased it at retail from a major supplier, and have sales receipt as proof.

$1500.00 or best higher offer, please. Leave E-Mail, or phone me any day noon to 10 PM Eastern Time at (407) 686-2133 (Florida).

Thanks from yours truly, and my wife!

ARLB082 FCC proposes closings

ZCZC AG49
QST de W1AW
ARRL Bulletin 82 ARLB082
>From ARRL Headquarters
Newington CT August 18, 1995
To all radio amateurs

SB QST ARL ARLB082
ARLB082 FCC proposes closings

Federal Communications Commission Chairman Reed Hundt has proposed actions to save money, including personnel reductions and facility closings.

Hundt said that although the FCC currently has fewer than its authorized personnel ceiling of 2,271, steps would be taken to reduce the number of FCC employees to about 2,050. In addition to retirements and buyouts, the closing of some regional and field offices would result in about 120 jobs lost, of which some 50 would be involuntary. Hundt said these 50 ''reductions in force,'' or RIFs, would be the first in FCC history.

Regional offices would be closed in Atlanta, Boston, and Seattle, leaving their functions to regional offices in Chicago, Kansas City, and San Francisco.

The following field offices would be closed (leaving 16 still open): Buffalo, Miami, St Paul, Norfolk (Virginia), Portland (Oregon), Houston, San Juan, Anchorage and Honolulu.

All nine monitoring stations would be closed, as well as monitoring operations within four FCC field offices. ''Fortunately,'' Hundt said, ''technological advances will permit us to replace these monitoring stations with a national automated monitoring network by the summer of 1996.''

These nine monitoring stations are at Vero Beach, Florida; Belfast, Maine; Allegan, Michigan; Douglas, Arizona; Livermore, California; Ferndale, Washington; Grand Island, Nebraska; Kingsville, Texas; and Powder Springs, Georgia.

Hundt said ''No monitoring function will be impaired.'' One facility, in Laurel/Columbia, Maryland, would be the central site for ''electronic monitoring.''

If approved by the full Commission, the monitoring stations and field offices would close by July 1996. No timetable was given for closing of the four regional offices.

A national direct broadcast satellite service would be a godsend to
stations such as KJAZ, since local support generally cannot be relied on
(There are less than 30 jazz stations in the US at this time). Such a service
would also be good for other specialty formats as well . ..

In article <4137qi$k9i@vixen.cso.uiuc.edu> lymp@biostat.washington.edu writes:
>I'm just a listener and in fact I only travel to the Bay Area about once
>a year. But I can say that while staying in Santa Clara (next to San
>Jose) I noticed that KFOG had a terrible signal and there was no other
>station playing even close to the same type of music.

If you were staying in a hotel and listening to one of those alarm clock radios, you probably would have a difficult time getting KFOG. However, it's much better if you have a directional antenna.

>If I lived in Santa Clara I would warmly welcome the better signal
>and would not really miss the absence of KHQT. Of course, a San Jose
>based station would probably be even better.

You might want to check out ba.broadcast if you get it. There has been a lot of discussion about the KFOG deal. (Thanks to Doc Searls for a great outline of all the issues.) A San Jose AAA station would've been more acceptable (to some people).

>By the way, didn't KHQT play basically the same stuff as Wild 107 (or
>was it 108?).

Yes, and because Wild 107 (107.7 KYLD San Mateo/San Francisco) is also simulcast on 99.1 KYLZ Santa Cruz/San Jose, there is a signal of at least acceptable quality in the San Jose area offering the same type of music. Also, 106.1 KMEL San Francisco is trying to target the San Jose area through their programming and promotions, plus they picked up some of KHQT's old jocks. (KMEL is more of a straight-up Urban Contemporary station than KHQT was or KYLD is.)

KHQT was a true niche for the San Jose listener, especially in the late 80's when it first came on the air. They broke several local acts and a few non-local acts that would go on to have international recognition. (For example, they were playing Paula Abdul in the summer of '88.) They also gave exposure to a lot of local DJ talent. Finally, they had a significant community outreach program. They took kids off the streets and gave them productive work to do.

## 1862. KGO still #1, but slipping

Newsgroup: rec.radio.broadcasting
Date: 1995-08-20 00:00:00 UTC
From: blake@kksf.tbo.com
Message-ID: <416eqj$hv0@vixen.cso.uiuc.edu>
Source record: 29713

The May-June-July Arbitrend for San Francisco shows that news/talk KGO is slipping even further in the prime 25-54 demo. Their share is down far enough that #1 25-54 is now a 3-way tie between KGO, KFOG (AAA), and KOIT (AC).

In the Spring book, KGO held on to #1 25-54 by only a *tenth* of a point ahead of #2 KKSF (NAC). In this first trend of the Summer book, KKSF is tied for fourth with KNBR (Rush/Sports).

KGO's long-time grip on #1 may be about to loosen.

Trying to find an old friend who I lost track of a number of years ago when he was in the Bay Area. His name is Bill Stone. I worked with him years ago at KAFY. He went up to Fresno, then to(what was then) KNX-FM. He' also worked in Monterey,San Jose, and San Francisco.

Any information would be greatly appreciated!

## 1867. Selling brokered time

Newsgroup: rec.radio.broadcasting
Date: 1995-08-20 00:00:00 UTC
From: SSimon9@ix.netcom.com
Message-ID: <416eqn$hv9@vixen.cso.uiuc.edu>
Source record: 29718

In reply to an inquiry recently from an individual wanting advice on how to sell brokered time:

My recommendation is NOT contact vendor agencies directly. You have not created a stable marketing plan for them to contractually commit at the beginning.

Rather, you should sell directly to your local and regional distributors.

Beer, soda, food items, and more are at your disposal. They generally have advertising programs for your pursuit.

Get distributors to bid for exclusive placement on your program. Examples include having Anheuser-Busch bid against your Miller, Coors, and other beer distributors.

Try an auction on your show featuring products that are related to your program. Barter the advertising time with a retailer, who will give you an equitable return in merchandise. An example would be if you were doing a sports program, barter a Chicago Bulls jacket for $100 of advertising.

Offer the item for sale on your show.

"Tonight, we've got a bargain for you. How would you like to have a Chicago Bulls jacket for as low as half price?" I'll start the bidding now at $50, all you have to do is call XXX-XXXX, and the highest bid at (time) will walk away with this gem!"

Do a couple of these in each show, and it will pay for the time. Sell advertising on top, and you will have a profit.

I know radio stations that make as much as $100,000 a year having a bartered merchandise auction on their air each week.

Scott Simon

MEMORANDUM OPINION AND ORDER

Adopted: August 1, 1995 Released: August 2, 1995

By the Commission:

I. INTRODUCTION

1. In this Memorandum Opinion and Order we address an Application for Review filed by Mr. Stephen Paul Dunifer pursuant to Section 1.115 of the Commission's Rules, 47 C.F.R. 1.115. Mr. Dunifer seeks review of a Notice of Forfeiture in the amount of $20,000 assessed against him under delegated authority by the Compliance and Information Bureau (CIB) of the Federal Communications Commission (FCC), pursuant to Section 503 of the Communications Act of 1934, as amended (the Act), 47 U.S.C. 503(b) and Sections 0.311 and 0.314 of the Commission's rules, 47 C.F.R. 0.311, 0.314. This forfeiture was imposed on Mr. Dunifer for broadcasting without a license in violation of Section 301 of the Act, 47 U.S.C. 301. Stephen P. Dunifer, NAL/Acct. No. 315SF0050 (FOB Nov. 8, 1993) (Forfeiture Order). We grant the application for review in part, deny it in part, and assess a forfeiture of $10,000.

II. BACKGROUND

2. On April 25, 1993, from 9:00 p.m. to 10:10 p.m., Pacific Daylight Time (PDT), an agent from the CIB's San Francisco field office monitored transmissions on frequency 88.1 megahertz that emanated from a radio station identifying itself as "Free Radio Berkeley." The signals were isolated by the agent to the vicinity of 6th Street and Allston Way in Berkeley, California. On May 2, 1993, agents from the San Francisco office again monitored transmissions on frequency 88.1 megahertz by "Free Radio Berkeley" station from 9:00 p.m. to 10:00 p.m. (PDT). Using close-in direction finding techniques, the agents located the source of the transmission as a dipole antenna at an apartment at 809B Allston Way, Berkeley, California. See Forfeiture Order, at 1, 4.

3. The agents remained outside the apartment and measured the strength of the transmission signals. The measured field strength, 630 uV/m at 700 meters, exceeded the maximum authorized field strength for non-licensed transmitters, which is 250 uV/m at 3 meters. See 47 C.F.R. 15.239(b), Forfeiture Order, at 2. In addition, transmission of the signals measured in the instant case comported with the technical characteristics of signals on the FM frequency band. Any operator transmitting on this band must be licensed. See 47 U.S.C. 301, 309.

4. Under Section 303(n) of the Communications Act, 47 U.S.C. 303(n), radio installations associated with a radio station must be made available for inspection by a Commission representative upon reasonable request. At 9:55 p.m. (PDT) on May 2, 1993, one of the agents approached the residence from which the transmissions were originating and attempted to inspect the radio station that was in operation. A man who Commission investigators stopped as he left his residence, and who the investigators later identified as Stephen Paul Dunifer, refused to allow inspection and claimed ignorance of any radio station.

5. A subsequent search of Commission records indicated that Mr. Dunifer has no license to operate an FM radio station. Forfeiture Order, at 2. On June 1, 1993, the CIB San Francisco field office issued a Notice of Apparent Liability (NAL) to Mr. Dunifer. After evaluating Mr. Dunifer's response, the CIB San Francisco field office issued him a Notice of Forfeiture (NOF). Mr. Dunifer then filed the instant Application for Review.

III. DISCUSSION

6. In his Application for Review, Mr. Dunifer contends that the Commission's broadcast rules violate his constitutional right of free speech under the First Amendment, U.S. Const. amend. I, violate the Due Process and Equal Protection Clauses of the Constitution, U.S. Const. amend. XIV, 1, and violate international treaties such as the United Nations Declaration of Human Rights. With respect to the instant case, he contends that the Commission's forfeiture action violates the Commerce Clause of the United States Constitution, U.S. Const. art. I, 8, cl. 3, and that the Commission's action assessing the forfeiture failed to meet established procedural requirements, and violated his Fifth and Sixth Amendment rights, U.S. Const. amends. V, VI; in addition, Mr. Dunifer contends that the $20,000 forfeiture is excessive. At the outset, we turn our attention to Mr. Dunifer's argument that the Commission's broadcast rules violate the United States Constitution and international treaties.

7. Mr. Dunifer challenges the licensing system established in Section 301 of the Communications Act. He argues that the Commission's rules, which do not provide for the licensing of stand-alone audio broadcast stations under 100 watts, operate as an unduly restrictive, total ban against low-power broadcasting, and thus contravene the First Amendment right of free speech. In support of his argument, Mr. Dunifer defines low power broadcasting as a transmitter operating with a power of 10 watts or less. Application for Review, at 4. Mr. Dunifer then argues that the Commission has failed to establish that the regulations at issue are the least restrictive means to further a substantial state interest. Application for Review, at 7. To illustrate his argument, Mr. Dunifer points to Canada's regulatory scheme which, he claims, establishes procedures for low power broadcasting.

8. For the reasons that follow, we reject Mr. Dunifer's argument that the Commission's rules abridge an asserted First Amendment right of free speech. Mr. Dunifer's constitutional arguments directly challenge the 60-plus-year statutory approach to the licensing of broadcast transmissions. By statute, Congress designed a licensing system which requires anyone who wishes to broadcast to submit a "written application" to the Commission with the information required by Section 308 of the Communications Act, 47 U.S.C. 308, and the Commission's implementing regulations, and which prohibits operation of a radio station without a license granted by the Commission. 47 U.S.C. 301. One of the principal reasons for requiring an FCC license to broadcast is to prevent interference with broadcast signals so that such signals can be received by the public. In the absence of a system requiring a license before

broadcasting can commence, it is not clear how interference conflicts would be resolved. At the very least, however, these conflicts would have to be resolved in almost all, if not all, cases after the interference has occurred. This approach would be costly, disruptive, inefficient, and directly contrary to the express will of Congress. Moreover, the United States Supreme Court has held repeatedly that there is no constitutional right to use radio facilities without a license and that the FCC has authority to regulate the radio spectrum. See Red Lion Broadcasting Co. v. FCC, 395 U.S. 367, 388 (1969) ("Where there are substantially more individuals who want to broadcast than there are frequencies to allocate, it is idle to posit an unabridgeable First Amendment right to broadcast comparable to the right of every individual to speak, write or publish"); National Broadcasting Co. v. United States, 319 U.S. 190, 227 (1943) ("The right of free speech does not include . . . the right to use the facilities of radio without a license"). See also Turner Broadcasting System, Inc. v. FCC, 114 S. Ct. 2445, 2456-57 (1994) ("The scarcity of broadcast frequencies . . . required the establishment of some regulatory mechanism to divide the electromagnetic spectrum and assign specific frequencies to particular broadcasters").

9. Given that the requirement for a license is thus clearly constitutional, if Mr. Dunifer believes it would be unconstitutional for the FCC to deny him a license, he should have, consistent with the Communications Act, asked for a license, along with a request for a waiver of the relevant rules limiting low power FM service. If such a request were denied, he could appeal to the U.S. Court of Appeals for the D.C. Circuit pursuant to 47 U.S.C. 402(b)(1). See WAIT Radio v. FCC, 418 F.2d 1153 (D.C. Cir. 1969) (FCC must consider waiver request of applicant who makes a nonfrivolous First Amendment claim); Turro v. FCC, 859 F.2d 1498 (D.C. Cir. 1988) (Court reviews and rejects a First Amendment challenge to an FCC decision refusing to waive its rules prohibiting low power FM translator stations from originating local programming). Alternatively, if Mr. Dunifer believes the FCC's existing low power FM rules are unconstitutional, he could have filed a petition for rulemaking pursuant to 47 C.F.R. 1.401. If this request were denied, he could have filed a petition for review in a court of appeals pursuant to 47 U.S.C. 402(a). See Quincy Cable TV, Inc. v. FCC, 768 F.2d 1434 (D.C. Cir. 1985), cert. denied, 476 U.S. 1169 (1986) (FCC denied a petition for rulemaking to repeal certain rules and court of appeals, in reviewing FCC's order, held rules unconstitutional).

10. In any event, Mr. Dunifer's argument that the Commission's rules limiting licenses for low power FM services violate the First Amendment is unavailing. Indeed, the D.C. Circuit has already upheld these rules under the First Amendment. See Turro v. FCC, 859 F.2d at 1500 n. 2. The Commission's technical rules and regulations which, inter alia, impose requirements on the power levels of stand-alone radio stations, are not content-based. As such, they need only be a reasonable means of promoting the statute's public interest standard in order to survive a First Amendment challenge. FCC v. National Citizens Committee for Broadcasting, 436 U.S. 775, 802 (1978). Even if this case did involve content-based

rules, it is well established that strict scrutiny would not apply. At most, intermediate scrutiny would apply. See FCC v. League of Women Voters of California, 468 U.S. 364, 380-381 (1984); Red Lion Broadcasting Co. v. FCC, 395 U.S. at 387-388. For the reasons stated below, the Commission's Rules are reasonable and would be sustained under the intermediate scrutiny test.

11. At issue in this case is the Commission's statutory objective of ensuring a "fair, efficient, and equitable distribution of radio service" in the United States. See 47 U.S.C. 307(b), and related sections of the Act. The Commission's rules pertaining to low power broadcast services are reasonably related to this permissible statutory objective and are designed to allow the most efficient use of the spectrum. Contrary to Mr. Dunifer's argument, the Commission's rules do not prohibit all low power services. For example, the Commission's rules provide for FM translator stations and booster stations which transmit at powers well below the 100 watt minimum established for primary broadcast stations. 47 C.F.R. Part 74, Subpart L. These rules establish technical operating requirements and licensing procedures for these low power facilities.

12. Moreover, the Commission's rulemaking proceedings reflect the Commission's efforts to examine the issue of low power broadcasting in light of the public interest. In particular, in the proceeding that increased the minimum operating power of non-commercial educational broadcast stations to 100 watts, the Commission discussed and weighed several competing public interest claims. In this notice and comment rule making proceeding, the Commission considered the public's interest in greater access to broadcast service and the more efficient use of the spectrum, and also considered the particular interest of rural or distant communities in obtaining access to noncommercial, educational programming. The Commission balanced these considerations against the potential increased interference to other services, and specifically to TV Channel 6. The Commission's public interest determination to provide for increased power for these facilities was based on its goal of providing, on a nation-wide basis, a stable, efficient, and diverse radio communications service. The Commission arrived at its decision only after considering issues pertaining to a proposed assignment table for noncommercial stations, varying hours of service, the nature of educational FM stations, co-location of FM stations, revised TV receiver standards, use of TV receiver interference filters, use of vertical antenna polarization, and alternate programs for interference prediction.

13. More recently, the Commission considered at length the issue of local program origination authority for FM translators, which, if approved, would have effectively established a low power FM broadcast service. Amendment of Part 74 of the Commission's Rules Concerning FM Translator Stations, (Report and Order) 5 FCC Rcd 7212 (1990), recon. denied, 8 FCC Rcd 5093 (1993). After considering the arguments raised by the proponents of program origination, we concluded that "we should not authorize program origination for FM translators." The Commission explained:

In view of our commitment to provide FM radio . . .
service in a manner that promotes program diversity
while enhancing the incentives for efficient broadcast
station development, we believe it is desirable to
hold constant the existing relationship between FM
broadcast stations and translator service.

Report and Order, 5 FCC Rcd at 7219 48. On reconsideration, the Commission again explained why it prohibits program origination by FM translators. We reiterated that "the proper role of FM translators is to provide secondary service to areas where direct reception of signals from FM broadcast stations is unsatisfactory due to distance or intervening terrain obstructions." 8 FCC Rcd at 5097 27. The Commission stressed that it "remain[s] committed to providing FM radio broadcast service in a manner that promotes program diversity while enhancing the incentives for efficient full-service broadcast station development." Id. And, we said that, "it is necessary to distinguish between the services provided by low cost translators and FM radio broadcast stations due to our preference to provide service through more efficient radio broadcast stations." Id. at 28. Thus, it is clear that the Commission has examined the issue of providing a low power FM service and has afforded an opportunity for public comment in this matter. Our decision not to establish this service was based on the record developed in that proceeding and Mr. Dunifer has not presented any evidence to challenge the reasonableness of our determination.

14. In this regard, a low power station could not co-exist with a nearby high power station; the interference received would be too destructive. However, at the edge of the high power station's protected service contour, where its signal is weakened by distance, a low power station could operate because the interference received by the low power station would be tolerable for a secondary operation. But this is unacceptable from a public interest standpoint because the low power station would cause objectionable interference to the reception by the audience of the primary station's signal. Such interference to the primary station could be difficult to identify and correct, and would serve to lower the quality of the FM broadcasting service. Moreover, all broadcast stations must maintain their signals on their assigned center frequency within their assigned frequency bands. Unauthorized low power transmitters which are typically used by unlicensed radio operators do not meet minimum operating standards for stability and signal purity. Inevitably some of them will generate spurious emissions that will cause interference but will be difficult to locate.

15. The Commission, through rule making proceedings, has developed a licensing system that serves a wide range of conditions and a licensing system that is adaptable to changing circumstances, but avoids the extremes in permissible power. The Commission, therefore, does not allow low power FM radio broadcasting because it is an inefficient use of the spectrum nor do we permit the highest power that the technology could achieve because that would reduce the number of stations and, consequently, the diversity of voices. Absent appropriate technical rules

and licensing requirements, broadcast speech would be unintelligible to listeners, and the Commission's goal of promoting diversity of voices would be undermined. In particular, we do not authorize low power FM radio broadcast stations because they cannot adequately serve communities and mobile audiences, and because they would preclude the establishment of more efficient, stable, full powered stations. Conversely, we have put maximum limits on the size of stations so as to promote a diversity of voices. Mr. Dunifer has presented no petition or argument to persuade us that our rules should be changed, let alone that they are unconstitutional.

16. FM broadcasting is a service based on protected service contours. A proposed new station or one which seeks to modify its current facilities must ensure both that it will not cause interference to the service of other stations, and that it will not receive interference within its defined service area. In FM broadcasting, the biggest constraint on the numbers and types of stations that can be authorized is interference from stations operating on the same channel. Interference to and from stations operating on first, second, and third adjacent channels is also a constraint but has greater impact on the location of a station than on the total number that can operate in a region.

17. Thus, if within a given region, we seek to authorize as many co-channel stations as possible, only a portion of a region will receive service of a satisfactory quality, and the remainder of the region will be covered by multiple interfering signals. The ratio of service area to interference area is not a constant. Because of the way radio signals propagate, and the way service and interference are determined, the proportion of the region receiving service would be greater if higher powered stations were established. Permitting low power facilities, as Mr. Dunifer recommends, would lead to a larger number of stations but less overall service. Simply put, full power broadcast facilities are more spectrally efficient.

18. In addition to general concerns about spectrum efficiency, there is the matter of preclusion. Under this principle, the presence of one station at a particular site prohibits the establishment of other stations on the same or adjacent channels in that general area in order to avoid destructive interference. A simple example shows how preclusion and service are related. A 10 watt station with a 100 meter antenna has a service radius of 5.9 kilometers and a service area of 109 square kilometers. To protect this hypothetical low power station from interference by a co-channel Class A FM station operating at 6 kilowatts, we would need to preclude the establishment of that Class A station within a distance of 92.6 kilometers from the transmitter for the low power station. In contrast, one Class A station would preclude another co-channel Class A station within a distance of 115 kilometers. A Class A station, however, operating at 6 kilowatts with a 100 meter antenna has a service radius of 28.3 kilometers and a service area of 2,516 square kilometers. Therefore, while the preclusive effect of a Class A station is 24 percent greater than the 10 watt station (115 kilometers divided by

92.6 kilometers), the service radius of a Class A station is almost 500% greater than the smaller station (28.3 kilometers divided by 5.9 kilometers). Although the preclusive effect of a station increases with power, as we would expect, the service radius (and area) increases at a much faster rate. If we treat preclusion as a cost and service as a benefit, the cost/benefit ratio improves with power; but the ratio is very poor for low powered stations.

19. As noted before, Mr. Dunifer contends that Canada's scheme for the provision of low power services demonstrates that it is possible to design rules that are less restrictive than the Commission's current rules. In his pleadings, Mr. Dunifer contends that low power broadcasting should be permitted absent transmissions that cause interference to licensed or navigational broadcasts. See Application for Review, at iv. At the outset, we note that the Canadian scheme provides no support for a claim that low power broadcast services should generally be permissible without first obtaining a license. Like the United States, Canada does license most broadcast facilities, including its low power broadcast services. Our examination of the Canadian regulatory scheme reveals that most low power FM stations are licensed and closely regulated by the Department of Communications and Canadian Radio- Television and Telecommunications Commission (CRTC). See Public Notice CRTC 1993- 95. Violations of the licensing rules can result in sanctions and penalties, including contempt charges. Id. Moreover, the Canadian low power services (which include rebroadcasting; community radio in rural or remote areas; travel services; and temporary broadcast facilities for work camps, student services, and special events) are similar to those provided for in the United States under Parts 15, 73 and 74 of the Commission's rules and under other sections of the Commission's rules and of the Communications Act (e.g., FM translators, low power traveler's advisory stations, Class A FM broadcast stations, and FM noncommercial educational stations).

20. To the extent that the Canadian licensing rules allow some low power services that are not permitted under our rules, there are vast and critical differences between the two countries that justify our decision to have a more restrictive policy. Specifically, the United States has over 6900 conventional FM stations whereas Canada has only 334 conventional FM broadcast stations. The most heavily used frequency in Canada -- 92.1 megahertz -- supports eight stations; the United States has 139 stations on the same frequency. Broadcasting Yearbook, Vol. I, pp. B-556, B-577 (1995 ed.). Thus, while Canada can allow low power stations even in urban areas, spectrum efficiency considerations create different obstacles for low power services in the United States.

21. In arguing that the Commission's rules are constitutionally invalid, Mr. Dunifer further asserts that the Commission has exceeded any authority to regulate interstate communications under the Commerce Clause of the Constitution. He argues that, although Section 301(d) of the Act authorizes the Commission to regulate radio communications within one state as well as between states, the statute must be interpreted and applied in a manner consistent with constitutional limitations. In

particular Mr. Dunifer claims that, because there has been no showing that his transmissions caused or may cause harmful interference, the Commission cannot prohibit his unlicensed transmissions.

22. This is a fundamentally erroneous view of the regulatory system for broadcasting as established in the Communications Act and interpreted by the Supreme Court. Section 301 of the Act specifically prohibits the transmission of radio communications without a license from one place in a state either to "another place in the same State," (emphasis added), or to "any other State," Section 301(b). These provisions make no reference to any requirement for a showing with regard to harmful interference before they can be enforced. Section 301(d) similarly makes clear the applicability of the radio licensing requirement without the necessity for a showing of interference as a result of the radio transmission at issue. The requirement for a license in order to broadcast has been upheld by the Supreme Court as a proper exercise of the constitutional power of Congress over commerce. National Broadcasting Co. v. United States, 319 U.S. at 209-217 ("Regulation of radio was as vital to its development as traffic control was to the development of the automobile. * * * The facilities of radio are not large enough to accommodate all who wish to use them"); FCC v. League of Women Voters of California, 468 U.S. at 377 ("The fundamental distinguishing characteristic of the new medium of broadcasting . . . is that [b]roadcast frequencies are a scarce resource [that] must be portioned out among applicants"). There is no support whatever in these or any other Supreme Court decisions for Mr. Dunifer's view that the licensing requirement in Section 301 of the Communications Act cannot be enforced unless there is a specific showing that the unlicensed radio transmissions caused or may cause harmful interference. The present licensing scheme is intended to facilitate broadcasting by protecting the service areas of those licensed by the Commission to broadcast. Otherwise the potential for chaos on the airwaves would severely undermine the ability of others to use the radio spectrum. See National Broadcasting Co. v. United States, 319 U.S. at 209-217.

23. We also note Mr. Dunifer's argument that the Commission's prohibition against low power broadcasting denies minorities and the poor the opportunity to be licensed because they are financially unable to operate a full-power 100 watt station. Therefore, Mr. Dunifer contends that the Commission's rules in this area violate the Equal Protection clause of the Constitution. As the Supreme Court has recognized, however, the standard provided in the Communications Act for the licensing of radio stations is "the public interest, convenience, or necessity." National Broadcasting Co. v. United States, 319 U.S. at 227. There is no constitutional right to be granted a license when it would not be in the public interest for the license to be granted. Id. The Communications Act does not define the term "public interest, convenience and necessity" but instead leaves it to the Commission "as the expert body which Congress has charged to carry out its legislative policy," FCC v. Pottsville Broadcasting Co, 309 U.S. 134, 138 (1940), to exercise its discretion in determining where the public interest lies. As previously discussed, the Commission in exercising its discretion has concluded that the public

interest would not be served by licensing a low power FM broadcast service.

24. Mr. Dunifer also claims that the Commission's rules with respect to low power broadcasts violate certain international treaties. In particular, Mr. Dunifer argues that the Commission's rules violate the rights of low power radio broadcasters and their listeners under the U.N. Declaration of Human Rights, the International Covenant on Civil and Political Rights, and the American Convention on Human Rights. None of the treaties or agreements listed by Mr. Dunifer, however, gives him a right to operate without a license or authorization from the Commission. Nor do any of these treaties or agreements compel the Commission to revise its rules to permit the licensing of low power FM stations that would broadcast their own originated programming.

25. We now turn to Mr. Dunifer's arguments that the forfeiture action in the instant case is procedurally flawed. Mr. Dunifer contends that the Commission failed to adhere to its own procedures when it did not first send him a citation or a warning giving notice of the violations and an opportunity for a personal interview as required by Section 503(b)(5) of the Act, 47 U.S.C. 503(b)(5), and Section 1.80(d) of the Commission's rules, 47 C.F.R. 1.80(d). In particular, Mr. Dunifer argues that because the FCC does not issue any licenses to operate low power radio broadcast facilities, he was not "engaging in activities for which a license, permit, certificate, or other authorization is required" and thus, as a non-licensee, he was entitled to a warning.

26. Mr. Dunifer is mistaken. Although Section 503(b) of the Act does require issuance of citations prior to forfeitures in certain circumstances, it specifically excludes individuals that are "engaging in activities for which a license, permit, certificate or other form of authorization is required." 47 U.S.C. 503(b). By transmitting on a frequency reserved for licensed broadcast services, Mr. Dunifer engaged in broadcasting, an activity for which a license is required. 47 U.S.C. 301. Therefore, he was not entitled to receive a warning prior to the issuance of the forfeiture.

27. Mr. Dunifer's constitutional claims include an argument that the FCC's exercise of its forfeiture authority violates his due process rights because he was not given an opportunity for a hearing. Further, Mr. Dunifer argues that his Fifth and Sixth Amendment rights are adversely affected because the violation subjects him to a civil penalty and possible criminal sanctions and he cannot afford to retain counsel. Specifically, Mr. Dunifer states: "[i]n the extremely specialized area of telecommunications law, even if competent counsel could be found, their fees place their services well beyond the reach of the average person." Response to Notice of Apparent Liability, at 11.

28. We disagree with Mr. Dunifer that his due process or Fifth or Sixth Amendment rights were violated. Contrary to Mr. Dunifer's arguments, Sections 503 and 504 of the Communications Act, 47 U.S.C. 503, 504, provide safeguards which satisfy due process requirements.

Specifically, the Notice of Apparent Liability (NAL) must specify the rules that are alleged to be violated, the facts upon which the charge against the named violator is based, and the date upon which the alleged violation occurred. Additionally, the party is given an opportunity to respond to the NAL and to have a trial de novo. 47 U.S.C. 503(b)(5), 504(a),(b). See Pleasant Broadcasting Co. v. FCC, 564 F.2d 496 (D.C. Cir. 1977).
As to Mr. Dunifer's argument that his right to effective assistance of counsel has been abridged, we note that the forfeiture proceeding in the instant case is not a criminal proceeding, and thus, the right to appointed counsel is inapplicable. In any event, the record in this case clearly shows that Mr. Dunifer has been able to secure legal representation before the Commission and in related court proceedings.

29. Finally, Mr. Dunifer argues that the Bureau erred when it used the Commission's Forfeiture Policy Statement to calculate the forfeiture in this case. Mr. Dunifer asserts that the Forfeiture Policy Statement does not address unlicensed operations. Thus, he argues, the Bureau instead should have relied on a 1990 Public Notice regarding unlicensed operations that sets the forfeiture amount for these types of violations at no more than $1,000. Assuming arguendo, that the Commission's Forfeiture Policy Statement applies in the instant case, Mr. Dunifer contends that he is neither a broadcast licensee nor a permittee or applicant, and that the only category he fits is "other." He further contends that the $20,000 fine for two one-hour low power broadcasts by someone with no prior FCC rule violations is too severe, because such a high forfeiture is intended for commercial broadcasters.

30. The Commission's Forfeiture Policy Statement, used to assess the forfeiture amount, was vacated by the U.S. Court of Appeals for the D.C. Circuit in USTA v. FCC, 28 F.3d 1232 (D.C. Cir. 1994). Therefore, it is not necessary to address the merits of Mr. Dunifer's argument regarding the use of the Forfeiture Policy Statement. Moreover, we are not persuaded that the forfeiture at issue in this case should be assessed under the 1990 Public Notice. The Public Notice issued by the Commission's staff clearly stated that it applied to "routine" cases of unauthorized broadcast operations. Unlicensed Radio Operations, 67 RR 2d 619. As discussed below, see para. 32, infra, this is not a routine case. Accordingly, we will assess the forfeiture amount against Mr. Dunifer under the statutory forfeiture guidelines set forth in Section 503(b)(2) of the Act, 47 U.S.C. 503(b)(2).

31. Section 503 (b)(2)(C) imposes a forfeiture maximum of $10,000 a day per violation for violations by parties other than common carriers and broadcast station licensees, permittees, applicants, and others seeking similar Commission authorization, as well as cable operators. 47 U.S.C. 503 (b)(2)(C). In determining a forfeiture penalty, the Commission must consider "the nature, circumstances, extent, and gravity of the violation and, with respect to the violator, the degree of culpability, any history of prior offenses, ability to pay, and such other matters as justice may require." 47 U.S.C. 503 (b)(2)(D).

32. The violation at issue in this case is serious and intentional. As stated in the Forfeiture Order, Mr. Dunifer is "a recalcitrant individual who decide[d] to willfully operate a radio transmitter without the required [FCC] authorization, as a protest against the regulatory power of the Commission, refuse[d] the opportunity to allow Commission investigators to inspect the equipment found in use, refuse[d] to discuss the matter with investigators, . . . [and] g[a]ve a false statement to them . . . . [concerning his identity]." Id. at 5. Moreover, Mr. Dunifer has not made any good faith efforts to come into compliance with the Communications Act or the Commission's rules even after being warned that his unlicensed radio transmissions are illegal. Id. After evaluating the facts and circumstances in this case under the statutory forfeiture guidelines, see para. 30, supra, we find that the statutory maximum of $10,000 is an appropriate forfeiture amount. Because the NAL only cited Mr. Dunifer for one violation of Section 301, the forfeiture is assessed at $10,000, rather than the $20,000 in the NAL.

33. Finally, Mr. Dunifer claims that he is unable to pay the forfeiture initially assessed. Because he has submitted no documentation, such as financial records, to support this request for further mitigation, we are unable to evaluate the merits of his request. See 47 U.S.C. 503(b)(2)(D); 47 C.F.R. 1.80(f)(3). See also Group Six Communications, Inc., 8 FCC Rcd 3111 4 (1993); Metro Media Broadcasting, Inc., 8 FCC Rcd 323 4-5 (1992).

34. In summary, upon review of the arguments raised in the Application for Review, and our independent review of the Notice of Apparent Liability and Forfeiture Order, we grant the Application for Review with respect to the request for a reduction of the forfeiture amount, and deny review in all other respects.

IV. ORDERING CLAUSES

35. Accordingly, IT IS ORDERED that, pursuant to Section 1.115 of the Commission's Rules, 47 C.F.R. 1.115, the Application for Review of Stephen Paul Dunifer is GRANTED in part and DENIED in all other respects.

36. IT IS FURTHER ORDERED that, pursuant to Section 503(b) of the Act, 47 U.S.C. 503(b), and Section 1.80 of the Commission's Rules, 47 C.F.R. 1.80, Stephen Paul Dunifer IS LIABLE FOR A MONETARY FORFEITURE in the amount of $10,000 for operating an unauthorized broadcast station in violation of Section 301 of the Communications Act. The amount specified was determined after consideration of the factors set forth in Section 503(b) of the Communications Act.

37. IT IS FURTHER ORDERED that, pursuant to Section 1.80(f)(3) of the Commission's rules, 47 C.F.R. 1.80(f)(3), Stephen Paul Dunifer shall, within thirty (30) days of the release of this ORDER, pay the full amount of the forfeiture. Forfeitures shall be paid by check or money order payable to the Federal Communications Commission. The remittance should be marked "NAL/Acct. No. 315SF0050" and mailed to the following address:

Federal Communications Commission
Post Office Box 73482
Chicago, IL 60673-7482

38. IT IS FURTHER ORDERED that a copy of this Order shall be sent to Stephen Paul Dunifer and his counsel by Certified Mail, Return Receipt Requested.

FEDERAL COMMUNICATIONS COMMISSION

William F. Caton
Acting Secretary

# 1870. Bob Chandler Dies

Bob Chandler, former operations manager at WGAY, Washington, died August 17. The heart ailments which had plagued him for years claimed his life on his 61st birthday.

Bob was one of the premier beautiful music programmers in America and in more than 30 years at WGAY kept the station mostly in the top three and occasionally number one in Washington. Over the years he built one of the largest and most comprehensive beautiful music libraries at the station collecting records from all over the world.

He was also creative director of the International Beautiful Music Association, a group of beautiful music stations and syndicators. In that capacity he supervised the arrangement and recording of orchestral cover versions of popular songs in England and elsewhere for broadcast on American radio stations.

Bob was an accomplished on air performer as the liner voice of WGAY. For many years he served as WGAY's on camera spokesman in its television commercials.

He was the recipient of the A.I.R Lifetime Achievement Award shortly before he retired from WGAY about two years ago.

For more than 20 years he was a colleague and a friend and I know I join many who will miss him.

...the other real Top 40 entertainers when the original WMEX/1510 - Boston was King? I heard that Warren Duffy was at a Christian station in the L.A. area, but when he left WMEX in the early 70s (or late sixties), he became a math teacher in the Baltimore area.

Anybody know? I used to worship those guys as I grew up listening them, as they were creative, fun, and not obscene.

Yes, some of us actually had a great deal of fun listening to radio before it turned X-rated!

Thanks!

by the way, WMEX went talk from ten PM-overnight. There were Steve Fredericks (whatever happened to him?), Jerry Williams (now WRKO), and Larry Glick, a REAL GENTLEMAN with ZERO EGO, now retored in south Florida, looking for a gig, I understand.

# 1873. KTOZ and Deregulation (was St Louis Radio Watch)

Newsgroup: rec.radio.broadcasting
Date: 1995-08-21 00:00:00 UTC
From: rrb@clm.aiss.uiuc.edu
Message-ID: <418uv3$n3n@vixen.cso.uiuc.edu>
Source record: 29723

St Louis RadioWatcher, SSimon9@ix.netcom.com (Scott Simon ) wrote

} Recently, there has been a lot of press concerning the operation of
} KTOZ-AM, Springfield, Mo. Specifically, it is operating as a commercial
} station, owned by a "for-profit" corporation.
}
} Even though the labor is free, they are still liable for contributions
} to each person's social security account. The Social Security
} Administration will determine the person's number of hours worked,
} multiply that by the minimum hourly wage, then come up with the
} contribution the employer must make to that person's SSI account.

But Johnson is *not* an employer, the staff are not employees, they
are volunteers. This is by the definition of the actual law, which Mr
Johnson has in his possession.

And SSI is not Social Security, BTW.

} It is very disturbing that someone is exploiting people in the
} broadcasting industry.

Oh, that is a good one. We all know that no one is being exploited in
the broadcast industry, don't we...

What is more exploitive, Scott, someone who is volunteering (who
*wants* to be there) at a station that is filling a local niche, or
someone who is 'employed' by very profitable station, and is paid
minimum wage for their hard work, simply because that is all the station
*has* to pay.

Radio is among the lowest paying professions in the entertainment
business. There are a lot of people who *work* in radio, make good
money for the owners, and are paid the same as a fast food cashier.
In fact there are many 'fast food' operations that pay better than radio.
Owners pay like that because there are a thousand more out there who
will work for that wage due to shrinking opportunities.

Are you equally upset at that kind of exploitation, Scott?

Do you also feel that 'interns', who are not paid, are being
exploited? If so, then you have a lot of potential targets for that,
including some of the most profitable stations in some of the largest
markets.

} The purpose of a commercial broadcast station is
} to make a profit for the owner. And this owner, who isn't making a
} profit, doesn't have the decency to consider a person's worth when

} operating this station.

While I do not worship the ground Ron Johnson walks on, I do know that he is providing a service to his community, and that everyone who does an air shift there is happy to be there, is always looking for more hours, knew at the outset that there was no monetary pay, and is gaining valuable experience in an industry that is closing its doors, a little more, every day to new talent.

As more stations go satellite and automation because of economic reasons, Mr Johnson (who is also a volunteer) operates a live, responsive, community-based radio station which is providing a needed and appreciated service to its listening area. For that I must applaud him.

} Mr. Johnson may have avoided a short-term confrontation with the
} Department of Labor, but he could also face a confrontation with the
} Missouri Dept. of Labor, and the Missouri Attorney General, Jay Nixon,
} who has taken an aggressive approach to violators of state law,
} pertaining to business and fraud.

Fraud? What fraud, Scott? If everything is on the table, where is the fraud? KTOZ has open books. Everyone knows what comes in to the station and everyone knows that they will be paid if and when the station is out of the red. Fraud involves mis-representation. No misrepresentation has occurred here. People are clamoring to be 'exploited' like this. Mr Johnson has piles of requests for air shifts, production shifts and such. They have come to *him*, he has not gone out to solicit them. And, more importantly, he has not lied to anyone.

Every day the number of small market opportunities for new radio talent shrinks. These people have very few places to go once out of college radio and/or broadcasting school. The reason for this shrinkage is economic factors forcing owners into satellite and/or automation setups.

We are a college town, Scott. We have 5 major colleges. We also have no 'student' radio station. We do have an NPR station with some local origination (late at night) and 1 Baptist Bible College station (100kw) which *sells* airtime to radio ministers, despite its noncomm status. Students at these colleges are more than happy to gain knowledge and experience they would get no place else here.

} It is the wish of this columnist, who has been a station owner, that Mr.
} Johnson be prosecuted to the full extent of federal and state law.

Geez, Scott. I don't suppose your intense dislike for this operation has anything to do with the fact that you and several of your business partners are incorporating in Missouri to buy dark and distressed stations for your own project, would it?

If not, then what is the beef? Does it bother you that someone is able to keep a small, relatively insignificant AM signal on the air with local, live and responsive programming? What are the alternatives? Dark or Satellite. I don't see either of those options as superior to the way it is now.

} There are hundreds of radio stations in the country that struggle to
} pay bills each day, week, month, and year.

Yes. There are also hundreds of small markets who are losing their only local radio services to unattended satellite operations, or total darkness because they cannot afford to pay an air staff minimum or greater, wages. I would be happy as a lark to see some of these wasted operations get back on their feet with volunteer, local, community help. I guess you and I differ widely on that issue.

Labor laws were designed to protect people from being forced into sweat-shops to produce goods for profitable companies at sub-standard wages and conditions (ala the recent California garment sweat-shop that has been in the news). KTOZ is a 'for-profit' company, that is true. However it is very hard to become a non-profit corporation. If he were a non-comm, there would be another chorus of complainers who would say that he should stop operating off of public donations and become a commercial operation.

} When an individual such as Mr. Johnson classifies paying a utility bill
} above the worth of an individual, it is proof that another
} non-professional broadcaster has lowered the standards that has made
} this industry an honorable profession.

Really, Scott? C'mon now don't kid a kidder. What has ruined this fine industry is the greedy, slum lord attitude of putting next to nothing into a station and reaping the profits, combined with the 'give away the pot' attitude of our federal regulators that has thrown away all the regulatory safeguards that kept broadcasters honest and in service to their communities.

It is these changes, not the little fish like Johnson, who have made radio a wasteland of homogenized, minimalist formats, devoid of service, humanity and personality. Radio has been allowed to become what it is because one-by-one theses safeguards, which were intended to assure diversity in the marketplace, have been stripped away with the gleeful approval of the larger broadcasting organizations. Now, there is little left of what has made radio the honorable profession you talk about. In my opinion, Ron Johnson's station is much closer to that honorable state than many of the larger operations in existance today.

Before Fred and others jump in and tell me all about how stations must be profitable to survive, let me say that I know this. I wonder why, though, radio survived for all those years *with* regulation, as a mostly profitable industry, and today *without* the regulations it is filled with fast-buck artists and failing stations that have no

choice, in many cases, but to find barter satellite shows to run at no cost to them, just to break even or turn a small profit.

Remember, folks, it was the same FCC, encouraged by the NAB and others, who brought us the 80-90 docket which was primarily responsible for all these new stations that are competing for listeners. Now, that 'same' FCC and NAB want to repeal all of the regulatory hurdles to near-total media dominance by a relatively few large corporations.

In other words, it was the same FCC who caused the problem they are now claiming they need to cure by total ownership deregulation. It seems a shame and a sham, to this reporter, that we can open those regulatory gates to the huge corporations who make tens of millions already (if they don't how are they affording these over-inflated multi-million dollar acquisitions) and not see the ability to...

a) Allocate 10 - 100 watt community stations (LPFM).
b) Allow operators like Johnson to stay afloat by using volunteer help.
c) Remove content restrictions on broadcasters.

Seems that de-regulation is only good when it benefits those who already have more than they will ever need. This reporter is sick and disgusted with the way the 'honorable profession' of radio has been beaten into a mere shadow of what it was, and more importantly, "WHAT IT COULD BE IN THE FUTURE".

And it is not the small-fish like Johnson who are at the forefront of this mutilation of the grand medium. It is those who are not satisfied owning 4 stations per market, no they need to own it all, and crush those who are either too small to assimilate or who find creative ways to stay independent.

I love radio. Always have. But when I see the awesome potential of radio diminished to the point of becoming *nothing more than* another electronic pitchman, I am deeply saddened. I am saddened because it doesn't have to be that way. Radio can be a dominant force, a profitable force, without stripping it of all its personality, individuality and service. It does take committed owners who realize, that to make money in the long haul one must put some of that money *back* into the operation, not drain it away, at break-neck speed, at the expense of the very product they are selling... their programming. And it takes an FCC that still cares about the industry, rather than merely pandering to those who would rape and pillage the longer term health of the industry for a few extra 'short-term' dollars.

Once the buying frenzy starts (it already has) there is no turning back. Under current regulations, the already inflated prices of broadcast properties will skyrocket even more out-of-reality. A few will cash out at a profit, but then there will be so much invested in these properties that they will never be available again at anything

resembling a realistic price, except at future fire-sales where those who had been taken in by the siren-song, but were unprepared, will fall flat on their faces and the broadcast scavengers will scoop up the remains.

So, please, spare me the nonsense about how Ron Johnson is ruining the honorable profession of radio by providing a well-loved local service to his community, run by those who love to be there and are being paid in ways more valuable, to them, than whatever meager minimum wage they might get. If Johnson is forced to stop doing what he is doing, these people will get neither the minimum wage *or* the experience, because Johnson would have to go dark, or barter satellite.

Who wins then?

Thank God for public radio, or jazz wouldn't exist on the airwaves. Living in NYC, I can listen to WBGO in Newark, a very good jazz station, though sometimes not as adventurous as I might wish. And when I visit my family in Philly, I can listen to Temple University's WRTI, another fine non-commercial jazz station. (Conflict of interest statement: I was the music director of WRTI back in the mid 70s when I attended Temple.) It's nice that just at the point in Central Jersey where 'BGO starts fading out, 'RTI starts coming in loud and clear.

I believe that a commercial station like 'BGO or 'RTI in a market like NYC or Philly could conceivably make money, but since it would never make a *lot* of money, few if any station owners would ever give such a format a chance. The situation, as I see it, is similar to what happened to NYC's former classical station, WNCN. In the reports I saw, WNCN was supposedly making about a million dollars a year as a classical station and had slightly higher ratings than its competitor, WQXR. Yet WNCN's owner, the GAF Corporation, decided that (and probably rightly so) there was much *more* money to be made playing hard rock. So, exit Beethoven and enter AC/DC.

A quick aside: I believe that one major reason why WQXR remains firmly wedded to a classical format is that its owner, The New York Times, feels that such a format is good for its corporate image.

Now, when I tune around the commercial portion of the FM band, most stations seem to be playing, with very few exceptions, variations on the same rock 'n' roll theme: classic rock, oldies, all-70s, alternative rock, soft rock, a mix of rock of the 70s, 80, & 90s, etc., etc. This became especially evident a couple of years ago, when I drove up through New York State, Western Massachusetts, and Vermont. The only place I could ever find any non-rock music was between 88 and 92 mhz.

Don't get me wrong -- I like rock 'n' roll and have the CD collection to prove it. But I also like to hear some Mozart, Bach, Chopin, Joe Henderson, McCoy Tyner, and Abbey Lincoln. Without public radio, jazz would never be heard on the airwaves, and classical music wouldn't be heard outside major metropolitan areas.

The marketplace, I believe, has been a failure for a significant portion of the listening public. Because of the peculiar economics of commercial radio -- due, for the most part, to the scarcity of bandwidth -- a station owner will almost always choose some variation of a rock format over classical music or jazz.

The even more peculiar economics of religious radio make that format more attractive to a station owner than jazz or classical; all you gotta do is put out the message that you sell time to preachers, and they come knocking at the station door with their tapes. Ratings don't matter, and the only personnel you need are some minimum-wage board operators to run the tapes.

This failure of the marketplace is just one more reason why we need public radio. Here in the NYC metro area, we have three of the best: 'BGO, WKCR, and WNYC. Let's hope they're around for a long time to come.

George, the TV stations around here (central Illinois) require SBE certification for their engineers. Very important. There is no FCC First (it died about 15 years ago), and the general is specifically stamped "NOT FOR BROADCAST," so skip on that one. For stations in the know, the SBE is the key. Yet I still see an ad once in a while looking for that First Class License--bizarre that some managers are so slow to keep up with the real world. ---Dan

Source record: 29727

Most AM stations gave up on it. But I used to listen to WIOD/610 in Miami in stereo, and at night, WBT/1110-Charlotte in stereo - both sounded incredible!

I still own a Radio Shack AM stereo receiver (plugs into any amplifier), and a Sony SRF-A100 portable. I wouldn't part with it for anything.

Anyone else still own these golden oldies?

By the way, for years, a local station (WPOM/1600) advertised on benches and billboards that it was stereo. But it maight have been for only a few days. From the looks of their studio (which I once worked on), and the kind of music they played mostly Rap), it would have made no difference anyway.

Even so, an amazing amount of people still think that "stereo" is when you have two speakers - even when they are attached to a mono radio! Just ask my father.

And while we're at it, why can't they make decent speakers for computers? --

In <4137qu$ka8@vixen.cso.uiuc.edu> Nigel Knickerson
<Nigelofnickersville@tryandfindme.com> writes [edited]:

>All the PD's [in Tulsa, OK] have my tape & resume'. Now, how do I get
>them to take notice? Any and all suggestions will be appreciated.

When you say they have your resume, what does that mean? If it
means you sent them a tape and a couple pages about yourself, it isn't
enough. They probably get 10 a day.
First, call the station to get the PD's name. Always ask that it
be spelled for you. Jerry could be Jeri. Smith could be Smyth. Be
sure to also ask for their official title. The PD may prefer to be
called the "Operations Manager". Ask the receptionist for their name.
If the PD has a secretary, try to get their name as well.
Second, it costs about a buck to send a tape and a couple sheets of
your resume in a plain envelope. For three bucks you can send them in
a two-day, two-pound pack at the post office. The Post Office even
supplies the envelope. Type the label to make it look professional.
While a PD may not even open a regular envelope that they think
contains a demo tape, no one fails to open a two-day mail pack
immediately. Mail it on a Friday. It'll arrive on Monday.
Third, phone on Tuesday. When the receptionist answers, say
"Hello, ,<their name>. This is <your first name>." Ask to speak with
Bob, Mary or whatever the PD's first name may be. If the receptionist
thinks you're on a first name basis with the PD, they may put you right
through. Ask if they'ver gotten your tape and what they think. If
they haven't listened to it, ask if you could call back on Thursday or
stop by the station to meet them personally. If you set an appointment
or say you'll call, follow through.
Fourth, be persistent. Keep calling back. Try not to be a pain,
but definitely show them you're not a flash in the pan and that you are
truly interersted in the station. Toward that end, listen to their
station. If the PD does an airshift, listen.
Fifth, call the weekday overnight air talent and chat. They're
usually low person on the station totem pole and are usually more
willing to let you know if there are openings and what the station is
"really" like. To get a job, there has to be an opening for you to
fill.

One person I know sent their tape and resume in a 3-1/2x2-1/2x5
inch cardboard box that was filled with bubble gum. If you've ever
been near bubble gum you know the smell permeates everything. The PD
hands out bubble gum to people who visit the office. Everytime they do
so, they'll think of you. When you call, instead of saying "Did you
get my tape?", you can say "Did you get the bubble gum?" Smoother and

they know who you are immediately.

Lastly, be sure your tape and resume LOOK professional. I've gotten loads of tapes with hand-written labels, and resumes with pencilled-in address or phone number changes. Things like that stand out and will lower your value to the PD before they even read the resume or listen to the tape.

A lot of this may be basic. Hopefully there's a grain or two in there that will help. Good luck in Tulsa.

Best,
John

> the late sixties and seventies).

Robert Trout's career covers almost the entire history of radio news. He was anchor (long before that term had been invented) of the very first CBS News Roundup in March of 1938. He remained with CBS News--doing both radio and television--into the 1970's when he moved to ABC.

For more details, see any good history of broadcast news, such as "Now The News," by Edward Bliss.

>WCRB 102.5FM "Classical Radio Boston" -> http://www.wcrb.com

Well, you can get to the WCRB home page that way, but you'll have to wade through Wilder Internet Gateway's stuff, none of which has anything to do with WCRB, to find it.

The real URL for WCRB is: http://www.wcrb.com/wcrb

The reason for the extra keystrokes is that WCRB does not yet have a computer permanently connected to the net, and the WRB web site is maintained on a computer belonging to a local ISP, Wilder Internet Gateway.

If there's money in next year's budget, we'll put an actual WCRB computer on the net and move the site there... stay tuned!

Interesting comment - WFAN has gone to two man teams in midday, PM Drive and in some weekend dayparts. In some ways, it's better, giving you some give & take between hosts to play off the callers.

Tripp Rogers

# 1889. D.C. Radio Watch / 8-22-95

Newsgroup: rec.radio.broadcasting
Date: 1995-08-25 00:00:00 UTC
From: "Max Cacas - NPR News Ops - Wash. D.C." <MCACAS@npr.org>
Message-ID: <41l0in$l41@vixen.cso.uiuc.edu>
Source record: 29607

As noted by Julian Breen in an earlier "Airwaves", Bob Chandler, the former Operations Manager for WGAY-FM (99.5) in Washington died last Thursday on his 61st birthday, after suffering a heart attack earlier last week.

The Washington Post's "On the Dial" (Radio) column quotes Ed Walker (who was half of the famous "Joy Boys" with Willard Scott on the old NBC-owned WRC-AM, now owned by WGAY's parent company) as saying of Chandler: "He made WGAY. He was a working program director, and his knowledge of the music was incredible."

The Post says Chandler joined WGAY in 1965, after working as an announcer at the now-defunct WFCR-FM in Fairfax, Va. (any D.C. old timers know anything about this station???), WNAV-AM in Annapolis, Md., and WOL-AM in Washington.

In the 70s, Chandler took trips to London to produce customized beautiful music "covers" when orchestras began to cut back on the amount of tunes they were producing.

Chandler also made his mark as the talent in the station's signature television commercials, which almost always had Bob putting his feet up on a desk or footstool, extolling the virtues of "relaxing WGAY, 99.5FM -1050AM".

Chandler remained at the station til last year, having stayed through the transition in 1991 from beautiful music, to soft AC ("Easy 99.5"). He had been doing some freelance announcing for several companies, including the Discovery Channel.

---

Elsewhere:

-- WMAL-AM (630) News Director John Butler leaves the ABC-o&o at the end of the month to program talkers KCMO-AM and KMBZ-AM in Kansas City. Butler says he grabbed at the chance to get into programming because "radio news is not a growth business. And radio news directors are becoming dinosaurs." (Wonder if he plans to say that in his first meeting with his News Director at his new job???")

-- The Post also notes the 20th anniversary of Dave Brown, the VP/programming for WWDC AM/FM (1260am, 101.1fm). Brown came to the station after graduating from the University of Maryland, and was one of the first voices to program rock n' roll on the FM when it moved from beautiful music to AOR, and became DC-101. Dave still pulls a daily airshift, handling 2-6pm on DC-101. The Post also notes that over on the AM (MOR/big band) side, Eddie Gallagher has been with the station handling the live morning show for 12 years. Gallagher, a veteran of the market, and claims such calls as WTOP-AM, WASH-FM in his career, has 3 more years to go on his contract...this at 80 years old! (Personal note: I've had the pleasure of working with both these talented gentlemen, Dave at

the University of Maryland's campus radio station WMUC-AM, and Eddie when he did mornings at Metromedia's WASH-FM in the 70s.)

I have never gotten more than a busy signal. Does anyone have a
number or address, or e-mail address for him? Thanx.
Doug. Houston

## 1892. Labeling CDs in control room?

Newsgroup: rec.radio.broadcasting
Date: 1995-08-25 00:00:00 UTC
From: wilsonrl@csn.net
Message-ID: <41l0j7$l5b@vixen.cso.uiuc.edu>
Source record: 29610

Reply-To: wilsonrl@csn.net (Roger Wilson)

How are most stations labeling their CDs in the control room. With carts labeling was easy - Large Number and then 3 lines for Title, Artist, and intro/runtime/ending. With CDs only being about 1/4" high, this makes things a little more difficult.

We have thought about getting some small labels and attaching them to the CD caddy. But I wanted to see what other ideas were out there.

Thanks in advance
Roger

From: cmorgan@qnet.com
Message-ID: <41l0ij$l3m@vixen.cso.uiuc.edu>
Source record: 29732

The Antelope Valley area of Souther California is aprox. 600 square miles and has a population of aprox. 500,000. Not quite yet a major radio market the A.V. radio scene is still very rural. Many of the local staions do remote broadcasts every weekend. The local #1 here is 103.1 KTPI the only FM country in the area. The Top/40 A/C station here is K-MIX 106.3 (KGMX). In future reports I will cover other formats in the area. "High Desert Hot Country" 103.1 KTPI has enjoyed ratings success for many months now. The PD at KTPI is Tom Kelly. Over at K-MIX the PD is Jeff Ryan. I have spoken to both these PD's and found Jeff Ryan to be very friendly and in tune with local radio needs. Jeff holds down the morning drive time while Tom Kelly does the PM drive time at KTPI.

# 1900. PHOENIX: MACHINE GUN KELLY QUITS KOOL-FM

> Rumor has it 'FEA wants to tear down the old beauty and put up
> a more "modern" two-guyed-tower array.
>
> Ah, progress.

I don't know what the first parts of this thread said, but the other "diamond" Blau-Knoxes include WADO/1280 in the New Jersey meadows (in my youth the front of the art deco transmitter building still said WOV) and WBT/1110 in Charlotte. WBT has three towers, and WADO has one, plus an additional little one for directional work.

What a waste if WFEA loses that old tower.

Doc

> Thanks alot!

> --Scott--

Our station uses mostly martti's for remotes, but we also have a local 2-way radio frequency that we use on occasion. Obviously not as good as a marti, but sounds about the same as a phone line. Maybe you could set up something with a local 2way/paging store.

We've also used cellular phones... if you're set up for that type of technology! Just make sure you've got fully charged batteries -- **trust me on this one!** :)

Good luck...

==========TRRadio@aol.com, 8/22/95==========

>Greetings from the Big Apple--

<Stuff snipped>

>With the recent celebration of the 50th anniversary of V-J day, the NY Daily
>News ran a reprint of their V-J paper from 1945. It was strange to look at
>the radio listings and see WEAF at 660 (The forerunner to WNBC), WJZ at 770
>and WABC at 880. Of course, WABC now resides at 770 and WCBS at 880.

<More stuff snipped>
>Tripp Rogers

WJZ at 770 was part of NBC's Blue Network and was part of the sale
of the Blue Network to the newly formed American Broadcasting Co.in
1943. It became the flagship station of that network, a position it still
holds. The CBS owned station was WABC at 880. A few years later, WEAF
changed its call letters to WNBC to reflect its corporate ownership. WJZ
changed to WABC and WABC changed to WCBS The frequencies remained
the same, only the call letters were changed.

Just a clarification. WJZ were the previous call-letters of WABC, and WABC
were the previous call-letters of WCBS. WABC did not move from 880 to 770.

PG> I say MORE POWER to KTOZ and other radio stations who still think of
PG>radio as an art and consider the bottom line secondary. Don't get me wrong,
PG>radio is expensive to run...but there is NOTHING wrong with local service.
PG>If done properly, local radio can sell. But as of now, I have yet to see
PG>some enterprising LOCAL operation use its' OWN ingenuity, free of the
PG>antiseptic, line card reading, "25 past the hour" world of of satellite
PG>bullshit. How's about some imagination and personality ?

Peter,
This is good to know. I'll go to the owner of my station (WOR, New York - where we don't read liner cards) and tell him we can fire our people and run the station with volunteers. It'll sure save a lot of money.

While I agree that the government used its usual, heavy-handed, testosterone pumped, bureaucratic approach in this case, I know of many stations that make a decent profit while paying squat.

Also, using volunteers doesn't qualify as "art." In any other profession the use of volunteers gets you what you pay for. Let's not elevate a station that can't survive with paid staff as some sort of art form. It's like going New York's Metropolitan museum and finding volunteer finger painting masquerading as high art.

I suspect that KTOZ sounds very much like the community stations Lorenzo Milam started years ago. Unfortunately, they aimed their programming at those willing to volunteer. Instead of catering to listeners, they programmed what the "jocks" liked. No commercial station can survive with that approach. Even NPR would disappear without a source of listener funding. That funding comes from listeners who are satisfied, in large numbers, with what they're offered.

I work for one of the most historically important stations in the country. I love its history and its traditions, but that stuff doesn't pay the bills. At some point, we have to face the facts of the 1990's, not the 60's.

Rich

# 1913. Live Radio, real-time on Internet

## 1916. GE SR-II FM ceramic filter replacement

Newsgroup: rec.radio.broadcasting
Date: 1995-08-25 00:00:00 UTC
From: gkd@WPI.EDU
Message-ID: <41l0kc$l7q@vixen.cso.uiuc.edu>
Source record: 29749

I have read articles which discuss replacing the stock ceramic bandwidth
filters in FM receivers with narrower filters in order to improve adjacent
channel selectivity. I'd like to hear from anyone who has done this with
a GE Superadio II, as I'm planning to try it with mine. Specifically,
I am wondering:
1) what the bandwidth is of the stock GE ceramic filter. I'm guessing
it's probably 230 - 280 KHz or so, but the service manual doesn't
specify.
2) what filter bandwidth to use as a replacement. I'm leaning toward
180 KHz. In addition to DXing, I do use the SR-II for listening
to music, and I'm concerned that its fidelity (and SCA reception)
might suffer if I went down to a 150 KHz filter.
3) whether a narrower filter will produce a noticeable improvement
in selectivity.
Any thoughts or advice will be appreciated.

Here's the up to date changes in the AV rado world. Over at KTPI 103.1 (country) P/D Tom Kelly has "moved on to something bigger and better" according to staff. The afternoon drive he leaves is very capably taken over by Mark Collard who will share P/D duty with station GM Tim Curtain. Over accross town at K-MIX (KGMX) afternoon drive personality Bo Reyes has been replace with the "Brooklyn Cowboy" John Barone". Barry Samuels will replace Barone on the late nite show.

The Antelpe Valley area of Southern Ca. has a population of aprx. 500,00 and is becoming a large market radio area. In my next report I will feature an interview with "Sue Freeman" of K-MIX and a report on the area's Classic Rocker KLKX.

Message-ID: <41q688$rfb@vixen.cso.uiuc.edu>
Source record: 29618

An example of gratitude......

Robert Chase, formerly mornings on alternative rocker WKQX-FM (101.1) was returned to his evening slot to make room for Lance and Stoli on the morning show a few months ago. While handling the mornign drive, Robert placed the show in the top ten during the spring book. Well, Robert has been moved again, this time to weekend and fill in work. Brian Paruch takes over for Robert in the evenings. Brian, who goes by the moniker "Whipping Boy", adds to the list of jocks at Q101 who appear to be mentally challenged.

Red Mottlow, long time radio sports guy who most recently handled the morning sports reports on all news WMAQ-AM (670) has left the station. The split was reportedly via "mutual agreement." Jeff Joniak takes over the morning sports festivities.

Leslie Baldacci, who hosted a Sunday morning talk show on WLS-AM (890) won't be collecting a paycheck from the station any longer.

Chicago Bear Radio news

WGN-AM (720), which dubs itself "infotaining" radio, will continue to carry the Chicago Bears through 1998. The Bears, which could have elicited bids from a number of stations including sports talker WMVP-AM (1000), talker WJJD-AM (1160) and probably news WMAQ-AM (670), decided to continue its relationship with GN. The Bears will receive $6 million dollars a year for the broadcast rights.

Promotions and extensions.....

Connie Lee Welsh is now the promotions director at urban contemporary WVAZ-FM.

Frank E. Lee has reupped for three more years afternoons on progressive rocker WXRT-FM (93.1).

Terry Boers, one half of the "heavy fuel crew" on daytime sports talker WSCR-AM (820) will be sharing his sports acumen for at least three more years on the station.

Ric Federicki, operations manager for Shadow Traffic can be heard weekends on rocker WRCX-FM (103.5). Ric goes under the name "Spazz" for unknown reasons.

A.J. Parker, part of the morning show on rap WEJM-FM and AM (106.3/950) is reportedly close to landing a spot on the soon to be syndicated Doug Banks show which starts in January. Doug and A.J. worked together at urban contemporary WGCI-FM (107.5) previously.

Rumor mill.......

Is the proposed sale of WXRT and WSCR from Diamond Broadcasting to Westinghouse going to be called off?

# 1920. Observations on NY Radio

Newsgroup: rec.radio.broadcasting
Date: 1995-08-27 00:00:00 UTC
From: "Max Cacas - NPR News Ops - Wash. D.C." <MCACAS@npr.org>
Message-ID: <41q68a$rfd@vixen.cso.uiuc.edu>
Source record: 29620

One of the nice things about traveling to and from the recent Macworld computer show in Boston by way of Amtrak is that you get a lot of opportunity to listen to the radio (something difficult to do in a plane, or driving). I listened to a lot of radio on the way up, but am moved to comment on the NY radio scene because of all the changes there of late.

I found KISS-FM to be the *most improved* radio station in NYC. Getting Barry White to record promo liners for use on the air was *inspired*...and its probably one of the most listenable, user-friendly radio stations currently on the air in the Apple. Its no wonder the last book showed them with a lof of sampling from around the metro. It will be interesting to see how they did in the summer book.

By the same token, I have *no* idea what Z-100 is about anymore. They're almost indistinguishable from that alternative station up at 104.3. And I mourned the passing of those great jingles that Z-100 used to have, replaced now by those "scratch mike" (for lack of a better description) liners. (Noted ironically: I heard a promo for a station sponsored event which featured an "appearance by Z-100's Human Numan". Wasn't he let go by the station just a few short weeks ago????)

'NEW seems to have done a nice job integrating their expanded playlist into their presentation. Everytime WCBS-FM plays a seventies-era tune, it *really* stands out. However, it does begin to bring the station to those of us who grew up listening to WABC, WRC-AM, etc. during the 70s, so its a calculated risk on their part. 'CBS-FM still sounds damn good, to my mind.

Since I was attending the computer show in Boston, I didn't have much time to do any listening...and my only comment is that it was a frustrating exercise trying to find a lot of stations I used to listen to in Boston because of the frantic re-arranging of deck chairs on the Titanic <g> that has passed for re-aligning of who owns/runs what frequency in that market!

Johnathan Schilling <jls@novell.com> wrote, in response to Joel Marshall's post:

>How about saying nothing and putting on the first record?

I assume that you are speaking as a listener, and not a professional. If that is the case, I respect your opinion. However, radio is much more complicated than just playing music non-stop. For better or worse, a radio station's survival is based on something called "ratings". It is often said that a station's identity (i.e. call letters, format, personalities, music, slogans and anything else that you consider to be "self promotional blather") is its bread-and-butter. Individual identification is gold in the radio game.

>I'm not trying to be difficult... but I get more annoyed by radio >station self-promotional blather than I do by commercials. I do=
n't need >to be told that you're playing a few records in a row without >commercials. I can figure that out for myself.

While mindless sloganeering can be a bit cliche (and it took me forever to stop doing it myself), we have to promote our station and our personalities as much as we can. And what are commercials, but promotional blather in 30 and 60 second bits? How about you? Don't you do a bit of self-promotion yourself, or do you just go through life saying nothing? In short, promotion and self-promotion are facts of life, and the world would be a dull place without it.

>I don't need to be told what your format is, I can figure that out for >myself too. Just get on with it.

Would you believe that there are quite a few people that call for requests on my station that don't know what our format is? Do they really think that a classic rocker (such as us) plays Snoop Doggy Dogg, George Michael, TLC, speed metal, Ace of Base, or even P-Funk (although I must confess that I would LOVE to play P-Funk, but it's not possible)? Obviously, there are people who do not know what the format is. Also, some listeners may only know the station by the identifying slogan (believe it or not). Yes, there is a method to all of this madness.

I assume that you have no use for radio personalities, that we are irrelevant and should just stick to playing nothing but music. If this is the case, might I suggest this for an alternative: Purchase a CD player and an ample supply of discs. Just think, no annoying jocks, no commercials, no blather - just your music. Then you can stop whining about us and just get what you're looking for - music.

You make some valid points - we do fall victim to using the usual crutch words and phrases. Although you and many others may disagree, there is a certain degree of skill, creativity and talent needed to becoming a jock (stop laughing!). One of the main challenges is to avoid this trap, and be more natural on the radio, without being redundant and without rambling. In conclusion, this is not a global survival issue - it's just entertainment. If you don't like what you're listening to, turn it off, turn on your CD player, and stop whining.

>Anyone else still own these golden oldies?

I still own the radio shack small AM-Stereo tuner. Somthing that I'd never part with. In my car I use a Delco deck that is capable of AM stereo. Locally there are no longer any broadcasters in AM stereo, although at night I frequently listen to CHML 900 and WOWO 1190 both in stereo. They do sound excellent when they are in clear. Often when I;m traveling in Scranton, PA I'll tune into WICK 1400 and listen to their music in stereo. AM stereo makes a world worth of difference for AMmers who broadcast music and also spices up advertising for talk stations. Too bad things got botched up in the early 1980's when the AM stereo standard was up in the air.

Source record: 29627

In Washington, there is an Arrow 94.7.

They started out as "Rock & Roll Oldies" and were an excellent alternative to classic rock because they were a little lighter. They hardly ever played Aersosmith, Led Zep, the Who, Grand Funk, BTO, Pink Floyd, or any of the groups that the classic rock stations play over and over.

Then the classic rock station (WCXR) went to smooth jazz. Arrow almost immediately went to a classic rock format. They are still lighter than WCXR was, but include too much of the groups I listed above, and have a tendency to repeat songs too much. If I hear "Free Bird" one more time I'll puke.

Unfortunately, they seem to stop at the mid 80's. Last week I heard "End of the Innocence" by Don Henley and thought I had the wrong station.

I would love if a station played classic rock without the heavy stuff or the songs that have been played too much for 20 years. They could also include some recent stuff by artists on their playlist already. If they really had some guts, they could play some newer artists like Sheryl Crowe, 10,000 Maniacs, and people like that.

I am a 35 year old man.

Please reply with your thoughts.

Well, ARROW isn't in my current market, but it was when I lived in LA and listened to 93.1 KCBS-FM, which you probably know is the flagship ARROW station. I listented until March of '95, and as far as I can remember no 90's music was played. The most recent offering I recall hearing was "Simply Irresistible" by Robert Palmer, which charted in 1988.

KCBS is on the Web at http://www.arrowfm.com and many of their staff are reachable via email.

> neighborhood in which it resides. I wouldn't advertise if I were a bank.

> Should adult bars be allowed to advertise? I think so. On my show?
> Hopefully not.

I would have to partially agree with this poster, but I would say
that it depends on the neighborhood. Such ads would seem very out of
place and inappropriate (to me) in a NAC or Classical format, but
frankly, I think they would fit in quite well in the environment of
a station programming so-called "shock jocks".
This problem is not unique to radio, by any means. Years ago, I was
surprised to see ads for these places running on several Dallas-Ft. Worth
TV stations. At the time, my reaction as a viewer was negative, especially
when these ads were interrupting programs such as the Twilight Zone.
Had I been watching a program featuring a little more risque material
(such as a profile of Playboy playmates, or whatever), my reaction might have
been different. And considering how easy it is for a radio listener to
change channels, this is something I would hope that radio sales departments
will keep in mind.

Tom Desmond

Well your not and I'm sure KABC is having no trouble at all. If you
have numbers it doesn't matter. If you're worried about "taste" on the
radio I would think there would be bigger issues to focus on than spots
for an adult bar.

Hi Roger,

What we did at WINC (Winchester, VA) and at WCYK (Charlotteville) was to
number the CDs.

At WINC, the music log showed the CD number/track as well as the uptime/etc.
This was constant through use of both AutoJock and Selector, and was in some ways
even more helpful than having that info only on the cart. (The info was
duplicated on carts and the music log -- best of both worlds!)

That's how one station handled it, anyway. ('CYK numbered the CDs, but the
music logs came from Drake and often the timings were approximate or worse.)

Regards,
Alan

>Roger

Roger:

I just want to say up front: I prefer CARTS to cd's while on the air,
ok, I feel a little better! The last time I used carts was at MixJamz
in Pittsburgh....I miss them.
When I was a PD I slapped a mailing size label on the front of the disc,
I had a ton of room for intro, time, info, etc. Where I work now we use
the Dennon cd-carts & we use the labels they provide with the blank cases
that we buy. Most of the intro, time & other info is just printed on the
music log.

On another note:

Clarke Ingram! Great interview!

The 3 radio stations where I work, put just a Music-Master Label with the CD# on the side of the disc, and the intro/extro/runtime just shows up on our Music-Master printed sheets or on the computer ! Many programs let you use this system (the former MusicScan turned Music-Master, Powerplay, etc.)

We don't bother putting any song info on the shells because the shells are too small and the thickness of the labels is another thing that could mess the system up down the road (labels peeling and jamming).

Hope this helps you out a bit.

How about putting the extra info on the playlist? That's the way it's done here at WLTE. We even have the album titles listed, too, for when listeners call, trying to find out what album the song is from... also room for year-of-release and top chart position.

Of course the station uses one of the many varieties of computerized playlist programs. Don't most (if not all) of them allow for extraneous info to be printed out? If you're using such a program (and who isn't these days), it'll take some extra time to add the extra details to each song-- but I think you'll find the task well worth it.

However, if you're using a recipe box and 5x7 cards, you just may have to spend the time adding the info you want to each songcard.

I agree, though, that there isn't much room for much beyond cd-cart # and title on those Denon carts.

From: jwlovell@ix.netcom.com
Message-ID: <41q68n$rgi@vixen.cso.uiuc.edu>
Source record: 29635

wilsonrl@csn.net (Roger Wilson) writes:

>How are most stations labeling their CDs in the control room.

I can't speak for most stations, but can for five, all in the
Miami-Ft Lauderdale market.

At 99.9 WKIS-FM (country) there is just a small tab with a 4-digit
number on the Denon case. The music selector software gives the title,
artist, into, duration and fade. It also gives the CD number and
track.
At 560 WQAM-AM (sports talk) there's usually a 1-1/2 by 3 inch
lable on the top, back of the Denon case listing the cuts to use. Or,
the CD is in it's album case, and is placed into a Denon case for play.
At 790 WAXY-AM (formerly WMRZ)(brokered time) Fill music CDs in
Denon cases have a thin strip with the Artist Name attached and a
number used strictly for maintaining order in the rack. The label is
from a sheet of labels with the info typed one line after another. The
label for the CD is cut one character high. Just cut on the space
between lines.
At 101.5 WLYF-FM (lite AC) The entire system is automated, sound
bank, multiple 100 CD changers. The air talent can select music,
overide and change order on the computer touch screen, but never has to
touch a CD. The computer does the work. The talent does the talk.

Best,
John Lovell

From: RobABass@aol.com
Message-ID: <41q68o$rgk@vixen.cso.uiuc.edu>
Source record: 29636

I have a 486SX computer, and a couple of Pioneer PD-F100 CD jukebox players. Does anyone know where I can find interface controllers and software that will allow me to have the computer run the CD players?

I want to be able to build a database of songs, and be able to program the computer to play these songs in random or in specific order.

Anyone know what would make this work? The CD Jukebox players have an I/O interface, but the manual just says it's reserved for future use.

thanks

Rob Bass

Hello!

Several years ago there was an evening jock using the name of "Doug Hammond" and was on KS104 (KQKS) here in Denver, Colorado. I am not sure of the exact dates, but I would venture to guess he was there until about 1992 or so. California Aircheck has several issues with him, but I would just like to know where he is now.

If anyone knows where he is currently working, or if he is even in radio, please let me know via Email.

Thanks!

I don't think that was exactly the case at KJAZ. I remember reading an article in the SFO Examiner that discussed lots of financial "tomfoolery" going on at KJAZ, and at the parent company that was apparently involved in a whole lot of things besides (and unrelated to ) radio. The reason I guess that they sold the station (broadcast license) in the first place was because they needed to "cash out". . .

It is sad to see non-mainstream stations pull the plug on their alternative formats, although money is what talks. Public radio still remains the answer for any type of music that is non-rock or country oriented. Locally in our Binghamton, NY market our local PBS station WSKG launched a second station (WSQX) playing mostly modern jazz. It's definately a good attempt of a station although my only complaint is that they only operate from 10am to 10pm.

I have noticed there has been a rise in "Smooth Jazz" radio stations. There has been alot of controversy over calling this music Jazz, atlhough it does appeal to much of the same audience (I personally listen to the Jones Satellite network's version of Smooth Jazz). It is a shame though that more variety in many markets does not exist.

While my experience has been that you can't rely on the notion that volunteer talent can do listenable programming it is a rule that has its exceptions.

I manage a non-commercial FM that is mostly straight-ahead jazz. I have a mixture of paid and non-paid people serving as my talent. A few of my volunteer hosts are very good indeed--knowlegeable, with a good voice and delivery. However, as a non-com we are not nearly as tightly formatted as even the most "laid back" commercial station. It's in those kind of situations--dealing with tight clocks, lots of stop sets, etc. that the experienced professionals make a big difference.

As self-indulgent as a lot of volunteer-run community radio can be, it sometimes serves as a nice balance to the increasingly-consolidated conglomerate-dictated uniformity that has become the rule, rather than the exception in our industry.

It's not much different than going from one city to the next and seeing the strips of the same fast food outlets, discount stores, and everything else. The U.S. has become very homoginized, and there isn't much difference between either MacDonalds or radio from one market to the next.

A couple words on community service, volunteers, etc. from someone who is not a broadcast professional but seems to share the same ideals for radio that many pros do...

I used to be a comms student. I do remember a little (yes, just a little!) of the history of broadcasting, though I no longer study the subject. I remember being taught that when radio's stranglehold on the public consciousness was stolen by television, radio had to find a way to survive and did so by narrowing its sights... instead of the broad range of programming that had previously been run, radio stations tied themselves to certain formats. This, in my opinion, is where the real commercialization of radio started. It became much more necessary for the individual stations to focus on demographics because they were *trying* to hit a certain audience.

I think that the commercialization effect snowballed. I would love to see a local station that offers a decent choice of music from local bands... that's not going to happen, because the business managers and bean counters want to see ad revenue, and the consultants and record companies are selling music that *they* want to succeed, not necessarily what the public wants to hear. More community programming would be great, but people aren't interested anymore in what's going on in their neighborhood and don't want to hear it.

I wish I had a few hundred thousand dollars in my pocket so I could go buy out that boring lite-jazz station down the freeway from my house... I wish I had enough money that I could put in people who *really care* about the community and the music, and I wouldn't have to necessarily worry about getting the best ratings...

As for the volunteers, if the *want* to work without compensation, that's one thing. If they are nevertheless entitled to certain benefits which management is not giving them, *that* is not right.

Just some thoughts which may or may not be relevant to this thread...

>
> Interesting comment - WFAN has gone to two man teams in midday, PM Drive and
> in some weekend dayparts. In some ways, it's better, giving you some give &
> take between hosts to play off the callers.

WEEI's new PD has been very open for months about his wishes to have
2-host teams during the afternoon parts similar to 'FAN and WIP in
Philly. He cited the fact that 2-man/woman approach works very
well in those markets.

Boston radio/TV sports market is a bit of a different animal from NYC and
Philly. Listeners here identify much more with *who* hosts the show rather
than with the way it sounds on the air...Even if you follow the
Boston market for a short period of time , you can form a clear picture :
the *name* here certainly outweighs any kind of on-air credibility and
creativity by a large margin. That is not to say Boston sports radio/TV
doesnt have any creative or credible people working in it. Acceptance
factor plays a bigger role in Boston than in any other market in the
country,IMHO...

If you look at both 'EEI and 'BZ(weekends), you hear hosts who are
either from New England or have been in the Boston sports scene for ages...
(even an alternative rock outlet like WBCN-FM chose to go with an established
50-something radio team on their football broadcasts instead of bringing
in a no-name younger voice to go along with the station's hipper audience
-- 18-34 males...). With an introduction of 2-hosts teams on 'EEI starting
Sept. 11th, you'll get the *same* personalities. Nothing really wrong
with that. But at the same time. no doors are being open for any kind of
new(homegrown or imported) talent -- even on weekends or overnights when
ESPN Radio or SportsFan Radio Network fills the airwaves. And
that's somehwat discouraging, IMHO.

There's a new kid on the block in WBPS AM 890, just a step away
from WEEI AM 850 on the dial. With an exception of 6a-9a weekday local
sports noncall-in show featuring former Red Sox Ricco Petroccelli
they only run Prime SportsRadio out of Houston. 'BPS has been talking
about having a local PM drive show for months now, but as of now there
appears to be no movement in that direction. Although, every bus in
Boston has a WBPS sign on it.:-) With 'EEI all-syndicated in the
morning(Imus/SportsBabe) and busy with Red Sox/Celtics/college basketball
at night, 'BPS is in a perfect situation to start up something local
in those periods. But again, they'd need a *name* or two to get it going
here...

Comments? Opinion? Anyone...

-Mark

I guess it's a real sign that you're getting old when you want things to go back to the way they were in the old days. I'm only (only?) 33 but I'd l;ike to return to the days when the rules were fairly clear and the national broadcasting discourse was more civil.

That may make me a bit of a prude...and a hypocryte because I listen to Howard on my way to work in the morning...but I wonder what is heppening to society when blue material is allowed into the mainstream.

I'm not a member of the radical Christian right (an abhor their politics of hate), but I wonder if we've gone too far when adult bars are advertising on radio and television.

I may subscribe to the Payboy Channel...that's a decision I've made as an adult...but I wonder if we have an obligation to allow our children to be children.

I should point out that I became an Assistant Principal of a middle school after leaving a career in radio. I just want to allow our children to be children.

Maybe I'm wrong (and I hope I am). I'd like to think that children can handle the mixed messages of contemporary media. But my experience is that they can't and that we adults have a responsibility to protect them if possible.

The little old ladies (and men) who are offended because that said "penis" on Saturday Night Live" should simply change the station. My concern involves the images we present to our children.

What's your opinion. I'm interested.

# 1957. Re: Automating CD Jukebox Players

Newsgroup: rec.radio.broadcasting
Date: 1995-08-29 00:00:00 UTC
From: lando5@cybercom.net
Message-ID: <41tu0c$8ha@vixen.cso.uiuc.edu>
Source record: 29657

Fairly reliable sources inform me that RobABass@aol.com wrote:

>I have a 486SX computer, and a couple of Pioneer PD-F100 CD jukebox players.
>Does anyone know where I can find interface controllers and software that
>will allow me to have the computer run the CD players?

Our CE, Paul Shulins, custom-designed the system that we use at WBCS
and WMJX. The system uses primarily off-the-shelf components -- NSM
CD jukeboxes, computers (I believe the music system may actually run
on '386s, but I'm not sure...we've go so much stuff run through or by
computers, it's difficult to tell which is which anymore), etc., with
custom software that Paul writes himself. Paul once mentioned to me
that he's built similar systems using Pioneer CD players, as well.

>I want to be able to build a database of songs, and be able to program the
>computer to play these songs in random or in specific order.

Our in-house system uses barcode readers to scan in song lists from
Selector logs, but from the way Paul described his Pioneer-based
system, it sounds like it operates much the way you want. I'll pass
your post along to him, and see what he says
===*Opinions expressed here are mine and mine alone. Deal with it.*===

Source record: 29658

Joel wrote:
One hypothesis is that the business and political atmosphere
amongst the institutional donors/funders/underwriters has gotten
much less generous in recent years and the pressure has migrated to
the listenership end -- where economic and social trends haven't been
particularly supportive.

I agree with Joel as far as this goes but will toss in this:
Non-commercial stations tend to begin life as shoe string operations
staffed mostly by extremely dedicated volunteers with a particular vision
or idea about what kind on radio is missing from their community. As
time rolls on and a station gains a bit of financial stability and a
following it may take steps to add some paid positions. Maybe a full
time PD, then a Music Director, then a News Director.

All these folks -- who wield a fair amount of power in the mangement
of the station -- have a very vested interest in seeing the station
grow. That interest is their salaries. And when some of the funding
sources mentioned by Joel dry up (for whatever reason) there is a
certain survivalist instinct that sets in. And since these folks are
"professionals" and have been hired by a Board because they are
"professionals" the advice they offer about how bolster up station
finances is usually taken. Is there anywhere, any station, where
management level folks have said: "Geeze, the station cann't afford me any
more so I'll just resign and let the station return to its original form."
That form being a volunteer based station, serving the very specific
needs of its core (and very dedicated) audience.

Just as many business and corporations are re-examining top-heavy
management structures perhaps non-commercial stations need to do the same
and realize that returning to their original strength as local resources
rooted in volunteerism could make more sense than continuing to feed an
overly ambitious and very money-hungry model of "success".

CC duopolized two separate AM/FM combos in Youngstown, OH officially in October '94. They waited several months, then canned a nostalgic format (along with announcers and a couple other people) on one AM (amidst a lot of community protests (mostly from older people) and the CNN headlines format on the other AM. One AM was turned into "Real Talk" WRTK with all syndicated shows except morning drive and the other AM to a One-On-One Sports network affiliate. Both AMs are heavy into sports broadcasts from high school to pros. The FMs were basically left alone to "compete" against each other (oldies WBBG and CHR WHOT). As far as I could tell from my conversations with the GM and some of the sales staff they seem to be a company concerned for employees (those being let go for format change and duplication reasons), however I get the impression the owner (New York) is basically hands off letting the GM handle the operations. Hope this helps in your upcoming change in ownership. Let me know how the transition goes. I'm interested since I've done some academic research in this area and plan to do more in-depth research on Youngstown and surrounding duopolies.

We are updating our news sound and want new intro/extro liners.

We've been saying "It's ____ degrees. I'm Joe Blow with CFSL news at (time)." for eternity. Same with our extro lines. We know what our nearby stations say in their news packages. We'd also like to hear from you.

CFSL is a country music station. Our existing slogan is "Your Community Connection, 1190 CFSL." We also bribe our listeners for news tips.

Your help would be appreciated. Please e-mail me directly:

CROATIA: INDEPENDENT RADIO STATION DENIED LICENCE

LABIN, CROATIA, AUGUST 1995 -- On August 11 the Council for Telecommunications of the Republic of Croatia announced its decision to grant a licence to broadcast in the city of Labin to FFI Commerce, effectively decreeing that the existing station, Radio L.A.E., go off the air.

FFI Commerce is a firm with connections to the ruling Croatian Democratic Union (HDZ). Radio LAE is an independent station founded by the Labin Art Express, an independent association of citizens for the promotion and production of alternative culture and art. Broadcasting since 1993, Radio LAE is widely recognised as the only fully independent electronic medium in Croatia.

According to many observers of the media situation in Croatia, the recent decision of the Council for Telecommunications is consistent with previous decisions granting almost all available frequencies to persons or groups close to the ruling party. The allocation of frequencies was completely under government control, conducted by a government-appointed body headed by Mr. Ivica Mudrinic, Minister of Maritime Affairs, Transport and Communication. In addition to granting frequencies to government supporters, Mr. Mudrinic has repeatedly expressed his desire for increased government influence over program content.

Radio LAE's programming pays special attention to alternative music, culture and art. The station's information programming features local news gathered by the station's staff and regional and world information from sources such as the BBC and Deutsche Welle. According to Dean Zahtila, director of Radio LAE, the station's programming "is a thorn in the flesh of the ruling party in Croatia, especially in this period when pre-election campaigns are starting." For the ruling HDZ party the Labin radio station is particularly sensitive because its signal reaches the entire Istria

region, an area in which the opposition Istrian Democratic Union won during the last national elections.

Radio LAE and AMARC's Solidarity Network are requesting that messages of protest be sent to Prime Minister Nikica Valentic and to Mr. Ivica Mudrinic, Minister of Maritime Affairs, Transport and Communication. Your messages should request:

* That Radio LAE be allowed to continue to broadcast as an independent and pluralist voice in Croatia;
* That the government establish an independent and non-partisan body to oversee all future broadcast licence concessions;
* That decisions already made by the Council for Telecommunications be reviewed to ensure that they respond fully to the need for pluralistic and independent broadcast media.

You've got the fudge word of "major", but there are at least two stations
that have been doing this since December - WREK in Atlanta and one in
North Carolina (WUNC?). By now, there must be dozens that are doing it.

Max Cacas - NPR News Ops - Wash. D.C. (MCACAS@npr.org) wrote:

: By the same token, I have *no* idea what Z-100 is about anymore. They're
: almost indistinguishable from that alternative station up at 104.3. And I
: mourned the passing of those great jingles that Z-100 used to have, replaced
: now by those "scratch mike" (for lack of a better description) liners.

Modern rock stations (and I classify Z-100 as modern rock) don't have jingles - jingles, to me, are usually associated with a Top-40 or AC outlet. New York seems to have the same problem that other cities like Boston and Cleveland have: PD's discovering that the modern format makes money. Z-100 could be WMMS in Cleveland - down to the fact that they use the same announcer and share programming. (Z's syndicated "Love Phones" show is also heard on 'MMS). While visiting NYC, I often listen to Z100, and sometimes (well, occasionally) listen to Q104.3, and have noted some similarities between them (tho the small amount of listening I've done to Q, in addition to leads me to believe that it is more of an AOR-type station).

Boston and Cleveland both have two modern rockers. Cleveland's WENZ initiated the format in this market in May of 1992. About two years later, WMMS, an album-rock pioneer and a mainstay in Northeast Ohio for almost 30 years, flipped to modern rock (and has been running promos stating how WENZ is a "copycat" station. Yeah, whatever.) I have a copy of Billboard from April '95 describing how Boston's WBCN has done the same thing.

It seems like New York is going in that direction also.

As a further note, the original WABC call stood for Associated Broadcasting Companies, a unit of 4 or 5 operators who wanted a radio station, but couldn't afford to program one full time. One of the operators did have the station license already.

CBS was an outgrowth of one of the other partners, the then parent of the Columbia Graphaphone Co. Columbia had tried a "network" set up previously by buying time on WOR and 2 or 3 other stations outside the area to relay the program and that was their intent with their partnership in WABC. Using his inheritance and selling his share in the family fur business, Bill Paley came along not too much later and bought out Columbia and the partners in WABC.

Does Indianapolis remain the largest market in the country
without live,local Oldie station with market-grade signal?

101.9 is apparently satellite-fed, and 106.7 is a suburban
station with limited coverage [and nighttime talk].

Do oldies fans miss the now-defunct WKLR 93FM?

[Moderator's Note: Since you are a data service for oldies stations,
tell me this... Why is it so that every Oldies station in America is
dead-set against having fun on the air? I mean these stations are
playing music from the Top-40 of the sixties and seventies when
personality and fun were the mainstays of the legenday CHR's that made
that music popular, so why are most Oldies stations so dry and
uninteresting? Bill]

programming?
Q11. I have some old transcriptions and tapes, how can I make them
sound better?
Q12. Are there any OTR clubs near me?
Q13. I have some OTR tapes of the same program, but their dates are
different. Why?
Q14. Is there anywhere I can get a complete listing of all the
episodes in a serial?
Q15. Is there anywhere I can get a written synopsis of the themes of
OTR programs?
```

Q16. Is there a World Wide Web page (URL) or FTP address that I can access for more info?
Q17. How do I subscribe to the OTR electronic newsletter?
Q18. Can I get archived copies of old issues of the OTR newsletter?
Q19. What is the best way to archive OTR programs?
Q20. My old reels squeak. Why does this happen, and can I fix it?
Q21. Where can I find more information about antique radios?
Q22. What is the best radio / antenna to get distant OTR stations?
Q23. Is there a group for modern radio drama ("new-time radio")?
Q24. I have only email access to the Net. Can I still get the files at your FTP site?
Q25. Your Digest and WWW pages only deal with Old Time Radio. Where can I get similar information about early TV?
Q27. I have never heard "Old Time Radio". Can I get an audio sample via Internet?

---

Q1. What is "OTR"?
A1. OTR is an abbreviation for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the early 1950's. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures.

Q2. You haven't mentioned OTR music, why not?
A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. There is no restriction to discussing OTR music in the OTR Newsletter, however you would find much more discussion about this topic in alt.music.big-band. There is also an Old Time Music on the Radio WWW page.

Q3. Where can I buy recordings of old radio shows?
A3. There are several individuals and companies willing to sell tapes of OTR programs. A partial list can be obtained from my OTR WWW site or FTP address listed later.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?
A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR newsletter to learn of their experiences, then check with potential vendors.

A comparitive price chart, listing many vendors, is available at my WWW site.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is summarized at the

archive site, and my FTP / WWW sites.

Q5. Are OTR shows rebroadcast? If so, where and when?
A5. Yes, several AM and FM radio stations, satellite feeds and a shortwave station rebroadcast OTR. Check my OTR WWW page for current info, or download STATIONS.OTR from my FTP site. If you learn of other sources, leave a note!

Julian A. Smith (jsmith@blues.epas.utoronto.ca), Frank Passage (passage@pluto.dss.com) and Bill Pfeiffer left the following information:

For AM listening, try the brand-new National Radio Club's _AM Radio Log, 15th Edition: Complete Listing of U.S. and Canada AM Radio Stations_ (Mannsville, N.Y.: NRC, 1994). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price range: $20.00]

For FM listening, I'd suggest Bruce F. Elving's _FM Atlas_ (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has _maps_ of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx $1.00 s/h]

The M Street Radio Directory, M Street at 800-248-4242 or +1 212 473 4668 voice, or +1 212 473 4626 fax. The address is M Street Corp., 304 Park Ave S Floor 7, New York, NY 10010 USA. costs $29.95 + p/h,

Those lucky listeners living near Boston can have a periodic update of local OTR programming by sending email to Noah Schaffer, at nschaff@k12.oit.umass.edu. Noah will send you monthly OTR & Radio Drama updates, including program titles and station/frequency/time data.

Q6. I remember a great show called (x). When was it aired?
A6. Check with subscribers to OTR newsletter, or look through the program databases (WWW or FTP). Also see answer A14 below.

Q7. Are there any books about OTR?
A7. Yes, there are several books related to OTR. See my WWW page or FTP site for a list of some of them.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt 119

Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch <henry@g0gku.demon.co.uk> related a good experience with the following on-line bookstore:

Acorn Books acornbks@netcom.com

Q8. Does anybody trade tapes of OTR shows?
A8. Yes. Check with subscribers to the OTR newsletter. My WWW page has a database of private traders as well. Leave a note in the OTR newsletter if you want to trade, or send email to me if you want your library to be listed in the on-line database.

Q9. What's this stuff about Copyright?
A9. The copyrights on most OTR shows have expired. Several copyrights have been renewed. Examples of the latter include The Shadow (Conde Nast) and some of Arch Oboler's productions. See my WWW site for the latest "common sense" and legal citations.

Q10. How can I get my local radio station to broadcast OTR programming?
A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing director of a non-commercial station, tells us: "The days of radio being ruled by the artisians is over, and for some time now it has been in the hands of people who only look at the bottom line, so to reach them you must talk through public radio pledges, or through sponsors on commercial stations."

Q11. I have some old transcriptions and tapes, how can I make them sound better?
A11. You might try using a good equalizer and/or digital signal processing (DSP) unit between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle (Rriddle@aol.com) left this information:

There's a firm that sells archival quality turntables and sound processing units that can dramatically improve old recordings. Their sound processing unit runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

Henry Brugsch <henry@g0gku.demon.co.uk> left this information about Digital Audio Format (DAT):

The dat-heads mailing list maintain an archive of all their material at the following site: ftp.atd.ucar.edu. Log on with the usual anonymous then, your routine password. head on over to /pub/dat-heads/ You will find a wealth of info up there. All the digests to the current day, and mike faqs, as well as market postings on equipment. Highly recommendable for anyone to get their feet wet in this media. Happy taping.

Q12. Are there any OTR clubs near me?
A12. Check the club listings in my WWW page, and leave a note in the OTR Newsletter asking about local clubs for your area. Send me email if you want your club listed.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?
A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, the Armed Forces Radio Service rebroadcast many Mutual Radio transcriptions at a later date. Your tape may be of one of these later dates. Alternately, somebody might have made a mis-typopgoof.

Finally, some shows -were- broadcast more than once, and sometimes on different programs! For instance, a few Suspense shows were re-scripted / re-cast for Escape. You might also find similarities between certain SF shows as done on X minus 1 and Dimension X.

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program serial?
A14. Some of the OTR Newsletter subscribers have contributed Program Logs for several well-known series. The logs are available at my FTP/WWW site. While you are there, check the online libraries; some collectors have very complete collections of various serials, and they are listed by name or date in their listings. I am currently compiling a database of contributed catalogs and libraries, which will eventuall contain most of the readily-available programs for popular OTR series. At present, the dbf file exceeds 6 MB. I am attempting to find a publically available Internet site to archive the file.

The "logs and publications" entry in my WWW page gives names and addresses of several vendors of these items. It can be FTP'd as sou_pub.otr. (Thanks to RadioJoe5@aol.com (Joe Coleman)).

There is also a Netscape table of logs and log sources at my WWW site.

Jay Hickerson maintains several logs and lists, as well as -Hello Again-, an OTR newsletter. Jay is the author of -The Ultimate History of Network Radio Programming and Guide to All Circulating Shows- (last supplemented in Oct 94). Jay's address is:

Jay Hickerson JayHick@aol.com
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the themes of OTR programs?
A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of the themes, send them to the OTR newsletter for inclusion in one of our databases.

Jim Widner has contributed some synopses / introductions to various programs. They are on file at his and my WWW/FTP sites.

Many of the local and national OTR clubs maintain informational libraries with this material.

Q16. Is there a World Wide Web page (URL) or FTP address that I can access for more information?
A16. Yes, there is a growing number of WWW sites, as well as FTP sites and a Gopher. Each site contains different information, so you might want to visit them all. The sites listed below are good places to start, since the major OTR WWW pages have links or pointers to each other. If you learn of any others, I'd appreciate your informing me via email!

(1) My site:

World Wide Web URL:
http://www.crl.com/~lgenco/otr.html

FTP:
Anonymous FTP to ftp.crl.com
directory: users/lg/lgenco

(2) AIRWAVES E-Publishing's Site (courtesy of Bill Pfeiffer):

FTP:
Anonymous FTP to radio.aiss.uiuc.edu,
directory: misc/rec.radio.b-cast/OTR.

GOPHER:
gopher radio.aiss.uiuc.edu 7070
(select "OTR")

World Wide Web URL:
http://radio.aiss.uiuc.edu/~rrb

Q17. How do I (un)subscribe to the OTR electronic newsletter?
A17. To subscribe, send email
To: old.time.radio-request@airwaves.com
Subject: SUBSCRIBE

To unsubscribe, send email
To: old.time.radio-request@airwaves.com
Subject: UNSUBSCRIBE

(The body of the message is ignored in both cases)

Q18. Can I get archived copies of old issues of the OTR newsletter?
A18. Yes. The OTR Digests and Index are updated three times a week, and are accessible through the first two WWW pages mentioned above, or from the AIRWAVES anonymous FTP site mentioned above, or from the Gopher mentioned above.

Readers with a WWW browser can access a "smart" archive program. This program can sort and display old OTR articles by author, subject, thread or date submitted. Just the thing to use when you want to catch up on a discussion thread, without plowing through a lot of extraneous material. To access this service, point your browser at:
http://radio.aiss.uiuc.edu/~rrb/online.html

Q19. What is the best way to archive OTR programs?
A19. The most popular way seemed to be reel-reel tapes, using each of the four tracks to record monophonically. Modern reel machines are in the > $2000 range, and used reel machines are becoming harder to find.

Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. These problems include "overwinding" and splitting of the tape at the leader. Because of their thinner track width and slower speed (1 7/8 IPS), the density of the information is greater than with wider and faster (3 3/4 IPS) reel tapes. This may lead to a greater loss of signal (particularly high-frequencies) over time.

The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction. "Hi-Fi" decks need no video signal to synch the systems, and can thus record audio without an accompanying video signal. One T-120 Stereo Hi-Fi VHS cassette can easily hold 12 hours of OTR audio (recorded monophonically on the right and left channels independently). If the linear track can be accessed independently, this will add six more hours of recording time.

Some subscribers have mentioned Talking Book tape recorders as a possible archival method. These recorders operate at 15/16 ips

(half the speed of a standard cassette recorder), and can operate in 4-track mode, thus giving up to 6 hours of play time on a standard 90 minute cassette. As yet, we have no info on long-term longevity of these recordings.

Don Coco (djc@crl.com) left the following information about sources for Talking Book type equipment:

The American Printing House For The Blind
1839 Frankfort Ave.
Louisville, Kentucky 40206
Tel. (502) 895-2405
Sells Braille and recorded books, 4 track recorders which record at 15/16 IPS, and other products of interested to Visually Impaired persons. Price of 4 track recorder around $175

I.R.T.I.
1411 West El Camino Real
Mountainview, Ca. 94040
Tel. (415) 961-3161 or (800) 322-4784
Sells all including Radio's, TV's with SAP, Reading Machines, Computers ETC.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at 1-800-622-0022 or call Radio World magazine at 703-998-7600 for subscription information. Radio World is an industry trade and has used equipment listings in the classifieds once a month.

(Jim Blackie [jblackie@aol.com] indicates that the Harris/Allied number has changed to: 1-800-300-0733.)

Q20. My old reels squeak. Why does this happen, and can I fix it?
A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will respond. Send your request to: Fred Korb, c/o Oldtime Radio Collectors and Traders Society, 725 Cardigan Court, Naperville, Illinois 60565-1202. I am willing to help you preserve the sounds of radio days gone by.

[Editor's note: Fred's method consists of a kit by which a lubricating film can be automatically applied to the tape as it is played. I tried it. Although temporary, it does indeed work! I'd recommend it for those squeaky tapes that you wish to re-record onto newer reels.]

Richard Fish <lodeston@bluemarble.net> also left this helpful info about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the backing, or the binder compound used to stick the magnetic particles to the plastic backing -- has absorbed water from the air. The water molecules actually make the tape expand a bit, so it doesn't fit the machined tape-guides properly anymore; and they can interfere with the lubrication impregnated into the tape; and it is theorized they can even interfere with the polished smoothness of the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the formulation of the plastic backing and binder. In the mid-70's, both 3M (Scotch) and Ampex, the two major tape manufacturers, started experimenting with their formulas. They thought they were introducing major improvements, but instead created a tape much more prone to hydrolization than anything had ever been. The problem did not show up for years, and the formulas did not get corrected until sometime in the mid-80's. Theoretically any tape could get hydrolyzed over a long period of time, especially if stored in a high-humidity situation, but in practice most squeaky tapes were made (roughly speaking) between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and entreprenurially successful producer of radio drama in the US today) gave me his formula and I've done it many times now and it works:

Bake the tapes in a convection oven for 8 hours at 130 degrees Fahrenheit. It is entirely possible to bake a tape twice if the first time doesn't do the trick. You get about a three-week "window", sez Tom, before the tape starts to re-absorb water. So the best deal is to bake the tape and immediately make a copy. But if you forget to do it and it re-hydrolyzes, you can bake it again.

Q21. Where can I find more information about antique radios?
A21. An excellent place for discussions about antique radios, phonographs and accessories is the rec.antiques.radio+phono newsgroup, created by Bill Robie. A pointer to his FAQ may also be found at my WWW site. Basically, r.a.r+p is:

- A *discussion* group, rather than a sales group (see r.a.m)
- Whose focus is on radios, phonos, and related materials made before the 60s
- It steers away from "ham" radio gear (the Boat Anchors group covers that)
- They have a -very- comprehensive FAQ that new folks should read

The WWW site, "The Bellingham Antique Radio Museum" is also available through my WWW site, or directly via URL http://www.pacificrim.net:80/~radio/ This site contains info and GIFs on old radio hardware, as well as soundclips (.au files) of OTR show intros.

The University of Maryland also has a WWW site entitled "Broadcast Pioneers' Library". This is an excellent resource for the serious / professional researcher. It can be accessed through my WWW site, or directly via the URL: http://www.itd.umd.edu/UMCP_Libraries/BPL/bpintro.html

Additional sites with pictures of old radios or other hardware resources may also be found at my WWW site.

Q22. What is the best radio / antenna to get distant OTR stations?
A22. Several readers have been acclaiming the GE SuperRadio III as an excellent choice for picking up distant AM stations that carry OTR programming. Although the tuning dial has notoriously poor calibration, the sensitivity and selectivity seem superior to other radios. A SuperRadio FAQ is available at my WWW / ftp site.

-Some- readers have had good success with the Select-A-Tenna antenna advertised in several magazines, and the Grove Catalog. The S-A-T seems to be rather directional, and may eliminate off-axis interference.

Ham Radio magazines sometimes carry information about small loop antennas for AM DX-ing. Dan Hughes <dhughes@prairienet.org> left this note:

Several years ago one of the electronic magazines ran plans with dimensions and number of turns, etc to build one of these antennas. I have built several and I'm no mechanic. If you (or anyone else reading this) would like a copy of the article and plans, drop me a stamped, self-addressed envelope: Dan Hughes, P.O. Box 933, Urbana IL 61801.

If you are interested in AM Broadcast Band reception, and technical artlcles related thereto, send a SASE to the following address for their product catalog:

National Radio Club
Publications Center
PO Box 164
Mannsville, NY 13667-0164

Q23. Is there a group for modern radio drama ("new-time radio")?
A23. There are several USENET groups whose charters include modern drama. Check the lists on your local Internet provider to see which are available to you. Here is a list of some of the WWW pages for radio drama (more may be found at my WWW site):

Atlanta Radio Theatre Company: http://www.webamerica.com/artc
ZBS Media? http://www.zbs.org/zbs.html
LodesTone Productions?
http://www.bluemarble.net/~lodeston/lode.html
Midwest Radio Theatre Workshop?
http://www.thoughtport.com/tpa/non/mrtw

There is also a mailing list for folks interested in current radio drama:

Send email to: majordomo@world.std.com
Subject:[blank]
text: subscribe radiodrama

Q24. I have only email access to the Net. Can I still get the files at your FTP site?
A24. Maybe. There are several FTP-by-email servers. Contact one of them for instructions.

ftpmail@decwrl.dec.com
with no subject line,
and two-line body with line one help and line 2 quit

ftpmail@grasp.insa-lyon.fr
(body: help) Please, European users only.

bitftp@pucc.princeton.edu
(body: help or ftplist for a list of anonymous ftp sites)

BITFTP@DEARN or BITFTP@vm.gmd.de
(body: help or ftplist for a list of anonymous ftp sites)
(Europe only)

Since the OTR FAQ is an "official" FAQ, a copy of it is stored at MIT, and is available from the MIT mailserver. For more info on how to get files by email from MIT, send a message
TO: mail-server@rtfm.mit.edu
SUBJECT: [blank]
BODY:
help
end

Q25. Your Digest and WWW pages only deal with Old Time Radio. Where can I get similar information about early TV?
A25. The OTR Digest and OTR WWW Pages are purposely self-constrained to OTR topics. Folks interested in early TV shows might be interested in this note from Kathy O'Connell (oconnell@pobox.upenn.edu):

Let me announce a brand new TV list!!! A woman named Linda
has just started a list devoted to 50's-60's Television.
You can contact her at LEEKNIGHTS@delphi.com I signed on
immediately, and it's a wonderful place to meet other people
interested in this subject. Very much like the OTR list,
but for television!!!

Q27. I have never heard "Old Time Radio". Can I get an audio sample
via Internet?
A27. Yes, if you have a suitable WWW browser. Connect to any of the WWW
sites mentioned above, and follow the pointers to their audio clips
and / or soundbytes.

} Unless you're independently wealthy, or have some other source of great
} income, and are running this station as a hobby, all stations are ultimately
} accountable to the listeners, whether by advertiser support, listener
} contributions, or some other "External" source. . .

I just wish stations *were* accountible to listeners, but the
truth seems to me to be that they are accountible to ratings
services and the ad agencies who worship them.

Few stations can survive today on local sales, but instead rely on ad
buys which hinge on Arbitron and to a lesser extent, Accuratings,
which many insiders will admit over coffee are vastly flawed measures
of real audience share.

It is much like Presidential elections. We vote, but the actual
winner is chosen by members of the Electoral College, the names of
which are virtually unknown by most Americans.

Likewise, format success and failure is only remotely tied to actual
listeners, but rather the projections of a very small sample on a much
larger body.

So, unless we are talking non-comms who derive public support, the
truth is that they are accountable to ratings services, not the real
public.

[Note: I use Arbitron as an example because it is the most widely
accepted ratings service. I make no claims that they are dishonest,
only that any tiny sample size cannot accurately guage real
listnership. ]

Sounds nice, but who's going to keep the lights on and the power running
when your "few hundred thousand" runs out?

Unless you're independently wealthy, or have some other source of great
income, and are running this station as a hobby, all stations are ultimately
accountable to the listeners, whether by advertiser support, listener
contributions, or some other "External" source. . .

Maybe whatever programming you have to offer will attract more listeners than
"lite jazz". Maybe not.

SJ>I think that the commercialization effect snowballed. I would love to see
SJ>a local station that offers a decent choice of music from local bands...
SJ>that's not going to happen, because the business managers and bean counters
SJ>want to see ad revenue, and the consultants and record companies are selling
SJ>music that *they* want to succeed, not necessarily what the public wants to
SJ>hear. More community programming would be great, but people aren't intereste
SJ>anymore in what's going on in their neighborhood and don't want to hear it.

Imagine that! They want to make money! You have to ask how many
listeners there might be for the format. Everyone has his own version
of the perfect format that would "serve" the community. Put them all
together and no one agrees.

SJ>I wish I had a few hundred thousand dollars in my pocket so I could go buy o
SJ>that boring lite-jazz station down the freeway from my house... I wish I had
SJ>enough money that I could put in people who *really care* about the communit
SJ>and the music, and I wouldn't have to necessarily worry about getting the be
SJ>ratings...

Not for a few weeks. Then, after the money is gone, you'll have to
figure a way to run the place. Let's see how long those "people who
care" will stick around when their eviction notices roll in. Let's see
just how much the power company "cares" about this wonderful format
that "serves" the community.

What it boils down to is that a format "serves" the community if you
like it. If it's a format someone else likes, it doesn't "serve" quite
so well.

Rich
SJ>As for the volunteers, if the *want* to work without compensation, that's
SJ>one thing. If they are nevertheless entitled to certain benefits which
SJ>management is not giving them, *that* is not right.

TR>Also, Mary Matalin is set to start a daily 3 hour PM talk show for CBS in
TR>January. The Daily News wondered if anyone in NYC would carry it???

Tripp,
There's no station of any consequence available to carry it in New
York. WABC is hardly about to drop Bob Grant and WOR has Jay Severin on
its own network. WCBS would be foolish to drop a well established news
block to slot yet another conservative host. The market's glutted.
WPAT-AM, in New Jersey, is the usual dumping ground for stuff that
won't clear elsewhere, but it's not a competitive signal. The last
ditch approach is to buy the time from WEVD.

Rich

# 1974. Shoestring Radio Theatre Launches Web Site

Newsgroup: rec.radio.broadcasting

SHOESTRING RADIO THEATRE

NEWS RELEASE / INTERVIEW ADVISORY

September 1, 1995

Media Contact: Monica Sullivan, Producer

Mail: Shoestring Radio Theatre
P.O. Box 590163
San Francisco, CA 94159-0163

Email: srt@shoestring.org

WWW: http://www.shoestring.org

SHOESTRING RADIO THEATRE LAUNCHES WORLD WIDE WEB SITE

SAN FRANCISCO -- Shoestring Radio Theatre, the San Francisco-based radio production company, announced today the official launch of its new World Wide Web site. Located on the World Wide Web (the graphical portion of the Internet) at "http://www.shoestring.org", the site contains information not only on the non-profit, tax-exempt corporation itself, but also on the company's two weekly radio shows: "Movie Magazine International" (a program of movie reviews and interviews) and "Shoestring Radio Theatre" (a program of original radio dramas). The two 30-minute shows air locally on KUSF, 90.3 FM (Wednesday nights 9-10 p.m.) and nationally on nearly 90 stations in 21 states via the Public Radio Satellite Network.

Shoestring Radio Theatre's World Wide Web site, which is made possible by Internet Provider LineX Communications of San Rafael, California (415-455-1650), contains a wide range of useful information for radio listeners and web surfers. The "Shoestring Radio Theatre" (radio drama program) web pages include: a profile of the show; local and national 13-week schedules of upcoming plays; press releases dating back to 1993; and a "Feedback" section encouraging radio listeners and web surfers to submit their suggestions, comments, questions and/or scripts to Shoestring via email. The "Movie Magazine International" web pages include: a description of the program; a schedule of upcoming interviews with actors and directors; movie reviews of current releases and old favorites; news releases; a "Feedback" area for comments; and a list of links to other cool movie-related web sites.

"The World Wide Web site is going to be a great way for us to reach out to our current listeners, to provide them with information about the shows

and to provide them an opportunity to talk back to us via email. But, hopefully, the site will also enable us to reach new listeners and raise awareness of 'Movie Magazine International' and 'Shoestring Radio Theatre' in areas of the country and the world where the shows are not currently heard," comments Founding Producer MONICA SULLIVAN. Senior Associate Producer and Webmaster RANDY PARKER adds, "The new web site is really exciting because as far as I can tell, 'Shoestring Radio Theatre' will be the only radio drama program in the country with a World Wide Web site. Plus, the site will immensely increase the potential audience for the film reviews from 'Movie Magazine International.' They'll now reach not only the local and national radio audience but also anyone in the world with access to the web."

Shoestring Radio Theatre's World Wide Web Site is located at "http://www.shoestring.org" and can be accessed via any web browser (although Netscape 1.1 is recommended). Additionally, the corporation has two email addresses -- "mmi@shoestring.org" for the film review program "Movie Magazine International" and "srt@shoestring.org" for the radio drama program "Shoestring Radio Theatre" -- which can be reached from the Internet or from any commercial on-line service (such as AOL, CompuServe, and Prodigy).

# 1975. Re: AM STEREO

Newsgroup: rec.radio.broadcasting
Date: 1995-08-29 00:00:00 UTC
From: Alfredo.Torrejon@amd.com
Message-ID: <41tu2s$8lr@vixen.cso.uiuc.edu>
Source record: 29675

WHAS (840) used to broadcast in stereo back in the mid 80s, and they
did an AM-Stereo walkman giveaway. I've never been able to hear them in stereo,
so I figure that they must have given up on AM Stereo, despite the fact that
they still play music. What system(s) did WHAS use when they did broadcast in
stereo?
Speaking of distant AM Stereo broadcasters, don't forget about the
high-powered Mexican stations that broadcast in stereo. XEG (1150) usually
comes in pretty well at night, here, deep in the heart of Texas.

After all the crap they went through to put the station on the air,
including paying way over price for the predcessor on the channel, and all
the recent changeovers to a new transmitter site, I wonder why they would
want to get rid if it.

Is their plan to sell to WHPC, (which shares the 90.3 spot with them), or
to take outside bids? Whatever they decide, they'd better act fast. If I
was at WHPC I would have had my application to incease my hours into the
FCC yesterday. That would put a crimp in any deal Adelphi could make.

# 1977. Westwood One - Rock 'n Roll Hall of Fame Broadcast?

Newsgroup: rec.radio.broadcasting
Date: 1995-08-29 00:00:00 UTC
From: staxowax@li.net
Message-ID: <41tu32$8m5@vixen.cso.uiuc.edu>
Source record: 29677

I hope this is the right newsgroup in which to post this question. If not, sorry.

I read in "Rolling Stone" that Westwood One will be broadcasting the Rock 'n Roll Hall of Fame concert this Saturday, September 2. Does anyone know what station will be carrying it in the New York metro area or how or where to contact Westwood One?

Thanks for you help.

I'm not sure why the WJLK move is such a bad thing. After all, the
Seaview Square Mall (where they moved to) is about one or two
air miles [at most] from 'downtown' Asbury Park. What is left of
downtown Asbury Park, anyhow -- it is quite a bit different than
what it must have been like in its heyday 20, 30, or 40 years ago.
If I'm correct, WJLK was the last remaining vestige of life in the
old Asbury Park Press building (their previous owners, who moved
down the road *past* Seaview Square Mall about 10 years ago).

If anything, it may make them more visible to the public (although
that particular mall is not doing particularly well compared to
others in the area). If they become more accessible to the
community, so much the better I guess.

As far as packing it up, and letting NYC & Philadelphia take over,
WJLK has a very aggressive LMA (I think it's an LMA anyhow, maybe
it's a duopoly) with an FM outlet in neighboring Ocean County, WQNJ.
Between the 2 stations, you can hear them over quite an area of the Jersey
Shore and inland, and they seem to be doing OK in the ratings.

Personally speaking, I'm a WABC (Bob Grant) & WXRK (Howard Stern & Classic
Rock) fan but my wife insists on keeping the clock radio set on WJLK so
I have to listen to their inane morning show when I wake up :-) WPLJ is our

"compromise" station when we're in the car together, to ensure domestic
tranquility.

I disagree with that, the move may actually be one to make the station more visable. Look at this situation on Long Island. About 20 years ago the local owners, (the Hornstein family), sold WBAB-FM. They also made a serious mistake of selling the call letters as well, changing their original AM station to WNYG. WBAB moved to a storefront across the street, in what looked like a building designed to be an automobile dealership, (they've since left there).

Even though the format of WBAB was AOR, not what the establishment of the Babalon, NY area would consider the music the majority of listeners in the area would like, that big illuminated sign on Rt109 stood out and made the station a real presence in the town, vs. the little painted WNYG sign in front of the house that was the original home of the station. WBAB did get involved in the community while WNYG deteriorated.

WNYG finally fell into receivership over a year ago and was sold to a spanish language group early this year. WBAB became the keystone of a small chain of stations, including a Long Island AM station similar to WNYG, WGBB in Freeport NY, (1000d/250n). After pulling the plug on WGBB and making it WBAB-AM, (simulcasting WBAB-FM), for about a year, they refurbished the station and went back to local origination and the original WGBB call sign. This time, however, they moved away from traditional broadcasting and went into community radio and broker time programs. It is realitivly healthy, economically speaking.

Meanwhile, a few miles further out from WNYG, the owners of a small shopping center/professional office complex put WBZO, (B-103), on the air about 2 1/2 years ago. It is located upstairs and also has bright white illuminated signs that say to the community, and the advertisers traveling on the Sunrise Highway, "we are here". The 3.5Kw FM outlet is the fastest growing station on Long Island, and the G.M. is a veteran sales manager,

formerly from other L.I. stations, including his last job at WGBB when they pulled the plug. He took a lot of lessions from WBAB's ownership and applied them to B-103.

To get back to WJLK, however, don't you think it's about time they moved out of the Asbury Park Press building anyway? It was something like 8 years ago when Press Broadcasting sold the station so they could buy the more powerful WKXW, (New Jersey 101.5), in Trenton, (service area overlap rules were less waverable at the time, and they couldn't own both).

## 1980. RE: Where to find AM/FM listings

Newsgroup: rec.radio.broadcasting
Date: 1995-08-29 00:00:00 UTC
From: bigger1@ix.netcom.com
Message-ID: <41tu3h$8n9@vixen.cso.uiuc.edu>
Source record: 29680

To find every AM/FM station listed alphabetically by state and also by format, check out the annually published Broadcasting & Cable Yearbook, a huge red-covered volume. I'm not sure how to order it to purchase, but I've seen it at both university and public libraries. One caveat: with call letter and format changes so prevalent, this time of the year the 1995 Yearbook might seem a little dated.

# 1981. Re: Connoisseur Communications

First, In any business (including radio) no job that comes with a guarantee. Corporate downsizing is still the buzz word for the 90's.

With that said, BRS Radio Consultants has conducted a market analysis report for the Youngstown OH market. Here it's finding on Connoisseur Communications and the station's it bought, in that market, last fall. (I once worked in that market, so it hit close to home)

Last fall Jeff Warshaw, principal partner on Connoisseur Communication, announced that his company would purchase H & D Communication's WBBW/WBBG for $5 million. The following week Warshaw announced plans to buying Myron Jones' WHOT AM/FM for $6 million. The 2 AM/FM combo buys would makeup the first duopoly in the Youngstown OH market.

Connoisseur Communications owns KJOC 1170, KBOB 99.7, & WXLP 96.9 in the Quad Cities (Davenport IA market #130) both KBOB and WXLP are in the TOP 6 12+. Connoisseur also own WFDF 910 & WDZZ 92.7 both stations are in the TOP 5 12+ in the Flint MI market (#113).

In the Youngstown OH market (#87) Spring 95, WHOT-FM 101.1 was #3, 12+ with a 11.0, it's the first time the station showed a double digit share in a year and a half. WHOT was at once the market leader and may know be on the same track again. (FYI) WHOT-FM is also a CHR station like WZOK - 97ZOK. WBBG 93.3 ranked #4, 12+ with a 9.2, up over 2 point for its last ranking. WBBG may have regained its crown at being the HIGHEST rated OLDIES station in country.

Here's what you wanted to hear; Both FM stations' formats were left in tacked and on-air personalities remained on staff.

The AM's however did not fair as well. WBBW 1240's talk format was dropped for a satellite Adult Standards format. Then, WHOT-AM 1390's local Adult Standards format was also replaced with the same satellite format. (Yes, for a short time both stations broadcast the same

satellite format) Due to the format change's staff was let go. A number of administrative worker also lost their job's due to the housing of all 4 stations under one roof. The number of workers laid off however was small compared to the total staff at all four stations.
Back at the AM's, after the short run with the satellite format WBBW flipped to an ALL SPORTS station. The 1000 watts AM, runs mostly a sport satellite feed.. The last rating put the station at 16th with a 0.7, down 1.4 from the Fall 94. WHOT-AM flipped out of the satellite format to a "REAL TALK" format and changed its call letter to WRTK. The format was to compete with the market leader WKBN 570. WRTK ranks 15th with a 0.8, down from a 4.6.

Analysis; Connoisseur Communication is a young broadcast company that only buy's top ranked station's. All FM's, the company has purchased are top contenders (including Rockford IL's WZOK). The company is buying into medium markets were the stations are not the over priced (YET). Youngstown OH is the company's largest market (#87). However, it's still up for discussion at to the profitability of buying $11 million in broadcasting in Youngstown OH. (The market has the worst economy, and the highest unemployment rate in the state)

Jerry Warshaw, a professional, does take a hands on approach with most of his stations and is committed to take the stations to new levels.

A couple of updates--

Howie Rose will be leaving WFAN for Sportschannel as play-by-play voice of the NY Islanders and the NY Mets. Who will replace him on the FAN is up in the air, however, rumors are Marv's son, Kenny, may become his backup p-b-p man on the Rangers radio team (Rose's role in the last few seasons). Rose has been with WFAN since it's inception in 1986.

Speaking of the FAN, the NY Daily News reported in yesterday's editions, Mike (Francesa) and The Mad Dog (Chris Russo), the station's highly rated afternoon team, have complained bitterly to management over the addition of Scott Ferrell to the WFAN lineup. The duo blasted him after an ESPN show on sportsradio stations, and Mike is quoted as saying in the piece "I told management they were making a mistake with this guy. Ferrell's show will be syndicated from the West Coast, where he rules the evening airwaves in San Francisco. IMHO - The show will be a filler after many of the station's live game broadcasts, and probably won't be on that much. Since it's being syndicated by Infinity (WFAN's owners), I think management may have been told to take the show by the owners. However, the situation will be interesting to hear as it plays out.

That's all for now--

Tripp Rogers

# 1983. THE VOICE OF AMERICA SEEKS OUTSIDE FUNDING FOR VOA EUROPE

Newsgroup: rec.radio.broadcasting
Date: 1995-08-29 00:00:00 UTC
From: ke@VOA.GOV
Message-ID: <41ttv3$8en@vixen.cso.uiuc.edu>
Source record: 29683

THE VOICE OF AMERICA SEEKS OUTSIDE FUNDING FOR VOA EUROPE

Washington, D.C., August 25, 1995 The Voice of America is seeking proposals from commercial and non commercial companies to finance the entertainment component of the VOA Europe Radio Network. VOA is specifically interested in exploring proposals from companies that would finance VOA Europe s music and entertainment portion while VOA would continue to provide news, information and special events coverage.

VOA Europe is an around the clock, English language entertainment and information programming service that is delivered by satellite in stereo without cost to affiliated AM and FM radio stations and cable systems in 50 countries on five continents. VOA Europe's research based "Music and More" format was originally designed to reach young listeners in Western Europe, but it has proven just as popular with audiences in Eastern Europe, the former Soviet Union, Africa, Asia, Oceania and Latin America. VOA Europe's adult contemporary format features the Voice of America's comprehensive world news and special short reports which objectively chronicle life in the United States. VOA Europe also offers its affiliates optional local commercial cutaways.

"VOA Europe, in its nearly ten year history, has pioneered many changes in international broadcasting among them, satellite stereo delivery, affiliate networking, digital on air studios and commercial mentions," said VOA Director Geoffrey Cowan. "VOA Europe has acted as a test bed for a number of new broadcasting techniques and technologies, and the exploration of a joint venture is yet another pioneering initiative involving VOA Europe."

The announcement, which is attached to this news release, also invites inquiries about the many other services of the Voice of America. Federal law encourages the Voice of America to participate with existing American media companies, including press, publishing, radio, etc., to carry out its mission. The VOA is prepared to explore a variety of possible arrangements, including joint ventures, corporate underwriting and other mutually beneficial relationships. THE DEADLINE FOR EXPRESSIONS OF INTEREST IS SEPTEMBER 7, 1995.

The Voice of America is the United States Government's world wide broadcasting service and a major component of the U.S. Information Agency's International Broadcasting Bureau. VOA has a worldwide news gathering service with more than 25 bureaus around the globe. It produces a wide variety of programming in English and 46 other languages and reaches about 100 million people worldwide. VOA also has a major

presence on Internet, with text English and Mandarin language news reports and audio files in 17 languages.

FOR IMMEDIATE RELEASE: For more information, please contact the Office of External Affairs, (202) 619 2538, or John Busch in USIA s Office of Contracts, (202) 205 5480; fax: (202 205 5466, or via Internet: <JBUSCH@USIA.GOV>.

ANNOUNCEMENT SEEKING PRIVATE SECTOR FINANCING FOR VOA EUROPE (as published in the Commerce Business Daily and the Federal Register)

The Voice of America (VOA) is the United States Government s world wide broadcasting service and a major component of the U.S. Information Agency s (USIA) International Broadcasting Bureau. VOA has an unparalleled worldwide newsgathering service, with more than 25 bureaus around the globe; it produces a wide variety of programming in English and 46 other languages, reaching about 100 million people around the globe; it has a fifty three year worldwide reputation for accuracy and excellence, making it far and away the best known and respected American source of news and information in the world; its music programs have brought and now bring American popular culture to remote areas of the world; millions of people have learned English by listening to the English teaching and Special English programs of VOA; many of its language services, such as the Spanish and Portuguese Services for Latin America, now work with a strong line up of about 1400 local affiliate stations, as does its Worldwide English Service and its 24 hour per day English language adult contemporary program service now known as VOA Europe, which is delivered by leased satellite circuits to numerous affiliate cable systems and FM and AM broadcast stations located primarily but by no means exclusively in Europe. VOA news broadcasts are also available by telephone, and VOA has a major presence on the Internet, with the text of English and Mandarin language news reports, and audio files in 17 languages.

Like other major media enterprises, the VOA is now prepared to explore a variety of possible arrangements with non commercial and private companies. VOA is prepared to accept proposals for joint ventures, corporate underwriting, and other relationships designed to further its mission while reducing the expenditure of taxpayer dollars. The Agency is authorized, pursuant to 22 U.S.C. 1437, to encourage and utilize private agencies participation, including existing American press, publishing, radio, et. al., in carrying out its mission

Accordingly, the U.S. Information Agency and its International Broadcasting Bureau are seeking private sector partners for its various VOA programs and program services. It is specifically interested in exploring proposals from companies that would like to provide financing for the music and entertainment component of VOA Europe, while VOA continues to provide the service with news, information and special events programs.

Expressions of interest should be submitted in writing by September 7, 1995, to John G. Busch, USIA, 330 C Street, S.W., Rm. 1611, Washington D.C. 20547. Telephone: (202) 205 5480. Fax: (202) 205 5466. Internet:<JBUSCH@USIA.GOV>. All correspondence will be considered

Here's the TOP 20 Radio Station in Youngstown/Warren OH as
reported in the Y-Town Vindicator:

Spring 1995
Youngstown/Warren OH. #87

Stations / Freq. (Formats) Spr. 95' +/- Fall 94'

1) WKBN-AM 570 am (News/Talk) 13.4 + 1.2 (2)
2) WQXK-FM 105.1 fm (Country) 12.5 - 1.1 (1)
3) WHOT-FM 101.1 fm (CHR) 11.0 + 1.9 (3)
4) WBBG-FM 93.3 fm (Oldies) 9.2 + 2.1 (6)
5) WKBN-FM 98.9 fm (Adult Contemp) 6.8 - 0.6 (5)
6) WNCD-FM 106.1 fm (AOR) 6.7 + 1.2 (7)
7) WRBP-FM 101.9 fm (Urban AC) 4.3 - 4.0 (4)
8) WYFM-FM 102.9 fm (70's Oldies) 3.9 - 1.2 (8)
9) WSOM-AM 600 am (Adult Standards) 3.5 + 2.2 (11)
10) WNIO-AM 1540 am (Adult Standards) 2.8 + 2.7 (18)
11) WRKU-FM 95.9/1470 (Classic Rock) 1.5 + 0.2 (13)
t12) WICT-FM 95.1 fm (Country) 1.3 + 0.3 (15)
t12) WENZ-FM 107.9 fm (Modern Rock) 1.3 + 0.1 (12)
14) WRRO-AM 1440 am (AC/Oldies/Talk) 1.0 + 0.4 (17)
15) WRTK-AM 1390 am (Talk) 0.8 - 3.2 (9)
t16) WBBW-AM 1240 am (Sports) 0.7 - 1.4 (10)
t16) WKTX-AM 830 am (Ethnic) 0.7 - 0.3 (16)
18) WGFT-AM 1500 am (Religion) 0.6 - 0.9 (12)
t19) WPIC-AM 790 am (Adlt Stand/Talk) 0.4 n/a n/a
t19) WLLF-FM 96.7 fm (EZ Listining) 0.4 n/a n/a

-NOTE-

The top 4 stations in Youngstown grab over 40% of radio listeners, that
does not leave much for the other 17 stations. People who listen to radio
in the Mahoning Valley traditional find a station they like and stay.
That's why it's very difficult for the other 17 stations to compete for
the small audience left. M street Journal recently marked the
Youngstown/Warren OH tied for 3rd, in most formatically volatile!
Last year there were MORE radio format changes in Youngstown/Warren OH
(#87 market) then in; Seattle, Los Angeles, Chicago, Miami, New Orleans..

Youngstown OH. (21 stations) had the same number of radio format changes
as #4 market, San Francisco CA. (65 stations), #9 Houston TX. (57
stations),
#62 Honolulu HI. (38 stations).

WS>> Should adult bars be allowed to advertise? I think so. On my show?
WS>> Hopefully not.

WS> I would have to partially agree with this poster, but I would say
WS>that it depends on the neighborhood. Such ads would seem very out of
WS>place and inappropriate (to me) in a NAC or Classical format, but
WS>frankly, I think they would fit in quite well in the environment of
WS>a station programming so-called "shock jocks".

Tom,
Are you suggesting that Classical listeners don't have libidos? If
you are, I'd strongly suggest you study the lives of some of the
greatest composers in history. If they did today what they did in their
day, they'd be locked in the slammer right along with many of our
favorite televangelists.

It's fun to see the stereotypes we live by. Classical = fine,
upstanding citizen. Rap = drug dazed heathen.

Some day someone will take a government grant and study the
backgrounds of the men who frequent the 42nd street peep shows. I work
on Broadway at 41st street in Times Square. It's fun to watch Priests,
Ministers, Hasidic Jews, suited businessmen and women pop in and out at
lunch. I'd be willing to bet a few of them like classical music. Maybe
a few of their Walkmen are tuned to WQXR.

WS>Had I been watching a program featuring a little more risque material
WS>(such as a profile of Playboy playmates, or whatever), my reaction might hav
WS>been different. And considering how easy it is for a radio listener to
WS>change channels, this is something I would hope that radio sales departments
WS>will keep in mind.

They are. Just ask Howard Stern. Many, many New Yorkers change
channels away from "fine, upstanding" programming to listen to Stern.
I'll bet a few of them will tune to WQXR or WNYC once the Stern show is
over.

Please. Give us Classical listeners a chance. We can be a sleazy
as the rest of you.

Rich

JA>>I think you're missing the point. A spot for an adult club cheapens
JA>the neighborhood in which it resides. I wouldn't advertise if I were a
JA>bank.

JA>Well your not and I'm sure KABC is having no trouble at all. If you
JA>have numbers it doesn't matter. If you're worried about "taste" on the
JA>radio I would think there would be bigger issues to focus on than spots
JA>for an adult bar.

Jay,
I would think that a Talk Show Host who advocates killing
government agents does a job on the quality of the neighborhood. Far
more than a few naked people. It always amazes me when I see where our
priorities lie.

I guess it's OK to kill, so long as you keep your clothes on.

Rich

MI>Should adult bars be allowed to advertise? I think so. On my show?
MI>Hopefully not.

Mike,
Do they cheapen the neighborhood more than the screaming dragway spots, or the used car dealers who do their own? Are they cheaper than the infomercials for spray-on hair and vaginal deodorants? Do they cheapen the neighborhood more than scam artist televangelists begging for money from little old ladies?

I think the neighborhood is already pretty cheap without them.

Rich

NPR station KJZZ(91.5) dropped jazz music, the reason for its call
letters, from its daytime programming Monday (8/28).
KJZZ GM Carl Matthusen told the Tribune newspapers that commercial
"Smooth Jazz" KYOT(95.5) was having a large and lasting impact on
KJZZ.
If you are wondering why ratings matter to a non-commercial station,
consider this...fewer listeners=less money from pledge drives.
K-Jazz, as it is called, had been doing jazz from 9AM-2PM
daily, and at night...with NPR programming in morning and afternoon
drive.
The new schedule:
4-9AM: Morning Edition
9AM-Noon: The Diane Rheme Show
Noon-1PM: Monitoradio Midday
1PM-2PM: Talk of the Nation
2PM-3PM: Fresh Air
3PM-6PM: All Things Considered
6PM-6:30: Monitoradio
6:30-7PM: Marketplace

The station will continue to play jazz at night(7PM-4AM), moving to
mainstream acoustic from the new age/light jazz/fusion
it has played since the mid-80's.
The move appears coincidental to the arrival of another
instrumental format in the Phoenix market.
Forest, the producer/host of the nationally syndicated
"Musical Starstreams" since the early 80's, has been named
Operations Manager of KBSZ(93.7), Wickenburg.
The station, nicknamed "The Breeze", has a translator
for Phoenix at 96.3.
Forest calls the format "CIB"...Contemporary Instrumental
Based...with core artists like Enya, Ottmar Liebert, Loreena
McKennitt and Patrick O'Hearn.
According to Forest, the sound is different from what NAC/Smooth Jazz
stations are playing and is expected to
lure dissatisfied former listeners who've given up on commercial
radio back to listening.

Sorry Fred, I have to disagree with your analysis. EZ Rock is just
one of many A/C stations in Toronto. The city is saturated with
them(theMIX, CHUM-FM etc.) I don`t even think they`ll be around by
next summer. The only station that doesn`t have direct competition
is Q107.

: Sounds nice, but who's going to keep the lights on and the power running
: when your "few hundred thousand" runs out?

Agreed... this was more to make a point than to present an actual number.

: Unless you're independently wealthy, or have some other source of great
: income, and are running this station as a hobby, all stations are ultimately
: accountable to the listeners, whether by advertiser support, listener
: contributions, or some other "External" source. . .

: Maybe whatever programming you have to offer will attract more listeners than
: "lite jazz". Maybe not.

(Fade in Rush's SPIRIT OF RADIO) :)

Correct. This, in a nutshell, is what the problem is: Broadcasting is
just as capitalistic as any other industry. I don't know how long the "few
hundred thousand dollars" would sustain a radio station if it only catered
to what I wanted to hear and not everyone else. And I just picked on the "lite
jazz" station because I don't like the stuff they play. :> However, like
Bill, I don't know how accurately any ratings system could portray the tastes
of a whole metropolitan area. But the ad agencies go for the ratings numbers,
so that's what the stations sell...

Bill--I've never much trusted Arbitron, either, but I have to tell you that my company does in-house research with much larger sample sizes than theirs, and our results come very close to theirs. I won't go into this further because the info is proprietary...but suffice it to say that I respect Arbitron more than I once did.

But those who clamor for their own particular tastes to be accomodated on the air must remember this. Commercial broadcasters are not in the business of selling programming to listeners. We are in the business of selling listeners to advertisers. That which we do to get our listeners is analogous to a retailer's wholesale cost. Our retail customer is the advertiser. Our profit is the difference between the cost of "buying" the listeners wholesale (talent salaries, music licenses, news services, admin overhead, etc) and the rates we can charge advertisers, minus sales commissions. Obviously the more listeners we have, the less it costs to "buy" each one, and the more we can charge the advertiser for the aggregate number he/she is getting.

Boy, did you miss out.

Last October, we held a sale of od equipment at our station, among the items were mic flags from the 30's & 40's.
The old cast aluminum type, with raised white letters, flat black background. I hink some went for as little as $10.
Some radio amateur of a local Ham club bought them all.
One was even a mic stand flag for WAIT, when they transmitted out of Elmhurst, IL.

I've often toyed with the idea of making new copies, exactly like the originals, it's not hard to do, or even the old 1948 RCA "On Air" studio lights, the Art Deco style with the heavy glass.

You might be able to pick up some by advertising in the back of a few HAM Magazines.

Have you ever heard WGRR-FM, Cincinnati? I haven't for a while, but last year when I did, they sounded terrific--real personalities, lots of fun and audience involvement. A truly entertaining radio station, and I was very much impressed with it...I'd have to say it's the best oldies station I've heard anywhere. The only quibble I had was that like most music stations these days, they don't make a real effort at news. (Disclosure notice--their night jock, Tom Michaels, is a very good friend of mine going back many years).
KRTH, Los Angeles is also pretty good. The Real Don Steele can still say more with fewer words than any jock you'll ever hear, and he makes the station sound very exciting when he's on.

I have to agree that the media exert a number of negative influences on youth. What bothers me is that nobody seems to look beyond sex when speaking of these influences. Even though nobody seems to notice or care, the images presented in advertising and most TV programs are quite detrimental because they convey the message that buying a certain product or dressing a certain way guarantees happiness. While some people may scoff at this logic, saying, "Now who would take advertising or entertainment shows seriously?" a large segment of our population does respond to these images. As a 21 year-old, I vividly remember junior high school, where many students' senses of self-worth were founded on being physically fit, owning several pairs of brand-name jeans, and a pair of Reeboks.
The incident that started this thread was that of an ad for a strip-bar on an AM radio talkshow. In this particular case, I don't think that the ad's appropriateness for a young audience is really that big a concern because kids today seldom listen to AM radio, especially talkradio. Media influence on today's youth seems to be mainly through cable-TV, which is rife with sexuality and the above mentioned anti-self-esteem, be-a-good-consumer, images. IMHO, promoting self-esteem and values is the job of parents and requires that children and parents be able to discuss their concerns.
I feel that I've gone off on somewhat of a tangent in this post, so I will not further contribute to this thread.

MI> Maybe I'm wrong (and I hope I am). I'd like to think that children
MI>can handle the mixed messages of contemporary media. But my experience is
MI>that they can't and that we adults have a responsibility to protect them if
MI>possible.

Mike,
I'm afraid life is a mixed message. In our zeal to "protect"
children we strip adults of interesting things. We seem to concentrate
on "dirty" language and sexual things. All the while plopping kids in
front of violent cartoon shows on Saturday morning. We boast that our
commercial messages influence behavior when it's in our best interest
and deny it has any effect when our "creative" freedom is questioned.

A 4 year old child was killed in a hail of gunfire in New York the
other day. They didn't kill her with dirty pictures or bad language.
They did it with violence. The same kind of violence we see day after
day and night after night on the tube. We hear people complain about
sex on prime time TV. The very same folks are glued to the tube during
the afternoon soaps where acres of flesh are exposed in the steamiest
situations we could imagine.

I believe we'd do much better to concentrate on those things that
do great harm to both the body and the spirit. To me, violence is the
enemy. Not sex.

Rich

When I was in High School (1980), my family received a request to fill
out a radio listening diary. My mom asked me what the name of the local
classical station (KING-FM) was, and then filled in listening for that
station, since she likes classical music. Never mind that she couldn't
even FIND the station on the FM dial. My brother filled in information
for a couple of popular stations that he sometimes listened to, although
the information wasn't accurate for the period the diary was supposed
to cover. I made it a habit of listening to an FM station in Bellingham,
100 miles to the North, but was having reception problems that week,
due to a power boost by a second adjacent FM in Tacoma, where we lived.
No problem, though, I just filled in my favorite station, anyway.
A few months later, my mom got a phone call from another ratings service,
wanting to know what three radio stations she listened to the most. She
asked me to give her the names of three stations that I listened to...
I wonder how much that screwed up the station's demographics, since the
result was that their survey would have showed a 49 year old woman listening
to a Top 40 station that was actually listened to by a 17 year old.
The point is that I suspect that most of the people who fill out these
diaries or answer these telephone surveys don't take the results real
seriously. I'm sure that my experiences with my family are not unique,
and that more than a few folks in this newsgroup can recount similar
stories.

Tom Desmond, who promises to be truthful in any future ratings surveys.

Forgive me if I scratch my head in wonder at all this hullabaloo.

First, volunteerism CAN work. College stations have proved that for nearly a decade now (I use decade, since the power limits were raised, some to 1000 watts). We have excellent examples of this in Chicago, WLUC, WZRD, &c. Whereas, they cannot sell advertising, the FCC does allow Sponsorships of programming, just like your favorite NPR or Pblic Television station gets. This can be big bucks income for a non-commercial station. Of course, you have to have Talent and good programming to make this happen.

Secondly, reading the great disgust from naysayers - Rich from WOR comes to mind - imagine my shock that they didn't mention any help at the station(s) from INTERNS. Gosh, they don;t get paid, do they? They (usually) get college credit, or plain old EXPERIENCE.

Third, who says you can't start off a station with a few thousand dollars and keep it on the air for more than a year or two?
Hasn't anyone heard of BROKERED PROGRAMMING?
We, at WCRW in Chicago hae had brokered programming since 1924, when we were just out of our HAM License days.
Everyone gets paid top dollar, higher than union wages,(We're not a union shop - what is it, IBEW?) and the station makes plenty, never once has been anywhere close to being out of the black.
In the last 5 years, we bought out own building, outright (look Ma, no Mortgage!) for our studios, plus all new equipment, paid C.O.D., no financing.
Not only does brokered programming offer a steady income, but there's no hassle of having to raise or keep a sales force for spot ads.
Plus, nothing equals community service, involvement, or broadcasting in the public interest (hey, a licensing requirement!) than brokered radio, with the possible exception of non-commercial.
We're not Arbitron rated, we refuse to pay those extortion-priced fees, yet we have plenty of National Advertising from Ad Agencies.

We run Public Service spots with our Station IDs, News, Weather, Public Affairs interviews, and we play music that our audience wants, not what's "Hot" with some out-of-town/state/country record company.
On top of that, we BUY our music, less than 10% comes from promotional copies sent by record companies.

Fourth, and finally, probably the gravest, most MAJOR sin a radio station owner can commit is taking the profits and pocketing them.
You MUST re-invest into the station, even if it's just putting it in the bank for a rainy day. Pulling cash out and converting it to personal or other non-station business use is like sucking a well dry.

Oh, Giving a thousand Dollars an hour away isn't really re-investing, it's begging and bribery. Those listeners aren't going to do the up-keep on your existing equipment or buy you that new audio chain to the Xmitter.
This sin is one of the reasons that is appears that radio doesn't make a profit, another is over-buying and use is like sucking a well dry.
Oh, Giving a thousand Dollars an hour away isn't really re-investing, it's begging and bribery. Those listeners aren't going to do the up-keep on your existing equipment or buy you that new audio chain to the Xmitter.
This sin is one of the reasons that is appears that radio doesn't make a profit, another is over-buying and over-financing for that new chain of stations. The interest can suck all the income from a station's spot sales alone.

They used to require you to have enough money to run a station for a year-and-a-day with no income, but that was back when radio was for entertainment, not a financial investment to buy low, sell high.

I guess I've "gabbed" enough. :)

-Mark Byrd

richwood@commspec.com wrote:

: SJ>music that *they* want to succeed, not necessarily what the public wants
:to hear. More community programming would be great, but people aren't
:interested anymore in what's going on in their neighborhood and don't want
:to hear it.

: Imagine that! They want to make money! You have to ask how many
: listeners there might be for the format. Everyone has his own version
: of the perfect format that would "serve" the community. Put them all
: together and no one agrees.

Or, you can have the current situation in N.E. Ohio: two modern rock stations, two Top-40's, three our four AC's and a Top-40/AC hybrid, three country stations, (well, four if you count WSLR, I was just counting the FM's)...

: What it boils down to is that a format "serves" the community if you
: like it. If it's a format someone else likes, it doesn't "serve" quite
: so well.

I'm sorry. I didn't mean to give that impression. However, as I mentioned before, I question how much the typical radio station gives back to the community. I listen to both modern rock stations and two of the AC's... I like a lot of the stuff they play. How much community service do they provide? Dunno. Not a lot, in my opinion. I understand what you are saying. Of course it is essential for the station to make money in order to stay on the air. But how many radio stations do breaking news anymore? If I'm listening to WENZ (for example) and there is an important news story that affects a lot of people in Cleveland, how likely do you think they are to break into the music? I've only heard one station even mention severe weather with any kind of urgency - there were really heavy rains and bad driving conditions down in Central OHio, and one of the stations down there broke in (with the EBS tones, even, which surprised me) and explained where the bad weather was, and how long the severe weather advisory was to last. No one does that anymore. I'm not even talking about public affairs programming now, as I was before. If there is a serious situation that affects the safety of people in Northeast Ohio, it's a good bet that no one will break into programming to announce it, and several stations will probably ignore it.

That is a situation where it would be relatively simple to announce the situation and how to avoid it. And very few stations do.

Community service? Sure... as long as it doesn't bite into our precious afternoon drive.... wouldn't wanna let the advertisers down.

(and what else could there be on the last week of August?)

*There's a new experimental FM in town. Avis Rent-a-Car is operating, or at least sponsoring, KF2XBF 88.5 FM at Boston's Logan Airport. The station runs a HALF-HOUR long loop of tourism information and Avis ads. Yes, ads. Yes, 88.5 FM. No, I don't have an explanation. At least it doesn't get out too far...15 miles away, here in the western suburb of Waltham, I still get WFCR Amherst MA on 88.5.

*There's a new pirate in town. "EB101" is allegedly operating weekends on 101.3 from "somewhere in the Boston area." Haven't heard it yet...I'll be trying again this weekend.

*So much for the "Matty in the Morning" show as a syndicated venture. The show is back to being heard only on WXKS-FM "Kiss 108" Medford-Boston, now that it's been dropped by its last remaining affiliate, WKZS-FM 99.9 "Kiss" Auburn-Portland ME. Kiss' local morning host led a successful public campaign against the show...saying it demeaned women. WKZS pulled out after just four months of a three year contract.

*Also in Maine: 95.9 in Saco has indeed changed calls to WRED-FM. The station is still CHR, and was formerly WHYR-FM.

*Moving inland a bit: M Street reports that the FCC believes religious station WWNH 1340 Madbury (Rochester-Dover-Portsmouth) NH to be silent. It's not. Then again, owner Brian Dodge is also operating WRUT-FM 107.5 West Rutland VT (CP expired several months ago, and the FCC has actually reopened the application process for the channel!), and is about to build his *expired* CP for WTIJ 1400 Roxbury (Keene) NH. Dodge briefly operated WKBR 1250 Manchester NH...until the FCC shut him down for main-studio violations and an illegal STL from WWNH to WKBR. Mercy...

*Almost on the air: The new antenna for Harvard's WHRB (95.3) is up, on the One Financial Center building in Boston's Financial District, right next to the antenna for Emerson College's WERS (88.9). It will be quite a boost for WHRB to move off the single-bay antenna on Harvard's Holyoke Center building. They'll gain several hundred feet by moving to the new antenna...and if WERS is any indication, they should get great coverage. No word on an exact date for the move.

*Not on the air: The Pioneer Valley, in Western Massachusetts, can be a very quiet place in the summer. All of the following were off the air during a drive through the area last weekend:

WAMH 89.3 Amherst (Amherst College)
WMUA 91.1 Amherst (UMass)
WMHC 91.5 South Hadley (Mt Holyoke College)
WNMH 91.5 Northfield (Northfield-Mt Hermon School)
WGAJ 91.7 Deerfield (Deerfield Academy)
WOZQ 91.9 Northampton (Smith College)

Also off in Berkshire County:

WTBR 89.7 Pittsfield (Taconic Vocational High School)
WJJW 91.1 N. Adams (N. Adams State College)
WCFM 91.9 Williamstown (Williams College)

I imagine it will sound very different in a week or two...

*More notes from that trip: Northampton's WHMP-FM (99.3) has migrated from a CHR format to modern rock. They're now known as "Today's 99.3," and they're not bad. There's some very good radio happening along I-91...from Greenfield's diverse rocker WRSI (95.3) and full-service WHAI (1240/98.3), down through Northampton's WHMP-FM, news-talker WHMP (1400), Amherst's rocker WRNX (100.9), and down to Springfield's heritage rocker WAQY (102.1), news-talker WHYN (560), and hot AC WHYN-FM (93.1).

*Close enough to New England to count: In the Albany market, the "Mix" talk-and-AC format on WEMX Ravena NY (94.5) is history. It's been replaced by a simulcast of the (presumably satellite) standards format of WABY Albany (1400). WEMX now goes by "94.5 WABY," and the WEMX calls are heard only on the top of the hour. I'm guessing that WABY is LMA'ing 94.5.

*And it wouldn't be a New England Radio Watcher without another reminder of why "Broadcasting and Cable" magazine can be so annoying. Today's issue (8/28) mentions that the WB television network has signed several new affiliates, including "WWBI-TV Burlington VT," then goes on to say "It was not clear at press time whether the new stations are full- or low-power." Someone should buy them a decent directory, or at least an Internet connection to the FCC database, so they can check and see that "WWBI" is in fact LPTV W27BI Plattsburgh NY...which gets into Burlington only in its dreams (or when there's good trop :-)

*Finally, a plug for the Boston Radio Archives, newly updated with some additional histories of Boston radio and TV stations. Set your Web browser to:

ftp://radio.lcs.mit.edu/radio/bostonradio.html

for everything you ever wanted to know about Boston radio.
We've added some new sounds as well, including some more
historic IDs (thanks, Dan Ferreira!), and even a bit of
yours truly :-)

## 2009. North Shore Radiowaves

Newsgroup: rec.radio.broadcasting
Date: 1995-08-30 00:00:00 UTC
From: sjsobol@junior.wariat.org
Message-ID: <422e9s$def@vixen.cso.uiuc.edu>
Source record: 29569

Greetings from the beautiful city of Cleveland, Ohio... Home of the
Rock & Roll Hall of Fame!

Speaking of which, everyone's trying to get into the broadcast studio, which
is now operational. AC WLTF/106.5 was the first one. AC WQAL/104.1 followed
with some others in the coming weeks, including modern rocker WENZ/107.9.

The broadcast studio is booked through at least the end of next year.. the
idea is to let broadcasters from all over the world do their stuff for their
home audiences.

The Hall opens Labor Day.

In other news, Top 40 WZJM/92.3 has found a replacement for Johnny "Johnny D"
DiModica, who bolted the station to go to Noble's top 40 outlet, WVKS/92.5
in Toledo. Marc Nolan shares the "Big Show" duties weekday and Saturday
mornings with "incumbent" Lee Anne Sommers. Nolan comes to Jammin' 92 from
Akron's WKDD/96.5.

WZJM owner Zapis Communications is pursuing legal action against DiModica,
who was reportedly under contract to the station.

Oh, and speaking of contracts!! Longtime WKDD morning jock Matt Patrick
is back at the station after they sued him for trying to leave to go to
the morning show at WLTF/106.5, after WLTF declined to renew the contracts
of the "Wake-up Club". As mentioned before, the new Lite Rock 106 1/2 morning
team consists of Jay Hamilton and our very own beloved Corey Deitz. WLTF
program director Steve LaBeau has promised me some information on the new
morning guys but so far, ahem, hasn't followed up ;) (Hi Steve :)

In spite of the fact that classic rock WNCX/98.5 has more claim to the
title "Hall of Fame Radio Station" than any other Cleveland radio station
except maybe oldies WMJI/105.7, 'NCX has not done a lot of self-promotion
in that direction except for the occasional sounder and a couple of bill-
boards. Perhaps they think everyone else is talking it to death... Meanwhile,
WENZ is offering a chance at front row Hall of Fame concert tickets (yeah!
The ones that cost $1,000 a pop!) to people who call in and suggest items
to be placed in the modern rock wing of the Hall of Fame. WKDD is also running
a giveaway with what they claim are "the last two" front row tickets.

Basically, with the Cleveland National Air Show happening this Labor Day
(as it does every Labor Day) as well as the Hall of Fame opening that weekend,
it is going to be EXTREMELY busy around here. Having done some of the
original fundraising (I'm a "Founding Member") I am REALLY excited and
proud of the civic effort this town has shown. The radio people are all
really pumped about it too and you can hear it in their voices. Throw in
a World Series for the Indians and a Superbowl for the Browns - and..

well... this is probably gonna be the best year Cleveland's seen in decades :> (please, no flames about the sports stuff, send me e-mail.)

I would really love to have Arbitrons for all of you to peruse. I don't have access to them yet... I'm working on it. I'm also attempting to find people in the business who might be interested in doing a Radio-Watchers column with me.

8 1/2 year midday vet Dennis McBroom has been fired from
Sandusky AOR KDKB(93.3). PD Tim Maranville says the station wants to
move in a different direction.
Carol Springer, who moved to KDKB after being fired
from KSLX in a contest-fixing scandal earlier this year,
moves from evenings to McBroom's 10AM-3PM shift.

Yes, I think they do.

I agree the we would be a better world without used car spots
(...nomoneydown8.2%financingotherrestrictionsmayapplyseeyourdelaerformroeinfor
moredetails...) and we would certainly be better off without televangelists.

Is Jimmy Swaggert or Pat Robertson more morally reprehensible than
LIVE NOODE GIRLZ? Certainly. Both are inappropriate messages to send to our
children.

I wish there were a way to shield our children from both forms of
pornography.

WOAH fellah. Let's draw a line in the sand here. There's nothing
wrong with "naked people." There is a huge difference between nudism and
adult bars. Let's not lump the two together.

>
> I guess it's OK to kill, so long as you keep your clothes on.

Same argument. We aren't talking about nudists here.

## 2014. American Top 40 show on vinyl

Newsgroup: rec.radio.broadcasting
Date: 1995-08-30 00:00:00 UTC
From: pcuser@IMPRINT.uwaterloo.ca
Message-ID: <422ea8$dfu@vixen.cso.uiuc.edu>
Source record: 29574

Anybody know where I could get my hands on some vinyl copies of Casey Kasem
on American Top 40? I am especially interested in shows from the mid 70's (74-76).
AT40 sure had some great jingles, not too mention long distance dedications.
I loved those spots that used to run for things like Pabst Blue Ribbon Beer.
I used to work at station that carried AT40when Shadoe Stevens was the host
and was lucky enough to get a copy of the show on vinyl, certainly some one
must have old copies some where. In a pinch I would send cassettes and sufficient
return postage.

Thanks

Steve Sobczuk email c/o Imprint- the University of Waterloo student newspaper.
519 886 7433

BTW, wouldn't it be cool for some of these 70's oldies stations to get those old AT40
shows on the air. Every sunday morning Buffalo's Rock 102 would count 'em down from
coast to coast with Casey, the way God meant it to be, it was like a tradition.

: that's not going to happen, because the business managers and bean counters
: want to see ad revenue, and the consultants and record companies are selling
: music that *they* want to succeed, not necessarily what the public wants to
: hear. More community programming would be great, but people aren't interested
: anymore in what's going on in their neighborhood and don't want to hear it.

That's not necessarily the case. Having worked almost ten years for WCRB, which has run various versions of a commercial classical music format since 1948, I believe that in audience-building the packaging of what you put on the air is as important as the content.

People most emphatically _are_ interested in what's going on in their neighborhood. The problem is, they don't necessarily want to hear half an hour of some newsie bullshitting with a member of the local board of selectmen about garbage pickup. Nor do they want to hear half an hour of bullshitting with some other town's selectman about _their_ trash collection. It has to be interesting stuff and it has to be packaged in a way that makes it easy to use.

What do those local bands sound like?

Do they play music that sounds good in an office environment?

Does it go well with driving? Working? Eating dinner? Making love?

If you just put any old music on the air at any old time, you're as likely to tune out the average listener as to tune him/her in.

How do your announcers sound? Do they talk too much? Is what they say relevant to the needs of your listeners?

I'm very much in favor of community radio, but it's got to sound professional, and it's got to fit the lifestyles of the listeners well.

A certain Boston-area college station with which I am affiliated plays jazz for eight hours a day, classical for eight hours a day, and punk rock at night. The announcers sound like college kids, talk way too much, and don't think very much about their listeners when choosing the music they play. They seem to share these three things with most other college or community stations I've heard recently. If they took the same ingredients and took the time to create a smooth, professional-sounding format, I have no doubt that their cume would be at least five times what it is.

>only that any tiny sample size cannot accurately guage real
>listnership. ]

I have often wondered just how Arbitron comes up with ratings for radio stations. It is not sample size alone that determines how accurate their ratings are. It is just as importatnt that the sample is representative of the population of listeners (a random sample of listeners would be ideal). The methods of measuring which stations they are listening to need to be accurate as well.

So, it is important to know how they choose the people and how the people report their listening. One potential problem I see is bias in the sample. I don't know how they decide who to ask to participate nor how aggressively they pursue people who aren't interested. This information is vital in determining the accuracy of the ratings. The other question is how they measure which station is being listened to. Is a station listened to quietly in the background equal to one listened to at full attention? What about "dial flippers" who catch 10 or more stations every hour? I know many people who have no idea which station (call letters, frequency) they actually listen to. Wouldn't being involved in the Arbitron survey cause people to be more aware of the stations and possibly affect their listening habits?

These factors should be taken into account and reported: who was selected to participate, who actually participated, who completed the survey questions, what information was used to produce the "market shares", etc. This info combined with general demographics could be used to assess the accuracy of the information. I'm sure Arbitron does all this, but I'm not sure how much of it they report. I have no idea how well the Arbitron system works, but I do know that if they really do things right, they can quite accurately assess the listening habits of a metropolitan area even with a fairly small sample size. Also if they are not doing things right, the ratings will be inaccurate no matter how large the sample size.

# 2017. Spanish Radio Talk Show To Link Stations Across US & Latin Am

Newsgroup: rec.radio.broadcasting
Date: 1995-08-30 00:00:00 UTC
From: Americas@aol.com
Message-ID: <422ecg$dlj@vixen.cso.uiuc.edu>
Source record: 29577

FOR IMMEDIATE RELEASE
CONTACT: KAREN KELLER
NETWORK AMERICAS
410-381-5989

TOLL-FREE CALL-IN RADIO TALK SHOW CONNECTS SPANISH-LANGUAGE STATIONS AND LISTENERS IN THE UNITED STATES AND LATIN AMERICA

Conversemos Esta Noche - Mon., January 1, 1996 - 10:00pm-12:00mid Eastern Time

WASHINGTON, D.C. (August 29, 1995) - An international Spanish-language radio talk show originating from Washington, D.C. goes on the air January 1, 1996 inviting listener participation through toll-free telephone lines from anywhere in the United States, Central and South America and the Caribbean. The two-hour nightly program, called Conversemos Esta Noche, is available to Spanish-language radio stations via satellite on a 100% barter basis starting January 1, 1996. The program will feature interviews with leaders of politics and industry, the arts and entertainment, and other fascinating and newsworthy guests that shape events throughout the hemisphere.

The new year will mark a new era in U.S.-Latin American relations. Never before in the history of the Americas has there been a regularly scheduled radio talk program allowing the participation of citizens on both continents to discuss timely issues of the day. Conversemos Esta Noche will be fast-paced, covering topics ranging from entertainment, domestic and international politics, business, trade and economics, human rights, arts and culture, and Hispanic issues, all from the perspective of mutual hemispheric interests.
Conversemos Esta Noche will be hosted by two Washington, D.C.-based journalists, Eugenio Gutierrez and Armando Trull, whose combined experience encompasses over fifty years of coverage spanning Latin America's "old and new order."

Eugenio Gutierrez of Chile has travelled the globe covering the biggest stories of the past thirty years. Assignments in 86 countries have brought Eugenio face-to-face with hundreds of the most influential people who have shaped world events in the fields of politics, economics and the arts. As a journalist, his credits read like a "Who's Who" of the most prestigious international news organizations, newspapers and magazines: Reuters, Agence France Presse, United Press International, Voice of America, El Mercurio, Cosas, Caras, Semana de Bogota and Caretas.

Armando Trull of Cuba, co-host and Executive Producer of Conversemos Esta Noche, represents the "new wave" of Hispanic journalists who present a different perspective; local in essence, but global in scope. Serving as News

Director of the CBS Americas Radio Network, a joint venture of United Press International and CBS Radio which he helped create in 1993, Armando has covered diverse issues that affect the daily lives of the millions of Hispanics living in the United States today. He also covers Washington for Colombia's CMI Television network and the BBC's Spanish News Service as well as being a frequent contributor to Mexico's Radio Red, Radio Formula and Radio Educacion.

To launch the program an aggressive promotional campaign is planned to maximize the program's visibility on affiliate stations, elements of which include television, newspaper and magazine advertising, and interactivity via the Internet.

Affiliates will receive pre-produced television commercials and camera-ready print and billboard ads, requiring only local customization. Additionally, affiliates will be provided with promotional announcements customized for the station inviting listeners to join them for Conversemos Esta Noche, which can be combined with the program's daily network topical promotional announcement.
The program is designed to be sales- and advertiser-friendly. Affiliates have eight commercial minutes per hour to sell and are supplied high-quality pre-produced sales material to the sales staff so stations can maximize revenue in the program's time period.

"It's no surprise that radio broadcasting is a fiercely competitive business for both listeners and advertisers now more than ever before," Said NetworkAmericas President, Joseph Ramirez. "But we have a way to make two hours of every broadcast day on our affiliates more attractive to listeners and more enticing to advertisers, which means it will be more profitable! Affiliates receive a turn-key package that includes top-notch, professionally-produced programming and premiere on-air talent; and it's all backed by a promotional support campaign designed to make it the most recognizable program in the station's line-up." Ramirez continued, "Conversemos Esta Noche's international flavor will certainly provide stations with a unique sales opportunity."

Conversemos Esta Noche will originate from state-of-the-art broadcast studio facilities in Washington, D.C. The program will be sent to North American and Caribbean affiliates via the Galaxy 4 satellite at 99xW, Transponder 1. Stations located in South America can receive it on the Intelsat 705 satellite at 310x, Transponder 11. Either satellite used requires a C-band digital audio satellite receiver and a receive dish antenna. Stations without the necessary equipment can often obtain the signal through a local cable television provider. NetworkAmericas will assist stations in locating the appropriate equipment, if needed.

Stations interested in becoming their market's affiliate should contact
NetworkAmericas

I very much like the idea of two-way give and take. But your analysis is
dead-on: it's got to be _name_brand_local_talent_. I used to be a HUGE
fan of the old SportsTalk show on WRKO from 6-8pm, when Dick Lutsk would
have a rotating array of Boston beat writers on nearly EVERY night.
Whether it was Joe Guillioti, Nick Cafardo, or any of the other Boston
Globe or Boston Herald beat writers (or the great Tim Horgan before he
retired), there was a rotating collection of name-brand talent to sit
there and disagree with Dick. It made for lively radio. I listened
nearly every night.

The "Fabulous Sports Babe" was a guest during tonight's Red Sox game.
Apparently, while her show is syndicated, she'll be doing it from Boston,
or at least she's claiming as much. She also claims to be a local. It
might be interesting -- I'll be willing to give it a listen -- but I still
think that Dale Arnold sounds more authoritative.

> If you look at both 'EEI and 'BZ(weekends), you hear hosts who are

Who? Gil and Gino, perhaps? I haven't listened to any pre-season games;
I've been waiting for the season itself. Unfortunate that they're on WBCN
for the next few years. (That is, until Westinghouse coughs up enough
dough to put them back on the *one* station they should be on, in
perpetuity -- WBZ. But I digress.) It means I'll have to break my silent
boycott of WBCN, which started when they began to carry Howard Stern.
Sigh.

Back to the two-person format. Hopefully they'll not get on well on the
air and it will give WEEI an excuse to dump Andleman. He's just not

interesting any more since he left the Sports Huddle. Nor is the Sports Huddle interesting without Eddie.

Well, you _did_ ask for comment...!

John Francini

Yet a further note: I'm not sure, but have been told that (770 New York) WJZ's call-letters came from the original owner's name, Jacob Zimmerman. Those call-letters are now used by WJZ Tv in Baltimore. Is there a radio WJZ any more?

Reply-To: r.kennedy@language.bbk.ac.UK

Here in London in the early seventies I used to listen to shortwave station WNYW; transmitters were in Scituate Mass, but studios were at 485 Madison Ave, NYC, along with those of co-owned local station WRFM.

I guess some of the presenters did duties on both stations, as we'd hear reports of how WRFM's MOR format had gotten top ratings in New York. And occasionally we'd hear WRFM's news ident on the half-hour instead of WNYW's own, in error I guess. The presenters I recall were Jim Aylward and Ken Lamb, plus a couple more with less certain spellings: Les Marzak and Bob Callomeer.

Well, WNYW closed a long time ago and I believe another station recently obtained the call letters, but is WRFM still around in NYC? And are any of the WNYW presenters still in the business?

Incidentally, Radio Netherland's Media Network co-producer Jonathan Marks broadcast an excellent feature on WNYW and its predecessor WRUL a couple of years back. He hopes to release that and some other fascinating historical features about radio stations on audio CD some time. But maybe that news is more relevant to rec.radio.shortwave .

## 2022. Digital Audio Radio Satellite (DARS)

Newsgroup: rec.radio.broadcasting
Date: 1995-08-30 00:00:00 UTC
From: ctrask@primenet.com
Message-ID: <422eak$dha@vixen.cso.uiuc.edu>
Source record: 29690

I would like to obtain technical information concerning the trans-
mission format of Digital Audio Radio Satellite (DARS) downlinks. In par-
ticular, I'm looking for a source for the method of encoding/decoding for
possible product development. I work as an RF design engineer for Fair-
child Data Corp. in Scottsdale, which, until recently, made the DART 384
rack that was used fairly extensively for broadcast downlinks.
In view of the amount of articles in "Radio World" for the last
few months, it seems that there may well be a viable market for a low-cost
DARS or DART decoder for small stations. This might be a product worth
looking into, but I need to find out about the digital side of things
before I venture too deeply into it. The RF portion is very simple.
Any assistance will be much appreciated.

Scott Fybush was showing me a note in the M Street Journal about how Arbitron had recalled the most recent Cape Cod book because of problems in 13 diaries. My immediate reaction was, ``Thirteen diaries out of, what, 15?''

It is a well-known fact that this sort of polling substantially under-represents minority opinions of all sorts, because the variety of opinions (or programming choices) is simply too vast to be accurately represented in any sample size which is cost-effective to collect. This is as true in ratings polls as it is in public-opinion polling. That's one reason why ARM (which measures in-car listenership by people who drive past a particular point) can often show different results from the sort of polling done by Arbitron and AccuRatings.

Quite a few actually. There are devices that will use
switched 56, ISDN, T1, etc. They are called CODECs (COders,
DECoders).

Talk to BSW, Harris, or anybody else. They'll send you
lots of splashy sales material.

Beware, though. The cost of the CODECs and the monthly
rent for the data lines will very quickly exceed the cost of a
decent STL system (a few years).

# 2030. Philly Personality in Murder Case

Newsgroup: rec.radio.broadcasting
Date: 1995-08-30 00:00:00 UTC
From: TRRadio@aol.com
Message-ID: <422ebr$dk7@vixen.cso.uiuc.edu>
Source record: 29698

There's an interesting story involving a Philadelphia air personality getting alot of play in the NJ/PA area:

Elaine Soncini has been the news director and morning personality at WPEN-AM for a number of years. Her late husband, Ken Garland, worked at WPEN and other Philly stations before dying of cancer a couple of years ago.
After his death, Soncini became involved with a married rabbi, who wife was murdered late last year.
News of their affair hit the streets, since the rabbi is suspected of hiring a hit man to kill his wife. Soncini admitted the two year affair on the air earlier this month and has been cooperating with authorities regarding the case. She also received police protection just after the rabbi's wife died, and one of her bodyguards fell in love with her. They married in June, however, he has been forced to resign from the Cherry Hill police department because of the incident.
No charges have been or are being considered against Soncini.

While it's not exactly the type of publicity you go looking for, WPEN is getting alot of coverage.

# 2032. New Job Service Web Site for Radio Positions

Newsgroup: rec.radio.broadcasting
Date: 1995-08-31 00:00:00 UTC
From: rrb@clm.aiss.uiuc.edu
Message-ID: <423his$n6@vixen.cso.uiuc.edu>
Source record: 29582
Cross-posted to: rec.radio.broadcasting,rec.radio.info,rec.radio.noncomm,ba.broadcast,chi.media

Rec.radio.broadcasting and AIRWAVES MEDIA WEB have begun a free job placement service for media positions.

This service is open to anyone seeking employment in radio broadcasting.
OR
Anyone offering employment in radio broadcasting.

This includes all facets of the industry from Air Talent and Board Ops to Program Directors, General Managers Sales Reps and Engineering Staff.

Note: Other than a cursory check, no effort is made to verify the credentials or legitimacy of an person or organization who posts here. Double check everything before you believe anything.

Still with me? Good... Here is the deal...

1. Send email to EMPLOYMENT@AIRWAVES.COM.
2. Use a descriptive subject that says one of the following...
o A) Help Wanted: Brief Description of opening.
o B) Position Wanted: Brief Description.

Note: You must use one of the above (A or B) as the beginning of your subject line or your message will be returned. This is required for sorting of you messages for easy retrieval. Obviously Help Wanted means you are offering a position, Position wanted means you are looking for work.

** Please Include Job Description In Subject **

Example...

- Help Wanted: Air Talent, New York City area
- Position Wanted: Engineer, 20 years Experience

3. Letter should be no more than 100 words (I won't do a word count, but brief and to-the-point will give the best impression)
4. Include your....

o A) Full Real Name
o B) Postal Address [Strongly encouraged, but no need to give your home address, A PO Box or business address preferred]
o C) Voice and/or Fax Phone (voice preferred)
o D) Email address
o E) If offering a job, your company name and title.

5. No resumes, but you can include a URL to your web or FTP site if there is material there (resume, picture, sound clips etc) that might be of

assistance.
6. If and when you fill your request, write and have your listing removed. It will be removed in 30 days anyway.

7. To look at the listings... point your Web Browser at..
http://miso.wwa.com/~wdp/job.html

It may take a few days to get your ad online.

Please address any other questions, problems or ideas to my *personal* email address EDITOR@airwaves.com.

---

A Caveat For The Job Seeker

We look at every submission before posting to see if it appears legitimate.

However we take no responsibility for any contact made via this service. You are doing this at your own risk. This is a publicly accessible global resource and can be read anonymously by potentially millions of web surfers. Do not take unreasonable chances, especially for individuals seeking employment. Please verify all respondents' identities by calling their company or station at some publicly accessible number and verifying the person's identity.

Especially if your ad says you are 'new talent' or 'looking for my first commercial break', be extra aware of scams which masquerade as job opportunities. Never send any money to anyone. Don't divulge much information on any first call (even less if the means of contact is email). Not to be sexist, but female talent should be extra careful about scams...

If this is too serious a risk for you, don't use this service.

But, as they say, nothing ventured nothing gained.

I hope you are successful

Bill

# 2033. ADMINISTRIVIA: Posting Guidelines for this forum

Newsgroup: rec.radio.broadcasting
Date: 1995-08-31 00:00:00 UTC
From: EDITOR@airwaves.com
Message-ID: <423h90$9g@vixen.cso.uiuc.edu>
Source record: 29583

It has become time for me to set out the basic guidelines for posting
to the rec.radio.broadcasting newsgroup, and some basic explanations
of what the group is for, and about.

Newsgroup rec.radio.broadcasting (rrb), and email digest
AIRWAVES RADIO JOURNAL (ARJ) are designed to provide a public forum
for the dissemination of professional-level information and
conversation pertaining to radio broadcasting. By
professional-level, we mean discussions of matters of interest to
radio broadcast professionals and those with a strong and serious
interest in radio broadcasting. We do not limit participation to
broadcast professionals, but do require a certain level of maturity
and intelligence when posting here.

In order to keep the forum from erupting into flame-wars and to keep
it on topic, rrb and ARJ are *moderated* forums. This means that all
posts must be approved prior to publishing. This document is designed to
give readers a feel for what is acceptable to publish here but is not
designed to be an all-inclusive charter.

In order to be accepted for inclusion in rrb/ARJ, a post must have the
following minimal attributes.....

1) All posts must have a valid name attached to them in some way.
This means one of the following...
a) A *real name* (your actual name) This is preferred.
b) Your *on-air name* (you must include the station/network at
which you use that name)
If your Internet host doesn't include a real-name as part of the"
From: line, then you should add it to the end of your post.
If you are posting sensitive information, and don't want your
name used, let me know and I'll try to cover for you.

2) All posts must have a valid 'SUBJECT' line.
This means that the subject line must accurately reflect the
content of the post. As a thread drifts from the original
focus, the subject line should be changed to reflect that shift.
Posts without a Subject: line or ones which use a bogus
subject may not be posted.

3) All posts must pertain to the charter of the group, *RADIO* broadcasting.
Occasionally a post about TV will be OK'd if it appears to
have a broad interest to radio people. However, this is considered an
exception and is not encouraged.

4) All posts must have a valid return address. Posts with email addresses that bounce may be excluded as a means to curb forgeries.

5) All posts must be submitted as "ascii-text".
Binaries, MIME and other attachments are not post-able to netnews.

6) All posts must be formatted to an absolute maximum of 78 columns. The standard for a text-terminal is 80 columns. We specify 78 to allow for quoting in followups. Failure to do this will result in "line damage" which is the uneven wrapping of lines that are too long.

7) Quoting of previous article text should be kept to a minimum and *never* exceed 49% of the entire article. Never quote the signature files from previous posts. Only use the bare minimum needed to make your points. If replying via the Digest, "please" never quote the entire (or substantial portion of) the digest.

8) Please distinguish between the 'followup' and 'reply' functions of your newsreader. Followup sends your response to the group, reply sends it to the poster via email. When replying to a personal request for information which is of limited or no real interest to the entire group, please email to the poster. There is no purpose served by posting replies to very personal requests to the entire globe. However, if the requested information is of potential general interest, then please do post.

9) When posting Help Wanted or Positions Wanted, please include a Full *REAL* name, Company name, postal address, FAX and/or voice phone and (if applicable) email address.

10) When asking for, or offering, information about a local station or personality, always give a little background. Remember most people are not familiar with your market. If you use a station's slogan, always include the calls and city too.

11) Commercial postings are a delicate issue. Some would like to see none of it, others seem to take the tack that mild commercial posts are OK provided they are not too 'in your face' and are part of the flow of conversation. The moderator makes all final judgements on acceptability of commercially-motivated posts. If you are in any way connected with the company you are posting about, you *must* disclose that affiliation even if you are not an official spokesperson. Avoid blatant commercials. Make your points in conversation. Never overtly bash a competitor's product. Be nice, it will be to your ultimate benefit.

12) Remember that you, the poster, bear all responsibility (if any) for copyright, libel, trademark and other matters when posting to the Internet (not just to this group). Please try your best to be accurate in your posts. If you post your opinion, make sure it is cabled as such. Please try to obtain permission when reprinting from copyrighted sources. Always give attribution of your sources when available. Summarize when possible to avoid potential copyright issues. So far copyrights have not become a problem on the Internet,

but as the net grows, it may become more of an issue.

13) Flames are not permitted on this forum. A flame is defined as "personal insult or ridicule". It is perfect;y fine to argue the points or opinions raised by a poster, but not to personally insult the poster. In other words it is acceptable to say... "Your stated opinion is stupid..." NOT "You are stupid for having that opinion..." It is fine to articulate and argue points of view, but make sure you counter it with another point-of-view and not just hit people over the head. Calling of names is also considered a flame. We have conversations here, not shouting matches.

Also avoid posting...

* Known false or misleading information.
* Items that you know are a violation of copyright.
* Overtly profane posts (profanity is not forbidden, just use discretion).
* Loooong signature files. 4 to 6 lines is a good soft-limit.

...VERY IMPORTANT... ...VERY IMPORTANT... ...VERY IMPORTANT...

Every poster is responsible for what (s)he posts. I make no effort to verify authenticity of postings and any copyright, slander or other legal matters arising from a public posting belong with the poster. Please use discretion when posting potentially damaging information to this, or any public, forum.

Thanks for reading. Hopefully this will clear up some of the misunderstandings about posting to rec.radio.broadcasting. For a more inclusive charter of this group, send email to rrb-charter@airwaves.com .

I agree. Among the negative influences appear to be the all-out emphasis
on business and none on labor (when's the last time a daily newspaper or
TV station had a segment about labor issues?)

Another negative influence is the holy belief that "progress" is more
important than quality of life. Who has examined exactly *why* those guys
keep "going postal" and shooting people in mail sorting centers -- is it
the stress? The automatiion too fast? The noise of the room driving
people over the edge? Why aren't the broadcast media talking about
quality of life issues?

# 2035. J.P. McCarthy Theme

Newsgroup: rec.radio.broadcasting
Date: 1995-09-01 00:00:00 UTC
From: forsling@iastate.edu
Message-ID: <427kom$7fg@vixen.cso.uiuc.edu>
Source record: 29501

I was driving to work on the morning after J.P. died and was, by chance, listening to WJR and heard the documentary on J.P. that the station aired at 6:15 A.M. It made me come close to crying.

Anyway, the next day, the fellow taking over the time slot opened with a complete playing of the theme cut that J.P. McCarthy used for years. Can anybody tell me the name of the selection?

It's big band, all instrumental with a sort of slow "loping" rhythm. The band sounded a lot like Count Basie's. If you know, let me know, and I'll be most grateful for the help.

Thanks

Don

> >with pc's at both ends & soundcards?

The Telos Zephyr codec (made by our company) will do this. At 56 kbps, you can have 15 kHz *mono* transmission. You would need two 56k lines for stereo, or one ISDN line.

The problem with pc's and soundcards is twofold (assuming you mean SoundBlaster type cards) :

1) You can't get enough data reduction.

2) You can't get a "streaming" output - the data goes to and comes from the pc's hard disk.

A note of caution: Codecs have too much delay for live off-air monitoring. So you have to get used to listening to a raw program feed (maybe with a local compressor for that jock-pleasing sound?). Most of our customers using Zephyrs for this application are using them for back-up to the usual STL. With dial-up ISDN, it is a lot cheaper than maintaining analog Telco back-up.

# 2039. Re: ...on responsibility and media

Newsgroup: rec.radio.broadcasting
Date: 1995-09-01 00:00:00 UTC
From: rrb@clm.aiss.uiuc.edu
Message-ID: <427kp3$7gh@vixen.cso.uiuc.edu>
Source record: 29505

Someone wrote me in email about this thread on 'responsibility in media' and the airing of adult bar commercials and all. Since it is email, I have deleted the name. But I wanted to post my response to him since this thread has now begun to grow.

John_Q_Poster@imaginary.domain.net wrote...

} I simply feel that, as a society, we have become more coarse. Look
} at how debate in our congress has fallen to a level of meanness that is
} sick. Look at our current crop of heros and role models. I'm a Libertarian
} (that's an anarchist with a necktie), but I see a society that has created
} Madonna and Charles Barkley as in need of reassessment.

I do agree with the above statements totally. I believe that we have embraces the 'anything for a buck is good' philosophy so entirely that there is little place for humanity in modern America and the world.

However, while I do agree with you, I feel that most Americans fail to really focus on the problem, but instead take great glee focusing on the 'symptoms' of the problem. We have become a nation of 'weed-eaters' in that we take out our philosophical weed-eater and go to work cutting off the tops of the problems we see, but when we are confronted with the idea of going after the roots, we don't bother because that would entail personal work and we might not like the fact that many of us who rail against the 'societal weeds' are not willing to admit that we are part of the problem. We would prefer to find a straw man to burn, someone 'else' on which to place the blame for the rough edges of the human condition.

} Perhaps I'm wrong, but I humbly suggest that we should consider this
} issue as a society. Do we have the responsibility of making our society
} more civil? Less coarse? Parents set standards fore their children. Don't
} we also need to set standards as a society?

We do have standards. They are "Make as much money by can means that you can, regardless of who gets used, hurt or what the ultimate price winds up being on society in general". If humanity or sentiment get in the way, you are doing something wrong. Simple...

It's simple market economics. A well adjusted and healthy society is not as likely to be good little consumers of worthless goods. The more alienated and isolated of a society we have the more likely they are to buy stuff which promises to restore what they have lost... Love, pleasure, status, sex, power...

When a society can support $3.99 a minute 1-900 masturbation lines by the score, it is a pretty sad commentary on the status of our personal

lives. We can try to stamp out those lines, but that wont cure the *cause*, which is a society in ever increasing isolation.

I believe that things like the abuse of mind-altering substances, casual sex, porn, and all the other things we love to hate are *symptoms* of a society that has sold its soul for the siren song of transitory material worship. We are a vacant society, devoid of anything to really satisfy our beings. So we take substances that either numb our senses or provide us with a false sense of happiness and this is a substitute for the real human bonds we need, but have thrown away in favor of more money, getting-over-on- our-neighbor, status, and all the rest of the shit that we, as a society, have placed ahead of what really matters. A good friend of mine once remarked that "...the reason they don't let you take [euphoric] drugs in this world is the same reason you are not permitted to drink ice water in hell..." I agree with that analogy. Drugs relieve, on a temporary basis, the inner turmoil of living in a spiritually bankrupt society based solely on greed and materialism. They do not 'cure' the problem, they just make it go away for a short time. Same with ice water in hell. You are still in hell, but you get a moment of relief. These things are seen in our society as the 'problems' but I submit they are but the symptoms of a problem we all are a part of, but choose not to admit to.

Even religion has degenerated, in many cases, into a game of name-calling and judgement of all who deviate from any given dogma. That is sad, because even religion is now, in many cases, a form of drug, a form of business where peace of mind is sold and traded for bondage to a leader.

} I know I must sound like a radical right-winger, but I
} assure you I am anything but.

No you don't sound like a radical right-winger, you sound like the average American who has traveled along with the crowd until he finds himself in a strange land without a return ticket. So we look for 'targets' to focus our anger on. Like the weed-eater, you can cut and cut and cut, but until you see to the roots, the *real* causes of our societal decay, you will never remove the problem, all we will wind up doing is giving ourselves the illusion of making the problem *appear* to go away, only to return in a stronger form, because the cause, a society that has (as Pink Floyd stated) 'traded its heros for ghosts, hot ashes for trees and hot air for a cool breeze' still remains and we as individuals in that society are not willing to change ourselves, we insist that *WE* are ok and *they* are the problem. My problem with the radical right (or the radical left for that matter, they are really more similar than different) is that they are focusing so much attention on these symptoms and telling the nostalgic faithful that these 'symptoms' are the 'problems' and if we just cut off the weed-tops often enough, the problem will vanish. As any gardener knows, that is hogwash.

I say that until we, as a collection of individuals choose to change our focus in society (which I do not see as something we are actually willing to do) the only other option is a police state that tries to enforce a morals code by taking away choices, instead of offering something better that satisfies the cravings we all have. But that means admitting that we are all part of the problem, and Americans are too lazy, self-righteous and prone to blame 'the other guy' to ever embark on such a journey. Sad thing is that even the police state wont stop people from craving and finding these things (if at all possible) it will, however take away any freedom in the society. Freedom is a two edged sword. It cuts for the just and unjust alike.

That is my take on it all. Bet you are glad you responded, huh?

Turn off your radio and/or TV or tune them to stations which don't broadcast the stuff. Personally, I seldom watch TV (maybe twice in the past 2 months), and my radio listening is very selective. Once a regular KGO (KABC's sister station in SF) listener, I decided to cut back my listening because I found their sensationalist talk hosts and their annoying scam commercials too much to bear.

While the vision of pink suburban men in polyester ogling women in a topless club is rather disgusting to think about while listening to the radio, so too is listening to scams about "patent it yourself" companies and "the big boom in wireless cable TV" trash. At least the adult clubs deliver more than the patent and TV scams do.

I believe the situation will remain because the big stations with years of name recognition (usually owned by the big companies) tend to win over and over again. Why change something that's making them rich? Considering that a sample of listeners in my office couldn't turn up anyone who could name a KGO talk host, still KGO has maintained the #1 spot in local radio for almost 10 years. If KGO went off the air for a month, people would likely *still* fill out diaries saying they're listening to it.

Source record: 29508

Reply-To: bl058@freenet.carleton.ca (Dan Stark)

He's back. The original screamin' TV voice of K-Tel, the first A&W Root Bear, class clown Scruff Connors lands back in Niagara again starting Tuesday, this time to spin alternative tunes in the morning on 101.1 The Planet in Niagara Falls/Buffalo.

Toronto Scruff fans, you've got a real DX project on your hands this time if you want to catch the show. Planet's signal is exceptionally weak, and can be picked up in Toronto only with a good antenna and equipment, and a lot of patience. The Planet primarily targets Buffalo where I think it has around a 2 share, and currently has a grand total of about 30,000 listeners in Canada where the station is based. This move might change that finally.

Dan

In article <422ec3$dku@vixen.cso.uiuc.edu> sjsobol@junior.wariat.org (Steve Sobol) writes:

>Or, you can have the current situation in N.E. Ohio: two modern rock stations, >two Top-40's, three our four AC's and a Top-40/AC hybrid, three country >stations, (well, four if you count WSLR, I was just counting the FM's)...

Steve,

At last check, WSLR wasn't country anymore... (yes, a shock - the station that spawned and hosted the career of Jaybird Drennan isn't country! :) When I was visiting Akron last, in June, they were satellite-fed "The Touch" - urban oldies. They dumped all their local jocks a year earlier when they joined the ABC/SMN Country Coast to Coast format, then they apparently segued to another ABC/SMN format, "The Touch".

I always thought Whistler would hook up one day with WERE-AM 1300 and do a simulcast. They've done it before in part - with Les Levine's old sportstalk show and with such things as Lumberjacks hockey. 'ERE has always had a crummy signal anywhere south of Northfield and simulcasting on 1350 would certainly be more interesting listening for Akronites than "The Touch"... as much as I hate both satellite and simulcasting, it beats that or being dark.

>break into the music? I've only heard one station even mention severe >weather with any kind of urgency - there were really heavy rains and bad >driving conditions down in Central OHio, and one of the stations down there >broke in (with the EBS tones, even, which surprised me) and explained where >the bad weather was, and how long the severe weather advisory was to last. >No one does that anymore. I'm not even talking about public affairs

You may have heard WQKT-FM 104.5 in Wooster, my old stomping grounds until March of last year. 'QKT, like most small market FMs between Cleveland and Columbus, *will* break in no matter what, with the EBS tones to boot. I know, because I did it a few times. We took pride in both our news image and keeping on top of severe weather, and (guess what?), we were number one in the Wayne/Holmes County area by a mile and a half. Even when WQMX went country and boomed in with its 100,000 watt-plus signal from just up the street in Medina. Heck, we even showed up regularly in the Canton book with 1-ish shares, and *we virtually ignored* most of Stark County (east of say, Massillon).

'QKT, FYI (PDQ ;), also ran Country Coast-to-Coast, which is how I knew what WSLR was running. I used to flip back and forth between 'QKT and 'SLR just to hear the different drop-ins. ;)

# 2044. Re: ...on the responsibility of media

Newsgroup: rec.radio.broadcasting
Date: 1995-09-01 00:00:00 UTC
From: mikedow@gate.net
Message-ID: <427kp9$7h4@vixen.cso.uiuc.edu>
Source record: 29510

>Mike,
> I'm afraid life is a mixed message. In our zeal to "protect"
>children we strip adults of interesting things. We seem to concentrate
>on "dirty" language and sexual things. All the while plopping kids in
>front of violent cartoon shows on Saturday morning.

Point taken. In fact, I'd rather be on your side of
the argument. I have no problem with sex on television and
I'd rather see nudity than blood (on TV and off :) ). I am
suggesting, however, that we consider the options we are
presenting children through the media.

As a longtime nudist I have no problem with the
body. It's what we choose to do with it. My neice, then
twelve, loved the song "Girls Girls Girls" by Motley Crue.
I have to admit that I liked it myself until I viewed the
video with her on MTv. Women in leather is fine for adults
(hey, bring 'em on!), but they are an inappropriate role
model to present to pre teen children. I would assume you
agree.

Our society has become more coarse. I place
**most** of the blame for this on the extreme right. Their
"win at any cost" ethic has done a great deal of damage to
the level of debate in our society. In New Jersey,
respected Democrat Bill Bradley is retiring and popular
former Republican governor Tom Kean is refusing to enter the
race for the same reason: the level of debate has fallen to
an unseemly low.

We need to raise the level of decency in our
society. I don't know the answer. I'm not sure I even know
exactly how define the problem. I only humbly suggest that
we ought to spend some time thinking about this problem.

It's easy to spout a reflexive defense of the first
amendment. I do that myself whenever I hear someone like
Pat Buchanan speak.

I'm interested in your thoughts on this matter. I
only ask that you roll it around for a day before
responding. Hopefully, Bill will let us keep this thread
alive if we stick to a single heading.

We boast that our
>commercial messages influence behavior when it's in our

best interest
>and deny it has any effect when our "creative" freedom is
questioned.
>
> A 4 year old child was killed in a hail of gunfire in
New York the
>other day. They didn't kill her with dirty pictures or bad
language.
>They did it with violence. The same kind of violence we see
day after
>day and night after night on the tube.

Excellent point, but I'd like you to take a longer
view. What's causing the breakdown in values that leads to
this type of violence. I'm not blaming Madonna for her
death, the issue is much more complicated than that.

> I believe we'd do much better to concentrate on those
things that
>do great harm to both the body and the spirit. To me,
violence is the
>enemy. Not sex.

Another good point. In my utopia, we wouldn't wear
clothes at the beach (and in Miami, that utopia exists!),
but children could walk to school without seeing a "LIVE
NOODE GIRLZ" sign. I've always throught our repressive
society was the cause of many of our ills. It may sound
like I'm encouraging more repression, but I'm not. I'm only
suggesting that we ought to consider what images we place
before children through media. Hustler magazine has it's
place, and those who would deny its publication are evil and
wrong. I feel the same way about 'Soldier of Fortune.'

I hope Bill allows us to continue this debate. If
nothing else, maybe I'll learn something.

Let's talk about emergency service.

Most stations (at least in LA) do at least time, temp and traffic
perhaps that severe weather report could have gone there.

How bad does it have to be to get the EBS tones? I've heard KFI
go into EBS mode over flash flood warnings in desert areas 100 miles
away from downtown Los Angeles. And of course, we hear about every
little earthquake (the big ones usually knock the station off the air)

Of course not every station does this consistently; those playing
NPR, brokered time, etc. probably don't do this at all.

This attitude is exactly why radio is not well respected by many people. Radio should at least try to pretend that they are also out there to please the listener. As long as they don't do that, people won't give a damn what's on the radio. Radio's not the only medium to blame, though. Hell, advertising is so prevalent that they run 2 of them before a $7.00 movie. Argh! Back to radio ... is it just me or is it pretty obvious that traffic reports are for the advertiser, too. The reports say the same thing every day - they are on every single station at predetermined times with the little "brought to you by ..." attached to them - but how many people really USE traffic reports? Look at the traffic jams, listen to the radio tell you it's jammed up after you're already there. Really useful, huh?

# 2048. Shock Radio for Republicans

Newsgroup: rec.radio.broadcasting
Date: 1995-09-01 00:00:00 UTC
From: jackmor@iglou.com
Message-ID: <427kph$7hj@vixen.cso.uiuc.edu>
Source record: 29514

Reply-To: riotgirl@actlab.utexas.edu

Shock Radio for the Republicans
by Shrimpy Scampers
In the dessicated, frosty regions of high-altitude, AM talk radio in theUnited States, only a few species of talk radio personalities have carved out niches for themselves and nested. This harsh geography starves out all but the heartiest and authoritarian of on-air personalities. Mere survival in these radio homesteads requires taking extraordinary rhetorical measures to sustain interest and market-share. Talk radio must be simultaneously "political" and "entertaining," participatory and spectacular--talk radio and shock radio.
Right wing AM talk radio was blessed with highly profitable markets in the 1990s, and until 1994, it could claim commercial success and simultaneously enjoy self-identifying with "underdog" Republican interests. Using Clinton's election in 1992 as a basis for backlash, talk show programs directed momentum-building campaigns of mass fax-and-phone call petitions to national politicians, especially in response to changing federal policies towards abortion restrictions, discrimination against gays and lesbians, and strengthening national educational standards. It was the nationally syndicated, "Christian talk" radio programs such as "Point of View" with Marlon Mattox and "Beverly LeHaye Live" which claimed great victories with fax and phone blitzing campaigns.
The talk radio listeners obeyed instructions and pulled the levers on November 4, 1994, and the Republicans rolled into office.
Anti-incumbency, anti-esbablishmentarian rhetoric had to give way to something new and reflective of the Democratic rout. Rush Limbaugh changed his introductory message, "America Held Hostage," to "America--the Way it Oughta Be." The voting, self-identifying conservative underdogs tuned in to hear themselves praised as democratic revolutionaries and visionaries.
The hype of Rush Limbaugh and other self-identified "mainstream" personalities on AM are the surface effect of a far more profound sea change in talk radio programming. On shortwave radio, call-in talk shows catering exclusively to racist, survivalist, right-wing audiences have proliferated in the past ten years. (For a list of current shortwave programs, http://www.tezcat.com/~kritikal/).
Shortwave broadcasters from the Patriot movement and Aryan Nations floated the first rhetorical trial balloons in interactive programming on abortion, gun rights, gay rights, and the multitudinous, inflammatory political discourses which have since suffused shock radio on the AM dial. The Republican Party learned from

shortwave, and made tremendous advances in 1994 using interactive talk radio technology.

As long as Republican party-sponsored talk radio programmers could claim underdog status, it was in every programmer's best interests to portray unity and solidarity within the party. But since the congressional elections, the Republican party has shown strains, as Christian Coalition sponsored politicians press to have their social agenda demands met and moderate Republicans balk. New Republican presidential hopefuls seem to join the race monthly, pressing all the troublesome social agenda buttons at once and trying to upstage the competition.

In this political environment, talk radio will play a divisive role in the Republican discourse. This is happening already, with Pat Buchanan's commercials during talk radio breaks accentuating the many differences within the party which threaten the convictions of his saved constituency. Meanwhile, nationally syndicated programs by audacious Democrats TomLykiss and Jim Hightower add new stations to their web of subscribing stations daily, and for the first time, meet Republican shock jocks on their own turf. It will be the same technology that cemented Republican victories a year ago that assists the party in splintering in the months preceding the 1996 elections.

The danger of talk radio for American party politics is that the technology is still too autonomous for party leaders to exert message management or spin control in time to prevent factions and in-fighting. This problem emerged for the first time with the Republican victories of 1994, and is beginning to come to the surface of popular talk radio discourse as Republicans begin to compete with each other in talk radio terrain. Rush Limbaugh, Beverly LeHaye, and the others served their purpose well back in the heyday of shock radio; they may now be the party's worst liabilities.

Dear: Broadcasters

I am looking for recordings of easy listening instrumental recordings. This genre of music populated many of North America's dials up until the late '80 when they became extinct from the airwaves.

Such artists, and I'm sure you will be familiar, that recorded such music included: Frank Chacksfield, Ronnie Aldrich, The Midland Radio Orchestra, The BBC Orchestra, with John Fox and Norrie Paramor. John Gregory, Frank Barber, Fairfield Orchestra, Bernard Ebbinghouse, Lex De Azevedo, Nick Ingman ect.

Many of these recordings as you know were custom recorded for airplay only, and were never publicly released. Since interest in this music have declined, there must be tons of this material floating around the libraries of the radio stations that use to air them just waiting to be tossed out.

A source of this material was Bonneville Broadcasting, who put this stuff on tapes and CD's. But they never sold anything to the public.

If anybody knows where I may obtain some of this music, I would be most interested. May be you were involved in the production of some of theses recordings, and if you can lend some assistance it would be most appreciated. Please understand that I am collecting these recordings because I am a dinosaur that enjoys good music. There are no commericial motives behind this request.

Sincerely

Derek Au

Message-ID: <427kpl$7hr@vixen.cso.uiuc.edu>
Source record: 29517

A bit off-topic, but I hope Bill will forgive me (won't you, Bill? ;-)

I'm looking for people with VCRs in the four markets listed above, to help me record the affiliation swaps that are due to happen September 10th. If you're able to help me out, I'd be happy to provide you with any/all of the following:

*Blank tape
*Postage
*A list of what to tape, when
*A trade for anything from my archives, including Boston's affiliation swap this past January, as well as my extensive radio aircheck collection (see, Bill, there IS radio-related material here!)

No commercial purpose to the whole exercise; just curiosity.

This offer also applies to anyone in other markets where affiliation swaps are upcoming -- those would include Greensboro/High Point/Winston-Salem NC, Honolulu, New Orleans, Bakersfield, Green Bay, South Bend, Evansville, and no doubt a few others that have escaped me. And I'm always interested in trading radio and/or TV with just about anyone, anywhere. E-mail me for more details...

Thanks!

Source record: 29519

Dear Brodcaster/Studio Technician

I am looking for a noise reduction unit that will remove surface noise from vinly recordings. Prior to the emergence of Cd's radio stations usually played their material from vinly or tape. My question is how did the radio stations clean up the vinly and make them suitable for airplay?

I know they would have used a unit manufactured by Burwin Labs. Has anybody had any experience with this unit? How well did it work. And where can I get one. Any thing that you can add to clear up the picture would be most appreciated.

* Kiss Off, Matty....:

Pyramid's(soon-to-be Evergreen's) CHR WXKS 107.9FM morning man
Matt Siegal had a rough couple of weeks, to say the least.
First, last week Portland/Auburn,Maine station pulled out of
his syndication deal claiming that his AM-drive show was degrading
to women. Then, his Providence affiliate pulled out earlier this week.
[Pyramid's Charlotte station carried the show briefly after its
debut in early April, but then dropped it after deciding that Matty's
schtick didnt go well with the AP format].
Finally, WXKS management decided to pull the plug on the 4-month
old syndication project altogether. This morning(8/31), Matt
got himself into more hot water with his female Boston audience
when began hopelessly arguing with the morning traffic reporter
Sue Tabb about the women's issues.(Matt is of the belief that a
woman shouldnt work if her husband does -- not a popular belief
in today's economic world).
Newcomer Tabb sounded a bit frazzled by Matt's on-air rantings.
She's probably not aware of her predecessor's problems with Siegal.
Long-time former WXKS traffic reporter Judy Papperrelli quit
and came back to the show 3 times in the past few years. Her comings
and goings were due to her on-air clashes with Siegal.
Papperrelli finally left the show permamnently back in March(a few
weeks before the syndication deal was about to start) claiming that
Matt's attitude made for an impossible working environment.

* More 'EEI moves :

All-sports WEEI AM 850 is getting ready to launch its new line-up
on Sept. 11th. In a move that kind of PO'ed WBZ AM 1030, 'EEI
lured away Boston area-based Sports Illustrated writer Gerry
Callahan to join PD Glenn Ordway on the new weekday 'Big Show' from
3pm-6pm.
Callahan was part of WBZ's popular Sunday night 'Calling ALl Sports'.
[WBZ announced that New Engalnd Cable News' funny guy sportsanchor
Mike Adamas will now join 'CAS' panel which also includes
WBZ-TV's weekend sports anchor Steve Burton and the show's producer
local businessman Norm Resha.]

In the off-air move, WEEI named Jason Wolf as the executive producer
for all of its local shows : the A-team(12-3pm) with Eddie Andelman+
Dale Arnold,the Big Show(3-6pm) with Glenn Ordway and Gerry Callahan,
and Ted Sarandis' 'Ted Nation'(6-11p). Wolf has been with 'EEI
since its inception in September 1991. Former executive
producer Lou Imbriano becomes production co-ordinator.

Also, highly-respected 18-year Boston radio vet, marketing guru Beverly Tilden, who was hired away from Pyramid's CHR WXKS-FM last June, was also sent to the beach this week. This off-air move and other upcoming on-air changes signify that 'EEI is taking the new direction : sports and nothing but sports. Now, only if they could quality callers...:-)

* Comings, Goings, Changes, Brief News :

- On Monday, 8/28, all-sports WBPS AM 890 sent Stu Taylor to the beach in favor of Mike Evans who joined Ricco Petroccelli on the weekday morning(6-9a) round-table discussion show.
Evans did some work for Global Radio Network.
Local businessman Taylor was with the show since it began on March 27.

- As has been expected for some time now, WEEI and the Celtics will finally name quality local sports talent Doug Brown as the radio voice of the Boston Celtics for 1995/96 season. Former Celtic Cedric Maxwell has already been named as the analyst.

In the early '90s, Brown worked as an analyst on the Celtics' radio broadcasts and was part of on-air line-up on the old WEEI AM 590, when the station was owned by the Boston Celtics. For the past couple of years, he worked as pre&postgame, half-time, and in-between periods host for the Bruins and the Celtics telecats on WBSK-TV38.[TV38's new owners(Viacom) decided to decided to eliminate the host role for its C's and B's road telecasts for this upcoming season.]

Brown has been a voice of Boston University's sports (football, hockey and basketball) on WBUR-90.9FM for the last few years.

- Afternoon voice Neal Robert(1-5pm) on AP WFNX 101.7FM who's been with the alternative rocker since 1986 resigned on Wed. Aug.30th. For the past few weeks, WFNX has been running on-air spots asking anyone with any kind of radio experience to send in their aircheks They also have 'wanted DJ' ads running in their media-cousin Boston Phoenix weekly. Robert's departure from the station might be tied to this latest search campaign. Weekend/Fill-in Kim Corbet(sp?) is doing 1-5pm until further notice...

- AAA WBOS 92.9FM's PM-drive jock Carolyn Morrel is on maternity leave. Weekend/fill-in Geoff Allen is doing her shift until she returns.

- Infinity's WBCN 104.1FM, which kicks off its NFL's Patriots season for real this weekend, has added former Patriot Andre Tippett to its pregame and postgame shows with sports director Paul 'Tank' Sferuzza and weekend DJ Bill Abbate.

- In case anyone tracks down Boston radio personalities, former WRKO AM 680 newsanchor Pat Carrol is now with all-news WCBS AM 880 in NYC on weekends...I heard her myself...:-)
Her WRKO/WHDH partner, Rod Fritz is still with MetroNetworks

delivering news for various stations(WRKO,WBNW,WEEI) in town...

-Mark

# 2056. Buffalo/Toronto:Scruff Connors returns...to CKEY

Newsgroup: rec.radio.broadcasting
Date: 1995-09-01 00:00:00 UTC

Reply-To: ag365@freenet.Buffalo.EDU (Carl K. Gorney)

Veteran Canadian AM driver Scurff Connors,who's done morings as CILQ(Q107, Toronto),CHTZ(97.7 HTZ FM,St.Catharines)and most recently in Winnipeg at CJKR (hope I got the calls right),returns to the Niagara region Monday(9/4)as the new AM driver at CKEY(modern rock,FM 101 The Planet). He replaces Kerry Gray, who left Tuesday to do AM drive at KBCO in Boulder/Denver,CO-and who had been elevated to AM drive only a few weeks ago,after AM driver Jon Summers was sent to the beach.

# 2057. New England Radio Watcher: More on WGBH

Newsgroup: rec.radio.broadcasting
Date: 1995-09-01 00:00:00 UTC
From: fybush@world.std.com
Message-ID: <427kns$79v@vixen.cso.uiuc.edu>
Source record: 29586

*Ron Della Chiesa said goodbye to "MusicAmerica" today (Thursday, August 31), with a final show that concluded with Frank Sinatra's "My Way." Della Chiesa will be back next Tuesday on GBH, but with a morning classical show that promises to be a far more sterile undertaking. It will be very interesting indeed to see whether donations to WGBH drop off as a result of the schedule changes, and if so, by how much. We will, of course, keep you posted.

*From the TV front: After more than 5 years off the air, Concord, New Hampshire's WNHT-21 is back up and testing. They'll return soon as WNBU-TV, a mostly-simulcast of Boston University's WABU-TV 68 Boston. It's a killer signal...covers Southern New Hampshire at least as well as the state's only commercial VHF, WMUR-9 Manchester. Meanwhile down in Boston, Peter Temple has left his job as general manager of Tribune's WLVI-56 (WB). No word on a replacement; the station is also without a news director.

-=Scott Fybush-fybush@world.std.com=-

# 2058. Re: New England Radio Watcher: Miscellany

Newsgroup: rec.radio.broadcasting
Date: 1995-09-01 00:00:00 UTC
From: fybush@world.std.com
Message-ID: <427knv$7a5@vixen.cso.uiuc.edu>
Source record: 29587

*A minor correction: WKZS Auburn-Portland ME was *not* the last remaining affiliate for Pyramid's failed attempt to syndicate the "Matty in the Morning" show from WXKS-FM (Kiss 108) Medford-Boston. There are two others...for now. WWKX Woonsocket-Providence (chr "Kix 106") and WKSQ Ellsworth-Bangor ME were also on the Matty network...but now Pyramid says it's ending the syndication effort anyway.

*Promotions director Bev Tilden is out at Boston's sports radio WEEI (850).

*And Thursday marks the end of the line for one of Boston's finest radio traditions. Public radio WGBH is reshuffling its schedule and dropping Ron Della Chiesa's 2-5pm "Music America" program, which mixed jazz, pop, and whatever else Ron could find in the "Great American Songbook." Now 'GBH is trying to accomodate the new 2-hour All Things Considered (never mind that it's already heard at the same time on WBUR in Boston, and can be heard on the west coast feed two hours later on the UMass Boston public radio network), and so they're dropping MusicAmerica and replacing it with classical music in the afternoon. Meantime, WGBH is adding an extra hour of Morning Edition as well (again, the program is already heard for 3 hours every morning on WBUR). ME will run from 6-8am, followed by classical music hosted by Della Chiesa. Non-classical music has to wait until 7pm, for Eric in the Evening and jazz Monday-Thursday, and Della Chiesa's new "Jazz Songbook" show on Friday.

GBH listeners have been up in arms...but the station has been firm about making the changes. A listeners' group is threatening a subscription boycott of $100,000 or more...we'll see what happens.

# 2059. WMEX REUNION UPDATE 1

Newsgroup: rec.radio.broadcasting
Date: 1995-09-01 00:00:00 UTC
From: p006778b@pbfreenet.seflin.lib.fl.us
Message-ID: <427ko2$7aj@vixen.cso.uiuc.edu>
Source record: 29588

Wow! Your response has been overwhelming, so much so that I had to call on my friend, America's foremost radio special programming producer and archivist, Ed Brouder, of Man from Mars Productions!

We are still seeking out WMEX air talent. PLEASE notify me! We need your comments and airchecks!

A tentative deadline for submissions has been set for February 1, 1995. We are planing a 1-hour cassette, or even a picture (!) CD! Some of the profits will benefit the Muscular Dystrophy Association. My wife has MD, and we'd rather see our profits help as many MD-stricken people as possible. This is often a terminal disease, and the best we can do now is to make the patients comfortable. Hopefully, our profits will help the MDA find a cure.

We realize that people will likely copy the tape illegally. But those who purchase the tape directly from Ed or yours truly, will receive a unique, special collector's item - we're not sure specifically, but it might be a full-color montage of authentic Music Surveys from the sixties, original autographs from a jock or two, actual Music Surveys, or whatever.

Those who contribute SUBSTANTIALLY in helping us get this project rolling may earn their copy FREE. By "substantially", I mean that you would find an ex-WMEX jock or newsman for me, have him call me, or at least call him, let hime know what we're up to, and give me his phone number. We do have airchecks, but we are looking for additional ones. Quality is extremely important.

Depending upon the actual expense of the project, the media we select, and the amount we wish to contribute to MDA, the pricing will be between $15 and $20.00 per LEGITIMATE, studio-quality copy.

We would really appreciate your letting us have your name and POSTAL mailing address, so we can keep you informed of this project, and so that you will be the first to have this once in a lifetime COLLECTOR'S EDITION tape in your hands ASAP. If you think you would like to own this valuable collector's item, while helping those suffering with Muscular Dystrophy, please leave E-mail with your name and address.

We would love to givethem all away, but we need to cover the high production expense, as well as office expense, and primarily benefit the MDA. Even if you earn a FREE copy, you could send a contribution, which will go directly to MDA. Details coming up! And thank you.

Try a specialty dealer like The Old Hippie (913-749-9315)
He's very expensive, but on older low-demand shows like AT40 of that era
he has some cheap items.

# 2066. North Shore: Correction and a clarification.

Newsgroup: rec.radio.broadcasting
Date: 1995-09-01 00:00:00 UTC
From: sjsobol@junior.wariat.org
Message-ID: <427kod$7d5@vixen.cso.uiuc.edu>
Source record: 29595

In the previous North Shore Radiowaves report, I incorrectly listed WLTF-FM as the first radio station to broadcast from the Rock Hall of Fame's broadcast studio, due to a severe case of brain drain (it's been a long week, folks). My apologies to WMMS-FM and extra apologies and many thanks to Buzzard Radio/OmniAmerica staffers Michael Rose, Chriss Scherer (sp?) and Barry Thomas who took the time to correct my mistake. Another first for the Buzzards!

Also, I referred to Zapis Communications as the owner of WZJM-FM. My friend Dan Steinberg called me on this one. Technically, it is another Cleveland company called Zebra Communications which actually owns Jammin' 92 and sister station WJMO-AM. However, Zebra Communications was set up in response to NAACP concerns about the Zapis family, who are white, running a radio station designed to cater to a largely black audience (never mind that Zapis has also run WZAK, one of the finest urban contemporary radio stations in the country, for over 25 years). The two people who run Zebra, Bobby Rush and Lynn Tolliver, are music director and program director at WZAK. And Zapis is the parent company of Zebra. So, I am going to continue to refer to Zapis as the owner, and I will continue to call WZJM/WZAK a duopoly (although in actual fact, it probably isn't :)

Thanks,
Steve

> Do oldies fans miss the now-defunct WKLR 93FM?

Nope. In fact, when in Indy -- which is quite often -- I generally listen to WNAP, the '70s oriented programming that replaced the oldies format on WKLR (now WNAP).

I grew up in Indianapolis in the '70s and spent an awful lot of time listening to WNAP so that could have something to do with it.

Ahhhh....the good old days.... when WNAP was running a current hits play list that was so tight you could set your watch by the song that was on the air :-)

# 2068. J. P. McCarthy WJR-AM in Detroit

Newsgroup: rec.radio.broadcasting
Date: 1995-09-01 00:00:00 UTC
From: tvz67399@pegasus.cc.ucf.edu
Message-ID: <427koj$7er@vixen.cso.uiuc.edu>
Source record: 29597

Recently while my parents were visiting Detroit from Florida where they live now they heard of the death of long-time morning drive guy JP McCarthy. I had hoped that someone on this group would post something about him for me.

Unfortunately, (unlike my parents) I was not exactly fan of JP's only a 2nd generation listener, since we left detroit when I was 11 and therefore didn't listen to AM talk radio much. Every morning JP was on in my parents and I still remember one of his shows. When I was about 9 y.o. my parents and I saw his afternoon public affairs show live in person.

I think it all comes down to "things in their proper order". For example,
sex in and of itself is not "bad", but so much of thwhat today's entertainment
media presents is casual, shallow, noncommittal sex that, in the long run,
does more harm than good.

Not that I'm excusing violent movies, tv and music, either . . but look at
Japan. Supposedly, they have stuff on TV that makes US programming look
weak . . .yet they're not at each others throats over there (at least
as far as I know . . .)

In my opinion, all thsis talk about objectional programming on radio/tv/movies/
music/Internet is a symptom of a larger lack of values in society. We've
got to decide *without* government interference, what type of common
values we want to have. Then, all this talk about media will be like
water off a ducks back.

# 2070. Easy Listening Instrumental Recordings

Newsgroup: rec.radio.broadcasting
Date: 1995-09-01 00:00:00 UTC
From: Curious.Party@clo.com
Message-ID: <427kog$7e7@vixen.cso.uiuc.edu>
Source record: 29599

Dear: Broadcasters

I am looking for recordings of easy listening instrumental recordings. This genre of music populated many of North America's dials up until the late '80 when they became extinct from the airwaves.

Such artists, and I'm sure you will be familiar, that recorded such music included: Frank Chacksfield, Ronnie Aldrich, The Midland Radio Orchestra, The BBC Orchestra, with John Fox and Norrie Paramor. John Gregory, Frank Barber, Fairfield Orchestra, Bernard Ebbinghouse, Lex De Azevedo, Nick Ingman ect.

Many of these recordings as you know were custom recorded for airplay only, and were never publicly released. Since interest in this music have declined, there must be tons of this material floating around the libraries of the radio stations that use to air them just waiting to be tossed out.

A source of this material was Bonneville Broadcasting, who put this stuff on tapes and CD's. But they never sold anything to the public.

If anybody knows where I may obtain some of this music, I would be most interested. May be you were involved in the production of some of theses recordings, and if you can lend some assistance it would be most appreciated. Please understand that I am collecting these recordings because I am a dinosaur that enjoys good music. There are no commericial motives behind this request.

Sincerely

Derek Au

## 2071. video news clearinghouse?

Newsgroup: rec.radio.broadcasting
Date: 1995-09-02 00:00:00 UTC
From: phil-was@ix.netcom.com
Message-ID: <42ag62$3f0@ixnews6.ix.netcom.com>
Source record: 29521

To whom it may concern:

I would like the opinion of professionals in the broadcasting, production, cable industry or other knowledgeable parties as to the need and viability of a worldwide video on demand clearinghouse for buyers and sellers of video news production, stock footage, newsgathering opportunities and programming.

Is the present sources of video news reliable?

Is there any benefit to a pay for basis system play rather than an all or nothing approach?

Is there a need to better organize the marketplace for industry-wide plan for the sale of products, collection from buyers, compensate sellers, and distribute the product?

What will the reaction of any competitors likely be?

Thank you for your assistance?

phil-was@ix.netcom.com

# 2072. Alternate Radio Sources...

Newsgroup: rec.radio.broadcasting
Date: 1995-09-03 00:00:00 UTC
From: rsmith@netcom.com
Message-ID: <rsmithDECI77.EEE@netcom.com>
Source record: 29522

I have a problem that I know is not unique. My local cable operator used to carry FM signals, but they dropped that service when they started selling DMX (Digital Music Express). Needless to say, I will *NEVER* get DMX, but this problem raises another question, even deeper and more troubling...

What I want to know is why, when it comes to radio, are there so few options (basically none) available to people who want more than what they can pull in locally with their own antenna? For example, I live in the SF Bay Area, and no local stations carry the Dr. Demento show. It just doesn't seem fair that I am at the mercy of a few narrow-minded program directors at local stations who don't see a demographic advantage to carrying the Doctor.

And there are other syndicated shows. Hearts of Space, Musical Starstreams, and many others that I've never heard of but I'm sure I'd love. Howcum there is no service that I can subscribe to to give me access to stuff like this?

What can I do to get myself more options? Is there a service (broadcast, satellite, cable, ISDN, I don't care what) that will give me access to the full range of radio in my area (Northen California) or perhaps even other markets?

I'm sorry if this is a "dumb" question, but I'm starting to get really frustrated. Is there anyone out there who can help me?

---

I work as an announcer for my local community radio station . It is not a college station, but rather a station with an incredible diversity of programming. We change our format every 2-3 hours. There are over 150 volunteer DJ's that make this station run. After reading your post in this ongoing thread, I felt I should get my 2 cents in.

Most of what you have said, I can agree with in theory. Making it happen in a station like ours is next to impossible. You have hit on 2 of our major problems: Announcers that talk too much and shows that don't sound professional. Just this week a letter was posted in our studio criticizing us for those 2 reasons. Because it is all volunteer, we have many people that just don't sound good on the air. Even though we cover a large market, we are in a small town, where the resources are slim. There are many ways to sound professional on the air, it is just a matter of taking the time needed to prepare for your show and practice, practice, practice.

Getting 150 volunteers coordinated to do anything, much less have all professional shows is next to impossible. But wait a minute. This IS community radio. It is put on by the community that it serves. Our listeners tune in knowing that we are not all experienced pro's. They tune us in to hear music and public affairs that they wont' get anywhere else, including the local commercial station in town. They also want and respect announcers that are knowledgeable and passionate about the programs they produce.

For us, achieving professional sounding, passionate programming with this many volunteers and a multitude of different types of shows, is a pipe dream at best. We will not always sound good in an office environment. Maybe we should be treated like old time radio. We publish a guide so listeners can tune in to their favorite shows. True community radio is a dying breed. We as well as other community stations, will have to find the right balance of programming, professionalism, etc. or we will not have a radio station any longer.

Brian

## 2074. ...on the responsibility of media (fwd)

Newsgroup: rec.radio.broadcasting

} From: mikedow@gate.net (Mike Dowling)
}
} >When a society can support $3.99 a minute 1-900
} >masturbation lines by the score, it is a pretty sad
} >commentary on the status of our personal lives. We can
} >try to stamp out those lines, but that wont cure the
} >*cause*, which is a society in ever increasing isolation.
}
} Exactly my point! Using your example of the 900 numbers, it
} it advancing technology that allows this or is it a serious
} breakdown in the fabric of our society?
}
} I guess this brings us back to our orignial questions (yes,
} this thread does have a point): Should radio stations
} accept ads from adult bars? Should the FCC regulate
} advertising from the adult industry? Should we, as a
} society, draw a line that shouldn't be crosssed by the
} media? If so, let's save the "could we" argument for
} another thread.

That is what I tried to address in my previous article. I guess I fall on the side of "he who trades his liberty for [the illusion of] protection deserves neither.

I thank you for refocusing my tendency to rant on the actual matter at hand.

I say that as long as there is a 'full-speed-ahead' 'damn the regulations' approach to broadcasting, then I feel that there should also be no regulation of broadcast content. It would be one thing if we could actually 'protect' children from the real dangers of life, but we cannot, nor should we. I feel, as Rich and many others do, that the role of 'protecting' should be the parent not the government.

I, like Rich, feel that the content of the average TV show is far more potentially damaging than virtually anything we now censor. And much of the offending material is actually *created* for kids. When violence is championed as the ',most acceptable means' of conflict resolution, when it becomes OK to kill and bludgeon a human being to death 'as long as (s)he is portrayed as *the bad guy* ', then we are condoning a situation that is in my opinion, far more damaging than anything we now call 'dirty', such as sexual content and 'foul language'.

So, in short, I say no. I already feel the government censors and regulates too much content. The recent de-regulation of ownership

rules will do more to censor content once in place than anything we have seen thus far. I am a bit of a maverick where kids are concerned. While I do believe in age-appropriateness, I am more of a believer in telling kids what the want to know. If I don't tell him/her, there will be someone else who will.

As my previous rant stated, we are so busy cutting off the tops of societal weeds that we fail to see that we are supporting the roots. I would not want the government to decide what is decent for my kids. I would not want the government to decide what is decent for me. If a parent is so busy that (s)he must place their kid in front of the boob-toob for extended periods of time (or is uninterested in what radio the kid listens to) then the parent is remiss and is at fault. Period!

On one hand, I long for the days of the NAB code of standards. On that hand I also long for public service in broadcasting. It is more than nostalgia, I truly believe that the industry was healthier then and we as a society were happier then too.

On the other hand, I think we need to stop worrying about the devil under every rock and get on with life. If we are going to de-regulate the mega-mergers and corporate takeovers that will forever change the face of broadcasting, then lets grow up and stop worrying about Howard Stern corrupting our children (when the biggest corrupters of children are parents who don't give a damn).

I stand for freedom and liberty. Unfortunately liberty cuts both ways. I would rather have liberty WITH all the jerks who might take advantage, than to lose liberty in the vein attempt to control these jerks, and wind up with a less free world and STILL have the jerks.

In broadcasting I guess I would prefer to HAVE Howard Stern, ads for adult bars and such and preserve the freedom for other odd-ball ideas to get aired.

Call me a radical, but I am in good company... Thomas Jefferson, Ben Franklin et-al.

Source record: 29452

Far be it from me to do anything that would hurt dear ole Scruff Connors, but when it comes to superlatives for your resume, hand 'em out to the public, but don't try to BS your peers. Scruff was neither the "original screamin' voice of K-Tel", nor the original A&W Root Bear.
That loud, stacatto voice that was an integral part of K-tel's advertising belonged to Bob Washington of CKRC Winnipeg, as anyone in Canadian radio knows. And figure it out! When those ads started, Scruff would have been about ten years old!
Furthermore, the A&W Root Bear was created by Vancouver advertising genius Ron Woodall, and was test-marketed here for number of years before it went national. Given, Scruff might have been inside the suit at one time, but the "original" Root Bear was a female mime artist and dancer from Vancouver.
Best of luck to our boy in Niagara. He's one of the few creative broadcasters left.
...And boy, can he make up a grest story...

# 2077. Stern Producer To Pay $1.7M

Newsgroup: rec.radio.broadcasting
Date: 1995-09-04 00:00:00 UTC
From: FFORTEJR@forest.drew.edu
Message-ID: <42doal$agk@vixen.cso.uiuc.edu>
Source record: 29454

WASHINGTON (AP) -- After six years of legal wrangling, the company that produces and broadcasts ``shock jock'' Howard Stern's radio show is paying $1.7 million to settle several indecency charges.

Under the negotiated agreement announced by the Federal Communications Commission on Friday, Infinity Broadcasting Corp. admitted no wrongdoing or liability in the five separate rulings by federal regulators between 1989 and 1994. The FCC agreed to dismiss another five pending complaints, the commission said in a statement.

The $1.7 million settlement is $9,000 more than the total of FCC fines pending against three Infinity stations that carry Stern's show: WXRK in New York City, WYSP in Philadelphia and WJFK in Manassas, Va.

Mel Karmazin, president of New York-based Infinity, said in a statement that resolution of the FCC charges maintains the company's ``pristine'' record and will ``enhance our opportunity to further expand the Howard Stern program into additional markets.''

Dozens of pages of transcripts from Stern's daily radio show documented the ``graphic'' and ``patently offensive'' material on which the FCC based its rulings.

Robert Ratcliffe, the FCC's assistant chief for law, said the broadcasts at issue ranged from graphic discussions of masturbation and child molestation to a segment in which Stern talked about shaving his posterior.

Karmazin said Infinity still believes Stern's material would not be found legally indecent in court. But the settlement ``will conserve the time, expenses and human resources of the parties'' involved in litigation, he said.

Noting that the FCC has logged no actionable complaints against Stern's show since the commission's most recent ruling in January 1994, Ratcliffe said regulators are satisfied that Infinity has cleaned up its programming.

``That Infinity has conformed its conduct or at least changed its ways was an important fact in us agreeing that this settlement is in our interests,'' said Ratcliffe.

Stern's agent and publicist were traveling Friday and could not be reached for comment, assistants said.

# 2078. Infinity Announces Settlement with FCC

Newsgroup: rec.radio.broadcasting
Date: 1995-09-04 00:00:00 UTC
From: bob.frable@phil.node99.com
Message-ID: <42doan$agr@vixen.cso.uiuc.edu>
Source record: 29455

AP reported in many newspapers that Infinity Broadcasting Corp., after a seven-year-or-so feud with the FCC over the alleged indecency of Howard Stern, his morning crew, and their so-called guests, announced it has reached a settlement with the Commission, paying it about $1.7 million.

On the surface, it looked a lot like the settlement between Major League Baseball and Pete Rose. In that, the former Cincinnati slugger, later manager, maintained his innocence over allegations of illegal betting, specifically on baseball games, but nonetheless agreed to accept the sport's penalty of indefinite disassociation with it.

Here, Infinity, the report says, "admitted no wrongdoing or liability in the five separate opinions issued by" the Commission since 1989, "and the FCC agreed to dismiss another five pending complaints ..."

Infinity CEO Mel Karmazin reiterated the firm's longtime contention that Stern's material would not be deemed indecent by a court. The settle-ment, he continued, "will conserve the time, expenses and human resources" of both sides.

As a regular Stern listener, I'm interested in what he'll be saying about this, if the company allows him to do so, on Tuesday's (5) show......

> won't be pleased if the show takes on a Boston feel just to please
> WEEI. If she's on 50 stations, 49 of them will be unhappy with that
> approach.

I think she might've been doing too much pre-launch PR hype for 'EEI
and might be got carried away with 'from Boston' thing...:-)
'EEI is stressing the fact that she's originally from Greater Boston
area('The Babe returns...' promos run endlessly on 850).
But basically, The Babe is staying put in the friendly town of
Bristol,CT.(ESPN central). As a matter fact, The Deuce(aka ESPN2)
will begin simulcasting the last hour(1p-2pm) of her live 4-hour show
on Monday, Sept.18th. WEEI becomes her 144th or 143rd affil on
Sept. 11th when it undergoes its line-up remodeling job('It's
never going to be the same...')....

Best Regards,

-Mark

# 2081. New Yorks' WRFM/WNSR/WMXV

Newsgroup: rec.radio.broadcasting

# 2083. Re - WRFM NYC, circa 1971

Newsgroup: rec.radio.broadcasting
Date: 1995-09-04 00:00:00 UTC
From: Bill Scheffler <SCHEFFLER@delphi.com>
Message-ID: <42doas$ahg@vixen.cso.uiuc.edu>
Source record: 29460

The New York-based "beautiful music" station WRFM followed its shortwave sister station WNYW into the broadcasting history books nearly a decade ago.

Management decided that the "beautiful music" wasn't attracting the most salable demographics, so it replaced the air staff with a younger sounding group, and switched the format to "soft rock" with the call letters WNSR for New York Soft Rock. That has since changed and the last time I paid close attention the station was billing itself as Mix-105, WMXV with music from the 70s, 80s, and 90s.

However, I believe the programmer who switched it from WRFM to WNSR, Bob Dunphy, recently left the station and that the format is being tweaked again.

Many members of the old WRFM-WNYW announcing staff are still around. I worked with Bob Kalomere and Ken Lamb for a short time in the late 1970's at WPAT but I haven't seen them since. Bob was doing a lot of voice over work at that time, and friends of mine who own production companies say he's still very active as a commercial and industrial narrator.

Last I heard of Ken Lamb, he had joined the booth announcing staff at ABC Television in New York. He also had a weekly national radio show featuring "beautiful music."

Les Marshak is a frequently heard commercial and voice over announcer. He's heard but never seen on TV's "Rich and Famous", department store commercials, and even big awards shows like the Oscars.

Another WRFM voice, Larry Yount was doing radio news in recent years at the New York Times station WQXR. He's also active in amature radio.

By the way, I recall that a small FM station on the edge of Florida's Everglades picked up the WRFM call letters as soon as they became available. I don't know if that station still exists, but WNYW's successor Family Radio's shortwave station WYFR is also now located in South Florida near Lake Okeechobee. It was moved there from Scituate, Mass. to provide better signal coverage in target geographical areas around the world.

Greetings AIRWAVES and rec.radio.broadcasting readers...

I have had, over the course of moderating and maintaining these forums, a handful of readers who have chosen to unsubscribe because they didn't see enough, or any, of a certain subject or thread.

I just got one of those today and wanted to make the point in public that I generally make in private when these kinds of responses are received, that.....

=======

AIRWAVES, and other similar forums are 100% "Reader-Driven".
We have no staff writers or columnists (other than our RadioWatchers, and they are also readers). Everything that you see in these forums originates with you, the reader...."

=======

Therefore it is important that you all understand that if you want to talk about it, and it is radio broadcasting related, then it is YOU who must begin talking about it. If not you, then who?

I cannot stress enough that we have over 1000 email subscribers now, and an additional 10 - 20 thousand newsgroup readers. Yet it is the same faithful posters who supply the lion's share of our content. While I am not asking these folks to stop (hardly) I do ask that the rest of you get in there and post as well.

If you don't see the content you want to see, then YOU start some new threads. If you don't then you have no one but yourself to blame if you don't find it here. I do my best to keep the excessive flames out of the group, to keep it radio-related as best as I can, but I cannot generate the traffic.

That is why I always tell people who write and praise *me* for these publications that "I only can be credited for what you n*don't* see here. It is the poster who is responsible for what you *DO* see here. The more interesting broadcasting news and information you post, the better we will all like it.

So get to work :-).

Thanks for listening and I hope to see more posts from more people. I know you are out there, so lets hear from you.

# 2086. Bob Gaynor - Awards Reception

# 2087. Dallas-Ft Worth gets an Urban AC

Newsgroup: rec.radio.broadcasting
Date: 1995-09-04 00:00:00 UTC
From: Tom Desmond <wsu@mimi.itg.ti.com>
Message-ID: <42do9l$ae4@vixen.cso.uiuc.edu>
Source record: 29525

As of this weekend, Urban KJMZ (100.3) has switched formats, giving the Dallas-Ft Worth area its first Urban AC outlet. As of yet, the call letters are unchanged, by the station is now identifying itself as "V-100, R&B Hits and Oldies". The legal calls are buried in the middle of a spot set at about five before the hour.

Per an article in the Dallas Morning News, the actual change occurred on Friday. The article notes that V-100 will be retaining the syndicated Tom Joyner show during morning drive.

It will be interesting to see how this move affects V-100's duopoly partner, KOAI (107.5, The Oasis), which has been getting a substantial Black audience in the absence of an FM station targeting Black adults.

I would also expect this to impact competitor Service Broadcasting's AM urban gold outlet (KKDA 730), and their plans to establish an FM duopoly with a rimshot signal at 105.7.

Tom Desmond

# 2088. Halifax, Nova Scotia Radio Watcher Report

Newsgroup: rec.radio.broadcasting
Date: 1995-09-04 00:00:00 UTC
From: harrett@ra.isisnet.com
Message-ID: <42do9l$ae5@vixen.cso.uiuc.edu>

***Please note new e-mail address-harrett@ra.isisnet.com

Friday September 01, 95

First off I want to say how great it is to be a part of "Airwaves Radio Journal". I look forward to given reports from the Halifax Metro area of Nova Scotia, Canada each month.

-There's a saying "Yes You Can Go Home", and that's exactly what Frank Cameron & Doug Saunders did when they returned to the Metro airwaves on August 23, 95 on Oldies 96/CHNS. The two most recently voted "most beloved two middle-aged men that were on late night metro CBC Television, where one read the news and the other read the sports and they both made fun of each other", have begun an epic journey to the early days of their legendary broadcasting careers, by returning to CHNS to do the morning show, have just closing out their celebrated CBC Television the week before. Both were at the station in the 60's and early 70's. The appointment of Frank & Doug to the morning show has left Bob Power out in the cold. Powers who was recently given the push from Q104 FM, where there lay offs took place to switch to auto-programs.
Along with Q104, its sister AM station, 780 KIXX Country, and now 96.5 SUN FM have switched to computer broadcasting in August/95.
(source Nacy Hilchie, promotions manager, Oldies 96/CHNS/Country101 FM, and "Cousin Clem of The Metro Weekly.

-Alot of people were confused by billboards that were up around Metro proclaiming "Billy Joel In Halifax", or Elton John In Halifax, Other major artists billed as being in Halifax were Fleetwood Mac, Whitney Houston, and Phill Collins.
The 15 aqua-colored bill boards didn't say when or where the artists will be in Halifax or even who is sponsoring the campaign. Dozens of fans were calling various radio stations wondering if the stars really are coming to Halifax. Karen Seaboyer, promotions coordinator confirmed the teaser was 96.5 SUN-FM. The campaign took shape when more was added to the billboards with the line "On 96.5 SUN FM". Sun Fm also now has a new slogan, with a little change of format by playing "Yeasterday's Hits & Today's Favorities".
(source The Halifax Daily News)

-Over at News Talk Radio 920/CJCH, the local phone in show "The Hotline" with Brian Phillips will start to be simulcast beginning September 11th on ASN Television (Atlantic Satellite System), from 9-10:am weekdays.
(source- Terry Williams, program director for 920/CJCH)

-The fall rating period is on for the Metro stations, giving away great prizes like Q104 (The Home Of Rock & Roll) is sending someone off to see Elton John In Las Vegas, Nevada. The ratings should be interesting to watch

to see how each station will do. Country 101 FM (CHFX) has the most listeners in the market this pass Sprning, while CJCH was the lowest, with a classic Rock Format, they since then have switched over to their News Talk format. I will have details at the time the ratings come out.

-UPCOMING MAJOR CONCERTS
C100 (Great Light Rock Hits) presents "The Rankin Family" at the Halifax Metro Centre on September 22 & the 23rd.

Country 101 FM (CHFX) presents "Sawyer Brown" with special guest "Charlie Major" at the Halifax Forum on September 15.

*From Halifax, Nova Scotia (Canada's Ocean Playground)

Source record: 29527

It looks like the areas north of Dallas and Ft. Worth will be gaining some stronger radio signals. Notably, Hunt Broadcasting has filed a petition with the FCC to upgrade KDSQ (101.7) from a C3 to a C1. The FCC has put this rulemaking out for comments. If this goes forward, this station will go from covering the 100,000 or so people in the Sherman-Denison, TX area it currently serves to covering close to a million people in Dallas's northern suburbs. This station currently programs a Soft AC format off of satellite.

Meanwhile, a couple of other Sherman-Denison area radio stations are also looking at facilities upgrades to reach into the Dallas radio market (Sherman & Denison are about 60 to 70 miles north of Dallas). Both of these other two stations are currently dark, and are owned by the Davis Family Trust. KTCY (104.9 FM) has a CP to move from Denison to Pilot Point (about 50 miles north of Dallas), and is under contract to Radio Plano, which currently owns a pair of Spanish language stations in McKinney and Cockrell Hill that serve the Dallas area. KTCY has permission to remain silent until the middle of December. They will be transmitting from the tower used by KDGE (94.5 Gainesville-Dallas-Ft Worth) to reach into the Dallas suburbs, with their new C2 facilities (this station was a class A). The other Davis station, KWSM (104.1) has won FCC approval on a rulemaking to upgrade from a class A facility in Sherman to a class C3 facility in Sanger, which is near Denton, TX...

Other potential drop ins to all or part of the Dallas market include a new C3 permit (107.9) in Gainesville, owned by Heftel Broadcasting (which currently owns several Spanish formatted stations in the Dallas area), a station at 105.7 (I forget the calls) that is being moved to Decatur, which is about 60 miles north of Ft. Worth--this one will supposedly be an Urban AC when it comes on, and 620 AM, which is moving from Wichita Falls to Plano (a Dallas suburb), and will carry big band music.

>From all this, it would seem like the Dallas area will be gaining quite a few new stations, although none of them (except possibly the AM) will be able to cover anything close to the entire market.

As these stations come on the air, I will provide reports on their programming--where I'm living, they should all come in listenably well.

Looking for suggestions - what does everydoby out there do for weekend kickoff type stuff? Y'know, beyond your average "Working for the Weekend" Loverboy garbage... any suggestions for an Alternative rock stations' weekend kick off? If you are doing something unique, let me know. Currently we are running a montage of movie drops and the like, but I'd like to do something special.

Thanks for your consideration, let's exchange ideas!

Beaner at Planet Radio, Jacksonville FL

Just a quick question - does anyone know of any sites on the 'net where one can access research figures? Either ftp or www sites would be great - there must be a database somewhere with all the info collated. Coming from South Africa I'm obviously interested in local (AMPS) figures, but it would be interesting to have a look at some from other parts, especially at methodology, sample size and results.

I have some research results that I'd be happy to post here if there was any interest. It was done a few years back in the USA and went into people's relationship with the medium; the effect it had on reducing loneliness; the effects of zapping; people's response to commercials and so on. Like I said, it was done a few years back by two sources: Henley Centre Media Futures '93 and Simmons '92.

As an aside, AMPS here in South Africa allegedly has a national sample of 2000 from which they draw radio and TV figures. With a total population of over 40 million with many different ethnic and language groups, is this a fair sample size?

Comments invited, either by posting here or if it is of limited interest by e-mail to top30@pixie.co.za

Tony

[Moderator's Note: Since ratings companies *sell* their information it is highly unlikely that they would be interested in offering anything of substance for free on the net or web. In fact they are reluctant to allow any of it to be posted even casually. Bill]

I have a problem that I know is not unique. My local cable operator used to carry FM signals, but they dropped that service when they started selling DMX (Digital Music Express). Needless to say, I will *NEVER* get DMX, but this problem raises another question, even deeper and more troubling...

What I want to know is why, when it comes to radio, are there so few options (basically none) available to people who want more than what they can pull in locally with their own antenna? For example, I live in the SF Bay Area, and no local stations carry the Dr. Demento show. It just doesn't seem fair that I am at the mercy of a few narrow-minded program directors at local stations who don't see a demographic advantage to carrying the Doctor.

And there are other syndicated shows. Hearts of Space, Musical Starstreams, and many others that I've never heard of but I'm sure I'd love. Howcum there is no service that I can subscribe to to give me access to stuff like this?

What can I do to get myself more options? Is there a service (broadcast, satellite, cable, ISDN, I don't care what) that will give me access to the full range of radio in my area (Northen California) or perhaps even other markets?

I'm sorry if this is a "dumb" question, but I'm starting to get really frustrated. Is there anyone out there who can help me?

# 2099. KKLF 104.3...Makes the change!

Newsgroup: rec.radio.broadcasting
Date: 1995-09-04 00:00:00 UTC
From: markj@got.net
Message-ID: <42doa1$af2@vixen.cso.uiuc.edu>
Source record: 29537
Cross-posted to: ba.broadcast,rec.radio.broadcasting

KKLF 104.3 (Gonzales,Salinas,Santa Cruz) has made the switch from Spanish to.....well...what do you call it???

Modern Rock?

Alternative Rock?

Could this be triple "A"?

We don't know be because phone calls made to KKLF on Friday night were met with "no comment" from staffers.

Monterey Bay "Rock Jock" staple Rich "right-on" Berlin(KMBY-AM-FM) says that "there will be a big news conference soon".

The format runs Bowie,Missing Persons,Talking Heads etc. I have not heard Stairway to Heaven or FreeBird....not once!

KKLF has great signal coverage into Santa Cruz County...I can't tell how the signal does in the other 3 counties(Monterey,San Benito,So.Santa Clara).

The Music *could* be coming from 22.300 miles away but thats fine! This format offers something to us late 20 somethings and early thirty somthings.

"My People" tell me that KKLF is owned by Jose Diaz who had the spanish format...former KHIP owner Mick Benidict and former KBOQ G.M. Terry Gillingham are said to be trying to purchase KKLF from Diaz.

Editorial>>>>

This is a bold move that is long overdue here in the Monterey Bay area. Since the format changed on Thurday I have yet to get burned out on it. I guess that means it wont last since all the *GOOD* formats (music)around here don't last more than six months.

Are the call letters gonna change????
We will see.

Mr.News

# 2100. KKLF (Gonzales,Salinas,Monterey Bay) 104.3

Newsgroup: rec.radio.broadcasting
Date: 1995-09-04 00:00:00 UTC
From: markj@got.net
Message-ID: <42doa1$af8@vixen.cso.uiuc.edu>
Source record: 29538
Cross-posted to: ba.broadcast,rec.radio.broadcasting

KKLF 104.3 HAS made the switch from Spanish to a new format. BUT what that format is being called the station is NOT saying. The change was made on Thursday August 31st.

What is it???????

Modern rock.....

Alternative.....

Sounds like BOTH!!!!! I can tell you what it is NOT!

Classic Rock.....

All Free Bird/Stairway to heaven.

Could this be what the big markets call AAA?????

I don't know and I really don't care. All I know is I LOVE IT!!
I have bitched and moaned in the past about crappy formats in this area but this one is great so far.

Rich"Right On"Berlin DOES have his hand in this pie. Phone calls to the station on Friday night recieved a "No Comment" from Berlin. "Were gonna have a big news conferance coming up soon". Berlin won't say what they are calling the format... or where it's coming from.

As I reported earlier in ba.broadcast former KBOQ(Monterey) G.M Terry Gillingham and former KHIP(Gilroy) owner Mick Benidict(sp) are reported to be trying to buy KKLF from Jose Diaz.

I should be able to get some real facts on this after the labor day weekend.

Has KKLF found a format that caters to us late 20's and early thirty somethings???

Where is the music coming from? We know that Rich Berlin is local but is the music...maybe not,but I think listeners around here won't really care if the music is sent from 22.300 miles in space since we can't get this anywhere else. The local signal is pretty good to Monterey,Santa Cruz and parts of San Benito and Santa Clara counties.

The true format test comes this labor day weekend....can Mr.News and his"people" burn themselves out on KKLF in three days?

We shall see.....

Roland makes a single rack height unit which will do single ended noise reduction via a four band system (stereo) and has an excellent hum cancelling circuit. The cost is just under 2K$.

From: jcrose@tiac.net (Jay Rose)
Subject: Re: Noise Reduction Units

In article <427kpm$7hu@vixen.cso.uiuc.edu>, Curious.Party@clo.com (Vik) wrote:

|: I am looking for a noise reduction unit that will remove surface noise
|: from vinly recordings. Prior to the emergence of Cd's radio stations
|: usually played their material from vinly or tape. My question is how did
|: the radio stations clean up the vinly and make them suitable for airplay?
|:
Mostly they used new recordings, treated them carefully, and replaced them when they went bad.

Or they carted the music and said the heck with the disk.

|: I know they would have used a unit manufactured by Burwin Labs. Has
|: anybody had any experience with this unit? How well did it work. And
|: where can I get one. Any thing that you can add to clear up the picture
|: would be most appreciated.

I've put Burwen TNEs in every commercial studio I've built since the early 1980s*, about eight of them. They're the only analog unit that worked, and -- once you learned how to adjust them for each disk -- were clean and reliable.

Dick Burwen still shows up at occasional Boston AES meetings. You might be able to find a unit thru him. If you're interested, e-mail me... the next meeting is 9/12.

* - Except my present room doesn't have a turntable. So I sold my TNE (thru the net) about a year ago.

>please the listener. As long as they don't do that, people won't give a
>damn what's on the radio.

It should be a fairly easy concept to grasp that if we don't please listeners, we don't get very many of them. And if we don't get very many of them, we can't charge advertisers enough to cover our costs. And if we can't charge advertisers enough to cover our costs, we go broke! All successful broadcasters are pleasing very large numbers of listeners, although no single broadcaster can please all of them, and in the largest markets may not even please a large percentage of them. The fact that a station displeases you, does not mean it displeases everyone.

If you read my original post, you will see that I refer to stations "buying" listeners with programming. That's simply one way of looking at costs. The listener, after all, does not pay commercial broadcasters (except for cable TV, which by definition isn't broadcasting anyway).

I am amazed at the fuzzy thinking about business matters that I see expressed in this group.

MI> Point taken. In fact, I'd rather be on your side of
MI>the argument. I have no problem with sex on television and
MI>I'd rather see nudity than blood (on TV and off :) ). I am
MI>suggesting, however, that we consider the options we are
MI>presenting children through the media.

Mike,
It appears we don't disagree on much. It's a pretty typical human reaction to excess. In the media we do things to generate reactions. By the time we've done them a thousand times, they're old hat and we need to find the next level. At this point, live executions are the only things that seem to attract attention. We're numbed by what we see and hear.

MI> As a longtime nudist I have no problem with the
MI>body. It's what we choose to do with it. My neice, then
MI>twelve, loved the song "Girls Girls Girls" by Motley Crue.
MI>I have to admit that I liked it myself until I viewed the
MI>video with her on MTv. Women in leather is fine for adults
MI>(hey, bring 'em on!), but they are an inappropriate role
MI>model to present to pre teen children. I would assume you
MI>agree.

I do. I just haven't figured out how to "protect" kids without stripping away the freedom of adults. If I had to sit and watch "Barney" every day, I'd open my 24th floor office window and leap. With my luck, I'd land on Barney and survive to watch some more.

As a nudist, you understand how kids react to nudity when its presented as a part of nature. It's very rare to hear of molestation or other sexual offenses happening in a nudist setting. It's only when we make it "nasty" do we find problems.

MI> Our society has become more coarse. I place
MI>**most** of the blame for this on the extreme right. Their
MI>"win at any cost" ethic has done a great deal of damage to
MI>the level of debate in our society. In New Jersey,
MI>respected Democrat Bill Bradley is retiring and popular
MI>former Republican governor Tom Kean is refusing to enter the
MI>race for the same reason: the level of debate has fallen to
MI>an unseemly low.

Again, no disagreement. I have regular "discussions" with one of my Conservative Talk Show hosts. He thinks I'm a Liberal (he thinks Atilla the Hun was a Liberal). I keep telling him that I distrust ALL politicians. I'm beginning to feel the last one who told the truth was

Barry Goldwater. He's more Libertarian than Conservative, I think.

There is no political debate. They lob bombs back and forth as dictated by their consultant handlers who believe negative campaigns work best. So, the voters get no valuable information and we vote for whomever we perceive as the least evil. I'm sorry to say that Talk Radio is a major contributor to this.

Why would any sane creature want to subject himself to the abuse of a political campaign. We'd spend more time trying to find some skeleton in their closets than learning what they'll do to improve our lives.

MI> We need to raise the level of decency in our
MI>society. I don't know the answer. I'm not sure I even know
MI>exactly how define the problem. I only humbly suggest that
MI>we ought to spend some time thinking about this problem.

I'm afraid basic decency comes from the family. That's where we should learn to respect other people. Unfortunately, it's often the place where kids learn prejudice and hate. Churches can't do it. Schools can't do it. Only decent parents can.

RW> I believe we'd do much better to concentrate on those
RW>things that do great harm to both the body and the spirit. To me,
RW>violence is the enemy. Not sex.

MI> Another good point. In my utopia, we wouldn't wear
MI>clothes at the beach (and in Miami, that utopia exists!),
MI>but children could walk to school without seeing a "LIVE
MI>NOODE GIRLZ" sign. I've always throught our repressive
MI>society was the cause of many of our ills. It may sound
MI>like I'm encouraging more repression, but I'm not. I'm only
MI> suggesting that we ought to consider what images we place
MI>before children through media. Hustler magazine has it's
MI>place, and those who would deny its publication are evil and
MI>wrong. I feel the same way about 'Soldier of Fortune.'

You can't have both in a free society. You have to find a way to teach the kids about the "Live Noode Girlz." I would bet that the attraction would be greatly diminished if "Noode" wasn't considered "nasty." It's forbidden, therefore it's enticing. Repression always encourages the very acts they try to repress.

If our kids were raised to respect and love their bodies as the magnificent creations they are, I'd bet that a show like Howard Stern would die a gruesome ratings death. "Weenie Talk" would have no appeal. Sort of like Italian kids having a glass of wine with dinner. It's natural, so they don't dream of the day they turn 21 so they can get bombed.

When Howard Stern wishes that a station manager gets gang raped by HIV positive people and speads AIDS to his wife and kids, I have a

problem with it; though the bigger problem is that very few of his listeners objected. Neither did his employer.

Money talks.

Rich

>water off a ducks back.

I believe this lack of values of which you speak is an illusion created
by the news media-- particularly by broadcasters.

The problem is not that American lifestyles and "family values" are
changing-- change they must in response to economic, and technological
realities. The days when every member of a family had a direct stake in
a family farm or business are largely over, and it is not reasonable to
expect lifestyles and moral values of the old days to continue unchanged
in an age when each person must pull his or her own weight.

That does not mean that Americans do not continue for the most part to be
decent, honest, constructive members of their communitites. However much
some of our fellow broadcasters seem to want us to believe otherwise,
this isn't Bosnia or Rwanda we live in.

I submit that there is, however, a real problem: we are being fed a load
of bullshit by people on the radio and television who want to attract our
attention to their advertisers' messages by planting in our minds
sensations of panic and images of violence.

The broadcaster who is accused of spreading fear, hatred and intolerance
in his community will retort that in a free marketplace no one is
compelled to listen to anything, and if people are offended by what he
has to say they will turn off their radios. He then goes on to assert
that because they do not do so, he is faithfully serving his community by
giving its members what they want to hear. He will also say that by
helping local businesses find new customers he is strengthening the local
economy and helping his neighbors to live better.

How they raise their kids, and what they allow them to listen to or
watch, he will say, is entirely out of his control and not properly his
business.

Now what is clear to me is that broadcasters _do_ have a responsibility
to help make their communities better places to live, and to the extent
that we air sensational news stories that evoke reactions of mindless
fear and/or hate among our listeners, we abdicate this responsibility.

To the extent that we sow distrust among their neighbors, we destroy our communities from the inside out.

To the extent that we ignore the thousands of decent, law-abiding, hard-working people in reporting the news, and concentrate on the bizarre, the horrifying, and the insane, we propagate a false picture of a sick society, a country bereft of values, where everyone is out to screw his neighbor.

That's the real problem. Not deadbeat dads. Not child abusers. Not OJ Simpsons and their high-priced lawyers. Not racist policeman or drug-crazed inner-city youth. Not even AIDS, or flesh-eating bacteria, or poisons in our drinking water. For while all of these exist, they are never the rule-- they are the rare exception in what is otherwise a peaceful, prosperous nation.

The fact that we are having this discussion at all testifies to the degree that some of us have abdicated their responsibilities as community leaders and public trustees, in having poisoned the image America has of herself. Where is the pride we should be feeling at having built, out of raw wilderness, a civilization whose meanest members live better than the kings of four or five centuries ago?

The breakdown of American society is a myth. This is not Lebanon, or Serajevo, or Somalia, but the richest, most powerful nation on earth, where there is nothing we cannot achieve once we resolve to come together to do it.

(Please do not accuse me of advocating censorship or governnent control of the media. Thank you.)

Yours for excellence in radio,

Rob Landry

Exactly my point! Using your example of the 900 numbers, it
it advancing technology that allows this or is it a serious
breakdown in the fabric of our society?

I guess this brings us back to our orignial questions (yes,
this thread does have a point): Should radio stations
accept ads from adult bars? Should the FCC regulate
advertising from the adult industry? Should we, as a
society, draw a line that shouldn't be crosssed by the
media? If so, let's save the "could we" argument for
another thread.

>listening to it.
>
>
San Francisco, and other very large markets, are so fragmented that the #1 station has only a tiny share of the audience. In KGO's case, last time I checked, it was something in the neighborhood of 7%. That means 93 percent are listening to something else. So it should come as no surprise that a non-random sample of a handful of people would not turn up any KGO listeners. To further put this in perspective, there are about 75 listenable signals in S.F., so if the audience were distributed evenly, each station would pull only 1.33%.

But it's true...people do put things in Arbitron diaries that give radio programmers heart attacks. That's why stations hammer on call letters and slogans so hard.

Reply-To: cleithiser@academic.csubak.edu

As a favor to a friend writing a novel, I am trying to obtain information on 1950's-60's era rural broadcasting, particularly in the Texas/Louisiana area, supposedly done on a town-by-town basis from private homes.

She remembers listening to such stations as a girl, and is looking for details from those who might have been involved: what would such a station have looked like? Equipment used? Typical problems? Etc.

Anyone with information can reach me at the e-mail addresses shown below. Ritual apologies if this is the wrong venue for this request (after lurking a few groups it seemed closest) and could someone point me in the right direction? Thanx in advance...

>

The 105.7 is now KSTV-FM Stephenville which has a permit to move to
Decatur with a 2000' + tower in southwest Tarrant County (Fort Worth).
KKDA-104.5/730's owners have requested the calls KRNB for the station
for when it moves in. It was announced that this would take place in
the fall and that KRNB was to have a similar format. Now that KJMZ
has shifted, it would seem unlikely that Dallas/Fort Worth needs 3
stations playing urban AC/black oldies mixes (KJMZ, KKDA, KRNB).

Maybe they will use KRNB to be dance CHR while keeping KKDA-FM urban
particularly with CHR KHKS having the format to itself...

Bonneville International Corp. owned WRFM and owns WMXV. They are located in Salt Lake City, Utah, which is the home of the Mormon Church.

The call letter switch in 1992 didn't involve a format switch. The station's main ID is Mix 105. The station's had an Adult Contemporary format since 1986.

-> Which one?
->

This station has been owned for _years_ by Bonneville Broadcasting,
wholly owned (the least time I looked) by the Mormon Church (LDS
to some of us).

-> The station switched in 1986 but I was unaware of the 1992
-> change. Why did they change? Was a format change involved?

It was a minor change, to a mix (hence 'Mix 105') of 60's oldies and
newer AC.

>change. Why did they change? Was a format change involved?
>
My limited knowledge...WNSR had largely "unknown" calls in
listener research...The trend for adult contemporary stations
at that time was to use the word "Mix" in your positioning
statement since listeners were using that term when describing
stations' music. Thus WNSR became WMXV "Mix 105" and that's
about the amount I know on this subject. I don't believe they
changed that much at the time. They are now a "Hot AC".

My former boss at Q95, Steve Weed, no stranger to New York radio
having worked there in the 70s, is the Program Director now at Mix 105.

## 2120. reply to WRFM query

Newsgroup: rec.radio.broadcasting
Date: 1995-09-06 00:00:00 UTC
From: "Fisher, Marc" <FisherM@washpost.com>
Message-ID: <42j713$sv5@vixen.cso.uiuc.edu>
Source record: 29358

Actually, it was jazz station WRVR (106.7), not WRFM, which belonged to Riverside Church in New York and featured extraordinary jazz jocks such as Max Cole (can anyone name the rest?) The church sold the station in the late '70s, at first to someone who tried an early pop-lite-jazz format (a flop), and then a quadrophonic sound rocker (very shortlived). Eventually it did a turn as country station.

## 2121. WRFM, et.al.....

Newsgroup: rec.radio.broadcasting
Date: 1995-09-06 00:00:00 UTC
From: "PETER Q. GEORGE, N1GGP" <PGEORGE@WELLESLEY.EDU>
Message-ID: <42j717$sve@vixen.cso.uiuc.edu>
Source record: 29359

I very much remember "Music from New York" on the now late WNYW/Shortwave, with its' transmitters located in Scituate, Massachusetts. WNYW stood for Radio New York Worldwide and was owned by Bonneville Broadcasting, a wholly owned subsidiary of the Church of Jesus Christ of Latter Day Saints, "The Mormons". The programming was pre-recorded except for the CBS News on the hour. The music was the same as WRFM (ex. WNSR, now WMXV) with "Beautiful Bonneville Music" toward the end of its' life. Before that, WNYW had live announcers in New York with a very upbeat semi-Top 40 format and also provided programming in Spanish for the South American continent. I was NOT exactly pleased when the current ownership took over control and replaced the format with the current gobbledeegoop of "fire-in-brimstone" crap that belongs somewhere else.

In answer to that question about a jazz station in New York that was owned by a church, the answer is the late, lamented WRVR-FM 106.7. RVR' was owned by the Riverside Church, a non-denomininational, predominantly black congregation who also currently owns WWRL-1600 in New York. WRVR had a huge following, right up until the time the station was sold to Viacom in the early 1980's. Viacom simply ripped up the format and replaced it with WKHK "Kickin' Country 106.7". They even added insult to injury by taking the WRVR call-letters to their co-owned Memphis station. This would insure that any listener boycott of 106.7 would be twarted. In essence, you would be beating a dead horse. The country format failed miserably. Now you have WLTW, the same Whitney Houston, Phil Collins, Mariah Carey, Sheena Easton crap that permeates every spot on the dial from Calais, Maine to San Diego, California. What a life !

Hope this info may be of help to those who receive it ! 73's de N1GGP !

Changes on the horizon for Clear Channel's WKCI (KC101). Morning co-host, Pat Grey, is leaving the station in the next week or two in a move to Salt Lake City. No word on if he has a gig there (probably does). This breaks up the Glenn and Pat show that has been on the station for nearly 4 years (previously in Baltimore). Also, morning newsperson Carolyn Fox is leaving the station by the end of the month (moving out of state). They are seeking replacements for both.

These changes leave the morning show with only Operations Manager Glenn Beck. Beck has recently suffered from bacterial meningitis and hasn't been off the air for 3 solid weeks (between vacation and illness). How he can expect have maintained a high quality morning show and oversee many aspects of the station is beyond me. How many morning show/pds to you see in rated markets?

They've suffered from ratings decline in the morning since Glenn and Pat started. They play too much music in the AM for a CHR station with such a highly compensated morning show. They'd be better served by either making a higher profile morning show or a quieter more "AC" approach. Their decline has been exacerbated by Imus' resurgence since WFAN went to the 50kw clear channel 660am. He is ruling in New Haven.

Pat Ryan

> Money talks.

I have an even bigger problem with the fact that his employer is
considered to be "a well respected broadcaster" by so many people.
Why? Because they deliver at the bottom line, and as you say "money
talks". I also find it disconcerting that his employer (and so many
other broadcasters) use the law for their guidelines, rather than
relying on their own personal sense of ethics and morality. To me
this reflects an abdication of personal responsibility, which is much
of what's wrong with the radio business.
Since I recently filed an application at the FCC for a new FM station,
I may soon find myself in a position of having to live up to these words,
by the way...

Tom Desmond, who now has a real good reason to dislike duopolies.
(The application I filed is for a new station in Bells, which is near
Sherman, TX. One of the competing stations in the area also filed...)

<<Now what is clear to me is that broadcasters _do_ have a responsibility to help make their communities better places to live, and to the extent that we air sensational news stories that evoke reactions of mindless fear and/or hate among our listeners, we abdicate this responsibility.

To the extent that we sow distrust among their neighbors, we destroy our communities from the inside out.>>

One point worth mentioning as an afterthoght--it is in the broadcaster's own *self interest* to improve their communities. There may be short-run money to be made in contributing to the deterioration of civilized behavior, but what kind of environment is going to result for the broadcaster and his family once that deterioration goes beyond the point of no return?

We're all in this together folks, and social Darwinism to the contrary, we'd better learn to live with each other or it's going to be all over for everybody.

# 2127. Consumer vs. Pro CD's (why do my CD's sound so bad?)

Newsgroup: rec.radio.broadcasting
Date: 1995-09-06 00:00:00 UTC
From: RobABass@aol.com
Message-ID: <42j701$ssn@vixen.cso.uiuc.edu>
Source record: 29467

I have had a lot of frustration with the recording industry, in terms
of the way consumer bought CD's sound, verses how CD's from
places like Broadcast Programming or TM Century discs sound.

After numerous tests, it seems to me like a consumer bought
CD sounds like uncompressed FM radio. It has a hollowness
or "cavey" sound to it. It's especially bad in the vocals and
drumming. It sounds to me like the artist and the drummer
are both locked up in a metal box.

Compressed FM sound quality I can live with, but these
uncompressed FM sounding CD's I buy at the store are
driving me nuts!

Yet CD's from these companies such as the ones I have named,
sound more natural, realistic, and lifelike.

Why is it that I can't buy consumer CD's that sound exactly like
TM's or BP's CD's? Is there some kind of processing
gear I can get that will beef up the quality of consumer CD's?

How many of you broadcasters use consumer type CD's
and what kind of pre-processing do you do straight
from the studio before you hit the transmitter processing
to make them sound better?

If I can't find a processor that will make my CD's sound more
lifelike, would buying a cheap compressor limiter at least
make them sound more like compressed FM radio? I
am sick to death of this uncompressed FM radio sound
from consumer bought CD's. I really don't feel like
these store bough "cup saucers" sound like they
are worth $19.99 + tax....

thanks

Rob Bass

P.S. why can't the idiots in the music business find some
compassion in their hearts to give us the radio edits
of the songs on the consumer albums?

# 2128. D.C. Radio Watch / 9/5/95

Newsgroup: rec.radio.broadcasting

Item One: "How many ACs can dance on the head of a pin?" <g>

WGAY-FM (99.5), for the past several years an adult contemporary station, has "changed" into...well, an adult-contemporary station!

The Greater Media station, which has promoted itself as "Easy 99.5", and made a very successful transition from beautiful music to soft AC, decided on a new tack last Friday, and is now "Star 99-5".

The station has essentially dropped the Barry Manilow, Neil diamond, Barbara Streisand, Christopher Cross, and Air Supply from the playlist, and is now plugging the 80s and 90s music of Phil Collins, Michael Bolton, and Mariah Carey, according to the Washington Post's "On the Dial" (Radio) column for Tuesday, September 5th. Jeff Silvers, who had been a consultant for the station, is now the program director, and says the station's new "target" is the 38-year old woman.

David Burd and Beverly Fox continue to host morning drive, and most of the staff has been kept, except for afternoon driver Sue Michaels, who was fired last week. Overnight personality Diana Woods is leaving the station full-time to become an announcer for C-SPAN, but will stay on to become a part-time announcer.

Formatics-wise, the station has adopted the "California Country" jingle package (which, I have learned, led to some early speculation that the station might be switching to country to challenge the sole country outlet in D.C, WMZQ-AM-FM). The station also recruited John Barthelomew Tucker to do recorded liners/promos. The Post says Teri Garr will be featured in a pair of 30-second TV spots.

And, sad to say, the Post also reports Greater Media is trying to "buy" new call letters for WGAY from another East Coast station, but declined to say which city or station. WGAY was originally named for founder Connie B. Gay, a country music star from the D.C. area.

AUTHOR'S COMMENTS: One wonders why Greater Media is taking this action at this time. All they seem to have done is to try to "position" themselves in the cracks between ABC's Mix 107.3 (WRQX-FM), and WASH-FM (97.1)...both stations which share much of the same playlist. Mix 107.3 dominates on the strength of a strong "Diamond in the Morning" AM drive show, and a fairly stable list of strong air personalities. But after a while, there's only so much differentiation you can achieve in a competitive situation once you get past playlists. Other stations "splitting" what share there already is for the AC format would be Radio One's WMMJ (102.3), with a Soul-flavored AC; and the two oldies stations, fifties-and-sixties flavored "Oldies 100" (WBIG-FM 100.3), and double-rimshot Seventies station, "Xtra 104" (WXTR-FM 104.1/WXVR-FM 103.9). Of

course, Greater Media *is* the same group that has never been able to make a go of talker WWRC-AM (980), a station which has been *the* premiere "revolving door" in this market. One almost wishes someone here in D.C. would try to do a version of NYC's "Kiss-FM", a station which I believe would do very very well in this market.

---

Item Two: On the Street on Colesville Road...

The Post reports Album Rocker DC-101 (WWDC-FM, 101.1) has taken morning man Paul Harris and his sidekick Dave "The Predictor" Murray off the air (or, as the Post put it, "placed on paid vacation"). Harris, who has been the morning man at sportstalker WTEM-AM (570), and before that, classic rocker WCXR (now "Smooth Jazz 105.9 WJZW), before replacing "the Greaseman" on DC-101 when Grease and Co. went west (and syndicated), says he's forbidden by terms of his contract from talking about his departure, and the station has no comment. Next Monday, Will Penn Davis, the evening man at Atlanta modern rocker 96-X, moves to DC-101 to take over morning drive. News reader Victoria Ray will continue in her job.

---

Item Three: Life is a Highway....

Kim Burton of Metro Traffic moves to WASH-FM to become the second half of the AC station's new "Kevin and Kim in the Morning" show. She follows such luminaries as "Mix 107.3" News Director Barbara Britt in taking the "Metro" path from traffic to showtime.

---

Item Fourth: Happy Birthday...

Finally, the Post recognized the 75th Anniversary of Bob Davis, who spent this past Sunday behind the microphones at classical-formatted WGMS-FM (103.5). Davis has been with WGMS since 1953, and was known for hosting the station's live lunch-time music and interview program from the Kennedy Center in the 70s. He retired ten years ago, but remains as a part-time announcer, and the station's theater critic.

# 2129. Kansas City Radio Watch (5-Sep-1995)

Newsgroup: rec.radio.broadcasting
Date: 1995-09-06 00:00:00 UTC
From: transvox@interstate.net
Message-ID: <42j6vb$sra@vixen.cso.uiuc.edu>
Source record: 29469

If you were wondering when EZ Communications would get to write that $28 million check to Sconnix Broadcasting for KFKF(FM), wonder no more.

The _M Street Journal_ reports in this week's issue that EZ is now exercising its option to buy KFKF. An application for a transfer of control has not yet been filed with the FCC.

I haven't kept good records of station sales in Kansas City over the years, but I believe that the $28 million price for the consistently top-rated KFKF is the highest ever for a single station in the Kansas City market.

EZ bought Noble's KBEQ-AM/FM in January for $7.65 million and secured a one-year option on KFKF from Sconnix. Sconnix was operating a duopoly with KKCJ(FM). In order to make the KBEQ-KFKF country-music duopoly possible, KKCJ was spun off to Heritage Media, already the owner of classic-rock KCFX(FM), with a provision that KKCJ had to switch from its "hot country" format. After ten days of polkas, KKCJ became a "smooth jazz" station and now has the call letters KCIY.

KBEQ(AM) continues to program Chuck Harder's "People's Radio Network", although strong rumors continue in the KC market of EZ's desire either to simulcast one of the country stations on the AM station at 1030 or to get rid of the property altogether.

KBEQ-FM was Kansas City's Top-40 FM pioneer back in 1973. After several years of declining ratings, its switch to young country in 1993 made it a much more marketable station once duopoly fever took hold.

It was ironic to note that the KBEQ station manager who made the switch, Kathy Stinehour, found herself out of a job when the EZ-Sconnix duopoly took over. Stinehour is now general manager at heritage album-rocker KLOL(FM) in Houston, Texas.

********

Thursday, August 31 was the last day at Signal Hill for WDAF(AM) and KYYS(FM). The stations have now moved into KCMO-AM/FM's old facilities in the Manor Square office and shopping center a couple of miles down Southwest Trafficway in Kansas City's Westport district.

Formerly co-owned WDAF-TV needed the radio stations' building for additional space after Channel 4 quadrupled its daily news schedule one year ago next week. That's when "NewsChannel 4" flipped to Fox from NBC, necessitating the expanded news schedule.

KCMO-AM/FM moved out of the former Manor Bakery earlier this year and into the newly expanded Bonneville Broadcasting facilities just across the state line in Westwood, Kansas. Bonneville bought KCMO-AM/FM from Gannett late in 1993, forming a duopoly with KMBZ(AM) and KLTH(FM).

********

Two Kansas City-area radio stations have started up Sunday-morning contemporary-Christian shows.

On CHR KMXV(FM), midday personality Mike O'Brien hosts the "Contemporary

Christian Mix," a reference to the station's "Mix 93.3" slogan. On Lawrence modern-rock rimshot KLZR(FM), an on-again off-again contemporary gospel show has resumed.
Also on Sunday mornings, new-rock KISF(FM) features "Resurrection Sunday" at 10 o'clock. However, it's NOT a gospel show: it's an 80s-oldies show. "Kiss 107.3" has also moved its Friday night free-form show "Off the Beaten Track" to Sunday nights.
********
I am now mirroring the newly slimmed-down Mid-America Radio Page at a site not subject to Sprint's appallingly frequent backbone outages and slowdowns in the Midwest.
It's available either at:

NEWSRADIO 85 KOA Broadcasts
Live to the World Over the Internet

For the first time, anyone in the world can listen to all of NEWSRADIO 85 KOA's programming, including the The Colorado Rockies and The Denver Broncos, over the internet. In an exclusive arrangement with Interactive Planet, 85 KOA will be available, at no cost, to anyone with internet access. The technology which makes this possible has been available for less than one month. Newsradio 85 KOA's Creative Director Kenan Pekoz says "...no matter where you are in the world, you can still follow the Rockies, Broncos and 85 KOA programs..."

To access Newsradio 85 KOA on the Internet:
You will need an IBM PC or compatible computer with slip/ppp access to the internet. Bring up your World Wide Web browser (preferably Netscape) and visit www.aaco.com Find the microphone icon to the left of the 85 KOA logo and click.
The page which comes up will explain how to get the Xing Streamworks audio software and how to connect with the Newsradio 85 KOA signal.

There have been several staff changes at radio stations in the Miami-Ft Lauderdale Market, including these:

Love-94, WLVE-FM 93.9, NAC Jazz

Stu Grant, Evenings - released
Irene Richards, Mid-days, - released
Rich McMillan, Program Director - released

99.9 KiSS-FM, WKIS-FM 99.9, Country

Scotty Manning, overnights - left for Ohio(?)
Shotgun Johnny Dolan, evenings - released, has done a short stint part-time at WLYF-FM, has now been hired at WFLC-FM, The Coast, for swing shifts

Dillon Stone - hired for overnights
Gator Brooks - hired for evenings

More changes are imminent at several stations in the area.

# 2132. Pittsburgh Report

Newsgroup: rec.radio.broadcasting
Date: 1995-09-06 00:00:00 UTC
From: URQM93B@prodigy.com
Message-ID: <42j6vf$srk@vixen.cso.uiuc.edu>
Source record: 29472

I know this isn't the right place to send this, but I misplaced the correct address. This info will also be posted in the rec.radio.broadcast newgroup.

There have a been a lot of changes in the Pittsburgh market lately. 104.7 The Rebel (country) just changed formats to Alternative, copying the success of 106.7, The Force. Their new name is The Revolution. Speaking of The Force, they were bought by #2 station (AOR) WDVE, and although they retain the staff and format, the new name is The X. Like all changes, this one has some bugs to be worked out, from the listener's point of view, they lost a lot. The jocks have been told to cut back on their old styles, creating an unoriginal, uninteresting show. Plus, they have a small selection of liners, so you hear them all within a short period of time. This is a disturbing Pittsburgh trend - whenever a station gives you trouble - buy it. The Force was a relatively small station, but with a growing listenership, mainly coming from other rockers, like DVE. The last time this happened was about 3 years ago, MixJamz was giving CHR WBZZ (B-94) some competition, so what did they do? They bought it and turned it country. That failed to bring money as K-Bear, so last year they switched it to The Point (70's). It's a cutthroat world out there.

Richard S. Smith wrote:
: What I want to know is why, when it comes to radio, are there so few
: options (basically none) available to people who want more than what they
: can pull in locally with their own antenna?

Because the customers of commerical radio stations are advertisers, not listeners, so a station could have a big audience (KFRC was #4 in the ratings with a big band format), but if the advertisers don't want to sell to you, the station doesn't play music/programming you'll like. In fact, they'd prefer to get RID of you and not clutter up the Arbitron books by making their ratings "skew old". The solutions? Public radio or buying records. I went to Streetlight Records on 24th in SF last night and had a wonderful time buying CDs prices as low as $2.85. The hell with the radio if they're not going to play what I want to hear.

As far as I know, Bruce does not have an e-mail address. He currently resides in Florida, where he broadcasts his show from his home much of the time. What more info. are you looking for? I used to work for him at his Texas radio stations.

# 2140. Question about Gary Burbank Show

Newsgroup: rec.radio.broadcasting
Date: 1995-09-06 00:00:00 UTC
From: Joel_Runes@email.fpl.com
Message-ID: <42j6vs$ssa@vixen.cso.uiuc.edu>
Source record: 29480

One of the stations here in South Florida carries, on a severely time-shifted basis (i.e., 2-5 AM) the syndicated Gary Burbank Show.

I think the show is produced at WLW-AM in Cincinatti though I'm not positive of that. I don't know whether it's produced and syndicated by the host station or by an independent producer. On the whole I find it fairly funny and mostly in good taste, though it can be a bit repetetive (a major occupational hazard for daily radio programs).

Does anyone know the details of the show's production and syndication, such as by whom, how distributed, how many stations, on a straight fee, fee+barter or barter basis, etc? If so I would be interested.

## 2141. CD caddies and theft

Newsgroup: rec.radio.broadcasting
Date: 1995-09-06 00:00:00 UTC
From: Dave Sheranko <dpsher@planetx.Bloomu.EDU>
Message-ID: <42j6vt$sse@vixen.cso.uiuc.edu>
Source record: 29481

Real quick'n'simple question here:

Our college station is having a severe problem with CD theft. It's impractical (hell, impossible) to have a "guardian" watch the CDs around the clock, and it's apparent that some of our DJs can't be trusted.

What have other stations done in the past to combat this? We thought of having a checklist to be completed at the start of each shift, but knowing our DJs, nobody would ever bother checking the racks, much less report a missing CD until it's already too late.

We're considering upgrading our two CD players to caddy systems, in the hopes that this will reduce theft. I vaguely remember hearing about a caddy system where one could "lock" the caddy so that it could never be opened again (without breaking or cutting it; either way, you lose the CD). We really have no other reason to upgrade to a caddy system, so if it's not likely to reduce theft, please drop me a line.

Thanks much.

Dave Sheranko
dpsher@planetx.bloomu.edu
shedav25@pct.edu

[Moderator's Note: This is one reason for Hard Drive music libraries. Another option is a PC driven jukebox, with a lock. AT can access any of the tracks, but cannot steal the CD's. It costs though. Bill]

>included: Frank Chacksfield, Ronnie Aldrich, The Midland Radio Orchestra,
>The BBC Orchestra, with John Fox and Norrie Paramor. John Gregory, Frank
>Barber, Fairfield Orchestra, Bernard Ebbinghouse, Lex De Azevedo, Nick
>Ingman ect.

I worked at an Easy Listening Station back in the early 80s and we
played all the above artists and then some. (I still remember the
shock I had, a couple of years after I left the business, when I
tuned the station in the day after they changed formats to hear
screaming guitars -- wow!)

Thing was, almost all of what we played was from publicly available
recordings. The catch was, they were almost all British Imports (as
almost all the bands you specify are British)

Being in Canada, we've always found it rather easy to find imported
music at our shops. When this music was popular, the imported albums
were relatively easy to find.

Thats the good news, unfortunately, I can't site a source for these
recordings. However, they _do_ exist -- it might take a bit of
looking.

Cheers,

# 2146. Dr George Abraham, Radio Pioneer Dies

Newsgroup: rec.radio.broadcasting
Date: 1995-09-06 00:00:00 UTC
From: Jeff Tellis <jtellis@mhv.net>
Message-ID: <42j708$st6@vixen.cso.uiuc.edu>
Source record: 29486

One of the pioneers of college and noncommercial radio has passed away. Dr. George Abraham died of a heart attack on August 28th, while at his vacation home in Maine.

George Abraham co-founded campus radio in the late 30's when he and David Borst, a couple of engineering students, hooked up a campus network to share their music with other students. They started out by hand-stringing wires through the trees, cross connecting at their rooms to record players. They ended up inventing carrier-current AM, the main method of campus radio transmission for many years.

Even today, in areas where the FM band is completely saturated with stations, George and Dave's carrier-current system still provides an opportunity for new stations to get on the air.

When the FCC decided to move the FM band to its present location, (88.1 - 107.9 MHz), George had the foresight and was active in helping to persuade the Commission to reserve the lower channels (88.1 - 91.9 MHz) exclusively for noncommercial use. We now know this as the noncommercial FM band, where most college, community and public stations currently operate. Without this crucial reservation of space well before the heavy demand for FM frequencies existed, it is likely that the FM band would have been completely occupied by commercial interests. And noncommercial broadcasters - college, community, public and religious - would have been essentially squeezed out.

In 1940, George Abraham and David Borst also co-founded IBS, the Intercollegiate Broadcasting System, a non-profit association of school and college radio stations. Starting with a original base of Ivy League and New England schools, the organization expanded nationwide and remains a vital source of information and support for existing school and college radio stations and to those looking to establish new stations.

George was a familiar presence at the annual IBS National Conventions until recent years when health problems slowed him down just a bit. He continued to serve the IBS Board of Directors as a Vice-Chairman.

Those of us who knew and worked with George will miss him, and the forward-thinking ideas he continued to express. We'll miss his quiet dignity and his amazingly active mind, often years ahead of the rest of us in his understanding of technology and the future.

Even if you never knew George personally, your noncommercial FM or carrier-current station owes its existence, at least in part, to his imagination, creativity and inventiveness.

Thanks, George.

Hi.
We're two wild and wacky Scottish DJs looking for work in the statesidetabulous US of A. At present we're working for SPEC FM, in Edinburgh, but we're keen to move from the land of the tartan haggises to somewhere a little more warm.

If there's anyone out there in radioland looking for the wildest, most outlandish bespectacled double act this side of Hadrian's wall, while cranking out the platters that matter, contact us -- we could become the soundtrack for all of your days.

And mine's a large one...

I have informally been keeping a "People Will Say Anything When Convenient" file, but in the wake of the settlement between the FCC and Infinity Broadcasting there is a new entry for the file which leaps to the fore.

Reportedly, Infinity's President Mel Karmazin commented that the settlement with the FCC will maintain the company's "pristine" record.

Only amongst those with a COMPLETE case of amnesia. And only if Howard Stern doesn't continue day after day to remind his listeners how tasteless he is.

Just as the peddlers of much tasteless anti-social rap music continue to do so because they make money from it, Infinity will continue to syndicate Howard Stern's brand of sophomoric anti-social humor so long as it enhances Infinity's bottom line.

If Howard Stern is a genuinely funny person, he should challenge himself to replace that which is demeaning and disrespectful of individuals or groups of people with things that are funny and which highlight the best of what humans can do and be.

I personally don't really like Howard Stern.

That having been said, I am glad as heck that he is out there pushing the edge of the national envelope. Howard proves that non-mainstream programming CAN work financially and that people are craving something different.

In a world of homogenized, cookie-cutter, "we gotta play Mariah Carey and Michael Bolton" formats, Howard proves that despite the unwillingness and fear on the part of radio programmers to step out of the mold, people still want something different.

I have said it before, but Rush Limbaugh also was one that proved this to be true, albeit from a totally different angle. Long live the radio rebels. Like them or hate them, it is these talents that are paving the way for something different. Proving to bean counters (who essentially run radio these days) that there is more to life than Hot Country, Hate Talk, Classic Rock, AC and CHR.

# 2151. S. Fla.: WLRN-FM Schedule Changes

Newsgroup: rec.radio.broadcasting
Date: 1995-09-06 00:00:00 UTC
From: Joel_Runes@email.fpl.com
Message-ID: <42j70p$sui@vixen.cso.uiuc.edu>
Source record: 29491

As of September 1, there have been a number of programming changes at WLRN-FM, the NPR and, now, PRI affiliate licensed to the Dade Co. Board of Education.

Most of the changes relate to the one-year trial affiliation with Public Radio International. Initially, there are three main PRI programs that will be carried:

Rabbit Ears Radio Saturday at 5:30 PM
A Prairie Home Companion Saturday at 6:00 PM
Marketplace Weeknights at 6:30 PM

WLRN-FM is hoping that there will be a sufficient increase in member support to cover the PRI affiliation costs at the trial rate for this year and at the regular rate beginning next September.

A number of scheduling changes are required to accomodate the new programs, most notably the droppng of Weekend All Things Considered. Car Talk will move from Sunday afternoon to its network feed time at 10:00 AM Saturday. Living on Earth moves to 5:00 PM Saturday from Monday evening at 6:30 PM. WLRN will begin carrying NPR's Weekly Edition Sunday at 10:00 AM. The weekend morning music programming moves an hour earlier, from 7:00 to 10:00 instead of 8:00 to 11:00.

Even with the likely elimination of some NPR magazine programs such as Horizons, public radio stations are faced with more network news and information programming than can conveniently fit in a balanced schedule. In the morning, some stations such as WQCS-FM in Fort Pierce are carrying MonitoRadio's AM edition at 5:00, a slot others use for News Hour from the BBC World Service. With the expansion of All Things Considered to two hours, plus availability of MonitoRadio, Marketplace, and audio of the MacNeil - Lehrer News Hour, something usually has to give.

This problem was certainly envisioned when NPR switched from their landline distribution to the 12-channel Westar system more than 15 years ago. As satellite distribution costs have declined, the volume of EPS programming and programming by independent producers has ballooned. The evolution of PRI, formerly APR, has further expanded the available programming, but there are still only 24 hours a day. Many markets do not have more than one viable major public radio station, and even in markets with several (such as Boston) the overlap of programming is frequent.

The subject has come up in other forums concerning whether public radio (and public TV) should be available on a subscription basis for satellite distribution. Inevitably it is argued (as it is by commercial networks) that such independent distribution will impact on the economic well-being of the affiliates. At first blush this sounds reasonable, but I don't think this is so with regards to public radio for two reasons:

A: A lot of public radio listening is mobile, such as people in their cars driving to/from work. Although the percentage of listeners who are contributors to public radio varies from market to market, it is generally low, and those who do contribute are likely to continue to do so even if they subscribe to public radio programming via satellite distribution subscriptions; and

B: A formula can be developed to apportion subscription fees among the networks, programmers and member stations to maintain the viability of all sides. The expanded opportunities for listeners to select the programming they want should expand the market for public radio.

I'm interested in any thoughts other readers may have on this matter.

Interestingly enough, KDSQ is already using an I D that mentions
North Dallas and Plano...

>Meanwhile, a couple of other Sherman-Denison area radio stations are
>also looking at facilities upgrades to reach into the Dallas radio
>market (Sherman & Denison are about 60 to 70 miles north of Dallas).

>(this station was a class A). The other Davis station, KWSM
>(104.1) has won FCC approval on a rulemaking to upgrade from a class A
>facility in Sherman to a class C3 facility in Sanger, which is near
>Denton, TX...

I've heard about the KTCY LMA deal with KRVA-AM/FM...those two stations
are long stories in and of themselves.

Had not heard about KWSM...that ought to put a pretty good signal over
the mid-cities, Lewisville, and the Alliance airport areas (which are some of
the fastest growing areas of the Metroplex.)

One other station to mention is KDSX 950 AM in Sherman-Denison..
They have improved their signal (I don't know if they moved their
tower, changed patterns, or upped their power..but they are stronger)
They program the Dallas-based Prime Sports Radio format and they have
put a billboard in Denton. (saw it today) It is certainly listenable
in much of the nothern half of the metroplex....but frankly, without
a better format, who cares. :)

>Other potential drop ins to all or part of the Dallas market include a
>new C3 permit (107.9) in Gainesville, owned by Heftel Broadcasting (which

>a station at 105.7 (I forget the calls) that is being moved to Decatur,
>which is about 60 miles north of Ft. Worth--this one will supposedly
>be an Urban AC when it comes on, and 620 AM, which is moving from Wichita
>Falls to Plano (a Dallas suburb), and will carry big band music.

The 107.9 in Gainesville will be part of Heftel's "Tejano Kick" format which
is already on 1440 (KICI Denton), 99.1 (KHCK Denton), 106.7 (KCKK Granbury),
and 107.9 (KICI Corsicana)...yes...107.9...they are going to drop power and
height on the Corsicana station and move the tower closer to Dallas while
using the Gainesville station to fill in the gaps...makes me wonder if they are
going to try and use 99.1 and 106.7 as one format and the 107.9s as
a different format. 99.1 really drops out over the southern half of Ft. Worth
which is exactly where 106.7 covers well....just a thought.

105.7 is currently KSTV in Stephenville. The move from Stephenville will
be a 60 mile move! The new calls will be KRNB from what I have heard...
however, with KJMZ switching to the format that Service wanted to use on
105.7, I wouldn't count on what they will do with it now..
The last I saw, Service had a permit to build a 2008 foot tower in far southeast
Jack county (about 45 miles from DFW). It'll be interesting to see
how that signal does. I think it's way too far to work well.

Additionally, 105.7 in Healton, OK will be moving to 93.7 and have
a 100kw signal...

620 am is actually already testing their transmitter. They are resurrecting
the KAAM big band format and calls. In fact, the people I know there say
they are going to be on the air full time inside of a week.

Good work Tom on getting all that info!

It will be interesting to see what happens....

Arnold Evans

It looks though as if KFYZ-FM-98.3 Bonham's upgrade to 25000 watts has occurred. Their signal seems stronger. They've also changed their top of the hour ID to include Sherman/Denison ("KFYN [1420] and KFYZ-FM Bonham/Sherman/Denison/Durant [Oklahoma]").

Poor Sherman/Denison...most of the stations are off the air, have left or are leaving, or are satellite. Only KFYN/KFYZ-FM is local all the time. KIKM-96.7 is local much of the time. That's it:

KXEB-910 Sherman Spanish (studios in Dallas and aims for D/FW)
KDSX-950 Denison Prime Sports Radio
KFYN-1420 Bonham country // KFYZ
KJIM-1500 Sherman silent
KIKM-96.7 Sherman country (some satellite)
KLAK-97.5 Durant OK SMN AC (local mornings)
KFYZ-98.3 Bonham country
KDVE-101.7 Denison JSN soft AC
KWSM-104.1 Sherman silent (moving to Sanger)
KTCY-104.9 Denison silent (trying to aim for Dallas)

> Other potential drop ins to all or part of the Dallas market include a

620 is the former KWFT Wichita Falls which went off the air at the end of last year. The calls have already been changed to KAAM and you can hear them during the day testing for their debut soon. The KAAM calls used to belong to KTCK-1310 Dallas before it's change to all-sports "the Ticket."

The Gainesville station is KECS and will supposedly simulcast the Tejano format now already simulcast on KICI-1440/KHCK-99.1 Denton, KCKK-106.7 Granbury, and KICI-FM-107.9 Corsicana.

Source record: 29494

I was in the Monterey area this weekend and frankly, I was not that impressed with KKLF. It seemed to be a lot of unknown Alternative bands. I recognized a song by INXS and Talking Heads. Mostly, the rest was stuff from bands I had never heard of. I live in San Diego and 91-X and The Flash definitely play more familiar "Alternative" music.
I know Rich Berlin has mostly an AOR (KMBY, KLRB) background and this choice of music seems to reflect that. Then again, Alternative in this area has always seemed to favor folk bands and music that would appeal more to the bohemian Santa Cruz audience, where "grunge" and "techno" music would probably not appeal as much to this crowd. I heard the catch phrase "Monterey Bay's Alternative" and once I heard the on-air jock say "Monterey Bay's Adult Alternative." Either he didn't know what he was saying, or the station is trying to compete as another AAA station against KPIG, which to me still seems bluesy and Country-Rock, not like KFOG or KSCA in Southern California. The station is just starting out, so we have to give it a chance. I may be up in about 6-8 months time and would like to give KKLF another try. BTW, the station gave another set of call letters at the bottom of the hour, saying that station served the Vail Valley. Where is that?? Is this a translator of KKLF??
-
Jeff G, Former KDON-, KWAV in Monterey & XHTZ in San Diego as Jeff Powers (lookin for p/t work on air)

[Moderator's Note: But isn't that what 'alternative' means? I always thought that 'alternative' meant new and uncharted waters, not merely another Top-40 list 'called' alternative. Oh well, call me a dinosaur, but calling a 150 song rotation, alternative, is like calling McDonalds 'fine dining. Bill]

Well, I'm a DJ at an "alternative" station (WPGU-FM, Champaign) and we
position our news as "a look at the world" thus leaving us with an extro like
this:

Newsperson: (weather forecast). Right now it's __. I'm __________.
Sportscaster: And I'm __________ and that's your look at the world.

In any case, the key is to come up with a positioning statement and place that
at the very end. As for other ideas for positioners, I can't quite come up
with anything there...

>carrying the Doctor.

A few questions:
1. Has any SF Bay Area station ever carried the Doctor Demento Show?
2. What would be

>
>And there are other syndicated shows. Hearts of Space, Musical Starstreams,
>and many others that I've never heard of but I'm sure I'd love. Howcum there
>is no service that I can subscribe to to give me access to stuff like this?

Never heard of these programs, what are they like?

Most of these are distributed via satellite, but the equipment needed
to receive them is probably complex and expensive. (Plus, some of them
may be scrambled, for all I know)
>[Moderator's Note: There is some stuff available on satellite for
>dish owners, and some stations are using Streamworks and other
>software to send medium-quality audio over the Internet. Other than
>that, not much is available until DBS becomes a reality. Then the
>capability will be there, but will the programmers offer alternative
>stuff or just cram the extra bandwidth with same-ol-same-ol? That is
>the question. Bill]

I believe it will be in the providers best interest to provide as much
variety as possible. (I'm assuming the DBS provider has control of
several "channels" of audio). All other things being equal, 20 or 30
channels of different kinds of music, etc., is a better seller than

20 or 30 channels of adult contemporary music . ..

For example, the jazz and other specialty music programs, which would have no chance competing in most radio markets, would be most suitable for such a satellite service.

What we have now are national networks and programs dependent on local markets for national coverages. If one station is doing poorly in the ratings with a particular program, it changes format to meet the local interests, thereby weakening the network.

Direct satellite broadcasting would obviously circumvent any local station/market problems. You could have, for example, your all-jazz station, while in a market that only supports country and religion, for example.

Inquiring minds want to know...

...why FM radio stations in the U.S. began saying "POINT" sometime in, oh, the mid 80s in doing frequency/station identifications?

As noted elsewhere, WGAY-FM (99.5) here in Washington, D.C. has changed its identifier from "Easy Ninety-nine POINT Five" to "Star Ninety-nine Five" as part of its recent shift in AC formats.

I think station IDs and jingles used to "flow" more readily when they didn't say "POINT". (Another favorite example of this was Metromedia's WASH-FM which used to say "Ninety-seven One". Nowadays, they say "Ninety-seven POINT One".)

Does anyone remember exactly how and why the "POINT" became such a pervasive part of American radio?

Newsgroup: rec.radio.broadcasting
Date: 1995-09-08 00:00:00 UTC
From: wdp@airwaves.com
Message-ID: <42otcm$9ot@vixen.cso.uiuc.edu>
Source record: 29360
Cross-posted to: rec.radio.broadcasting,rec.radio.info,rec.radio.noncomm,rec.radio.shortwave,alt.radio.networks,npr

Announcing a new mailinglist digest "Strictly" for radio
people. It is called RadioPro and is now accepting
subscriptions.

"RadioPro" digest is a virtual publication strictly for
Radio Professionals who wish to communicate with one-another in a
timely fashion, devoid of most of the non-professional discussions
found on Internet newsgroups and some other email-based digests.
Since it will be an automated list, delaying effects of moderation
will be essentially eliminated. RadioPro will be sent out, at least,
once every 24 hours, as traffic demands, in standard
'burster-friendly' email digest format. While not moderated, as such,
it will be monitored for appropriate useage.

Here are the publication guidelines.

1) No advertising without previous agreement and permission from the
list owner. (personal items for sale are OK)
2) No flaming or personal attack.
3) No posting of copyrighted material without permission of the
copyright holder (you must state that any copyrighted material is
re-posted with permission).
4) Use of full name (real or on-air) and station afilliation in every
post.
5) No re-distribution of the digest without permission of the list
owner. This includes cross-posting to Usenet, other mailinglists
or internal networks. Generally permission *will* be granted.
6) Be concise and don't over quote in followups.
7) Try to stay reasonably close to the charter of this list.
8) Do not use the list, or the names gleaned from the list for any
purpose other than personal and private communications with the
individual involved. In other words, creating your own mailing list
or mass-mailings from the names found on this list is prohibited.

Posting to the list will be restricted to list members. List
membership is restricted to those working in radio broadcasting or
support professions such commercial production, voice work,
ad agencies, free-lance production or other related fields.
Please write to the following address and request a membership. It is
free for individuals. Tell us how you qualify (i.e who you are, where
you work, etc). No information will be shared with anyone. Our
server will not devulge member lists and I won't sell or give them
away either.

WZJM-FM, Jammin 92.3, seems to have completed a return to traditional Top 40 after spending a year or two skewed dance/urban... they are in the process of implementing some changes their listeners have supposedly asked for. They sound much like they did when they were top-40 WRQC several years ago.

Plus, I hear that Trapper Jack, late of WLTF/106.5 and currently entertainment reporter at WEWS-TV5, may be returning to the radio on WDOK 102.1, placing him once again in competition with WQAL's Larry Morrow. I will let you know for sure when I have a confirmation on this, but it sounded interesting enough that I thought I should mention it. Trapper Jack left the station when his contract expired earlier this summer. WLTF did not choose to renew it.

First, Congratulations! You're entering a whole new level in the biz!

Actually it's pretty simple: Be yourself, listen to airchecks of other morning shows, have consistent features at the same time every morning that listeners can look forward to, and of course BE TOPICAL!

# 2163. Re: KKLF 104.3...Makes the change!

Jeffrey Gerstl (SDXD07A@prodigy.com) wrote:

: I was in the Monterey area this weekend and frankly, I was not that
: impressed with KKLF. It seemed to be a lot of unknown Alternative bands.
: I recognized a song by INXS and Talking Heads. Mostly, the rest was stuff
: from bands I had never heard of. I live in San Diego and 91-X and The
: Flash definitely play more familiar "Alternative" music.

Radio doesn't play enough unknown stuff.

I remember when Alternative used to mean that a band *didn't* have
a major-label contract. Now it is just a marketing buzzword.

: [Moderator's Note: But isn't that what 'alternative' means? I always
: thought that 'alternative' meant new and uncharted waters, not merely
: another Top-40 list 'called' alternative. Oh well, call me a
: dinosaur, but calling a 150 song rotation, alternative, is like
: calling McDonalds 'fine dining. Bill]

I don't think it's the rotation as much as, gee whiz, let's pick two
SoCal-based bands, Green Day and Stone Temple Pilots. They sound good,
sure. They rock, actually. But how can you call them alternative when
they have sold thousands and thousands of records? Sounds rather mainstream
to me.

-steve "I don't dislike modern rock, but fercryinoutloud, don't call it
anything besides mainstream!!!!" :>

Same thing is happening here in Charlotte on Star 104.7. I've also heard Joan Jett's "I Love Rock and Roll" (1982) and Jackson Browne's "Tender is the Night" (LATE 1983!) I understand the desire to expand the playlist... but isn't it a little ridiculous for a station that positions itself as "The Greatest Hits of the 70's" to be playing songs from last 1983, almost four years after the 70's ended?

I worked at WJLK in the late 70's - early 80's...and though I'm sad to hear that the station has physically moved out of Asbury Park, it was inevitable. Even back then the Press Building was not a safe place to work. Having the newsroom nearby was great, but take a walk outside and you're in a deserted downtown area populated by frightening people. Neptune isn't much better, especially a mall.

Do you remember the GM? He'd bring his latest girlfriend up to show her IGOR the live-assist machine. Yeah. But those were the old days.

# 2166. Boston Radio Watch 09-07-95

* Alternative alterations....:

Phoenix Media's AP WFNX 101.7FM is undergoing a few on-air changes
in programming and staff :

'Jazz Brunch', Sunday's jazz mainstay is now heard from 6am to Noon
instead of 6am-2pm.[an obvious attempt to attract non-sports listeners
from crosstown rival AP WBCN 104.1 FM which kicks off its 2-hour
football pregame show at 11am on most Sundays in the fall].

The defection of 11-year 'FNX veteran afternoon jock Neal Robert
to WBCN[he got a sweet 2-year deal working weekends,
fill-ins and overnights] on the last day of August caused
for some line-up reshuffling at the Lynn station. PD 'Boy' Troy
Smith leaves mid-day airwaves in favor of night-time jock
Nick Carter. Julie Kramer moves up a couple of hours to host
PM-drive. Night-time slot is currently open. Here's 'FNX's on-air
line-up :

6-10a Tai with Henry Santoro
10-3p Nick Carter
3-7p Julie Kramer
7-12a <Vacant>
12-6a Chris Kennedy

* Lost and Found :

Boston's tradition "The Lost 45's" will get national
exposure in January 1996 when NYC-based syndicator called Small Planet
Radio will sell the show to various stations across the country.
Currently, the program which is dedicated to 70's and '80s obscure
pop tunes and one-hit wonders, and being hosted by its
founder Barry Scott, airs on American Radio's Hot AC 'Mix 98.5'
WBMX 98.5FM every Sunday night(6pm-10p). Scott started "Lost 45's"
14 years ago on WERS 88.9FM while attending Emerson College.
Since then, the show has been heard on CR WZLX 100.7FM, AAA WBOS 92.9FM
and now on Hot AC WBMX 98.5FM.

The show will remain Boston-based. Scott will produce two versions :
one for all-70's stations(70's songs) and the other for
Hot AC stations(mid '70s to mid '80s songs).

* Market Notes/Briefs, Listener Comments :

- American Radio Systems' all-70s WEGQ 93.7FM is looking for
a new morning jock. Scott MacKay who was with the station
since mid-October was sent to the beach when his contract expired

at the end of August. Scott, who was the first jock to be heard on the new Eagle 93-7, moved to mornings from evening duty at the sister station Hot AC WBMX 98.5FM last fall. Bill Stevens is filling in. Speaking of the Eagle 93-7, former CR WZLX 100.7 weekend person Steve York is now their night-time jock(8pm-12a).

- Pyramid's CHurban's WJMN 94.5FM has been airing a new night-time(10p-2a) soft R+B show called 'Between The Sheets'. However, 'JMN management decided to switch jocks -- Mark Jordan who came aboard from daytimer Urban WILD AM1090 a few months ago takes over 10p-2a duty while DJ Marc Clark goes back to his old overnight shift(2-6a)...

- As Scott F. reported a couple weeks ago, Avis Travelers' Network now operates on 88.5FM at Boston's Logan Airport. Basically, it's nothing more than a promotional service for Avis with some traveler tips(narrated by George Plympton) inserted in-between. ATN is quite audible in most of downtown Boston...They probably play it in Avis' Airport Shuttle Buses...:-)

- Add Lowell's All-Talk WCAP AM 980 to your growing list of Greater Boston/Eastern Mass. radio stations on-line. 'CAP's Website is located at http://www1.usa1.com/~scryber/wcap/

- I have certainly done my share of PR for the 'new' WEEI AM 850 in this space over the summer. Well, it's part of the job, I guess..:-) Once again, the improved(and not so new) line-up kicks off on Monday,Septemebr 11th. Here we go again :

5:30-10a Imus
10am-12p 'Fabulous Sports Babe' with Nanci Donnellan(ESPN Radio)
12p-3pm The A-team - (Dale) Arnold + (Eddie) Andelman
3p-6pm The Big Show with PD Glenn Ordway and various sports personalities : Gerry Callahan+ Will and Sean McDonough(not at the same time) + Steve Nelson(former jock) + Fred Smerlas(former jock) + Lyndon Byers(former jock) etc....

6p-12mid 'Ted Nation' with Ted Sarandis(shorter shift when pre-empted by Red Sox or Celtics broadcasts).

[I am afraid to say it, but Boston radio will never again be the same after this coming change. insert sarcastic :-) Wow!]

Speaking of 'EEI, PD Glenn Ordway named Sean Grande as 'EEI's new sports director. He'll be delivering sports updates during the 'A-team' and 'Big' shows.

- Letter of the Week comes from a peeved CR WZLX 100.7FM listener who tuned in to 'ZLX's simulcast of 'Rock'n'Roll Hall of Fame' concert televised on HBO on Sep. 2nd and got a lot less than what was expected from the history-making broadcast :-( :

>From DirtyWadda@aol.com
>Subject: Idiots at ZLX!!!
> How could the idiots at WZLX broadcast the entire Westwood One HBO
> simulcast of the Rock and Roll Hall of fame concert 180 degrees out
> of phase the last night. You think someone their would have realized
> that the mono material (the vocals) where all cancelling.. Anyone
> listening in mono heard no vocals. They weren't answering their
> phones either! I think this could be the first time in Boston a
> stereo station has done an entire concert broadcast out of
> phase. Its a pretty elementary thing a stereo station better workout
> before they broadcast remotely delivered stereo programming. Even
> WGIR was able to master it up in NH. Geeesh!!!

# 2167. Buffalo/Toronto Radio Watch(9/6)

Newsgroup: rec.radio.broadcasting
Date: 1995-09-08 00:00:00 UTC
From: ag365@freenet.Buffalo.EDU
Message-ID: <42otco$9pa@vixen.cso.uiuc.edu>
Source record: 29367

Reply-To: ag365@freenet.Buffalo.EDU (Carl K. Gorney)

Up & down the dial in the #40 market:

-First,I haven't been able to get to the Watch for the past 2 weeks due to a number of circumstances.(Then again,Tony Violanti wasn't doing radio columns for the same time-so we're even. :) )
Now,to the news:

*WBEN(NewsTalk 930)has made adjustments to a couple dayparts.

First,Michael Mroziak(to 'BEN:if the name's wrong,let me know)has been brought up from part-time status to handle financial news for its 4-6pm news block Buffalo's Evening News. He's also doing anchoring duties in the evening. Martin Biniaz(another P/Ter)had tried out in that post-but remains with weekend news duties. Krista Bettina-who works at WJJL(1440,Niagara Falls; oldies)-also tried out on weekends.
Second,WBEN is declaring war on WGR in the sportstalk arena.
Howard Simon's 1 on 1 Sports gains an extra hour,now going from 6-9pm. Chris Parker,who's a sports producer at 'BEN,gets a show of his own from 9-11pm,but is known on-air as the "Bulldog".(Disclosure:I worked with Chris while the two of us were at WBNY.) PD Kevin Keenan calls the 'Dog an in-your-face type,adding that he isn't the typical 'BEN talker. Listening to parts of his debut last night,I'd partly agree-insofar that he's a bit hyper. Parker's on Tues.-Fri. (at least for football season). Bills G Glenn Parker gets his own show Tues. at 7,while Simon's talk with head coach Marv Levy has been pushed back to Mondays at 6pm-to give him more time to get to Rich Stadium to do his show on the Empire Sports Network.
Also,Mark Webster's duties at 'BEN seem permanent-liners mentioning his traffic duties are running. He's also doing news anchoring/reporting duties.

*Kerry Gray left CKEY(FM 101 The Planet)last Tuesday to do AM drive at AAAer KBCO-FM in Boulder,CO-which also serves Denver. Gray,who was brought into AM drive 2 weeks before after Jon Summers got blown out on Friday 8/18, was thought by top brass to be the answer in AM. Veteran Canadian AM driver Scruff Connors(whose stops include CILQ/Q107,Toronto and CHTZ/97.7 HTZ FM, St.Catharines)debuted in AM drive yesterday.
In nearly 1 year,Gray managed to become one of the most disliked radio people in the area(including Violanti). But,at least he's found a future wife-the lucky lady is local theater vet Lorraine O'Donnell,to whom he popped the question while guest-hosting WKBW(ch.7)'s "AM Buffalo". It'll be a commuter marriage for the next year,as O'Donnell wraps up theater projects locally. They'll wed later this month in her hometown of Boonville.

*American Radio Systems has agreed to purchase WBLK(93.7;urban AC)from WBLK Broadcasting for $8 million. But,it'd create a tri-opoly(with WJYE and

WYRK;one of the 2 was referred to as WRCH in an Aug.18 Buffalo News article-
actually,it's in Hartford)-and that's a no-no...unless the current law gets
overhauled.

TTYL...

Joe Frank v4.1
Frequently Asked Questions 8/95

---

Welcome to the Joe Frank FAQ, posted sporadically to alt.radio.networks.npr, rec.radio.noncomm, rec.answers and news.answers. It was created by Richard Looney with assistance from many Joe Frank fans who are net.citizens.

Additional information is welcome - please send to rlooney@csc.com.

---

Contents:

1. Who is Joe Frank? -> Biography

2. What has he done? -> Chronological Listing of Radio Programs

3. How about video and writing? -> Listing of his non-radio work

4. Is he still on the radio?

5. Are tapes of the radio programs available?

---

1. Who is Joe Frank?

Joe Frank is *not* the host of a long-running New York talk show, and a different Joe Frank (Carollo) was responsible for those top-40 hits from the early 1970s. Joe Frank is best known for the weekly radio show called "Work In Progress" he created in the studios of KCRW, Santa Monica between 1986 and 1992. Starting in 1993, Joe changed the title to "In The Dark". His program was picked up by some of the more progressive public radio stations, since KCRW made it available 'on the satellite'. In 1995 it was announced that Joe Frank would be 'taking a break' from "In The Dark", and it was removed from the schedules. "He made the decision after considering a number of opportunities in film and cable."

The following biography from KCRW was dated April 1990:

Joe Frank was born in Strasbourg, France of a Viennese mother and a Polish father. His family immigrated to New York City where Frank was raised and educated. Frank, who received a B.A. from Hofstra University, attended the Iowa Writers Workshop and subsequently taught at the Dalton School in Manhattan.

In the mid 70's Frank joined WBAI, the New York Pacifica station, as a volunteer. By 1977 he was the host of "In The Dark," a late night entertainment program that featured Frank's monologues, improvised sketches, and live music. In 1978 Frank moved to Washington D.C., to anchor the weekend edition of "All Things Considered" on National Public Radio (NPR). From 1979 to 1985 he wrote, performed in, and produced 18 dramas for NPR Playhouse, garnering many broadcasting honors, including the 1982 Broadcast Media Award, the 1983 Radio Program Award from the Corporation For Public Broadcasting, two consecutive Gold Awards at the International Radio Festival of New York (1983 & 1984), the American Nomination to the 1984 Prix Italia and a Special Commendation from the Berlin Prix Futura (1985).

In 1986, at the invitation of Ruth Hirschman, general manager of KCRW, Frank moved to Los Angeles where he created his own weekly one-hour program, "Joe Frank: Work In Progress" at the Santa Monica-based NPR station. In 1988 Frank won both the prestigious Major Armstrong Award and the Corporation For Public Broadcasting Program Award for his three-part series "Rent A Family."

In February 1989 "Rent A Family" was adapted and directed by Paul Verdier at Stages Trilingual Theater. In March of 1989 Frank gave his first one-man show ("Joe Frank: In Performance") at the Museum Of Contemporary Art's Ahmanson Theater.

Frank has published two plays, "The Decline Of Spengler" (New Directions 48, New York) and "A Tour Of The City" (Tanim Press, New York). A volume of fiction, "The Queen Of Puerto Rico And Other Stories" will be published by William Morrow (New York) next winter.

Montreal's Theater Anima will present Frank's award-winning "A Tour Of The City" at Hangar Number 9 of the Old Port of Montreal in June 1990. This drama, featuring a cast including performers from Cirque du Soleil, will be under the direction of Jordan Dietcher.

Michael Mann, creator of the television series "Miami Vice" and "Crime Story," has purchased the rights to Frank's radio monologue, "Night" and plans to adapt it for a feature film.

2. What has he done? Chronological List of Joe Frank's radio programs

The origin of this section was a Program List received from KCRW in 1987. That list was then augmented by the author of this FAQ as new shows were broadcast. The productions were originally listed as either monologues (M), dramas (D), or both (MD). This FAQ continues that tradition, but simplifies it such that programs with a single vocalist are listed as monologues (performed by Joe Frank unless noted otherwise) and programs featuring multiple performers are marked as dramas.

Additional information now augments this listing:

(cast members of the dramas are enclosed in parentheses)
... based upon the credits announced at the conclusion of each program - note that there may be misspellings! The following key identifies those performers who appear more than twice:

AH Avery Hart AJ Annalee Jeffries
AM Arthur Miller BD Beth Dixon
BM Bernie Mantell BS Barbara Sommers
DR David Rapkin DSJ David St. James
ES Eric Sears FMA F. Murray Abraham
FZ Farley Ziegler GZ Grace Zabriskie
HP Harvey Per HW Helen Wilson
IW Irene Wagner JP Joseph Palmieri
LB Larry Block LE Laura Esterman
LM Larry Massett LN Lester Navscer
MH Mark Hammer NA Nick Aulette
PM Paul Mantell RC Ryan Cutrona
RF Rosemary Foley TJ Tim Jerome

[ musical artist and title is noted between square brackets ]
Some sources of background music used in selected programs are identified.

{ Comments are enclosed in curly brackets }
The author of this FAQ has annotated the listing with a few comments.

1978
-----

The 80 Yard Run
monologue - one hour
{ KCRW's program list had this show in the middle of the 1979 entries,
but a KCRW announcer's introduction to this program claimed this to
be Joe Frank's very first show, initially broadcast in 1978 }

1979
-----

A Call in the Night
drama - one hour
(BD, ES, AM, BM, IW & Joe)

Arena
drama - one hour
(AJ, AM, BM, RF, ES, Joe & TJ)

The Death of Trotsky
monologue - one hour
[ Miles Davis, "Solea", from "Sketches of Spain" ]

'Til You're Gone
drama - one hour
(AM, Robin Bartlette, TJ, BM, IW, ES, RF, DSJ, Marcel Rosenblatt & Joe)

Summer Notes
drama - one hour
(TJ, BD, AM, LN, RF, BM, Fran Dorn, DSJ & Joe)

1980
-----

The Rare Recording
drama - half hour
(BM, ES, AM, IW, FMA, Christina Moore & Joe)

Joe Frank in Concert
monologue - half hour
{ recorded live at Bushido, a gallery in NYC }

1982
-----

The Decline of Spengler
drama - one hour
(Joe, BS, JP, LN, IW, TJ, Leslie Katz (or Cass), DR, RF, Charles Potter,
AM & Brother Theodore)
[ Steve Reich, from "Music for Eighteen Musicians" ]

Lies
drama - one hour
(Joe, MH, FMA, BS, Christina Moore, TJ, AM & Jane Hunt)
[ Mother Mallard's Portable Masterpiece Company, "Ceres Motion" ]
[ Philip Glass, "Part One" from "Music In Twelve Parts" ]
[ Steve Reich, from "Music for Eighteen Musicians" ]
{ contains "The Night Watchman", which was used to conclude
All Things Considered on Halloween, 1979 }

1983
-----

The End
drama - half hour

Pilot
drama - half hour
(BS, Clark Gordon, PM, LB, IW, Joe, AM & TJ)
[ Pat Metheny, "As Falls Wichita, So Falls Witchita Falls" ]
{ also broadcast on In The Dark }

The Queen of Puerto Rico
monologue - half hour

Sales
monologue - half hour
[ Steve Tibbetts, "Walking" from "Northern Song" ]

Warheads
drama - half hour
(LN, PM, AM, MH, IW & Joe)

Questions
drama - half hour
(TJ, MH, AM, PM, ES, IW & Joe)

1984
-----

A Tour of the City
drama - part 1 one hour, part 2 half hour
(Alan Hunter, Marilyn Casky, BS, AM, Richard Bower, TJ, MH, JP, LB & Joe)
[ Steve Reich, from "Six Marimbas" ]
[ Harold Budd, "Flowered Knife Shadows" from "Lovely Thunder" ]
[ Brian Eno, from "On Land" ]
[ Tangerine Dream, "Remote Viewing", from "Exit" ]
[ Popol Vuh, "Brothers of Darkness - Sons of Light" from the soundtrack
of Herzog's "Nosferatu" ]

Across the River
drama - half hour
(AM, PM, LN, AH & Joe)

1985
-----

Dreams of the River
monologue - one hour

Dear Annie
monologue - one hour

A Pact With God
monologue - one hour

Pretender
monologue - one hour

When She's Asleep, She Looks Like an Angel
monologue - one hour

>>> Work In Progress <<<

1986
-----

Photography
drama - one hour
(TJ, NA, Sandy Fazin, DR, LN, AM & Joe)

Rain
drama - one hour
(Angel, Shawn, Dinah, Chantell, LN, LM, Scott Carrier & Joe)

Talking About Love
drama - one hour
(Dennis, Doug, Danny, Bobby & Craig)

Another Country (parts 1, 2, and 3)
monologue - three hours
[ Philip Glass, "Facades", from "Glassworks" ]
[ Eno/Byrne, "Qu'ran" from "My Life in the Bush of Ghosts" ]

A Landing Strip in the Jungle
monologue - one hour

No Show
monologue - one hour

Let Me Not Dream
monologue - one hour
[ Brian Eno, from "Thursday Afternoon" ]

Case Studies
drama - one hour
(AM, NA, TJ & Joe)

Cocktails Before Dinner
monologue - one hour
[ Jon Hassell, "Power Spot" and "Wing Melodies" from "Power Spot" ]

Dreamland
monologue - one hour

An American Flower
monologue - one hour
[ Ry Cooder, from the soundtrack of "Paris, Texas" ]
{ also broadcast as: Rose }

Why I Don't Love You Anymore
monologue - one hour

Tell Me What To Do
monologue - one hour

Highways West
monologue - one hour
[ Fred Simon, "Time and the River" from "Usually/Always" ]
[ Brian Eno, "Always Returning", from "Apollo" ]

Night Ride
drama - one hour
(TJ, MH, JP, Alan Hunter, LN, AJ, FMA, AM & Joe)
[ Steve Reich, from "Six Marimbas" ]
[ Gavin Bryars, from the original "Sinking of the Titanic" ]
[ Harold Budd, "Flowered Knife Shadows" from "Lovely Thunder" ]
{ continuation of A Tour of the City }

1987
-----

Rent A Family (parts 1, 2, and 3)
drama - three hours
(BS, MH, AM, TJ, NA, Carolyn Swift, LB, Lynn, Sarah, Carmen, Thomas,
Timo, Sharon, & Christa)
[ Harold Budd, "Gypsy Violin", from "Lovely Thunder" ]

In the Middle of Nowhere (parts 1, 2, and 3)
drama - three hours
(TJ, LB, AM, LE & RC)
[ Andreas Vollenwieder, "The Stone" from "White Winds" ]

The Policemans' Ball
drama - one hour
(TJ, AM, NA, LB, BS, Steve Friedman, Denny Partridge & Joe)
[ Rossini's "William Tell Overture" performed by the Portsmouth Sinfonia ]

He Hesitated
monologue - one hour
[ Frank Sinatra, "All My Tomorrows", from the soundtrack of "A Hole in the Head" ]

At The Border
monologue - one hour

Thank You, You're Beautiful
drama - one hour
(LE & Joe)
[ Harvey Sachs, "What the World Needs Now" ]
[ Popol Vuh, "Brothers of Darkness - Sons of Light" from the soundtrack of Herzog's "Nosferatu" ]

To The Bar Life
monologue - one hour

1988
-----

The Emergency Room
drama - one hour
(AM, TJ, LB, PM, LN & Joe)

Stories For Nothing
monologue - one hour

Building A Church
drama - one hour
(TJ, Tess, AM, Richard Eisner & Joe)
[ Bill Nelson, "West Deep" and "The Spirit Cannot Fail" from "Chance Encounters in the Garden of Lights" ]

The Street
drama - one hour
{ vocalists unidentified }

Lines
monologue - one hour

Words
monologue - one hour

Five Part Dissonance
drama - one hour
(ES, AM, AH, PM, FMA, AJ & Joe)

Emerald Isle
drama - one hour
(Fionualla Flannigan, LB & Joe)

Home
monologue by GZ - one hour

Islands
monologue - one hour

Sleep
monologue - one hour

1989
-----

Performer
drama - one hour
(LN, Julie Renick & Joe)
[ Enya, "Watermark" and "River", from "Watermark" ]

The More I Know You
drama - one hour
(A. Lorey, Antony Becker & GZ)

Road To Hell
monologue - one hour

Nausea
monologue - one hour
[ Yello, "The Race" from "Flag" ]

Bad
drama - one hour

3. How about video and writing? Listing of his non-radio work

Joe Frank on screen:
---
A short video was presented at the Santa Monica Public Library in 1988. It showed Joe speaking in the KCRW studio, a woman driving up to a pay phone and making the calls heard in "Thank You, You're Beautiful", and material from "Pretender", including the scene of Joe with the pillows stuffed up his shirt.

Jerry Summers, one of Joe Frank's cohorts in the studio, says that "... Joe did a short for CBS for a late-night summer-replacement show called 'The Midnight Hour'. The piece was 'Memories', a re-working of a WIP story. It aired (as I recall) late August or early September 1990, on the final night of 'Midnight Hour'."

A short film has been aired as filler on the Los Angeles PBS station, KCET, showing a montage of urban images (among which is Joe at the microphone) accompanying the first segment from "Islands".

Three shorts are available on Playboy's "Inside Out" anthology series, released on videotape in 1992:

Volume 2 contains "The Hitchhiker"
(which dramatizes the first segment of "Nausea")

Volume 3 contains "The Perfect Woman"
(which is similar to part of "Sleep", and also dramatizes part of "The End")

Volume 4 contains "Jilted Lover"

Joe Frank stars in these features.

... and the 1995 Zima commercial

Joe Frank in print:
---
An article about Joe called "Radio Noir", by Jamie Diamond, can be found in the Los Angeles Times Magazine of Sunday, November 22, 1987. The Wall Street Journal profiled him in an article in their March 15, 1988 edition. Another article, by Dick Lochte, called "Frankly, Joe's Branching Out", appeared in the March 1989 issue of Los Angeles Magazine. Much more verbiage (generally quite favorable) appeared in the wake of the release of his book of short stories, _The Queen of Puerto Rico_, which was published in 1993 by William Morrow and Company of New York.

Contents of _The Queen of Puerto Rico_ :

Tell Me What To Do
Fat Man
Night

Green Cadillac
Date
The Queen of Puerto Rico
Winter
The Decline of Spengler

{ Fat Man contains material from "Dreams of the River", and Winter
has similarities to "When She's Asleep, She Looks like an Angel" }

4. Is he still on the radio?

The following stations play repeats of Work In Progress or In The Dark:

KDVS 90.3 Davis, California
Saturdays at 11PM, and Mondays at 11PM
[Monday slot may move to Wednesday, soon]

KPFA 94.1 Berkeley, California
Thursdays at 11PM

WFMU 91.1 East Orange, New Jersey
Mondays at 6PM

5. Are tapes of the radio programs available?

Episodes of Work In Progress and In The Dark are probably still
available on tape from KCRW. Write to them for more information at:

KCRW 1900 Pico Blvd, Santa Monica, CA 90405
---

This is a living document. If you have any corrections or updates, especially
concerning the schedule on your local station, please email rlooney@csc.com.

Here in Calgary we have been hearing some rumours as well, concerning
not one but two new FM stations.

Last year CFXL-1140 (50 kW, a mixed bag of religion, rock oldies
(carries Good Time Oldies network at night) and misc. other programmes)
was granted permission by the CRTC to go to FM (96.9). This was supposed
to occur sometime this year, but I have heard nothing recently about this.
CHRB-1280 High River (10 kW, Country) would take over the CFXL AM
facility (and thus become a major force in the Calgary market).

The other rumour (actually a fact) is that a application has been
made to the CRTC for a new FM which would carry a variety of foreign
language programming (largely Chinese).

Cheers, Deane D McIntyre

Dave Sheranko wrote about theft of CD's in a college station, and wanted to know about lockable CD storage.

If your budget permits, Dave, I highly recommend you call TM Cantury in Dallas, and purchase their Ultimate Digital Studio, and get the Sony CDK jukeboxes with the system.

It's a pricy system yes, but the CD jukeboxes are lockable, and can only be opened when you enter your password into the computer.

Good luck!!!

Rob Bass

: [Moderator's Note: This is one reason for Hard Drive music libraries.
: Another option is a PC driven jukebox, with a lock. AT can access any
: of the tracks, but cannot steal the CD's. It costs though. Bill]

There are no real methods to keep the CD's in the control room. In a college station you are really SOL. In the Real world we resorted to 18gB of MUSICAM compressed hard drives to store all the music. The CD's are in the possion of the Music Director and are stored in a Locked Cabinet when not in use, IE dubing into the system. Oh there is a box outside the MD's door full of CD for the taking but no one wants those for some reason just the ones that we are actually airing... This from a Classic Rock station.

Get rid of your DJs and get new ones. Seriously. Do you want to help guys like this get started in the radio biz where they will be dealing with thousands of dollars worth of equipment and CDs on a daily basis? There are *plenty* of honest people who want to be on the radio, can be good at it, and won't steal your CDs.

: What have other stations done in the past to combat this?

At one station the GM occasionally checked certain records (pre-CD) in the library and noted when they disappeared. He also had clearly labeled each record with the call letters. He fired 2 or 3 DJs before people began to learn not to mess with the records.

: knowing our DJs, nobody would ever bother checking the racks, much less
: report a missing CD until it's already too late.

That's their fault, not yours. If you use this inventory approach then make it clear that the racks MUST be checked or they won't have an airshift the next day. Then purposely pull an occasional CD to see if it shows up on the missing list just to check that they're really filling it out reliably.

>Our college station is having a severe problem with CD theft. It's

>What have other stations done in the past to combat this? We thought of
>having a checklist to be completed at the start of each shift, but

Hi Dave,

My college station, WECI (Earlham College), had a sign out system and locked record/CD libraries during non-signout hours. If the AT couldn't be there for regular hours, she or he had to arrange with one of six people who had keys for a time to pull for their shift. (Not hard, since they were all Admin Staff members who kept way too many office hours.)

I have to say that the image of our station improved greatly with this system, by the way. Pulling ahead made people plan their shows -- most of the jocks even knew to pull the tunes that would be requested. Others were able to fill requests because there was almost always an AdStaff member there (I'd study there so folks could get the keys from me.). Show planning really made a major difference. (We were also training AT to use the station calls first thing every break, etc...)

I'm a proponent of a tightly controlled sign-out system at a volunteer station. It allows control of the record (disc) inventory, and promotes good presentation.

Bill's idea of one of them newfangled computer controlled units is a very good one if the station only has a couple of hundred discs. College stations, though, tend to have "Strip" or "Block" formats. WECI ran Classic Rock, Jazz, Classical, Oldies, and Alternative from 600 CDs and 14,000 records (maybe more). If your station is like that as well, then carousels will only solve part of your problem.

Good luck, Dave! Your quandry is one of the oldest in college broadcasting. Please let me know if you come up with an eloquent solution!

Best,
Alan

We use Denon CD players. The CDs are in the caddys and we do not screw them shut, though the caddys come with tiny screws for this purpose. We do, however use a 1/2 inch by 3 inch label, with album information on it that is stuck on the caddy. It seals the caddy cover and does not interfere with use. To get to the CD inside is not impossible, but a determined CD thief will get it anyway. It does help keep honest people honest and decreases temptation. If anyone finds a label cut or a CD missing it is reported immediately to the Music Director. We can then go back to see the last time a piece of music was played from that CD and at least get an idea of when it disappeared. It isn't a perfect solution, but it helps.

Sure, Chicken Man (a.k.a. Benton Harbor) was pretty fun.
Even more fun was "Peter Fugitive", a James Bond-ish serial that
ran in the mid-60's on WLS-AM. In fact, I think it ran on
the Art Roberts show in the late evening -- are you any relation?

I think the series started in Chicago (Orkin?), but I remember
hearing it in Portland, Oregon, and New York, New York, as well as
pirated episodes on tape while in Vietnam at AFVN.

Someone's post about NYC's WRFM (which I remember was a "Beautiful Music" format station 25 years ago) got me to think of obsolete or defunct station formats.

Looks like the following are defunct:

Beautiful Music example stations: WPAT, WTFM, WRFN, WVNJ, all NYC area

Top 40 example: WABC, WKBW, WOR-FM, WMCA, all NYC area 'cept KB

Disco Well, that didn't last real long, WKTU of NYC

And there was the old stuff like radio drama shows, like "Green Hornet", "Fibber Magee", "Lone Ranger", and such (NO< I'M NOT THAT OLD!!!)

Well, TV "..killed the radio star..", so the radio drama stuff went away.

My parents used to listen to Beautiful Music stations, but my father is now passed away, and my mom is around 70. She seems to like WQEW after I set up an AM radio (that was a boat radio that could also transmit on around 2500KHz, disabled the transmitter, and broadened the recieve bandwidth of AM, and feed the audio signal to a stereo amp, in mono) in the living room. So, it's fairly obvious that BM's audience has died out (literally) and "younger dentists want soft rock anyway" :=) Though I'm not sure who "American Standards" (WQEW) is aimed at.

And Top 40 is pretty much gone, though moddern rock stations sometimes play that catagory of rock songs in a top 40 style. I suppose rap stations might play rap in a top 40 style, but (sorry) I'm just not a rap listener.

# 2188. Help! Question on sales/programming dept division.

Newsgroup: rec.radio.broadcasting
Date: 1995-09-08 00:00:00 UTC
From: mjain@ix.netcom.com
Message-ID: <42otdo$9u1@vixen.cso.uiuc.edu>
Source record: 29388

I am currently working with a large contemp. hits station in a top 20 market and need some advice. I am sensing a fairly large division between the sales manager and the programming director with reference to a promotional item I am running. As naive as I am (I'm new to radio), I marketed my product to the sales manager with full force, leaving the sales man. with the duty of creating the program directors role in the promo. My product can give the sales department a lot of features, flexibility and creates sizable revenue for the station. We started the promotion this week and are supporting it only on ad time (approx. 5 spots a day). There is no programming involvement as of yet.

The problem is that the programming director is viewing my promotional product as a "sales" issue, and wants to stay completely away from it. I really need his support to make this promotion work, i.e. I need the dj's to talk about it on the air, integrate it into programming etc. It's a very easy item to promote, but the scent of $$$ seems to keep the PD away. I am now trying to find different ways to show the PD how the promotion can work for his agenda/staff.

My question is: What do PD's look for in a promotion? What exactly are their agendas? I hear dj's on all the stations promoting the MTV music awards (on this station too.) and other sales oriented things. If $$ is a bad word to him, why are they talking up those items. What direction should I be looking at to "get him on board".

I've been playing with...this promotion is going to help solidify the station's sense on community among listeners, this promotion will help bring in lots of other promotions (I know that's sales related), etc.

Our current results show that listeners are really excited about our system. Is working around the PD an option (talking to the DJ's individually) or would that make matters worse?

Any responses would be helpful!!!

Thank you.

I'd like to collect some of the 60s Drake/Chenault jingles. I have a KFRC one (the drumroll ID without the bed for the DJ intro) to trade in .WAV or .VOC format to trade.

Also, does anyone have the "Nighttime Is the Right Time (to listen and enjoy...)" KEWB/KFWB/KDWB jingles or the instrumental anthem which ran about 2.5 minutes?

: Why does everybody rag on DMX? It may not be much now, but services like it
: are the ultimate solution to your problem, in my opinion. Read on . . .

Because it appears that DMX leverages local cable operators into discontinuing whatever other FM feeds they provide to their customers for fear of the competition. I have had this happen to me TWICE in two different cities.

I personally am hoping that the Telecom reform bill will allow entrepeneurs to provide services that my cable operator does not. An example would be DMX-quality feeds of local and non-local radio stations, and nationally syndicated shows like Dr. Demento. I would gladly pay for this service.

I know that KKSF (the local Jazz/Easy Listening Station) would be eager to particiapte in something like this. They publish a newsletter which has castigated DMX in the past and basically said that if people want expanded options when it comes to radio access, they have to ask for it, and vote with their pocketbooks if they want to see anything change.

I couldn't agree more. More Oldies stations need to develop the on-air presentation. We consult lots of Oldies stations and this is one of the highest priorities.

I also agree with your comments on WGRR & KRTH. WGRR is a wonderful station. They're a client of ours and we're really proud of them. KRTH is also a fabulous station.

Best Regards. E. Alvin Davis

Max:
One reason for the insertion of "point" in station ids was the
proliferation of digital tuners, especially in cars. Long gone are the
dials with red pointers indicating the frequency. Where a station may
have once indentified itself as Rock 100, it was reasoned that 100.1
would better serve the station on air, since the listener was actually
seeing "100.1" on the readout.

As for actually saying "point" instead of simply "Ninety-Seven Nine",
well, some do and some don't. But you pretty much have to say "point"
once you reach 100. One Hundred Point Seven (100.7) is much different
that One Hundred Seven (107)!

Digital radio tuners, plain and simple.

That's why stations that for years were "Hokey-Smoke 100 FM" all of a sudden were eager to tell you that they were "Hokey-Smoke 99-POINT-3 FM," 'cause "100 Mhz" is not a valid FM radio channel, and on the next closest numbers to 100, 99.7 and 100.1, you'll either hear a competitor or nothing at all. Only Hokey-Smoke 100 knew that they were at 99.3 Mhz, but when you had a poorly calibrated analog slide-rule dial, it didn't matter much.

As to why they emphasize the decimal "POINT," never overestimate the intelligence of the American public. Or the ability of America's radio and automobile companies to produce clear, easy to read radio controls.

Jeff...

ARRRRGHHHHH! "Mix 105-DOT-7"????? "Thunder 107-DOT-7"???????

Jeez, I sure hope not!

Um, brave poster stepping forward to propose, how about we steer the industry back toward not saying ANYTHING to call attention to the decimal point? In the interest of reducing the clutter on the air, even just a teeny bit? I think enough of the American public is aware that FM frequencies come in the number-dot-number format, LCD displays on radios a perfect example.

I dunno...its a thought...

Cheers,
Max (no decimal point) Cacas...

Max, the POINT started coming up in identifiers because:

1. The FM band became more congested and stations became crowded together in the larger metros.

2. Digital tuning became the rule and not the exception.

3. Arbitron started being more picky about accepting frequency write-ins

All of the above translated into the need by programmers to make sure the listener...especially the one holding an Arbitron diary...knows EXACTLY what frequency they're listening to...so they can write it down and go back to it the next time!!

GaryB

(...it's changing again: net.fever is changing the way freq's are being talked about on the air. An alternative station now calls itself "107 DOT 7"!!

>Does anyone remember exactly how and why the "POINT" became such a
>pervasive part of American radio?

They started using "point" when they realized just how *STUPID* the average listener is. <Dar ducks flying objects>

Seriously, Joe/Jo A. Listener isn't a radio geek (like most of us here ;) ;) ).. "they" just fly through, finding anything that's pleasing to their ear, not caring about what a "hit" is, or a "format" (heck, I once told somebody that the reason we probably wouldn't play their Real McCoy request is because that artist doesn't fit our format...the woman then proceeded to say, "What about my floormats???? Huh?!? I don't understand! What do my floormats have to do with my requesting a song??" I just answered, "We'll try to play it for you soon, OK?"

Also, maybe listeners aren't as stupid as stated, but rather it's insecure advertisers who aren't sure that the listeners know what they're listening to
(hence the invention of naming EXACTLY where you are on the dial, despite how stupid it sounds, and reading a liner over and over (and over and over) that says what your purpose as a radio station is - "We Don't Play <This>, <That>, Or <The Other Thing>!").

In light of all this, we get mail and e-mail from people who refer to us as "Y-100.3", even though we've never said that *specifically* on the air (except at the top of the hour, where our voice guy says "digital 100.3")..does somebody think our mail will accidentally go to 100.1 WJRZ in Manahawkin NJ...or 100.7 WFMZ in Allentown?? I think that people just like to boast that they own a digital tuner :) :) (Which is really where all the references to EXACT dial position came from...we used to just say, "Yeah, there's some station around 98 or 99 that plays cool music, so I just listen to them all the time." People never knew that there were actually 10 separate 0.1 units between 98.0 and 99.0)

Me? I still call 93.3 WMMR just simply "93" (which is different from 93.7 WSTW, which I just call "STW"); "B-101.1" is just "B-101"; "Magic 102.9" is, in my references, "Magic 103" (which I differentiate 103.9 WIBF from by saying just "IBF" (or "DRE", as it is now)); "Star 104.5" is just "Star 104".

Of course, that's just me :)

In your posting about what's the point of stations adding point to their numbers. you ask "what's the point?".

But you also mention WGAY. They changed their format. It doesn't sound much different. What's the point?

## 2200. A couple of AM technical questions

Newsgroup: rec.radio.broadcasting
Date: 1995-09-08 00:00:00 UTC
From: EDNSTRASSBERG@cahners.com
Message-ID: <42ote8$a00@vixen.cso.uiuc.edu>
Source record: 29400

Can anyone tell me whether WBT, Charlotte, NC is a Class IB station? I had always thought that it was. KFAB Omaha, the dominant station on 1110, protects WBT at night. WHIM, Providence, RI, which used to be a daytimer, has been operating at night on 1110 with 250W DA for many years. As far as I can tell, Providence is well within WBT's 0.5 mV/m 50% skywave contour--the normally protected nighttime contour for Class IB stations. Although WHIM's directional pattern (sort of a figure-8 with major lobes to the west-northwest and east-southest) protects WBT somewhat, WHIM's nighttime service does not seem consistent with the protection at least theoretically offered to IBs. Is WBT, in fact, a Class II? If so, is this because of WBT's synchronous transmitter, which operates nighttime in Shelby, NC to provide null fill-in?

Also, can anyone tell me whether WNNW (I think those are the calls) the Spanish-language daytimer on 1110 in Salem, NH, operates with 5 kW ND-D as listed in the M-Street Directory or with 10 kW DA-D--protecting WHIM and WBT--as I had thought? It could be that the station originally used the higher power and DA but lost its transmitter site and had to change its facilities. (At one time, the station had applied to increase to 25 kW DA-D, but the FCC rejected the application because of daytime-skywave interference to KFAB.) Where is WNNW's transmitter now located?

Secondly, can anyone explain why, when WNEW-AM (now WBBR) moved its transmitter from S Kearny NJ to Lyndhurst NJ, it replaced a two-tower

directional with a four-tower system. WNEW had been operating with 50 kW DA-N from S Kearney for several years before the move, so, presumably the two-tower array afforded adequate protection to KWKH Shreveport, the dominant station on 1130. It is most unusual for a station to replace an array with one having more towers if there is no facility upgrade involved, and there was none in this case. Moreover, because only one of the towers in the four-tower array is a half wavelength, WNEW had to obtain a waiver of the minimum signal strength requirement for Class IB stations (225 mV/m/kW RMS unattenuated at 1 mile). My recollection is that the RMS field is either 210 or 215 mV/m/kW.

[Moderator's Note: 1130 is a weird frequency, having several relatively high powered, but HIGHLY directional stations on it. Milwaukee Wis, Detroit Mi, and Minneapolis Mn all ahve high powered signals on 1130, but are so directional that they are often un-listenable in places where you can still see the towers! Maybe that is part of the problem with WBBR. Bill]

Well put. It seems that it should be natural that most of the things a
radio station does should be able to please the listener and the
advertisers at the same time.

> I am amazed at the fuzzy thinking about business matters that I see expressed
> in this group.

I'm learning. As a listener I really only pay attention to the product.
How it gets there is something I had no concept about before picking up
this newsgroup. Your description about what the stations are buying and
selling is starting to make sense now.

An entry appeared in either R&R or Broadcasting & Cable about a month ago, listing an actual sale. The price was specified as $700,000. This would reflect a pretty good profit for the current owner, who paid less than half that amount in 1992. That's assuming he can get the darn thing back on the air (it's been silent for the last three years, except for returning to the air for a few weeks at low power in late 1993).

> Bonham/Sherman/Denison/Durant [Oklahoma]").

I did notice this when I was driving around last weekend.
Their programming, however, is not polished enough to make a real dent
in the ratings of KIKM, which is the incumbent country station in
Sherman-Denison.

> Poor Sherman/Denison...most of the stations are off the air, have left or
> are leaving, or are satellite. Only KFYN/KFYZ-FM is local all the time.
> KIKM-96.7 is local much of the time. That's it:
>
> KXEB-910 Sherman Spanish (studios in Dallas and aims for D/FW)
> KDSX-950 Denison Prime Sports Radio
KDSX is one of the stations that supposedly will be migrating to the
expanded AM band.
> KFYN-1420 Bonham country // KFYZ
> KJIM-1500 Sherman silent
The sale of this station has been reported (in R&R, I think) about a
month ago. After this sale is consummated, KJIM should return to the
air. I'm afraid that the people who bought this station overpaid, though...
> KIKM-96.7 Sherman country (some satellite)
> KLAK-97.5 Durant OK SMN AC (local mornings)
KLAK is also local during afternoon drive...
> KFYZ-98.3 Bonham country
> KDVE-101.7 Denison JSN soft AC
KDVE is KIKM's duopoly partner. Hunt Broadcasting acquired this station
from Octavian Communications earlier this year. Octavian was owned by
Durant Broadcasting (owners of an AM/FM combo in nearby Durant) and the
Davis Family Trust (which still owns KWSM and KDSX, and is in the process
of selling KTCY and KJIM).
> KWSM-104.1 Sherman silent (moving to Sanger)
> KTCY-104.9 Denison silent (trying to aim for Dallas)

When I moved to Texas (in 1984), this market was a lot healthier,
with full-time local programming on 910 (KIKM-AM, then Top 40), 950
(KDSX, country), and 96.7 (KIKM-FM, country). 101.7 (KDSQ) was automated
Top 40, and 104.9 (KLAK, before it moved to 97.5) was satellite AC.
I think that several factors have hurt this market, including an
increase in listening to Dallas radio stations in the area, several new
stations coming into the market, and incompetent management of some of

the stations.
Now that the stations that were added to the market in the late 80's
are leaving for the Dallas suburbs, the situation should improve quite
a bit.

Source record: 29409

Rob:

A couple of suggestions based on personal experience with "rotten" CD sound:

1) Throw away that Yama-Tech-Sony CD player with its digital jitter and cheap-butt D/A converter; purchase and use a carefully-designed audiophile-grade CD deck that won't generate artifacts on its own, and will sound smooth as silk, such as a Rotel or NAD. Note: these examples are not expensive costing $400 or less; there are others, too.

You mentioned that "compressed" CDs sound 'better' to your ears, and I believe it, so please note the following:

2) Use an amp that can keep up with the dynamic range of CDs. If solid-state, that means big wattage reserve and low noise floor; tube amps tend to deal with the inevitable peak overload with much more grace to the ear and can actually compliment the sound of CDs. BIG tube amps (my personal preference)make CDs sound like the voice of God in an old DeMille movie.

By accomplishing the above you might note the differences I did: for example, percussion rim shots no longer sound like baseball bats on a fiberglass outhouse. Enjoy, and all the best.

My wife & I frequently visit relatives in Scituate, Mass. Does any of the transmitter plant remain intact today ? (Antennas, buildings, etc.) Might be an interesting side trip (for me, anyhow. My wife would prefer the Talbot's Outlet Store, I'm sure :-)

Just curious........

P.S. (Unrelated) - I enjoy reading the various local radio/TV updates from around the country. Is there anyone who could put something together every once in a while on the Erie PA market ? Maybe the Buffalo/Cleveland/Pittsburgh folks hear when something happens in Erie ?

# 2211. WRVR New York Jazz - (was WRFM query)

Newsgroup: rec.radio.broadcasting
Date: 1995-09-08 00:00:00 UTC
From: Bill Scheffler <74767.2332@compuserve.com>
Message-ID: <42otej$a17@vixen.cso.uiuc.edu>
Source record: 29411

In his post about the New York Jazz station WRVR, which was owned by Riverside Church in New York and sold in the 70's, Marc Fisher mentioned how the station featured extraordinary jazz jocks such as Max Cole. And he also issued a challenge for anyone to name the rest.

I was a listener and can name some, but mostly because I later worked with them at other places.

Ed Beach was one name I remember from the air. He was originally from the Northwest, and really knew the music.

Of course, there was New York's best know Jazz jock Les Davis. When I worked with him at WVNJazz in the 80's he'd tell the story of how he was getting ready to do his regular morning drive jazz shift at WRVR when a couple of rented vans with Texas license plates pulled up in front of the station around 5-AM. Folks from station owner Viacom began unloading boxes of country music carts and issuing orders that starting at six, only those carts were to be played on the air.

There were probably thousands of Jazz fans who had a rude awakening when their clock radios tuned to WRVR went on that morning.

Then there was Robert Desiderio who worked weekend overnights on RVR and used to say on the air that "rock was his music, but he'd be playing jazz that night." Desi was a former rock jock, at WDHA in Jersey where we worked together, WCOZ in Boston and WPIX in New York, who was breaking into soap opera acting in New York and needed the work. He later went to LA, acted in movie and television dramas and married Judith Light of TV's "Who's the Boss." Another former DHA jock who also worked at RVR was Ed Reily.

Another RVR almu was Ed Kerins, who went on to UPI where he did celebrity interviews and general reporting from the New York radio bureau. Ed is a Juliard piano player who loves jazz. He tells a story of his WRVR days when he was doing a DJ shift. He put on a long record and ran down the street to buy a pack of cigarettes.

On the way back, a group of neighborhood tough guys slammed his face into the sidewalk and stole his wallet. When he got up with blood all over his face and shirt, one of the muggers must have realized what a decent guy Ed is. The guy apologized, and later apparently mailed Ed's wallet back to him. It came to Ed's Long Island home a couple of days later with the proper postage. The money was missing, but all the important papers were inside.

And yes, though bleeding, Ed made it back to the studio before the record ended and his listeners never knew.

Two other former RVR guys are now working at the Wall Street Journal Report. Writer Pat O'Neal and former ABC Network Anchor Warren Dean.

The styles and voices of some of the other RVR air staff were memorable, but unfortunately their names are harder to recall.

The last bastion of that format in NY City was WPAT. Not long after WRFM went out, WPAT began phasing in more modern music eventually becoming an "EZ" format. I think the Program Director at the time was Ken Lamb. Jim Aleworth, another WNYW/WRFM alumnus was also on the station.

When the owner died, Park Communications was disolved and the station was sold to a local group. The format is somewhere between WMXV and WLTW right now and seems to be doing quite well.

> I know that WRFM was a jazz station owned by a church.
> Which one?

No that was WRVR. There is a connection, although minor. Sonderling purchased WWRL/WRFM around 1967 or so, (not exactly sure), and then sold WRFM to WNYW. Around 1972, they bought WRVR and moved that operation from Riverside Church where it had been a non commercial operation to the WWRL studios in Queens.

When Viacom took over Sonderling, WRVR became WKHK, a country station paterned after KIKK that they also owned. They also moved the WRVR call sign to an Easy Listening station they owned in Atlanta. After about a year or so WKHK became WLTW, a light station it reamins today.

WWRL is still in Queens and is owned by Unity/NBN with a Religion/Gospel Music format while WLTW moved to Viacom's HQ building on 43rd St. in Manhattan, (later torn down for an urban renewal project). It is located now in Viacom's HQ at 1501 Broadway.

> The station switched in 1986 but I was unaware of the 1992
> change. Why did they change? Was a format change involved?

As for WRFM, the format remained Easy Listening until 1986 and then went soft rock as WNSR, a format that competed with WLTW. The change to 70's, 80's and 90's music as Mix-105/WMXV was in 1992 and had been phased in partially during the last weeks of WNSR.

Different stations...you're thinking of WRVR, owned by New York's Riverside Church. As I recall, although they were on a commercial frequency, they did not broadcast commercials. WRFM was on 105.1; WRVR was on 106.7, today occupied (I believe) by WLTW.

I believe you are thinking of WRVR which was Jazz and owned by the Riverside church in NYC. This facility was sold and its format went through several changes including WKHK, country. It is now WLTW at 106.7 MHz.

The previous post about the WRFM, WNSR and WMXV post is esentially correct. I worked there from 1967 when Bonnevile Broadcasting first aquired WRFM and moved its operation to the prsent 485 Madison Avenue studios and ran it with the shortwave operation WNYW, Radio New York Worldwide. I board operations for both facilities for several years.

Last I heard (a few years ago), Don retired in a San Francisco suburb (San Ramon? Orinda?) He was disabled in a skiing accident where he broke his leg. The leg didn't heal properly and had to be re-broken and re-mended. This created more problems. The last years of his KFRC broadcasting were being done from his home while he was on his back and his wife was doing his sound effects. KFRC (this was in the RKO General days) did everything in their power to make things work for him. Unfortunately, there aren't many stations willing to go to these lengths anymore.

Someone correct me if I'm wrong, but I'm fairly certain Dr. Donald D.
Rose passed away some time ago. KFRC is still around, try 415-555-1212
for directory assistance and call the station and ask around...

> and there was none in this case.

The So. Kearny site was abandoned for 3 main reasons, Floods, The NJ Turnpike and WMCA. The entire area is a swamp, the land floods with water after every storm and it takes days for it to drain. The building up of roads in the area made each plot of land a dammed in lake. Needless to say, when the towers and ground system needed replacing, it just wasn't worth wasting the money. The towers did offer some skywave protection for the other stations on 1130, they were built with "top hats". If you pass by the site you can probably still see them rusting on the ground. No one has developed that property, it cost too much to drain and fill the swamp.

During the late 1950's the road between WNEW and WMCA, The NJ Turnpike, was replaced by an elevated road on a 200+ft tressel, about 3/4 th the way up the towers and less then 100 ft from one of them. The elevated road was simply to level the road between the hills surrounding the swampland, but it played havoc with the pattern.

Now as for WMCA, well they were getting some very large antenna current readings when they were off the air, simply due to the proximity of their towers to WNEW's. While WMCA was only 5kw, it did it's dirty work on WNEW as well. WMCA is 570, with the second harmonic at 1140, you can be that WNEW got some erroious readings as well.

While Lyndhurst is 4 towers, like many stations, I've been led to believe that only 2 towers are used for day DA and either 2 or 3 for night DA. Since the CE for the station is a regular subscriber he would have the correct answer for you. The facillity was built not long after the landfill that had been there, (a constantly burning garbage dump), was

closed and just like WOR's move to the area and WHN's new towers, was timed to be there while the land was still cheap and the developers hadn't gotten the idea of building there. Of course the state later declared the area the Meadowlands and even though they invited the radio stations to move there, are now trying to get them out.

As a current Jersey Shore resident, I'd like to point out that WJLK is in a shopping mall near Routes 35 & 36, nowhere near downtown Neptune. The mall they moved into was heading down the tubes because of the Monmouth Mall, and they probably got a sweetheart deal to move there.

The site was visited last year by Johnathan Marks, host of Media Network
over R.Netherlands. According to the report, there is nothing left but a
concrete block that was the foundation for the main antenna and rubble
where the building was.

WRVR brings back memories, not for jazz, but for some of their syndicated programs. Unfortunately, I never got to hear the station, but I remember some programs that were heard on the old National Educational Radio.

They also broadcast a program called Night Call, which dealt with race relations and other political topics during the mid-60s.

--------- REMAINDER SNIPPED TO CONSERVE BANDWIDTH --------------

Bill's post reminded me about another WRVR alumnus of note. Back in 1972, Jay Kernis was a regular summer intern/part-timer for WRVR/New York. During the school year, he was a Journalism student at the University of Maryland in College Park, where he served two years as Program Director at the school's WMUC-AM (yeah, it was just a carrier current AM back then). I worked for him there as a dj, newsman, and typing program logs.

While still in school, I remember Jay got a big thrill when he and a bunch of friends went to the movies one night. It was the movie version of the Broadway musical "Pippin"; in the opening minutes of the movie (which was shot in NY), a cross-town bus wandered across the screen with a WRVR busboard clearly promoting the station's "Jazz in Drive Time" program. It was a busboard Jay had designed that past summer for the station!

After college, Jay went on to a long career here at National Public Radio, serving (among other things) as the Creator/Senior Producer of "Morning Edition", and the Creator/Executive Producer of "Weekend Edition". Jay is now with CBS News in New York, where he works as a producer.

San Diego Radio Watcher Update 9.9.95:

KFMB on Friday announced that starting in October,
the Berger & Prescott show will take over the 5 to 8 p.m.,
time. The popular San Diego icons have had a colorful history:
KGB-FM, XETRA-FM, XETRA-AM, and at various golf courses around
the county.

They have a Saturday afternoon show on KFMB - AM from 2 - 6 p.m.,
and were filling in on an as needed basis for other talk show hosts
at the station.

Currently, KFMB has one hour of news at 5 p.m., followed by a two
hour block of sports talk.

KFMB is at 760 [5kw/50kw DA-II]

Just when you think not much is happening...everything is. Greetings from market #32 - California's capital, the jewel of the Central Valley and home of a lot of radio happenings lately. ;)

* Mix 96 (KYMX 96.1 FM / AC) has been victimized by vandals. Those vandals, apparently looking for copper wire to sell as salvage, knocked down two of the station's towers earlier this week by cutting guy wires. That knocked Mix 96 off the air for a good part of Wednesday morning, but it finally returned with the help of crosstown rival Eagle 96.9 (KSEG 96.9 FM). That station gave Mix a spot on its tower, and Mix is back - but temporarily at a tenth of their 50,000 watt power.

* Off the Sacramento airwaves, but by his own choice, is NBA Kings broadcaster Tim Roye. He's accepted the job as play-by-play voice of the cross-area Golden State Warriors. Roye came to Sacramento many years ago as sports director of KFBK (1530 AM News/Talk, and, for those who don't follow these reports often, my employer :). He left us when the Kings contract went to Hot Talk 1140 (KHTK 1140 AM Talk/Sports). He's been hosting Kings pre-game and post-game shows and co-hosts KHTK's afternoon drive sports talk show with KPWB/Ch. 31 sports director Grant Napear. Tim has also done play-by-play work for the Kings on KHTK when main play-by-play voice Garry Gerould does Ch. 31 or Indy car racing work. He's a peach of a guy and we wish him well in the San Francisco Bay area. He's signed a 3 year contract.

* Lori Sacco, Y92 (KGBY 92.5 FM Hot AC) news director and KFBK News at Noon host, has had her baby. Lori and baby Nicole Christine, reportedly a beautiful lil' creature, are resting. Subbing for Lori on Y92 is KFBK weekend anchor/reporter Rebecca Green. (Which leads me to count the days until Lori's back with us. :) Subbing for Rebecca on Saturdays with me on KFBK will be Mike Sicilia. Subbing for me is...wait, no one. ;)

* Still on the KFBK home front - executive editor/assignment editor/afternoon editor Don Andrews, who is also the other half of the News at Noon team, is leaving us after many years. He's accepted a position in the assignment desk team for KCRA/Ch. 3. His final day with KFBK is today, Friday. Don is one of those guys it takes a bunch of people to replace. Moving to the assignment desk for KFBK is reporter Bryan Goebel. The afternoon editor's slot will be subbed by a combination of yours truly and Bret Burkhart, and at this point I have no idea who will take Don's place on the News at Noon. (With Don leaving and Lori on maternity leave, I hope someone will. ;)

* Still no word on what SportsRadio 1380/The Score (KMJI) plans to do in afternoon drive. That might be an interesting one to watch, especially with Tim Roye's departure from Sacramento. Is 1380 still looking for a local host? Is KHTK looking to pair someone else with Grant Napear or will he go solo?

* Neglected to mention this one earlier - a new health show debuted on KFBK last weekend. "For Your Health" with Sue Pearson-Atkinson (former Ch. 3'er, no relation at all to Ch. 13's Stan Atkinson) now runs Sundays 2-3 PM. This one was a sheer time-sink oversight - I'm across the console from Sue when the show runs, so I certainly know about it. ;)

* And not quite yet - but close... studios for Cool 101 (KHYL 101.1 FM Oldies) at the KFBK/KGBY complex near Cal Expo are almost done. The Cool 101 office staff moved over a couple of weeks ago - expect programming and production to follow in the next week or so.

Mike

# 2229. EEO Quotas VS Talent and Experience

Newsgroup: rec.radio.broadcasting
Date: 1995-09-10 00:00:00 UTC
From: VUBS79A@prodigy.com
Message-ID: <42u00a$b2i@vixen.cso.uiuc.edu>
Source record: 29429

As I continue to search for my next opportunity, I noticed an ad in this week's R&R (9/8) for an afternoon opening at WXLK-K92 in Roanoke, VA. After emphasizing the need for good airwork and production, the ad instructs applicants to "Forward T&R to EEO Coordinator, WXLK-K92..."

EEO COORDINATOR?? I always thought that applicants for on-air positions were to submit their materials to the program director, operations manager, or consultant. Is race and/or gender now more important as hiring criteria than talent and experience?

Up in the Great White North, at least my part of Canada, Easy Listening exists. The station in Ottawa is a French station called CIMF Rock Detente...which...I think...means light rock...but...it is beautiful...and the company that owns CIMF, TeleMedia, has beaucoup stations in Quebec running that format.

## 2231. FM Talk in Boston?

Excerpts from The Boston Herald, 9/9/95:

FM Talk Perks Up Hub Conventioneers' Ears
by Dean Johnson, Boston Herald

"New Orleans - FM talk in the Hub was one of the rumors buzzing around the radio industry's biggest annual conference in the Big Easy through today."

...a bunch of stuff about some of the themes of the NAB's Radio Show, who from Boston is attending, etc., etc., then...

"Each NAB convention generates both serious business talk and rumors. Among the hottest gossip - that country signal WKLB (105.7) will become the Hub's first FM talk station, even if that happens only after it (or the entire Fairbanks chain) is purchased by American Radio Systems (WRKO, WEEI, WEGQ and WBMX) or some other chain."

Keith Nelson

In his article, Bill Scheffler quotes Les Davis as saying that WRVR changed formats from jazz to country at 6 AM.

I was working at "Jazz 88," WBGO at the time, and we were tipped when the change was going to take place. The format change occured at High Noon. We all tuned in and listened as the change took place.

We were a fledgling public radio station, only on the air for 18 hours a day, and much of the time was filled with NPR programming. That afternoon, we had a staff meeting in the GM's office, and decided to go 24hours a day, with an all-night jazz show. Within a few weeks, more of the NPR programs fell away, until the station was largely a classic jazz station, focusing on bebop and modern jazz styles.

I no longer work there, but I'm happy to say that WBGO is now one of the country's most popular public radio stations, consistantly doing well during their annual pledge drives, and is the home for several nationally syndicated shows. There is another jazz station now in New York, WQCD, and it focuses on "smooth jazz."

KKLF is playing "Rocky Mountain Network", it originates in Avon Colorado, and is broadcast on half a dozen or so O&O'd station in Colorado's sparsely populated high country. The format is quite popular there, and somewhat unique. It takes a little getting used to, but it grows on you.

I'm quite surprised to hear it here.

>pervasive part of American radio?

We were hit with this problem in the late 70's when I worked at a station we promoted as "FM-91." The assigned frequency was ACTUALLY 90.9 MHz, but with analogue dials, FM-91 was close enough and slid off the tongue smoothly. It was another way to promote your dial position (i.e.: "address). Then digital radios came along. At the time we feared people would punch up 91 on their FM radios and at best hear a slightly distorted signal - at worst hear nothing at all! I suspect that's the reason folk started promoting the exact frequency of their station with "FM Ninety point nine." Not as smooth, but sometimes practicality wins out.

Like any business, "if you scratch my back, I'll scratch yours". If you
are simply paying for promotion for this event and don't plan to have the
station display it's banners, give away bumper stickers, have some of the
jocks make personal appearances, or foot the bill for a live remote
broadcast, he's not going to be interested. You have to reciprocate
by promoting his radio station, (out of your pocket), in order for him to
promote your business beyond what you're already paying for.

> I've been playing with...this promotion is going to help solidify the
> station's sense on community among listeners, this promotion will help
> bring in lots of other promotions (I know that's sales related), etc.

This could be against his agenda. You might be locking the station's image
to the local community when he wants to get those potential listeners in
the next county interested. If a New York City station got involved in a
deal with repeated promotions for say, Long Island, and did not get
involved with promotions in New Jersey, NJ listeners might think that the
station isn't interested in them. If the NJ advertisers beging to think
that way, he's in trouble. A radio station has to balance it's promotions
and slight no segment of their audience, geographically or whatever.

> Our current results show that listeners are really excited about our
> system. Is working around the PD an option (talking to the DJ's
> individually) or would that make matters worse?

If he says no, you've wasted lip time. The person you have to convince is
the General Manager. Since he looks at the bottom line, he may be more
like the Sales Manager.

Drew Durigan writes:

>>Is race and/or gender now more important as hiring criteria than talent and experience?<<

Depending on your point of view I guess this is either fortunate or unfortunate. Yes, in hiring air talent for my stations, it is neccessary to look at minority recruitment sources when filling positions and solicite applicants from those sources...and document the effort. I don't know whether this is "more important", but equally as important under today's EEO enforcement efforts. Perhaps the reason why the ad you referred to in your post had applicants send their tapes and resumes to the "EEO" person, rather than the program director, is that the EEO person is in charge of documenting the radio station's EEO efforts...and more than likely forwards applications to the program director.

BTW all, a short personal introduction as I am new to Airwaves (thank you Tim Sawyer). I am Operations Director/Program Director of a 4-station duopoly in Farmington, New Mexico. Our two FMs program country and classic rock. Both FMs are locally programmed most of the day and use Westwood One's Hot Country and Adult Rock & Roll late-nights and overnights. According to the Spring '95 Arbitron for our market, our two FMs are tied for #1, 25-54 adults. One AM is oldies (satellite; Westwood One) and the other AM is spanish, locally programmed. I'm 38, have been is the biz since high school in 1970, growing up and starting out in radio in the northern Chicago suburbs. I do mornings on our classic rock FM.

I too, am dismayed by that. I saw the ad also, and just scratched it
off my list of stations to send to.

I am icreasingly disgusted by our business' tendencies toward EEO
requirements. As a female, or minority,

I would be pretty dejected to find out that I got the job because of
my Race/Gender.

I personally am out of the running at the station I'm currently
employed part time because I am a man.

The opening is for 7-mid. We have no female full time air talent, and
although it's been unspoken...everybody knows that management is
looking for a female.

Angry????...You betcha! Wouldn't you be? Here I thought when I got
into this business that talent actually counted.

That the Program Director made the hiring decisions.

I wouldn't get too worked up about this. Although I don't know the
station in question, most keep rather detailed records of their
recruiting efforts in order to satisfy the EEO mandate. Most likely,
this is just an easier way for them to keep up with their EEO paperwork
(materials received go directly to the EEO coordinator and then to the PD or
OM, rather than vice versa).

As a PD in a small market who now has a corporate owner, the race and gender is more important than ever in order to keep the FCC suits happy. The first thing that happens before I get the tapes is that the Office Manager sends the applicant a package with the application and EEO forms. Gotta do it. Fortunately I've been fortunate enough to hire several strong, talented women for on air work. Not only will it look great at license renewal time, but I have a well-balanced wonderful sounding station. So, we WMs can grumble all we want, but it's the rule. Given the current EEO shift in Congress, I don't know how much longer this will go on. Even without EEO, I still would have hired the people we have as they were the best for the job!>

MSG will make it official tomorrow that Kenny Albert will be
backing up his father Marv on all Rangers broadcasts. (Good call Tripp).
The Newark Star-Ledger is reporting that MSG had to get HTS (Home Team
Sports of Washington DC) to release Kenny from his contract, which still
had 2 years left on it.

TV Note:
Former Devil Doug Sulliman has been hired to take the
place of Peter McNab (who left for Denver) on all SportsChannel Devils
Broadcasts. He has never done any colour commentary full time (once he
took part in a Whalers broadcast when he was injured).
He will debut September 22 during a pre-season game
(Devils/Whalers I think)
SportsChannel hired, of all people, Marty Glickman (yes, this
whole thing had a radio tie in ;) to tutor Sulliman on how to announce
the game. He'll be working with Mike Emrick.

There still is no replacement for Sherry Ross on the Devils
radio broadcasts. I haven't heard any rumours, but if any of you have,
please let me know.

I'm still trying to figure out who is going to be announcing the
Bruins on WBZ and the Flyers on WIP. Again, if you know please let me know.

Happy DXing

Here at Millersville University we have a radio station with a lot of devoted listeners in and around the Millersville community. This year we are striving to sound even more professional than ever before. One of our biggest boasts is that we have the freedom to break music before the local radio stations because we are free to play whatever style or type of music we desire. Our station tag is "Your Number One New Music Source."

I wanted to mention how fortunate we are to be able to play various genres of music because the Lancaster, PA market has become oversaturated with stations not catering to their listeners tastes and musical preferences. In the spring ratings we put a dent on some of the so-called "professional radio stations."

I will be graduating from this fine university in the spring with a bachelor's degree in broadcasting communication, and as perhaps a future radio programmer I want to open your eyes to the fact that, to be successful, you have to give the people what they want.

How many times have we turned on the radio and heard the same tried-and true songs played over and over again? Those consultants that feed you a line of bull about certain songs tested to be what people want to hear are not always the most accurate. Your best determinant is your listeners. In college radio we have the freedom to listen to the people. And guess what, they're not as dumb as we are led to believe they are.

So, in keeping with the goal of our campus radio station, I suppose we are the alternative to everyone else. And until some of the local stations wise up and start playing what listeners want to hear we will continue to provide the area with music they may not hear otherwise unless they are able to get stations in Philly or beyond on their band.

## 2249. What does 'professionalism in broadcasing' mean, anyhow?

Newsgroup: rec.radio.broadcasting
Date: 1995-09-11 00:00:00 UTC
From: rueger@netaccess.on.ca
Message-ID: <430pj7$a9e@vixen.cso.uiuc.edu>
Source record: 29310

Good to hear the perspective of the community radio sector in this discussion -- I'm the manager of CFMU, a campus/community station based at McMaster University in Hamilton, Ontario. We have about 150 volunteers too, and I agree it can be difficult to get consistently high quality across the board

Re: this whole discussion about "professionalism" in community radio

I shy away from the word "professional" because it is often used by people who have no knowledge of community radio to mean that we're supposed to sound the same as commercial broadcasters. If we're talking basics like not putting tapes on backwards, I agree there are certain standards. In matters of style, though, what does "professional" mean? Does it mean you shouldn't talk more than 30 seconds? Does it mean you have to hype your voice and talk in a deep throaty and thoroughly unnatural voice? I have had many discussions with "commercial" radio people about what precisely "professional" means. Often they mean we don't sound professional because we don't sound like them. That doesn't mean we're unprofessional. It means we're different. I don't even enter into discussions which try to compare commercial and community. You can't compare them because they're different concepts.

Community radio is about community -- people who are on the air because they have something to say, or a passion to share. Often that means content comes before form. Myself, I'd rather have someone who has something to say and maybe is a bit awkward about expressing it, instead of someone who says nothing, but says it really well.

Re: Brian's statement that community radio is a a dying breed ...

Not true .. There are lots of us keeping it alive, and more stations starting up all the time (at least that's true in Canada)

Radio ... a respected profession? In the community radio sector, damn rights!!

According to the FCC's on line data base, WBBR is "DAN", and uses a single
tower during the day, with 4 at night. Of course, only the CE would know
what they are really running, I will stay tuned for the answer.

John Byrns

# 2252. Chicago Radio Watch: 9/9/95

Newsgroup: rec.radio.broadcasting
Date: 1995-09-11 00:00:00 UTC
From: JJB92@aol.com
Message-ID: <430pik$a8k@vixen.cso.uiuc.edu>
Source record: 29439

I'll trade you one Babe and a Psycho for a.......

Perhaps following the lead of sister station WLUP-FM (entertaining talk), sports talker WMVP-AM shook up their lineup. The station dropped syndicated talker "The Fabulous Sports Babe" and replaced her with ex-Bear Tom Waddle and current 1-4 host Jim Kozimor in the 10 am till 1 pm slot. The station also dumped fromer baseball player Steve "Pyscho" Lyons from the evening slot he shared with Brian Davis. Brian continues with the station, but his hours were reduced from 7-11 to 7 to 9. Why 9 pm? The station picked up syndicated talker Scott Farrell who brings a unique style to sports talk radio. Scott can be heard nightly from 9 till midnight.

WLUP-FM also announced changes to their weekend programming. The Saturday lineup now starts off with the best of Johnathon Brandmeier follwed by Kevin Matthews from 10 till 1. Wendy Snyder and Bill Leff will alternate weeks with Liz Wilde from 1-4. Chicago Sun Times columnist Richard Roeper holds court from 4 till 7 while Tony Fitzpatrick picks up the torch from 7-10. Former porn star Seka takes over the airwaves from 10 till 2 am to discuss the topic which made her famous.

The Sunday lineup also changes, although this change is more significant. Bob Stroud, long time Chicago personality, rides the shuttle from classic rocker WCKG-FM back to WLUP. (Personalities who have worked at both stations include Patty Haze, Mitch Michaels, Dan Michaels and Bob Stroud) Bob will reprise his "Rock and Roll Roots" show from 9 till noon. After that, the station goes deejayless and plays music (Imagine that!!) till 10 pm when Buzz Killman highlights blues music.

Thanks for your help, now get out.......

Gary Meier, formerly of WLUP-FM who became a feature reporter on WGN television has been informed his services are no longer required by station management. Gary's lighthearted features no longer fit with the stations morning news program which is trying to emphasize a more serious tone.

All news (except when they are covering the Sox, Bulls or having a nightly sports talk show) WMAQ-AM has dropped the Sunday Sports Huddle in favor of syndicated talk host Laura Schlessinger who will be featured from 7 till 11 pm. This makes total sense; now that football season has started, this eliminates the only outlet for Bear fans to discuss the game. Since syndicated talk has been sooooo successful (see the ratings of WJJD), this move is yet another example of twisted radio logic.

Extensions and promotions.....

Dave McNeil, Program Director at country WUSN-FM and Lee Ann Trotter, morning news at the station, have each signed on for two more years at the station.

Terry Fox has reupped for two more years at dance/top 40 WBBM-FM.

Update on old friends.......

Eddie Volkman, part of the infamous Eddie and JoeBo show on WBBM-FM, has left the Eddie and JoeBo show which was heard on WIOQ-FM in Philadelphia.

Dan Michaels, formerly with WMET, WLUP and WCKG in Chicago has landed at WMGK-FM in Philadelphia.

Rich Higgins, former overnights at all 70's WYSY-FM, won't be suffering through cold winter any longer. Rich has landed at ZFZZ-FM in the Grand Cayman Islands.

Bob Wall, former highly rated morning host on urban contemporary WGCI-FM, is at KARN-AM in Little Rock Arkansas. Bob was best known for his pig hat and pleading guilty to criminal sexual abuse for a tyrst with the family babysitter.

The "didn't we just read the opposite was going to happen?" award.

The award goes to the Chicago Radio Watch reporter who wrote that the sale may not happen. Westinghouse and Diamond Broadcasting have announced that the sale of progressive rocker WXRT-FM and sports talker WSCR-AM will go through. Westinghouse takes over management of the stations on October 1. It appears that my sources are accuracy challenged. Back to the drawing boards.......

# 2253. Art Vuolo Turns 50

Newsgroup: rec.radio.broadcasting
Date: 1995-09-11 00:00:00 UTC
From: scottw@jax.jaxnet.com
Message-ID: <430pil$a8l@vixen.cso.uiuc.edu>
Source record: 29440

Just who IS Art Vuolo? If you've ever been to a radio convention, you've probably seen his Vuolo's Video Airchex tapes which feature footage of many of the nation's most notable radio talent. If you've ever rented a car and found one of those colorful guide listings that shows where you can hear Rush Limbaugh in each of the 50 states, that probably came from Vuolo's Radioguide people. He's produced a number of audio and video programs, including the gargantuan effort "The History of Detorit Radio", and distributed a number of air check anthologies over the years that have helped promote careers and taught the beginners how to get better. Ever since he got his first tape recorder, Art has been one of those guys who tirelessly promotes broadcast radio, and has been a direct (or indirect) influence on the careers of many of us who been infected with it's alure.

As if we didn't need another sign that the clock continues to tick, the man that former R&R columnist John Leader calls "Radio's Best Friend" is about to turn 50. In concert with this event, Art's company has scored it's biggest Radioguide order ever: 10.2 million. Sponsored by Ford Electronics and distributed in most markets by Little Caesers, this guide series promotes college football and ties in with 68 major stations who broadcast games in he Big 10, PAC 10, Big 8 and Southeastern Conferences.

Art's one of those guys who still uses an IBM selectric and thinks that the Infobhan is a German test track for Volkswagen, so if you'd like to drop him a B-day wish, do so at PO Box 880, Novi, MI 48376.

TM probably simply runs their CDs through a compressor and equalizer.
It's that simple. If you want to achieve the same sound, just take your
storebought CDs and equalize and compress them before going to cart or
recordable CDs. It's not a big deal but it is a tedious process.

Just for interest, if its the same series I'm thinking of and I suspect it is, Chickenman (one word) is an Aussie production. If anyone's looking for it I'll gladly supply them with the relevant contact details of the production house.

Tony

[Moderator's Note: Nope. The Chickenman (one word or two, Idunno) started as an inhouse production at Chicago's Top-40 AM WCFL. The cast included many of their airstaff. It was later synidcated. Bill]

Last year, a station in Denison, TX (CHR formatted KDSQ 101.7) did this for a couple months running. Being on the edge of their coverage area, my car radio blended their audio down to mono, providing a real interesting result. In any event, I got to find out how groups like Nirvana and Crash Test Dummies would have sounded had they done instrumental versions of their hits...

> AT #NIGHT.

For a little while, anyway. This station is reportedly being sold to
a Christian broadcaster (Salem, I think. Can anyone confirm this?)

This existing "Christian" stations in Dallas-Ft Worth are:

AM 540 KDFT Gospel
AM 660 KSKY Christian Block Programming
AM 770 KPBC Christian Country
AM 970 KHVN Black Gospel
AM 1040 ???? Black Christian
AM 1540 ???? Christian Block Programming
FM 90.9 KCBI Christian Block Programming
FM 91.7 KVTI Christian Block Programming
FM 94.1 KLTY Christian Contemporary (probably the most successful
Christian music station in the country)

There have also been two recent non-commercial rim-shot applications
filed by Christian broadcasters. One in Sanger, TX (89.7) and one in
Greenville, TX (90.5). If all these stations come to fruition, that'll
give us 12 of these stations.

: >the process of implementing some changes their listeners have supposedly
: >asked for. They sound much like they did when they were top-40 WRQC several
: >years ago.

: Are they going to play any "hot country" or "young country?" It seems
: to me that for a station to call itself traditional "Top 40," if there
: are country songs that are doing well in their area, they need to play
: them. In the 70s and early 80s, popular country songs crossed over
: onto Billboard's Hot 100 and were played on Top 40 stations.

Then it's more appropriate to label them CHR, I suppose. Their playlist consists of a mix of modern rock, R&B, rap, and some of the AC-oriented stuff, along with some more traditional guitar rock (e.g. Bon Jovi and Van Halen). However, no country. There are already two big country stations that hit the Cleveland area, WGAR Cleveland and WQMX Medina/Akron. WGAR plays hot country... WQMX may, but I never listen to them, so I would not know. However, I was a very loyal fan of WGCL, Cleveland's quintessential Top-40 outlet, before it flipped formats in '87, and they didn't play a whole lot of country either, aside from the occasional crossover hit. Neither did the old WRQC.

Hi

I'm interested in getting some info on radio management courses that are run in the USA. Does anyone have any contact info for me?

I've heard that the NAB runs such courses, as does Notre Dame University. I'm interested in Public Broadcasting, Station Management, Programming and Marketing. Ideally I would like to go on a 2-4 week "crash course" with a strong practical element.

If anyone has any info for me (preferably 'net addresses of the relevant colleges/organisations) I'd really appreciate it. Course outlines, costs involved and contact info can be e-mailed to me at:

top30@pixie.co.za

If anyone else is interested in getting the info, e-mail me and I'll send you a copy of what I receive and compile.

Thanks in advance.

Tony

[Moderator's Note: Be warned. There are many scams out there that promise you the sky and moon in exchange for your life-savings. Many are legit, but now that you have posted you are likely to get email from some that will not be. Check ALL your options before doing anything. Be wary of any whose claims seem too good to be true. And don't overlook community colleges and other low cost alternatives to schools. Also ask to see their placement records. Realize that the best way to get into radio in this day and age is just to bug everyone till someone opens a door to you. Bill]

# 2263. KGBS AM 1190

Newsgroup: rec.radio.broadcasting
Date: 1995-09-13 00:00:00 UTC
From: david627@dallas.email.net
Message-ID: <4362t3$m6p@vixen.cso.uiuc.edu>
Source record: 29250

TO Tom Desmond....

In response to your question of KGBS AM 1190 being sold to Salem Broadcasting out of California... yes they have purchased 1190 from Greystone Broadcasting out of Kansas... the interesting thing here is that KGBS was in the RED to its creditors... and Mike Russell made a deal with Salem for a reported 4.8 million dollars... which by the time he pays off the people he owns.. he will probably not have very much left over..

In its day.. KGBS was a very good idea... it started out as a CNN affiliate using the news orginzations resorces to fill most of the day parts.. during the mid day when they were able to have it.. they would air Rush Limbaugh... but when Cap Cities intervened.. they took that away from them... thus starting the demise of the station.. they floundered a bit with local programming... including a psychologist... and the first DRIVE time Sports program... when things started to unravel... they hooked up with Morton Downey Jr out of Washington DC... after a few months.. Mort brought his show to Dallas.. and made a deal with Russell... which would permantley bring his show to the Dallas/Ft. Worth area... after 10 months.. he left... stating that there was a "breach of contract"... when payroll bounced... (he was a co-owner of KGBS and the partnerships that were formed for his TV show)... after Ron Engleman left in June of '93 and Mort in October of '93.. the station has never recovered from the finacial burden it endured from that.

Now that the station has been sold.. there is no telling what format or what programming will be put on it... the one thing is for certain.. CNN won't be on the local air here anymore...

Good luck to those of KGBS in finding other work if the new owners don't keep them on board.. I hope they do... they are good people there...

Dave Michaels.

# 2264. Fishing "The Lake" on a trip through Virginia

Newsgroup: rec.radio.broadcasting
Date: 1995-09-13 00:00:00 UTC
From: searls@batnet.com
Message-ID: <4362t2$m6n@vixen.cso.uiuc.edu>
Source record: 29251

While driving with my sister from Burlington, NC to Washington, DC last Friday, we decided to do some signal fishing on the Virginia backroads. Near Lynchburg, we made the first and only truly interesting catch of the entire trip. It was a little one, but from a rare and charming species I hadn't heard in decades, one we might call "all over the road."

It was WLQE, "The Lake," and it radiated on 106.9 FM out of Bedford, VA and on 880 AM out of Moneta, VA.

The format -- if you can call it that -- sounded like somebody's old record collection, played by the "shuffle" button. Here is what I scribbled down:

Glenn Miller
Jim Croce ("Leroy Brown")
Herb Alpert
Nat King Cole
Elvis ("It's Now or Never")
Bing Crosby ("I can't begin to tell you")
Everly Brothers ("Dream")
Ella Fitzgerald (a great song; wish I got the title)
Henry Mancini ("Duke's Place" -- the old late night Larry King theme)

For what it's worth, WLQE is one of those stations that seems to be listed better by Broadcasting Yearbook than by M Street.

On the AM side, M Street says the station is 800 watts full-time non-directional, plays "Adult Standards," and changed its call letter, format and owners in 1994. The Yearbook says the station is a 1kw ND daytimer, broadcasts in stereo, an plays "nostalgia, big band, jazz;" and has a target audience of "35 plus, lake residents, mostly middle aged." The yearbook also has the Lat/lon coordinates for the transmitter.

On the FM side, both stations list the station as WYMY. Apparently, this has changed to a simulcast of WLQE, by purchase or LMA, I suppose. Both agree the station radiates at 1276 feet; but M Street says 330 watts, while the Yearbook says 180 watts (with which FM Atlas agrees). Again, there is much more info in the Yearbook entry.

Anyway, the trip took 7 hours, and every other station we heard was a pea in its format pod.

Doc

I can verify this. I heard Chickenman in DC in the late 60's (but I forget which station). My brother even got the LP from somewhere, and a long-simmiering problem between us is that I loaned this disk to a friend, and we never got it back. (He eventually got a copy on tape, however.) Anyway, I heard some ads on the radio in LA in the late 80's that had voices that were so familiar... the only mental ID I came up with initially was "Benton Harbor", but eventually I recalled Chickenman! I don't recall what they were advertising, but I can still recall some lines from one holiday-season spot, a takeoff on the Scrooge story.

# 2269. Re: What does 'professionalism in broadcasing' mean, anyhow?

Newsgroup: rec.radio.broadcasting
Date: 1995-09-13 00:00:00 UTC
From: haulgren@cc.wwu.edu
Message-ID: <4362t6$m6v@vixen.cso.uiuc.edu>
Source record: 29256

Brian Lee, Victoria Fenner, and others have raised these issues
of "talking too much" and "sounding professional."

To me the idea of sounding professional is a must! It should
_not_, however be confused with "professionalism" which suggests
a lot more than just sounding the best that you can. I once
heard Chicago folksinger Fred Holstein say in an interview that
the best performers were also the best fans because these folks
had a keen sense of what made a performance engaging. Those who
have spent a lot of time listening to many *different* kinds of
radio will likely have that much lauded "professional" sound be-
cause they've internalized a good deal of the kind of presenta-
tion that they feel really works. Also, for the 3+ years I produced
a weekly live one hour public affairs-type show. My production
partners and I airchecked every show and listened *critically* to
the tape each week. Too often I think people just want to come
in do their stint and that's it. If volunteer programmers re-
gualrly sat down and listened to themselves -- not just what they
sound like when the mike is on but to the flow and feel of the
entire show -- I think that in most cases programs would
make a giant leap towards sounding better -- more "professional".

Regarding too much talk: Let's not forget that many of the folks
listening to community radio are listening because they do not
like the inane patter of commercial DJs. This does not, however,
necessisarily mean that listeners think programmers talk too
much. What's important is that when programmers talk they do so
from their experiences and heart and not try to mimic someone
else. What's important is that their "talk" _include_ the listeners
and that it does not talk at them.

I am constantly frustrated by how much discussion centers on what
kind of music gets played and the way music is presented. Radio
is more than a juke box and in the U.S. that seems nearly forgot-
ten. Don't mistake this and hear the words as a pitch for more "talk-
radio" a la Limbaugh, Stern, Talk of the Nation etc. What hap-
pened to radio that transports the listeners to a place they've
never been before? Gives them something that makes them realize
that they've become caught up in the words being spoken and without
knowing it, have stopped their busy work -- completely and unex-
pectedly cought up in the unexpected magic of radio. It's about
communication isn't it?

I cut my listener-ears in Chicago and caught the tail end of Jean
Shepard's radio days, and was mezmerized by Studs Terkel, and now

I am so happy to live close enough to the Canadian boarder to hear the CBC and CFRO (Co-Op Radio) out of Vancouver.North of the boarder there is a national radio network and small community stations that still produces some marvelously unique and compelling program-ming.

Many radio fans are unaware that the Program Director behind the success of the WMCA "Good Guys" was Program Director, Ruth Meyer, one of the very few women P.D.'s in the heyday of Top 40. Rick Sklar got a lot of press with his work at WABC, bur Ruth and her "Good Guys" gave them a run for their money. Later, Ruth pioneered Country in New York as Program Director for WHN where she imported some "Good Guys" for the airstaff (Dan Daniel, Ed Baer, Jack Spector). Ruth returned to WHN a few years later as Station Manager and also earned her stripes as V.P. Programming at both ABC and NBC Radio (where she developed the "Source"). She also was P.D. at WNEW-AM.

Earlier this month, Ruth suffered a stroke at her home in Kansas City and is currently in rehabilitation for the damage. Although still cheerful and full of humor, she needs to hear from her "family", that is...anyone in radio who may have been affected by her in their broadcasting career, even if you don't know her personally. Send your cards, gifts, or letters to:

Ruth A. Meyer

## 2271. CD Theft: The Answer

Newsgroup: rec.radio.broadcasting
Date: 1995-09-13 00:00:00 UTC
From: vance@mc.edu
Message-ID: <4362td$m76@vixen.cso.uiuc.edu>
Source record: 29258

The answer to the problem of CD theft is simple: hire DJ's who will not steal them. Go to the root of every problem to find the solution. There are plenty of students who would love to work for a station who is serious about training them in a "real world" situation. In the "real world", employees would not only be fired for thefy, but prosecuted as well.

Here at WHJT-FM and WSLI-AM, our two college-owned, student-run, commercial stations, theft is simply not a problem because we try to hire students with talent and integrity. You'd be surprised how well it works.

and...

> If Howard Stern is a genuinely funny person, he should challenge
> himself to replace that which is demeaning and disrespectful of
> individuals or groups of people with things that are funny and which
> highlight the best of what humans can do and be.

Okay...

1) Rap is an art. Its pratitioners are artists. Their art is highly social, or it wouldn't appeal to the societies that like it. And vast majority of rap music (like the vast majority of all kinds of music) doesn't make money for anybody.

2) All peddlers peddle to make money. What's wrong with that?

3) Howard is funny to a lot of people, or they wouldn't tune him in. Why should this obvious fact remain so constantly overlooked? Easy: because we have a double standard: what goes in private doesn't go on the air. Howard, to his constant credit, violates that double standard. Get it straight: all Howard does is take what countless normal people do in private and make a very public radio show out of it. That's it. And surprise: a lot of what people do and talk about in private turns out to be pretty funny when it finds its way onto the radio.

4) If you want radio that doesn't demean or disrespect individuals and groups, tune in NPR. But don't expect it to be funny. I'm serious. Respect and humor are almost mutually exclusive. And don't think it isn't possible to mix NPR and Howard's show. My morning radio is about evenly divided between the two of them. And, given the commute-length spot breaks Howard takes, this is pretty easy to pull off.

Respectfully,

Doc

Well, Broadcasting Yearbook lists 1110 as "Clear I-B," while others, such as 1100 and 1160 are "Clear I-A." I believe the protection rules are a bit more loose for the I-Bs. Though I am surprised to find anything in the East Coast other than WBT on at night at 1110. I'm also not sure the station still has the synchronous transmitter at night in Shelby; but maybe it does.

> Secondly, can anyone explain why, when
> WNEW-AM (now WBBR) moved its
> transmitter from S Kearny NJ to
> Lyndhurst NJ, it replaced a two-tower
> directional with a four-tower system.

Since you and I last corresponded, I heard that the old site was vacated for two reasons: 1) the expansion of the turnpike, which originally required an intersection that would have obliterated the site (the intersection was never built, even though the site was moved); and 2) the bad experiences the station had endured with hurricanes and flooding. Not that either situation bothered WMCA, which still stands on the other side of the highway (and now also radiates WNYC). FWIW, the old towers, with their capcitive umbrellas, can still be seen laying in the tidewater next to the Turnpike. The transmitter building still stands, too.

The movement of the WNEW transmitter is yet another example of how new sites are often arguably not as good as old ones. Personally, I think the new site and pattern of WOR doesn't help much of the market outside the Bronx and Westchester. The old twin-Eifel setup down in Cartaret (which actually had three driven elements -- the third was a wire suspended vertically from line hammocked between the two towers) did a helluva fine job, I thought.

I wonder how the new WINS will differ from the old one, now that the 1010 has been cleared out of Little Rock. I thought the current 10kw ND sounded pretty good when I was in North Carolina last week.

I need a belt-driven turntable with at least one weight control on the tonearm. Must have 33 and 45 RPM selector and would like to have 78 RPM selector if possible. Built in pre-amp or extrenal amp would be nice. If you have a only an amp or a truntable to sell, I still want to talk.

TRUNTABLE DOES NOT HAVE TO WORK!!! If there is a problem with the motor or needle, or something else easy to fix, I'll fix it.

I will pay shipping.

# 2277. Buffalo/Toronto Radio Watch(9/12)

Newsgroup: rec.radio.broadcasting
Date: 1995-09-13 00:00:00 UTC
From: ag365@freenet.Buffalo.EDU
Message-ID: <4362sl$m65@vixen.cso.uiuc.edu>
Source record: 29313

Reply-To: ag365@freenet.Buffalo.EDU (Carl K. Gorney)

Up & down the dial in the #40 market:

*The Buffalo Sabres have a new radio broadcast team in place for this season(games heard on WWKB/1520,hot talk;The Big 1520).
Pete Weber will handle play-by-play,while ex-Sabre Danny Gare returns to handle analyst duties. Gare is back in the area after 3 years with the NHL's Tampa Bay Lightning-one on the TV broadcast team,the other 2 as an assistant coach. Weber's no stranger to calling hockey,either...he's handled PBP for the AHL's Rochester Americans,as well as the L.A. Kings.
IMO,nobody can truly replace Rick Jeanneret,and if Weber is judged on those standards alone,then that is unfair.(Jeanneret is now doing PBP on the Empire Sports Network). Weber is,to be sure,quite a bit more low key than Jeanneret,but he has his own style which should go over well given time. He wouldn't have gone over 2,000 games as the voice of the Buffalo Bisons(triple A baseball)if he didn't.
The season(preseason,at least)starts Sunday night,when the pregame show starts at 6:35pm-the game against St.Louis is at 7:05pm.

*There might be a new Bisons broadcast team next spring. If Weber returns to the booth,he'll have a new partner-Darrian Chapman is leaving WGR(NewsRadio 55)next Wednesday(9/20)to become the #3 sportscaster at WRC-TV(or,if you wish, NBC 4)in Washington,D.C.

*All the talk of who has the longest pre-game show(is it Fox? Is it ESPN?) doesn't fly if you happen to be at WBNY(91.3),Buffalo State's radio station. Within the last 2 weeks,its sports talk show "The Sports Review" moved to Sundays at 9am and goes for 3 hours. The crew-which includes Chris Russo(not _that_ one-you know,the "Mad Dog")and Mike Maniscalco(sp?)gives a preview to that day's NFL games,and Buff State football head coach Jerry Boyes has a segment as well. Also,'BNY covers the Bengals games...the only other station that does college sports is WWWS(1400;satellite urban oldies). It's the last year of a 3-year deal to do UB football & basketball. Niagara University won't return the Purple Eagles hoops team back to WWKB,nor will WECK(1230;adult standards)carry Canisius football & basketball.

*Buffalo radio vet Jerry Reo(ex-WGR;last seen at WBUF in March)is back-and it isn't too far for him to travel,either. He's now doing PM drive at Rochester's WVOR(100.5,AC;Variety 100.5). 'VOR also brought in Jeff Elliot to hanlde AM drive,thus ending the 2-female AM drive team of Colleen Brannigan (now at WGRF in Buffalo doing AM news)and Jennifer Michaels(whereabouts unknown;last heard to be in the Southern Tier). Weekender Tom Keller had been in AM drive before Elliot.
Also,Marti Casper(last with Metro Traffic,has worked at WGR & WUFX) jumps to WBEE to join Bill Coffey's morning show-unknown as yet what capacity

she's in.

*Across the border:
-Oshawa's CKGE changes positioners from The Edge 94.9 to Magic 94.9 .
The calls and hot AC format remain.
-Changes galore at CISS(92.5,Toronto,new country;92.5 CISS FM):Elsie
Xynos leaves as PD,while Sharon Taylor is upped from station manager to GM-
finally filling a position vacant since Sandy Davis left in the spring.

*Ron Bowen exits WQBK-FM/WQBJ in the Albany area as the stations' PD.

*Stations detected at the Canadian National Exhibition in Toronto:

-CJEZ(EZ Rock 97.3)-got buttons
-CFTR(680 News)-got descriptions of their news wheel
-CHFI(FM 98)
-CHTZ(97.7 HTZ FM)
-CIDC(Hot 103.5;CHR/dance)
-CING(Energy 108,Burlington;dance)
-CIAO(530;multilingual)

Another thing I found out:if you ride the TTC,you cannot get away from
Mix 99.9 AM driver Rob Christie. His face was plastered on ads in _every_ TTC
vehicle I used to get there. He looks like either Don Imus(withe a bit less
hair)or Alan Colmes(with more hair & eyebrows-BTW,Alan,if you're reading
this,don't take it as an insult). Does SPY still do Separated at Birth?
(While I'm on it,CFRB advertises on the TTC,too.)

TTYL...
--
C.K.G. (((((*))))) "It's all fun & games until someone starts
| barking like a dog."
|X| -ad for Rob Christie's morning show

# 2278. Chicago radio history (reply)

Newsgroup: rec.radio.broadcasting
Date: 1995-09-13 00:00:00 UTC
From: rrb@clm.aiss.uiuc.edu
Message-ID: <4362sm$m66@vixen.cso.uiuc.edu>
Source record: 29314

} From: mikedow@gate.net (Mike Dowling)
}
} I have a few questions about Chicago radio history.
}
} 1. Am I correct to assume that in the sixties and early
} seventies, the kids listened to WLS (and John Landecker's 'Boogie
} Check') while the adults choose WGN and Wally Phillips? With Black
} oriented WVON, those three stations made up close to a majority of the
} Chicago listening. What then of WMAQ or WLUP (AM or FM)?

WLUP didnt exist. The 97.9 FM was WSDM (Were Smack Dab (in the)
Middle) an all-female contemporary jazz/rock outlet (pretty innovative
for the time too).

} 5. Am I correct to assume that Steve and Gary were a flash in
} the pan in the late seventies? Are they now apart and at best
} moderately successful on second tier stations?

Not at all! S&G were together on-air for over ten years and were
(Steve still is) a huge force in CHicago radio through the eighties.
They had a major fight (ironically right after Evergreen placed a huge
ad in the trades talking about hoe S&G would withstand the years...)
and now Steve Dahl holds court on WMVP-AM with sports-sidekick Bruce
Wolf (known for his incredible parody-sportscaster puppet "Chet CHit
Chat".

Steve and Bruce are, at this point, the only daypart that is bringing
in ANY listeners to WMVP (the ex-WCFL).

} 6. Howard Stern. How's he doing now?

Chicago has never been kind to syndie radio hosts, with the exception
of Limbaugh. Stern had a failed bid for CHicage a few years ago on
WMVP (then WLUP-AM) [Please no wars over *why* it failed, it just did]
and now he is on Jurrasic Rocker WCKG 105.9.

He will probably fail there too... not so much because he is worthless
[again, no wars over this please] but more because Chicago is rife
with quality *local* talent, especially morning talent and Stern's
New-York-centric style is not that appealing in Chicago.

# 2279. Pittsburgh Radio Watch

Newsgroup: rec.radio.broadcasting
Date: 1995-09-13 00:00:00 UTC
From: AMCCOY@delphi.com
Message-ID: <4362sn$m67@vixen.cso.uiuc.edu>
Source record: 29315

(Copyright, Pittsburgh Post-Gazette. Reprinted here
by permission. Republication prohibited in any medium.)

All you folks out there who keep asking why Pittsburgh doesn't have a modern rock station when every other town does can stop asking. Because we do. WXRB-FM switched from country to modern/alternative rock.
Dubbed ``The Revolution 104.7,'' the playlist includes new and current artists like Green Day, Stone Temple Pilots and Smashing Pumpkins, plus new rock from the '80s and early '90s we missed hearing.
The new format is aimed at 18- to 34-year olds, and the station expects to attract younger and older listeners as well, said WXRB/WDSY general manager Joseph Armao.
For the past few days, WXRB had been exhibiting the classic symptoms of a format change - playing snippets of songs that fit into different formats - ranging from the Beatles to Hootie and the Blowfish and ``The Theme from 'Shaft.' '' Listeners heard tags like ``radio programmers in Pittsburgh are listening intently to 104.7, knowing that developments there could put them out of work,'' along with numerous plugs steering country listeners to country competitor and sister station WDSY-FM.
The switch means the formerly glutted market is back down to one country music station. A year ago, there were three: WDSY, the Rebel and WQKB-FM (K-Bear). Y108 dominated the ratings and K-Bear switched to an all '70s format last fall. With K-Bear out of the picture, the two remaining stations were essentially competing with themselves.
``There's certainly room for one, but there's not room for two'' country stations, Armao said. ``What we were doing with the Rebel was trying to expand the country music life group. What we had seen is that the country music life group has been pretty flat for the last couple of years.''
``We're offering something that you can't get anywhere else. You could have driven a truck through the hole in this market [for alternative rock],'' said WXRB program director Tommy Nyce. The Force (WWKS-FM) in Beaver Falls, which has shifted to a new rock component in its playlist, has a reception problem in parts of the city. WDVE-FM also plays newer rock, but there was no full-time source for it in the city.
Armao did not elaborate on staffing for the new format, which currently is being presented by ``three nameless renegades'' who've taken over the station and will be playing their favorite new music over the next few days.
``Talent is going to be evaluated and we'll take it one step at a time,'' Armao said.

Pittsburgh started the week with no modern rock stations and ended it with two. WDVE-FM is purchasing WWKS-FM (The Force) and will operate it as a new rock alternative format.
Secret Communications, which owns WDVE, is buying the station from Pittsburgh Radio Partners, Inc. WDVE did not disclose the terms of the deal,

which is pending FCC approval. It will take over operations immediately. The announcement came three days after WXRB-FM switched to a new rock format from country.
``We'll spare no expense to aggressively market, research, program and promote Pittsburgh's new rock alternative,'' WDVE general manager Bob Roof said. Commercials for the new format will air on sister station WDVE.
The station's name will be changed to ``The X'' to reflect its alternative character. The Force started out as a '80s heavy metal/``hair band'' format aimed at younger males. It had shifted to a heavy emphasis on new rock in recent months, but still retained older material in the mix.
WWKS will be ``a major player,'' says WDVE program director Gene Romano. ``We'll maximize the synergy between the two stations, enabling us to bring Pittsburgh a more diverse mix of music.''We don't see it [WWKS] as a little ebtorhere but an equal partner.
WDVE plans programming and technical improvements for its new acquisition. Reception for the Beaver Falls FM frequency is inconsistent throughout the area.
Technical problems aside, WWKS has been doing fairly well in the ratings. In the Spring Arbitron book, it ranked second in the market behind WDVE among men aged 18 to 34.
Although several large companies owning stations here have taken advantage of relaxed FCC rules allowing ownership of more than one station in a market, this marks the WDVE parent company's first purchase here.

A former Pitt Panther is watching the game from on the other side of the microphone. WTAE-AM has hired William Osborn Jr. as color analyst for the 1995 Pitt Panther Football season. He replaces Mark May, who left for TNT's ``NFL Studio Show.'' The former Panthers wide receiver graduated from Pitt in 1989 and played with the Philadelphia Eagles that season, and later was part of the Pittsburgh Gladiators arena football team.
Osborn will join WTAE play-by-play announcer Bill Hillgrove Saturday for the Pitt vs. Washington State game, which airs at 7 p.m.

## 2280. Morning show advice

Re: Aaron Schatz' request...
> I was hoping that some of you drive time and former drive time
> personalities might like to give an aspiring radio personality some air
> sound advice for mornings...

* If you've heard it done before, don't do it--unless you see real value in it.
(That eliminates silly celebrity birthday-guessing games; jokes about astronomer Carl Sagan that include the phrase "billions and billions"; and Letterman-style Top 10 lists...unless you're *sure* your list is as good as Letterman's--all 10 elements!)

* Speak as if you're talking to just one person.
(That rules out silly jock-type phrases like "Good morning to you"; do you know anyone who really talks like that to real people?
(It also means you should introduce your news (and traffic and sports) people to the audience as if they've just joined you at a party...instead of just addressing them by their full names: "Here's Charlie Meyerson with the news," not "What's up with the news today, Charlie Meyerson?" No one addresses another person in normal second-person conversation by first and last name.)

* Be yourself. (That means--to name one thing--don't use a phony-sounding air name.)

Best wishes for a successful and rewarding career,

Charlie Meyerson

>taking the WRVR call-letters to their co-owned Memphis station. This would
>insure that any listener boycott of 106.7 would be twarted. In essence, you
>would be beating a dead horse.

Sorry, but I don't think that was the reason for the switch---Most stations wish to ensure other stations in the market don't grab the calls and try to grab the station's audience using their old calls and format. So, in some cases, they either make deals with stations for the calls in another market far away from the original one. (WRVR simply moved the calls to it's Memphis stations to prevent someone from New York from grabbing them and switching to a Jazz format using Viacom's old calls.)

I think WPLJ did this when they switched to their WPWR calls in the late 80's for a couple of years, then went back to WPLJ.
In Mix 105's case, I was told by my boss, a deal was made with another station to prevent anyone in the NYC area from taking the WNSR calls at the time of the change to WMXV.
Another case of a station being burned by a nearby competitor grabbing the calls was in the late 70's-- Top 40 legend WIBG in Philadelphia changed calls (to WZZD, I think) and a station in Ocean City, NJ grabbed those calls for their Top 40 formatted station (which eventually went dark in the middle 80's).

Tripp Rogers.

# 2283. Charlie Tuna/KHJ airchecks

A friend of mine recently gave me some
airchecks of Charlie Tuna/KHJ which I guess
are from the late 60's or early 70's.

Man that guy was good!

Of course growing up here in the Boston area
we had WRKO and Charlie had been with
WMEX for a rather brief period.

J Paul Huddleston is the newsman 20-20 news
on this Charlie aircheck.

We were spoiled here with WRKO's John Masters,
arguably the best top 40 newsman of all time, and
certainly the biggest voice.

Masters is currently retired from WRKO and living
in a Boston suburb. A very nice guy too.

Message-ID: <4360k4$jv9@vixen.cso.uiuc.edu>
Source record: 29320

San Diego Radio Watcher Update 9.11.95:

KNX [1070 50kw] celebrated 75 years of broadcasting on Sunday. The Los Angeles news station began broadcasting as "6ADZ" on Sept. 10.

The station started at 500 watts, and then jumped to 50kw in 1934, for trans-coast service [remember those days of great DXing?].

According to Gary Lycan's Orange County Register column on Sunday, the station was bought by CBS in 1936, and started with studios on Sunset Blvd two years later.

On April 15, 1968, the format was changed to all news. KNX, based in LA, has a sizeable San Diego and North San Diego listener base.

Also:

KKOS is testing the 95.7 transmitter. The station, currently at 95.9, will shift frequency at noon on Friday. It is reported that the call letters will be KUPR. [I'm sure there is a method to the call-letter madness.]

Various e.mails to my new address indicated great reception south of the Sorrento Valley area on 95.7; and as suspected by me, loss of the LA KLOS at 95.5. The new KUPR will have/has an ERP of 7.2kw, vice 7.8kw as previously reported.

KCBQ-AM is carrying high school football this season. Previously, KBNN, the 48watt [non ERP too] station in Julian filled that role [and much to my praise.] A complete schedule of KCBQ's fall pigskin feast is at: http://www.kcbq.com, or e.mail me, I can send the electrons your way. Thanks to Bill Lipis who corrected me on my whining about HS sports.

Other call letter or changes in the works/or done include:

KKLA(FM) LA to KKLA-FM
KLFE(AM)San Bernardino to KKLA

1190kHz KORG Anaheim granted CP to increase day power to 20kw and change directional pattern. This station has been a time brokered station.

107.9 KWVE San Clemente granted a CP to Santiago Peak for 0.56kw at 1125 meters HAAT using directional FM antenna.

For my Sacremento friends, can you confirm that KLVW is an AM station? KBNN, Julian [100.1, 48 screaming watts] has applied for KLVW-FM as the new calls. The former adult contemporary station was sold and shifted format about two weeks ago. The satellite is from the K-LOVE Radio Network

in Sacramento.

RobABass@aol.com wrote:

: I have had a lot of frustration with the recording industry, in terms
: of the way consumer bought CD's sound, verses how CD's from
: places like Broadcast Programming or TM Century discs sound.
:
: After numerous tests, it seems to me like a consumer bought
: CD sounds like uncompressed FM radio. It has a hollowness
: or "cavey" sound to it. It's especially bad in the vocals and
: drumming. It sounds to me like the artist and the drummer
: are both locked up in a metal box.

As you are aware TM uses the "No Noise" noise reduction software. They look for the best copy of the music they can find then remove as much noise as possible before mastering the CD. They carefully watch technical paramaters to ensure the best possible broadcast sound.

There are stories that the record labels offten don't take the time and care needed to produce a decent CD. There were stories of companies rusing to release back issues of LP's by using the LP equed Master or in one case using a standard release Cassette that was ready to go to the store. Now how good is a CD going to sound is the master was a Cassette that was Highspeed duplicated on the tape used for mass producton ?

Try some porcessing, perhapps a compandor and EQ will help make the CD's more listenable.

DP>Our college station is having a severe problem with CD theft. It's
DP>impractical (hell, impossible) to have a "guardian" watch the CDs around
DP>the clock, and it's apparent that some of our DJs can't be trusted.

Dave,
You have two options: one is to go back to carting the music. Very
few students have broadcast cart machines in their dorms. That way you
can lock up the CD's.

The better approach is to move to a digital system where all
music is on a hard disk and each studio is fed from a single source.
Again, the CDs can be locked up.

The third is to make sure all your jocks go to church and love
the Lord. I rejected that one because the equipment got stolen, too.

Rich

I have to agree with the previous post. If you have problems with your DJ's stealing CDs then you simply need new DJs.

I have to admit that we have occasionally had problems with theft, usually during breaks when we are really tight for airstaff (we're commercial, so we like to be on 19.5 hours/day). It's easy for us to identify who the problems are, since the incidents are rare. I imagine that might be harder for you, if these incidents are so common.

More to come, but under a different title...

I have a few questions about Chicago radio history.

1. Am I correct to assume that in the sixties and early seventies, the kids listened to WLS (and John Landecker's 'Boogie Check') while the adults choose WGN and Wally Phillips? With Black oriented WVON, those three stations made up close to a majority of the Chicago listening. What then of WMAQ or WLUP (AM or FM)?

2. Larry Lujack was big on WLS? Right? Why did his popularity plummet so quickly? Where is he now?

3. What happened to Landecker? I used to listen to 'Boogie Check' when I was a kid.

4. What about Brandemier? (okay, help me with that spelling). Wasn't he the star of Chicagoland after Larry Lujack? Didn't he move to Los Angeles? Didn't he have a national show? Isn't he doing afternoons (and why not mornings)?

5. Am I correct to assume that Steve and Gary were a flash in the pan in the late seventies? Are they now apart and at best moderately successful on second tier stations?

6. Howard Stern. How's he doing now?

: For a little while, anyway. This station is reportedly being sold to
: a Christian broadcaster (Salem, I think. Can anyone confirm this?)

Sold for over 4 million. That's about $400K a stick (grin)

: This existing "Christian" stations in Dallas-Ft Worth are:

: AM 540 KDFT Gospel
: AM 660 KSKY Christian Block Programming
: AM 770 KPBC Christian Country
: AM 970 KHVN Black Gospel
: AM 1040 ???? Black Christian
: AM 1540 ???? Christian Block Programming
: FM 90.9 KCBI Christian Block Programming
: FM 91.7 KVTI Christian Block Programming
: FM 94.1 KLTY Christian Contemporary (probably the most successful
: Christian music station in the country)

: There have also been two recent non-commercial rim-shot applications
: filed by Christian broadcasters. One in Sanger, TX (89.7) and one in
: Greenville, TX (90.5). If all these stations come to fruition, that'll
: give us 12 of these stations.

The difference is that Salem will probably use this one as
their continuing springboard to mainstream talk. Given
their successful syndication of Ollie North and Armstrong
Williams, we'll see.

>accurate. Your best determinant is your listeners.
Umm....Testing your music is simply a way of asking your
listeners what they like. The reason college radio "has the freedom"
to play whatever you want to play is that you are not required to
produce a sizable audience to continue to exist. And that's fine;
college radio should be for learning, experimenting, and growing.
But a soon-to-graduate broadcast major who wants "to open your
(i.e., commercial broadcasters') eyes to the fact that to be
successful you have to give the people what they want" is in for a
rude surprise when he enters the commercial broadcast world and
discovers there's an awful lot he did not learn (in fact, never was
told about) in college.

I agree totally! I am the chair of a Programming Committee at WEFT - FM
in Champaign, IL, which is also a Community Radio station. We don't want
to sound "professional" because one of the reasons we exist is to provide
an alternative to all the other commercial stations which "sound the same"

*Snip*
> Community radio is about community -- people who are on the air

Again, wholehearted agreement. While we definitely have our share of
airshifters who have a very good on-air presence, we make no such
requirement that someone sound "professional" -- only that s/he have
something of import to say, and be able to say it in a manner which is
understandable and somewhat intelligent.

> 
> Re: Brian's statement that community radio is a a dying breed ...

Well, there are many in the U.S., although getting one started is a long
fight. We are the only one in the entire state of Illinois (yes,
including Chicago-- there are college stations there, but no community
stations which are not university affiliated). Here is the U.S. there
are miles of red tape to conquer to get a station on the air. but for
the few with the tenacity to deal with it, the reward is great.

> Radio ... a respected profession? In the community radio sector, damn
> rights!!

Yes! You should need $1,000,000 and a profit motive to broadcast. Just a will and a message (and of course, an audience).

RS>I have a problem that I know is not unique. My local cable operator used
RS>to carry FM signals, but they dropped that service when they started selling
RS>DMX (Digital Music Express). Needless to say, I will *NEVER* get DMX, but
RS>this problem raises another question, even deeper and more troubling...

Richard,
If Dr. Demento were on DMX, would you subscribe?

RS>What I want to know is why, when it comes to radio, are there so few
RS>options (basically none) available to people who want more than what they
RS>can pull in locally with their own antenna? For example, I live in the SF
RS>Bay Area, and no local stations carry the Dr. Demento show. It just
RS>doesn't seem fair that I am at the mercy of a few narrow-minded program
RS>directors at local stations who don't see a demographic advantage to
RS>carrying the Doctor.

Why are they "narrow-minded?" The show, evidently, didn't get
ratings and/or they weren't able to sell it. What "demographic
advantage" does Dr. Demento offer? Can you prove it to either a radio
station or a cable company?

RS>And there are other syndicated shows. Hearts of Space, Musical Starstreams,
RS>and many others that I've never heard of but I'm sure I'd love. Howcum ther
RS>is no service that I can subscribe to to give me access to stuff like this?

Probably because there aren't enough people interested to make a
business out of it.

RS>What can I do to get myself more options? Is there a service (broadcast,
RS>satellite, cable, ISDN, I don't care what) that will give me access to the
RS>full range of radio in my area (Northen California) or perhaps even other
RS>markets?

Nope. For the reasons stated above. Most of these shows have such
small audiences that there's no advertisers or subscription support.

JO> If Howard Stern is a genuinely funny person, he should challenge
JO> himself to replace that which is demeaning and disrespectful of
JO> individuals or groups of people with things that are funny and which
JO> highlight the best of what humans can do and be.

Joel,
Both the anti-social Rap music and the anti-social Howard Stern
will disappear just as soon as the anti-social listeners demand
something else. Once the ratings and the sales drop to undesirable
levels you'll see both phenomena disappear from radio.

When Howard Stern can fill the streets with thousands of book
buyers in city after city, I have a feeling that your view isn't shared
by the millions who wallow in "weenie-talk" Monday through Friday.

Perhaps the better approach is to issue fines to those who listen
to the shows.

Howard Stern reaches such a tiny fraction of the US population
that I'd hardly consider him a threat to the "fabric of our society."
Even Rush Limbaugh with the huge (by radio standards) audience he has
still reaches a miniscule number of breathing humans in this country.

I think the best way to eliminate the Stern-type programs is for
parents to take responsibility for their kids. Raise them to accept
their bodies as the magnificent creations they are and the market for
"feelthy peectures" and "weenie talk" will disappear. Take that freedom
away and you'll only make dirty words and pictures more appealing ...
more forbidden.

Rich

FF> Robert Ratcliffe, the FCC's assistant chief for law, said the
FF>broadcasts at issue ranged from graphic discussions of masturbation
FF>and child molestation to a segment in which Stern talked about
FF>shaving his posterior.

While we're horrified at the concept of Stern shaving his posterior, it's interesting to see no mention of his wish to see a General Manager gang raped and infected with AIDS so he could spread it to his wife and kids. I guess that's good clean fun.

Frankly, I'm beginning to doubt that we'd be able to tell the difference between Stern's front-erior and his shaven posterior.

## 2310. How to break into radio

Newsgroup: rec.radio.broadcasting
Date: 1995-09-13 00:00:00 UTC
From: edaleman@pioneer.nevada.edu
Message-ID: <4362ss$m6c@vixen.cso.uiuc.edu>
Source record: 29346

I was wondering if there was anyone from Las Vegas, NV that could give an aspiring sportscaster of disc jockey some tips on trying to break in the radio business. I currently have an internship through SportsFan Radio Network which is a nationally synicated radio show. I'm currently looking for another internship where getting on air would be possible. So, anyone looking to hire an inexperienced on air person, please email me at edaleman@nevada.edu. The internship with SportsFan Radio is for college credit and I was looking for an on air job that pays around $6-6.5 an hour here in Las Vegas. Thank you for your time!!:)

Rick Hansen responds:

Manny, please re-read my post. I said that I heard pirated versions of Chickenman while in Vietnam with AFVN. Not "over" AFVN or "by" AFVN or "from" AFVN. We were fun-loving types, but we loved our work, we might have mouthed off on the air a bit and stretched our officers' tolerance, but would not have jeopardized our jobs by broadcasting any pirated material. We understood our responsibilities.

The members of the Armed Forces Vietnam Network were a bunch of young, absolutely wonderful baby boom, 60's broadcasters from all over the country from all services who loved a joke almost as much as good radio production (we could never understand why the officers turned down the PSA for syphilis that started with a man's scream, a flushing toilet, and an announcer ponderously intoning "Do you have to grab onto the pipes when you pee?")

The pirated Chickenman episodes I heard were probably sent to Vietnam by former co-workers who weren't drafted -- that was the way we got most of the good music we listened to, no thanks to our official music supplier, AFRTS. I was pleased to hear the episodes officially OVER AFVN late in my tour.

Manny:

>
>AFRTS does not pirate material. We depend on the cooperation of the United
>States radio industry in order to provide troops overseas with a selection

>1970 in our files.

>
>An unfounded allegation that AFRTS rips off intellectual property rights
>holders is extremely harmful and should not be allowed to circulate.

Rick:

There was no such "unfounded allegation," but thanks for dusting off your files for us.

Also, here's something I've waited 25 years to say:

LIGHTEN UP, A-FARTS.

When I was in the Army and assigned to AFVN, it was common for us grunts (the enlisted broadcasters -- officers could not go on the air) to refer to AFRTS as A-FARTS in off-the-air conversations. For that entire year's tour and in all my contact with former Army broadcasters after their tours, AFRTS was ALWAYS referred to as A-FARTS. No disrespect meant; it was just AFRTS's nickname.

Leaving Vietnam, decidedly sloppy, perhaps unshaven, and probably hungover, I ran into a young Air Force puppy just coming in country ... pressed and starched dress uniform and fresh from high school and some sort of AFRTS training. He asked me what I did in Vietnam; I told him I was with AFVN. He said, initially thinking this made us comrades, "You mean A-F-R-T-S?" I said, "No, A-F-V-N. I'm in the Army. I worked for A-F-V-N and my only contact with A-FARTS was the pre-packaged middle American talk and record programs and pukey bubblegum and traditional country music they selected (A-F-R-T-S was careful not to offend the powers that be during the Vietnam War and avoided music of the Rock Renaissance) and sent over every so often on LP's." To me, A-FARTS was a sub-par programming service that had an other-worldly relationship to the work we were doing.

The young man let that pass over his head and went on to explain that HE was in A-F-R-T-S and his Air Force role was secondary. And, that I was disrespectful of the wonderful A-F-R-T-S organization and no one who really knew anything about broadcasting in the military would call it anything else but A-F-R-T-S.

I didn't know what to say to the young man; I have hoped over the years that maybe once, just once, he slipped and said A-FARTS in a casual conversation with someone else.

I still don't know what to say to AFRTS when faced with this overkill on a mis-read, casual posting, but

LIGHTEN UP, A-FARTS,

is a start.

By the way, most of us liked Chickenman because, in military terms of the day, Chickenman helped us put up with the chicken shit from the anal retentive, tight cheeked, CYA-ing, bureaucratic lifers, officers and A-FARTS types. The bumbling super hero was a wonderful parody of the way we

saw the war being fought.

In fact, our hootch often rang out with: "It's everywhere! It's everywhere!
It's chicken shit! It's chicken shit!"

Item: Scholarships...

The Washington Post's "On the Dial" (radio) column for 9/12/95 reports that all-news WTOP-AM (1500) has established the "Jamie Bragg WTOP Radio 1500" scholarships at the University of Maryland to honor veteran newscaster jamie Bragg.

The Post says the scholarships will be awarded to students picked as News Director and Assistant News Director for the University's student-run radio station (and this poster's alma mater <beaming>), WMUC-AM-FM. The scholarships, expected to be worth $2000 a year for the first year, will be awarded by the school's College of Journalism.

Jamie Bragg, 68, had been anchoring news for years at WTOP, and if I remember correctly, was one of the few DJ/air personalities who made the jump from spinning disks to reading the news when WTOP changed from MOR to all-news under Post-Newsweek in the 60s. Jamie Bragg retired from the station last March because he was suffering from prostate cancer. The Washington Post says he is now gravely ill in a D.C. area hospital.

# 2315. Springfield Missouri Radiowatch: Ratings and Imus

Newsgroup: rec.radio.broadcasting
Date: 1995-09-14 00:00:00 UTC
From: rrb@clm.aiss.uiuc.edu
Message-ID: <439env$jm1@vixen.cso.uiuc.edu>
Source record: 29265

Springfield Missouri:

Imus In The Morning is now carried in market on Jurrasic Rock
KWTO-FM (98.7 The Buzzard 100kw@600') I am not sure when they
started, but they hope Imus will raise their pathetic showing in the
local ratings (1.9 in Arb's 12+ - 2.1/2.6 in Accuratings 12+/25-54
respectively)

I They are playing local Jurrasic Rock during Imus breaks which leads
me to believe they are on tape delay. Ill let everyone know when I
know (unless someone else from the market cat jump in).

Speaking of ratings here is what the Springfield News-Leader has
reported..

Alpha-order

Calls Format Arb 12+ Accu 12+ Accu 25-54

KADI (Contemp Christian) 4.0 4.3 4.8
KGBX (Mix-AC) 9.6 9.2 13.5
KGMY (Hot Country) 10.7 9.2 12.2
KHTO (CHR) 4.8 6.8 2.5
KLFJ-AM (gospel) NONE 0.3 0.4
KLTQ (Lite Rock) 1.6 1.2 2.0
KOSP (60's Oldies) 5.9 6.7 9.5
KSMU (NPR/Public) Not Surveyed 3.5 3.5
KTOZ-FM (Grunge Rock) 6.4 8.8 5.4
KTOZ-AM (Adult Variety) NONE 0.6 0.2
KTTS-AM (Classic Country) 4.8 4.5 2.4
KTTS-FM (country/News) 19.0 17.7 15.6
KTXR (EZ-AC) 5.6 3.8 2.8
KWFC (S.Gospel/Ministries) NONE 3.4 3.9
KWTO-AM (NT-Limb/Williams etc) 4.0 4.2 4.5
KWTO-FM (Jurassic Rock) 1.9 2.1 2.6
KXUS (AOR) 6.4 5.9 6.9
KZBE (Jurrasic Rock) 2.7 3.0 5.0
KZPD (Adult Standards/EZ) 0.5 1.2 0.4

---

Also see the Ozark Radio Dial at

http://radio.aiss.uiuc.edu/~rrb/DIALS/ozark.html

Analysis:

Kudos to Contemporary Christian KADI for their extremely good showing in the ratings. This class-A CCM outlet sounds very good. Their change from the positioner of "Pure Radio" to "Music Radio" and a tight AC/CHR CCM mix makes this station sound very appealing and is a breath of fresh air in this rock/country-saturated radio market. KADI appeals to Christians and Secular listeners as well, something none if the other Christian stations in town can lay claim to. KADI is a super-A with 6kw from a 2 bay antenna on a 320' tower just west of Springfield in Republic. They also have excellent audio quality which is loud, but not overdriven. Bravo!

New Christian noncomm KAKU is now on the air here on 90.1 with a class-A signal from Fordland Mo, about 18 miles east of Springfield. KAKU is a satellite-fed repeater of the American Family Radio network.. IE a translator with a Class-A signal. Their format is very traditional Christian music and teaching. This brings our Christian station count to 5 In Town, and 2 rimshots.

No ratings mention of country upstart KCTG (92.9 Ozark) an affiliate of the Branson Music Network, who is putting a good signal into the entire area from their mountain-top transmitter some 15 miles south of Springfield. Branson Music Network is heard in too many places on the dial here. 92.9 is city-grade in Springfield and Branson, Class-A in Buffalo (20 miles N of Springfield) at 99.9, Class C2 in Lebanon at 107.9, Class C in Arkansas (covering Branson) at 104.3 and another 99.9 near Joplin. Can you say 'saturation'?

No surprise that KTTS is still the dominant signal here. Not so much because of their outstanding country music format but for their outstanding commitment to news and weather coverage. Although the duopoly of KGMY/KGBX has them beat in raw numbers.

The battle of the dinosaurs continues with KZBE/KWTO and KXUS, the latter being a Jurrasic heritage station that has begun playing some new rock since KWTO dropped the format for 100% Jurrasic a few months ago.

Speaking of Duopoly, the KZBE/KHTO duopoly has been bought by an unnamed Chicago-based concern. KHTO's amazingly successful dance-chr has given way to a more mainstream AAA/Hot AC sound.

With KHTO moving toward AC, market AC/MIX leader KGBX is playing more seventies tracks. Hmmm... is Arrow 105.9 around the corner? Probably so, after all they are doing great with what they have, so given radio logic, it's time for a change... right?

Market leading EZ/AC KTXR (The Gentle Giant- duopoly with KWTO-AM/FM) is playing more (get this) instrumental music... Shades of 'BM'... While upstart (automated) standards rimshot KZPD (Republic Mo) is slowly leaving the standards arena for a format more closely resembling KTXR, but based in older (40's - 60's) music. KZPD (The Gentle Beat) has increased its power from class-A (3kw @ 320') to a class C3 (21kw @ 320') giving it a better (but still spotty) coverage

in Springfield from its transmitter, some 15 miles NW of the city).

KTOZ-AM has won its battle with the Labor Department. They have withdrawn their challenge to the 500 watt daytimer's use of volunteer labor. The station is not showing on Arbitron, but is showing on Accuratings with a respectable (given the station's situation) 0.6/0.2 rating. The station programs a 'free-form-big-band-pop' sort of mix where DJ's get the chance to pick the music within the general format.

Springfield may be getting yet another Adult Standards station as KGMY's AM (1400 Khz 1kw-U AMAX stereo) may be taking that station off the simulcast and placing it on its own with a satellite fed Standards format. My sources indicate that change may take place as soon as October. With the increase in KZPD's power and KTOZ AM's format in place, not to mention KTXR's light-AC/B.M format, it will remain to be seen how well yet another A.S. signal can do, especially on a class IV AM that (like most class IV's) barely gets out 10 miles at night. My vote would have been for a 24 hour news and information station (which we sorely need), but then I am not making the decisions.

I have also heard a rumor that someone bought the dark KIDS (1340 1kw-U) formerly a locally programmed childrens radio station similar to the Radio AAHS format, KIDS has been dark for a year. No idea what the station went for, but last report had owner Jeane Kramer asking for $400,000! for a class IV with virtually no equipment and an ancient transmiter. Maybe this will be the news station... more likely, though, it will be another CHristian outlet. We'll see.

KWTO-AM has let go veteran PD and morning host Phil Gibson (pgibson@mail.orion.org). Phil was host of "open line" a daily call in show and 'ask the professionals' an infomercial style of talk show where business owners buy time and take calls. Phil will be missed, at least by me, for his warm and unpretentious style that is reminiscent of Paul Gonzales (PRN host). I am sure Phil would love to hear from any of his listeners and/or from area stations who might like to pick up this most qualified and excellent broadcaster.

Thats about it from the 'Queen City of the Ozarks" (no wise cracks now) Springfield Missouri

>
WBT was a Class I-B station. Under the current FCC and WARC (World
Administrative Radio Conference) medium wave (AM) radios stations are now
classified as Class A, B or C. Here is a translation table:

Class I-A or Class I-B are now Class A
Remaining Class I, II and III are now Class B
Class IV are now Class C

Class A stations receive protection to there 100 microvolt per meter
daytime contour and also receieve protection to their 500 microvolt per
meter 50 percent skywave nighttime contour (i.e. have a protected nighttime
skywave service area)

WBT "shares" 1110 kHz with KFAB in Omaha, NE (the other Class I-B station
on 1110 khz in the United States) WBT and KFAB use complimentary nighttime
antenna systems and KFAB is allowed to use it's daytime antenna system at
the time WBT goes to it's daytime antenna system. All other stations must
protect WBT and KFAB.

Didn't realize that WMCA was radiating WNYC-AM. I thought WNYC-AM was
broadcasting from the single tower about a mile north of the WMCA site
alongside the NJ Turnpike.

>I wonder how the new WINS will differ from the old one, now that the 1010
>has been cleared out of Little Rock. I thought the current 10kw ND
>sounded pretty good when I was in North Carolina last week.

Do you have any idea when WINS will start on their new towers? They were
supposed to use the stand-by at WABC while construction was underway,
but I never heard that that had actually come to pass.

Now, if only WQEW could go non-directional. Where I live (central NJ)
the signal is quite noisy.

Does anyone have any idea what became of The old CBS Radio Mystery
Theatre Series? I remember hearing the NPR was going to air it, but it
never seemed to come to fruition.
I've also tried to find it in syndication to buy for a local station,
but no one seems to know where it is or if it is available.
The last thing that I remember hearing (a few years ago) was that there
was some sort of legal hassle over rights.
Would appreciate any info.
E-mail to Garysice
Thanks, Gary

My vote would go to the "Pop-Corn" format of the early 60's ... a "rock and roll" song followed by a country song. Am I correct in remembering that Steve Lawrence's "Go Away Little Girl" was the rock and roll Record of the Year in '62 (by some awards group, wasn't that pre-Grammy), the last year before the Beatles rewrote the book on what was rock 'n roll? (I was a mere early teen at the time, doing weekends at the local station).

And remember back when every medium or larger market had a "Good Guys" rock station. Wish I'd had the trademark for that one.

# 2326. Dr. Don II

Newsgroup: rec.radio.broadcasting
Date: 1995-09-14 00:00:00 UTC
From: jbenson@tcf.com
Message-ID: <439eoa$jmv@vixen.cso.uiuc.edu>

>To: hijohn@aloha.net
>From: jbenson@tcf.com (Joe Benson)
>Subject: Dr. Don II

Incidentally, for many years, Dr. Don was a familiar TV voice as well, on several stations from the Bay Area to Philly. He'd not introduce the news like Charlie Van Dyke does all over the country today...no, DDR would announce the cartoon shows...only. Promos for the sitcoms, that kind of stuff. Nothing heavy. Nothing dramatic. Just pure DDR fun stuff.

He made TV stations, like a UHF station in Philly...when nobody could even watch the station off the air. But, they heard Dr. Don...cracking jokes as intros. It was fun. DDR was better than most of the shows he emceed, in voice only, but just as vivid.

I, too, called a respected major Bay Area newspaper (because nobody I talked to at KFRC knew...) and they agreed that he had passed away. Not that I question the post from a past KFRC'er, but I, too, worked in the newspaper game and Don was regular fodder for the grist mill in the "First Estate." In fact, the person I talked too wanted to make sure that I didn't mean "Don Sherwood" formerly the kingpin of KFSO who passed away in the early '80s. He came back and said, "If it's the guy from KFRC who did mornings, he did pass away due to cancer some time ago, but I can't confirm when."

And Don, if your friend at KFRC is, in fact, right -- and you are in Phoenix...please call home. Some newspaper reporter-type people in San Francisco are very anxious to hear from you. Knowing Dr. Don, it would be a bit made in Radio Heaven, for sure. Gosh, I only wish those infamous words, "The mention of my passing has been greatly exaggerated" could only be true.

For those of us who knew him, know of him and shared his great life in radio, he's not forgotten, in any way. The memories of him are still bringing smiles, from a wonderful voice silent for whatever the reason. And smiles, there will always be for him, IMHO.

>From: myers@West.Sun.COM (Dana Myers)
>Organization: SunSoft South, Los Angeles, CA
>
>(As a long time Dr. Donald D. Rose "fan", I am so saddened to hear of his passing some time ago. I could not venture a guess on the now apparent fact, but have plenty of great memories of DDR from Miami, Atlanta's WQXI, WFIL in Philly, KFRC and KKIS, both in the Bay Area. I knew Don best, personally and as a listener, for years, when he started the "Pop Explosion" at WFIL in 1966. He and "Lulabelle" were always welcome friends in our home as kids growing up. His ability to absolutely charm a Top 40 format in a communicative, fun, personable, one-on-one way was absolutely the way to learn during a great radio era. When Don suffered a tragic skiing accident and was in excrutiating pain that, eventually, took him out of Philadelphia and into San Francisco (near his family,) the tragedy of his going through many, many hours of painful rehab, not to mention rebreaking a leg do to inadequate treatment in the first place, never dimmed his character and personality....and his will to make others happy.

Ane happy we were, with DDR.

WFIL was a station that launched many stars of radio...including Dick Clark. But Don Rose never looked to be a "star" there...or anywhere. He was a teammate...with some great team players. He knew format radio like the back of his hand. He practiced it. He developed a computerized joke file that was years ahead of its time. And prepared intently. Don would do "show prep" for 8 days...for a morning airshift of 4 hours. And he did it unfailingly...even while broadcasting flat on his back in his last years, with his wife helping him by playing sound effects from his bedside.

Don suffered a lot for this business...but with the encouragement of people like Jay Cook, his long-time PD and friend and many others...including millions of of loyal listeners, one, proud to be, was me.

Dr. Donald D. Rose.

Somewhere, in "The Big Radio Station" in the sky, with more power than we can ever imagine, God has shown a great sense of humor by letting DDR display his, just like he did here. And for so long...and so well.

Thanks to Dan O'Day, another of our great broadcasters, and Dana Myers, for checking out what some of us most feared. And caring. Thank you.

I will make certain that Don Rose is remembered at John Williams 440:International Radio Site at http://www.440.int.com immediately. Come

visit for a rememberance of many of the shining stars of radio past and present. Most, however, didn't quite make the status of "legend" as Don. But then, he wouldn't have thought he had, either.

Peace, my friend.

Dana Myers wrote the quoted material below:

" I spoke with an editor at the Contra Costa Times editorial desk
" this morning; she confirmed that Dr. Don did indeed pass away
" as a result of terminal cancer.
" [ What I find remarkable is that two notes have been posted refuting
" my claim without taking the time to find some confirmation, even
" when I went as far as suggesting that someone should do so. ]

I'll go along with Tom Parker of Portland's K-103, who worked with him at KFRC and knows him (and says he's alive and well and living in PHX). I'll put less belief in the Contra Costa Times, long considered one of the worst newspapers in California for news mismanagement under the Dean Lesher empire. Having worked in that market and having sold advertising against them and written stories for radio which they also covered, I can say that it will take a lonnng time for the new owners, Knight Ridder, to wear down the public perception that the "Green Sheet" is really a yellow sheet.

>

Easy there, big fella...no EEO coordinator I know would be
circular-filing anybody's T&R (unless s/he also happens to be the PD ;-).
Entering your name and address in their records, certainly; probably sending
you a card *asking* (not requiring) sex, race, veteran status info; and also
asking where you heard about the opening (if you didn't indicate that in your
letter). At the last last station I was at, the position was filled by
our traffic manager, because above at it is an administrative task and
she was by far the most organized person in the front office (and also
had the most time to deal with it). She had no interest in listening to
anybody's tape, or in rejecting any applicant for *any* reason.

Frankly, when I was a PD, the primary reason that I rejected applicants was
because either (a) they misspelled my name in their letter; (b) they sent
the letter to my predecessor; or (c) they used an old set of calls in the
address. Each of these told me they didn't know anything about the
station, didn't want to take the time to learn anything about the
station, and probably wouldn't do any better if they were employed at the
station.

I don't know too many stations who would hire an unqualified minority
for a top-4 category job *just* because they're a minority. I'm not
suggesting it isn't *one* factor in the equation, but it's going to be
way down the list from talent and personality. Let's be honest; there
are always biases in the hiring process. The biggest one at most places
is simply to find someone who will fit into the culture/personality of

the business. If I don't *like* you, I won't hire you...is going to be almost universally true. The corollary of that idea is that most of us are most comfortable surrounded by people just like ourselves. The easy thing for the white males (like me) who continue to fill most of the PD/OM/GM chairs to do would be to hire more white males. To some extent, the result of EEO for me was that it made me examine my hiring decisions even more carefully and be able to better defend them than I might have otherwise. Sometimes we promoted from within, sometimes we went outside; sometimes the job went to a minority, sometimes to a white male. With only one exception, talent (note: *not* experience) was the determining factor (in that case, money was--GM wouldn't meet the salary demands of my first choice).

IMHO, the vast majority of complaints about reverse discrimination come from people who didn't get the job for many reasons, talent and/or personality likely foremost, who are looking for some exterior reason in order to soothe their own ego. Hey, I've been there; all of us have lost out on jobs we wanted *badly* and felt we were qualified for, only to be told "sorry" (if lucky enough to be told anything at all...but that's another thread). Pick it up, move on. The one thing I've learned is that the job you don't get probably wasn't as good as the next one you do get.

And if you think EEO is tough in radio, you should try academe :-)

>Bruins on WBZ and the Flyers on WIP. Again, if you know please let me know.
^^^^^
WBZ-TV4's weekend sportscaster/sports reporter Bob Neumier was named
as the next Bruins radio voice back in February. Former Bruins forward
Barry Pederson will handle analyst duty. Hall of Famer Johny 'Chief' Bucyck
will also be part of pre-game and intermissions features...

Neumier did Hartford Whalers'(then in WHL) play-by-play on WTIC AM 1080
in the late '70s. His most recent hockey work included PBP on ABC/ESPN2's
regional hockey broadcasts...

WBZ AM 1030 kicks off Bruins' 5-year deal this Sunday night(9/17) at
7pm....Legenadary Bob Wilson, who retired after recent NHL strike, is
scheduled to take the mic one last time when the Bruins face off against
Montreal in a special exhbition game on Tues.,Sept. 26th....The game
will also be televised on WSBK TV38(available on many cable systems througout
Northeast) with another Hockey Hall of Fame broadcaster, Fred Cusick
doing play-by-play on the TV side...This will be the last sporting event
to be held at the Old Boston Garden. The brand new Fleet Center opens
on Sept. 30th...

>With Lander leaving, Stern fading, and a dance-flip about to happen any
>moment in New York, I think there's going to be an interesting new breed
>of morning-drive shows in New York City...

On the last night of Hot 97.7 KHQT Los Altos/San Jose, I heard a rumor that WYNY (103.5) was going to switch to a dance-oriented format. I didn't know how seriously I should've taken the rumor, since it was their last night, and most of the staff were bouncing off the walls. On the other hand, several jocks from back east either dropped by KHQT's studios, or called in earlier that day to say goodbye to the station. So, perhaps there is some truth to the rumor after all.

Reply-To: dhughes@prairienet.org (Dan Hughes)

I'd like to hear from some PD's who have strong opinions, pro or con, on
having the announcers give a list of upcoming artists: "In this hour
we'll hear from Pink Floyd, Nine Inch Nails, Troy Shondell, and Abba."
I've read that studies show this practice actually causes people to
switch to other stations, WHETHER OR NOT they like the named artists.
Do you agree? Seen any research to verify or disprove this claim?
Thanks for any comments! ---Dan

# 2340. Re: defunct or obsolete radio formats

Newsgroup: rec.radio.broadcasting
Date: 1995-09-19 00:00:00 UTC
From: Ed Scarborough <majic@gate.net>
Message-ID: <43lh6m$o11@vixen.cso.uiuc.edu>
Source record: 29204

Your comments about defunct formats is a bit misleading. The Top 40 demise you describe, with the exception of WOR-FM, were all AM radio stations. The "format" death you discribe is really the end of AM radio as a source for music.

Top 40...as all things, has changed over the years. Just like the jokes that entertained your folks don't make you laugh. Top 40, now called CHR (contemporary hit radio, to avoid the Top 40 repetition image) is doing well in LA (KIIS), Miami (Y-100), NY (Z-100) and countless other markets. It's simply not the high powered hi-repeat format of years back.

Your real argument is in the area of beautiful music stations. And yes, they are gone. Radio, after all, is a business...and the demos of a pure beautiful music are 50 plus. No agency or advertiser places buys for those people. Even "geritol" is seeking a younger buyer. To survive, most beautiful music stations evolved into soft ac...featuring Manilow, Diamond, Streisand, Denver, Taylor etc. Unfortunately, even the demand for those artists is declining...again, forcing an adjustment for these beleaguered soft adult contemporary stations.

Hey...no-one ever said it was easy. But as times change, radio stations have to change to meet the needs of the available audience.

*PRESS RELEASE*

DOES CYBERSPACE LIVE UP TO THE HYPE?

Why isn't everyone already connected to the internet?, after all isn't everyone involved in a love affair with their PC?
The answer is NO. Why?
Because the internet is still confusing.

For those in a quandry, Jason Ford, is changing that. Jason is the host of a new program called Access Internet on FM 91.5. He says,
"My program Access Internet will provide a grass roots understanding of the internet, for those who are totally mystified, learning , or who are already on the net."

Access Internet gives the novice the "how to" information. Every Tuesday night at 6pm on FM 91.5. Access Internet will deliver , everything you always wanted to know.

* What the internet is
* How it can benefit people
* What a service provider is, and where to find one.

He'll look at current issues such as security pornography, copyright and marketing. the Jargon such as Modem, Baud rate, World Wide Web, and e-mail etc. will be explained. He'll talk to people already connected to the internet about the pro's and con's, of being on-line. The show is co-hosted by Ross Bark, who's grown up with computers. With his constant exposure to new technology, he'll explain new changes, and how they'll affect us in an easy to understand manner.

Katie Wilson the manager of Information Technology at Macquarie University Library, will bring her expertise to the program on a regular basis.

Jason says, "The word Surfing has been banned from the show, because it's not about hype, it's about information."

Since 1994 Jason Ford has been a volunteer with FM 91.5, and has regular programs, 10pm, Tuesday night and breakfast on Friday mornings. Plus, he produces and panels for other announcers.

For further information call 419 6969.

Access Internet Tuesday night 6.00pm on FM 91.5

I'm searching for a new radio news service. I'm not happy with the one I have now-- it's crisis coverage is somewhat less than what I'm looking for.

So far, I've contacted UPI, StandardNews, and ABC. I understnad WOR is considering putting up a new news operation. CBS is not an option in this market (2 CBS stations within 10 miles.)
I've worked with ABC at other stations, and liked what they did. However, due to congestion from an adjacent market, all ABC will clear me for is their Dimension service. Anyone have any experience with this package. The person at ABC affiliate relation (yes, they really do have people there-- it's not just miles and miles of voice mail boxes designed to make you believe they have a caring staff) dropped something in the post today, but I'd like to hear from someone who actually uses it.
Also, are there any other outlets I'm neglecting?

Thanks
Steve Bishop

# 2349. Radio Resistor's Bulletin 12 Available.

Newsgroup: rec.radio.broadcasting
Date: 1995-09-19 00:00:00 UTC
From: haulgren@well.sf.ca.us
Message-ID: <43lh70$o2a@vixen.cso.uiuc.edu>
Source record: 29213

Issue #12 of the RADIO RESISTOR'S BULLETIN, Fall, 1995,
is now available.

**********
---
". . .(I)t is rarely dreamt of to use the radio waves
as a tool for communication, self-expression or cultural
definition, and although radio is always with us,
it exists apart from us, administered by a
Federal Government and owned by wealthy business
people." Simon Morrin, Syracuse Community Radio
---
**********

This issue contains articles about the attempted take over of Waterloo,
Ontario's, community station CKWR; a piece about the aftermath of major
programming changes at Pacifica's KPFA, in Berkeley, California; editor
Frank Haulgren reviews Michael Keith's book, SIGNALS IN THE AIR: Native
Broadcasting in America,
("The problem is that too many of those who are
broadcasting out there are more culturally Anglo
than they are Indian." E.B. Eiselein).

Back to Canada for Brian Hannigan's extensive piece on
western Ontario's CHRW and what he calls the decline of campus / com-
munity radio,
("Now that Campus/Community radio has joined the critical
list of endangered species, it is finally time to stop
rationalizing about apathy." B. Hannigan).

Radio Resistor's Bulletin #12 also contains pieces about Free Radio
Berkeley's on going face-off with the FCC. In this issues Radio Briefs
Frederic Noyes writes about 3 Syracuse Community Radio projects (here and
abroa), Barry Rueger provides information about the 16th Annual National
Campus and Community Radio Conference, and some follow-up notes to last
issues story on far right radio and Radio For Peace International's Far
Right Radio Review. And, of course, letters to the Bulletin and the
INFOBOX.

If you are involved in non-commercial broadcasting or are just a passionate
listener you should be reading the Radio Resistor's Bulletin.

The Bulletin is available by e-mail, in a 10 page paper edition, and at
our WWW site (http://www.rootsworld.com/rw/feature/rrb.html the
current issue will be up and ready in a few days). For information or a
sample copy send E-mail to haulgren@well.com.

Message-ID: <43lh5p$nsa@vixen.cso.uiuc.edu>
Source record: 29215

>From Charm City...

WCBM (680-Talk) has finalized its new daily line-up, filling the holes left by late-morning talker Alan Keyes (who is running for the GOP nomination for President) and afternooner Brian Wilson (who is now doing mornings for "The Colt" (WOCT, 104.3-70's)). Sean Casey and Frank Luber remain unchanged in morning drive. Zoh Hieronimus moves from evenings to 10am-2pm. Tom Marr moves from early-afternoons to PM Drive and Les Kinsolving fills the 7pm-10pm shift.

Julie Dehardy adds News Anchor responsibilities on the "Jo Jo & Kenny Morning Show" for Mix 106.5 (WWMX-AC). She was their airborne traffic reporter. Also, Tamara Nelson adds News Anchor duties at "The Colt" for Brian Wilson's morning show (moving over from middays at sister station Mix 106.5). Brian Wilson's move to mornings has seemed to set off a chain reaction in the market of sudden attention to morning shows that include rumors of the possible demise of "Jo Jo & Kenny" and also "Marshall & Maxwell" at 100X (WGRX-AOR).

The WOL Radio Network that includes WOLB-Baltimore (1010 AM) and WOL-Washington (1450 AM) and which simulcast urban-oriented talk now broadcasts out of studios in downtown Baltimore, joining sister stations WWIN AM & FM and WERQ. The stations previously operated out of Washington. Along with the move came the removal of former Virginia Governor Douglas Wilder's show. It is unclear if the reason is technical or philosophical.

Stay tuned,

Jim Purther

Tulsa's KTRT radio is uplinking a feed to one of their new affiliates in Western Oklahoma on C-Band at G3/6 5.6 wide.

Owner is Fred Weinberg, who posts somewhat regularly to rec.radio.broadcasting. KTRT is the flagship of a locally programmed talk network serving, primarily, Oklahoma but I understand he also owns an affiliate in Las Vegas, though its programming is unknown to me. The programming is mainly the KTRT broadcast day, but also carries some syndicated stuff.

Perhaps Mr Weinberg can fill us in with more details.

Give it a listen.

Message-ID: <43lh5r$nsf@vixen.cso.uiuc.edu>
Source record: 29217

News from Jacksonville:

WJBT (92.7, licensed to Green Cove Springs) has begun changing to churban/crossover (from straight urban) under new PD Paco Lopez and consultant Steve Smith (WQHT/New York). Sister station WHJX (101.5, licensed to Brunswick, Georgia) has changed format to urban gold (also was urban). WJBT's old PD (Nate Bell) is now the PD of WHJX.

During a recent series of thunderstorms and severe weather, WJBT was the only Jacksonville station knocked off the air for an extended period of time: more than two hours. For a long time their transmitter was on, with no audio, suggesting that power had returned to the transmitter site but not to the studios.

Tony Renda, owner of WEJZ (96.1) is buying WWRD (100.7, licensed to Brusnwick, Georgia). No rumors yet about a format change at WWRD, which is religious. WEJZ is a soft-AC.

Reply-To: makkalkb@mailbox.syr.edu

Hello, by the title I guess you already know what this post is about.
I am currently working for a FM radio station in the Central New
York area and I need some advice.
I have been in radio for almost 4 years now and I am working for
country station. I have learned A LOT since I have been where I am
at, but it seems that no one really wants my help with anything.
For the past 3 years I have done the satellite board operator drill
and when I got to this station I finally had a chance at some on-air
time, now the overnights on the weekends have gone satellite and I have
lost that air time that I really enjoyed working on. The program
director said that those who lost air time would be given more time on
the weekend. Well, a new part-timer has been hired with the promise
of a set show. Now it appears that I will be a board op for the most
part at the station.
I have tried to get involved in other areas of the station. Like
writing liners or asking for production work, but like I said no one
seems to want to give me the chance. I have asked the people in
charge, but they tell me when they have something they will get back
to me. That's fine, but what do I do when I hear these people
complaining about how much work they have? I offer my assistance again
and still nothing.
Am I being to eager or something or should I talk to a higher power?
I really need some help. I am at this station to work for them and
to learn as well. I am still learning the music, but that's all I'm
learning. Is there some way to make someone see that I can be of some use?

If you have any advice please respond to this post.
Thank you,
Melanie

# 2357. Buffalo/Toronto Radio Watch(9/15)

Reply-To: ag365@freenet.Buffalo.EDU (Carl K. Gorney)

Up & down the dial in the #40 market:

* It starts up in Toronto this time around,with a couple of stories. One
has been talked about,the other hasn't.

CHOG(640(CHR/talk/Argos;AM 640)is dumping the CHR part and is going to
what they call "hip talk",according to Peter Goddard's Sept.9 column in the
Toronto Star. Promos were running within the past few days referring to the
change,noting that its noon-1am "information snacks" series were part of the
format. Obviously,Bill Carroll's "Toronto Talks" remains,as does(probably)
AM driver Gene Valaitis. Blown out are PM driver Tarzan Dan(weep not for him;
he's still at the Canadian cable network YTV)and Kenny the Hit Man.
PD Danny Kingsbury says that they never went into this with the intent of
gunning for CFRB(N/T;Raptors;1010)or CBC(CBL/740),adding that "we've thought
we could produce a younger,18-40 style of talk programming with a different
kind of delivery,a little more personality,being a bit more left wing as
opposed to right wing."
Those looking for its type of music will now have to settle for CIDC
(Hot 103.5),which is CHR/dance-ish,or WKSE(Kiss 98.5)here.

*CFRB has been suffering one defection after another. First it was
midday talker Jane Hawtin,who left to do a talk show with CHCH(Hamilton,ch.11;
ind.)which airs weekdays at 1pm. Now,midmorning talker Andy Barrie has also
left 'RB-to go to crosstown CBL/740 as the host of Metro Morning(6-9am).
He started in that post last Tuesday(9/5).

Back here:

*WHTT(Oldies 104)may soon have a new news reader on Danny Neaverth's
AM drive show. One of my tipsters told me that Krista Bettina(now at Niagara
Falls' WJJL/1440)is expected to take that post within a couple of weeks.
She'd replace WKBW-TV(ch.7,ABC)reporter Steve Boyd,said to be tiring of Danny's
antics. Overnighter Ray Geska has been pinch-hitting in that post.
*WECK(1230,adult standards)is now,again,known as the Music of Your Life.
'ECK worked out a deal with Al Hamm(the creator of the MOYL format)to use the
moniker in preparation of going back to live programming again(currently,
Transtar provides the format).

>$3,000 raised in an "illegal" car wash via the SD Airwaves

Raising the 'ire of city council has been KSDO's Rodger Hedgecock forte since leaving city council. With a recent passing of an ordinance in the city of San Diego against all car wash fund raisers, the talk show host showed justified defiance against every-growing government intervention.

With the "ludicrous" ordinance in effect, Hedgecock held a wash at the studios of KSDO/KKBH last Friday, Sept. 15. The station is in the city limits of San Diego. Up to 100 students from Madison High School and St. Stephens, whose plans for a car wash were canceled by the city council, helped in the event, and were one of the beneficiaries of the event.

During the event, Roger took over $900 in pledges in his three hour show from listeners phoning in. That helped in putting the total amount raised over $3,000.

The city council decision to pass the ordinance against fund raiser car washes was "to stop the amount of soapy wter and car debri run-off that reaches the bay and beaches."

[It should be noted that a majority of soap used for cleaning is bio-degradible.]

Helping to create a festival atmosphere was food from Geno's BBQ sauce and Hansen's All-Natural juices.

Source record: 29288

Just want to pass along what the local New Jersey newspapers are reporting on the condition of New York's WOR overnight talkshow host Bob Aaronson.

According to the reports, Aaronson underwent emergency surgery following an accident on Thursday afternoon. Police believe that he was struck by a car while he was riding his bicycle on a road in Boonton, not far from his home in Parsippany. He was not wearing a helmet when he was found on the side of the road.

As of Friday, (9/15/'95) police were still trying to piece together what happened. Aaronson was still in critical condition and unable to talk to the them.

Aaronson had been hosting the WOR overnight show for a couple of months, before that he had been the fill-in host for WOR's Barry Gray and the host of a mid-day talk show on WCTC in New Brunswick, N.J. He also could be heard as a news anchor on the ABC radio network on occasion.

I only know of Bob Aaronson because I listen to his program. He is a true professional and everyday that he's absent from the airwaves is a day that the broadcasting industry is not quite all that it could be. Let's hope his recovery is a speedy one.

## 2363. Atlanta radio

Newsgroup: rec.radio.broadcasting
Date: 1995-09-19 00:00:00 UTC
From: Neville <lloyd@climate.geog.sc.edu>
Message-ID: <43lh64$nu6@vixen.cso.uiuc.edu>
Source record: 29290

I check out the postings here about three times a week and have never seen any comments on the state of radio in Atlanta. Almost all that I talk to seem to agree that Atlanta is under-radioed. Does anybody, either locally or nationwide, have comments on the current offerings in this market? Any suggestions on what needs to be improved or curtailed? Atlanta has gone through some big changes in the 90's and it is interesting to compare the city to other markets of comparable size.

Thanks!

I'm a Canadian living in Texas and want to get back on the Canadian airwaves. Radio experience includes, music announcing, news anchoring/reporting and interview/talk as well. I'd like a job in any size market that can utilize as many of my skills as possible.

## 2366. Atlanta radio

Newsgroup: rec.radio.broadcasting
Date: 1995-09-19 00:00:00 UTC
From: Neville <lloyd@climate.geog.sc.edu>
Message-ID: <43lh6a$nv6@vixen.cso.uiuc.edu>
Source record: 29293

I check out the postings here about three times a week and have never seen any comments on the state of radio in Atlanta. Almost all that I talk to seem to agree that Atlanta is under-radioed. Does anybody, either locally or nationwide, have comments on the current offerings in this market? Any suggestions on what needs to be improved or curtailed? Atlanta has gone through some big changes in the 90's and it is interesting to compare the city to other markets of comparable size.

Thanks!

# 2367. Chicken Man, Dick Orkin and Radio Ranch

Can someone help me out on something. I'm sure that within the next year all of this will become a tad more clear, as I will be a freshman in college majoring in Radio Broadcasting, but just what is the difference in "Commercial" and "Non-Commercial" Radio? Also, the college that I'll be attending plays "eclectic" music, and to be frank, I haven't a clue what type that is, or what it means. Any help here?

Jason Spencer

# 2369. Re: Agent???....tip#'s in R&R

Message-ID: <43lh6b$nva@vixen.cso.uiuc.edu>
Source record: 29296

You absolutely should not consider getting an agent to secure a full-time radio gig. You will be wasting your money and your energy. In the history of the world, no one has ever landed their first full-time radio gig via an agent.

Despite the claims you might see in ads by "agents," the only value a real agent has is in negotiating a contract for an already established radio talent.

Final tip: No real, ethical agent will ask you for money up front. A real agent gets a flat commission based upon earnings you accrue as a result of his/her efforts. The ones who ask for money up front ("to cover the costs of phone calls, tapes, mailings, etc.") are making money from your fees...not from getting you work.

The following information was contained in the RTNDA Update distributed on Broadcast News, Friday September 15/95.

According to an Angus Reid Group survey, almost half of those surveyed say they are "very" interested in what's happening in the news, while four in ten say they're "fairly" interested. 60-percent say they are specifically interested in "local" news. And people also think we're pretty credible. Television tops the list with a 43 percent "high believability" rating, and TV leads as "most important" news source at 56-percent. Radio and major daily newspapers tie at 35-percent; and one in five, about 18-percent, say radio is their single most important source of news. The information is contained in a publication entitled "Canadians and the News Media."

In a message dated 95-09-15 21:55:26 EDT, Mark S. Roberts writes:

>: No surprise that KTTS is still the dominant signal here. Not so much
>: because of their outstanding country music format but for their
>: outstanding commitment to news and weather coverage.
>
>And the fact that they've had a *long* track record. That's probably why
>there are no all-news or formats in Springfield: KTTS has the news image
>locked down solid.

Likely also because Springfield is just too small to support an all-news format. Here in Bakersfield, which is a 350,000-plus metro, the guys who tried all-news on the biggest AM signal in town had to give it up and evolve to (mostly satellite) talk, because it was just too expensive. Now they're still doing some news, but with a staff of only three! The other newstalker in town is even cheaper...in a duopoly, two very poorly paid fulltime staffers, buying actualities from a TV station and using one of its anchors part-time to do mornings, and stealing most of the rest of their content from my stations or the newspaper. From what I've read about KTTS, we're similar in being a country station that owns the news image, but you need to realize that also makes it VERY expensive for others to challenge us seriously. And markets this size just won't support that kind of spending. IMO, all-news can't be profitable in markets outside the top 25 or so, unless it's just a CNN feed or AP All News Radio. Even then you're not going to make much, because you won't get any serious ratings without lots of local content.

# 2374. Kansas City Radio Watch (18-Sep-1995)

Newsgroup: rec.radio.broadcasting
Date: 1995-09-20 00:00:00 UTC
From: transvox@crl.com
Message-ID: <43nrrc$98o@vixen.cso.uiuc.edu>
Source record: 29224

In an apparent attempt to provide coverage in dead spots, gospel
broadcaster "Life 92 FM" has filed an application for a translator
in Kansas City, Missouri.
Bott Broadcasting's KCCV-FM, licensed to Olathe with a class C3
(25,000-watt or equivalent) signal, has difficulty penetrating
midtown Kansas City, because of all the 100,000-watt FM transmitters
located there or nearby.
KCCV-FM, licensed at 92.3 mHz, has applied for a 140-watt translator
on 97.3 with a directional antenna located near 43rd and Main, between
the Westport and South Hyde Park districts.
Bott Broadcasting already owns KCCV(AM), a daytimer at 760 kHz, and
KAYX(FM) in Richmond, Missouri. KAYX, at 92.5, simulcasts KCCV-FM to
provide coverage in the northeast and eastern parts of the Kansas City
metropolitan area.
If the application is approved, 97.3 will become a somewhat hashed-up
frequency in the Kansas City area.
On the Kansas side, 100,000-watt WIBW-FM is readily audible at 97.3.
In Blue Springs, on the east side of the metro area,
translator K247AB rebroadcasts KCVO(FM) from Camdenton, Missouri.
In essence, two gospel translators will be duking it out in many
Missouri locations, including Independence, with just a dash of
WIBW-FM.
I can just contain my joy.
*****
Kansas City listeners on the eastern fringes of the metro area already
can hear country station KXKX(FM) from Knob Noster, at 105.7 mHz.
KXKX, presently broadcasting a class C3 signal, has finally filed
its application to go up to a class C2 (50,000-watt or equivalent) signal.
The move should make the station audible in much of the eastern and
southern sides of the Missouri part of Kansas City, and may increase
interference for KLZR(FM) (105.9), a rimshot from Lawrence, Kansas
that sort of attempts to cover Kansas City.

Message-ID: <43nrre$98r@vixen.cso.uiuc.edu>
Source record: 29225

University of Kansas station KANU(FM) in Lawrence, along with
a group of Kansas public radio outlets, is preparing to go online
with a service called KPRNet.
According to KANU's September program guide, KANU will operate
a Web page featuring audio files of stories aired through the
Kansas Public Radio (KPR) network. KPR affiliates are in Hutchinson,
Manhattan, Wichita, Garden City, and Hill City, as well as KANU
and its network of translators.
KANU will also maintain its own information on its Web pages,
including programming news, playlists, station activities, and
membership information.
The site is temporarily at the following finger-breaking URL:
http://kuhttp.cc.ukans.edu/cwis/units/kanufm/public_html/KANU.HTML --
however, the site is described as "under construction." It's possible
the URL will change to something simpler once the site is more permanent.
*****
More Web Sites:
+ I found a site for one of the last share-time AM stations in the United
States, KKSU(AM) in Manhattan, Kansas. A brief yet informative history of the
station is available from KKSU's pages. The home page, also noted as
"under construction", is:
http://www.oznet.ksu.edu/dep/xcom/kksu/welcome.html

+ The Mid-America Radio Page is making yet another move, to a URL that
should be much easier to type in. The new URL is:
http://www.littleblue.com/kcradio
The pages are still being mirrored at both http://www.crl.com/~transvox/
and http://www.interstate.net/~transvox/ -- but if you have a page that links
to mine, please make the transition as soon as you can. My e-mail address is
still transvox@crl.com.
*****
The Investigative Listener #1:
Curious to see if any work has proceeded on the new KZTO(FM) (or
KCHZ) transmitter site east of Lawrence, I downloaded some maps and
set out in search of any signs of tower-building activities.
(I did find that I had mistakenly described the site earlier
in AIRWAVES. It is in Leavenworth County, just two miles across
the Kansas River from the small Douglas County town of Eudora.)
Conclusion: no activity whatsoever anywhere at or near the site, which
is just off Leavenworth County Route 1. Inasmuch as the station's presently
licensed site is west of Lawrence -- the wrong side for a rimshot
attempt into the Kansas City market -- it's doubtful KZTO or KCHZ will
take to the air any time within the next few weeks.
*****

The Investigative Listener #2:
Radio Shack has begun carrying Sony products, among them, the stereo AMAX-compliant SRF-A42 Walkman(tm). I think it is safe to say this is the first time this model has been available nationally. I now own one of these little radios.
It's a $25 radio, and it performs about like one. FM is useless in any area near strong transmitters, which happens to describe the urban core of Kansas City, Missouri.
The AM section, when in mono and a narrow bandwidth, is pleasant enough but unexceptional. When in stereo and wide bandwidth, it sounds very good. However, an FM station with clean, open, minimal processing could still sound better.
Nonetheless, with the slash-and-burn modulation so many CEs are forced into running by ignorant GMs and PDs who believe that loudness equals goodness, the only such FM stations typically are non-commercial stations any more. So, on the AMAX-capable radio, a well-engineered stereo station such as WDAF(AM) sounds cleaner and less muddy than most commercial Kansas City FMs.
The radio has its problems on AM, too: the automatic gain control is far too agressive and there is no indication of the stereo pilot tone used in the C-QUAM system.
*****
The Bored Listener:
Probably my least exciting discovery of modern times was finding the Motor Racing Network this Sunday on not just one, but two stations audible in the western parts of the metropolitan area: KMAJ(AM) from Topeka and KLRQ(FM) in Clinton, Missouri. (Yes, FM.)
Now if it had been the Boston Pedestrians-Dodging-Cars-and-Rollerbladers Network -- that might have been a far more interesting broadcast (complete with natural sound!)

# 2376. PHOENIX: KSLX FIRES HOLMES

Newsgroup: rec.radio.broadcasting
Date: 1995-09-20 00:00:00 UTC
From: Michael Hagerty <Michael_Hagerty@azfamily.com>
Message-ID: <43nrrh$992@vixen.cso.uiuc.edu>
Source record: 29226

After only 3 months at the station and about 6 weeks in morning drive, Citicasters' Classic Rock KSLX(100.7) has shown J. David Holmes the door.

Holmes, an 11 year veteran of AOR KUPD(97.9), thought he'd found a home at KSLX back in June with weekend and fill-in shifts...and was promoted to mornings in early August when PD John Sebastian canned John Giese and Bill Andres.

The morning show now goes to midday mainstay Tony Evans (who, in fact, has been there longer than the format and the call letters...he's been doing middays since it was CHR KOPA-FM a decade ago) and MD Jeanne Sedello(who was originally part of the David K. Jones/Bob Boze Bell morning show at KSLX).

KSLX, which peaked at a 5.4 12+ last fall in a 9-month return from the near-dead, is now in the mid-3's and looking to do better.

# 2377. On telling us upcoming artists

Newsgroup: rec.radio.broadcasting
Date: 1995-09-20 00:00:00 UTC
From: halem@access.digex.net
Message-ID: <43nrrk$99c@vixen.cso.uiuc.edu>
Source record: 29227

I'm not a radio programmer, but as a listener I can tell you that telling me what artists (and sometimes songs) are coming up, make me do one of two things:

A. Leave it on that station because I know I like the artists they say they will be playing and I want to hear them.

B. Change the station since I hate what they will be playing.

I think it is a damned if you do, damned if you don't situation. Whether you do it or not, people are going to change the station maybe to avoid the commercials or the upcoming music, who knows. But, what it comes down to is making your station uniform so that I know what types of music and artists will be coming up based upon what I have heard so far. The best stations I have listened to sometimes tell you what is coming and sometimes don't. But, I know what will be played (genre wise, not necessarily artists) based on the music they have played. That I beleive is the key here.

Just my opinion.

-Mike

>oriented WVON, those three stations made up close to a majority of the
>Chicago listening. What then of WMAQ or WLUP (AM or FM)?

Partially. Before FM caught fire, WLS, WGN, WVON were big draws.
However, WMAQ was the country station, and WBBM was the news station.
Other notable draws were WIND, WAIT, and WCFL(Later WLUP-AM, and now
WMVP) The WLUP FM station came later in the seventies along with WMET,
WEFM, WXRT and many others.
>
> 2. Larry Lujack was big on WLS? Right? Why did his
>popularity plummet so quickly? Where is he now?

Lujack was second to Wally. He made the am to pm drive switch and lost
his audience to the hordes of newcomers. He is retired now, probably
playing golf.
>
> 3. What happened to Landecker? I used to listen to 'Boogie
>Check' when I was a kid.

Well, I don't think he does Boogie Check anymore. He bounced between
Toronto, Chicago, and Cleveland but John is now back in Chicago doing
Mornings on WJMK, the oldies station.
>
> 4. What about Brandemier? (okay, help me with that
>spelling). Wasn't he the star of Chicagoland after Larry Lujack?
>Didn't he move to Los Angeles? Didn't he have a national show? Isn't

Brandmeier is back on WLUP FM's AM Drive. His national TV show failed.
He did the dual residence thing in LA fo a while. Star is such an
overused word in radio.
>
> 5. Am I correct to assume that Steve and Gary were a flash in
>the pan in the late seventies? Are they now apart and at best
>moderately successful on second tier stations?

NO! You are mistaken on several things here. Steve and Garry started in the late 70's on WLUP. They were then fired and went to WLS FM, then WLS AM. Then fired again. Returned to WLUP FM afternoons. Then WLUP AM, where they did very well in the 80's. They returned to mornings for almost a year before the break, still doing quite well(They kicked Stern's Ass). Apart now, Steve is doing mornings with Bruce Wolf on WMVP. Ratings aren't as huge as before but not bad. Meier was on WLUP FM, where he did poorly, was let go, and joined WGN TV. He was just let go from there as well.
>
>
6. Howard Stern. How's he doing now?

After a miserable showing on WLUP AM, where he was dumped, he is now on WCKG FM where is isn't gaining much ground either.

Jason...

In the United States, noncommercial radio stations are mostly
differentiated by the fact that they are prohibited from airing
commercials - the sale of time to promote the goods, services,
or products of a for-profit company.

They may air underwriting announcements which acknowledge the
contributions of funds, goods, services or products to the station.
However, these donor announcements may include only the
donor company's name, address, and phone number, and a generic
description of their product/service without using terms considered
qualitative, promotional or comparative. Also, the announcements may
not urge a listener to action.

On the FM band, the frequencies from 88.1 through 91.9 are reserved
for noncommercial use. That's why you'll find most of the noncommercial
college, community, public and some religious stations there.

Commercial radio stations don't have these restrictions and operate on
the rest of the FM band and also on AM.

As for the definition of eclectic, the American Heritage Dictionary
says it means:

1. Selecting or employing individual elements from a variety of sources,
systems, or styles.
2. Made up of or combining elements from a variety of sources.

I think you'll find it means integrating music from a number of different
formats and styles, such as jazz, blues, rock, etc. rather than sticking to
just a single kind of music all of the time. You'll find eclectic music more
on the noncommercial college and community stations than on commercial
radio.

Hope this helps.

Jeff Tellis

Could that be the same Barry Gray I listened to as a kid? Barry Gray broadcast a Midnight - 2 or 3 am talk show from Chandler's Restaurant in Manhattan over WMCA at least 45 years ago. I remember him interviewing William F. Buckley who was plugging a book he wrote while in college!

Gray must have been one of the very first radio talk hosts, along with Jack Eigen (?) who I could hear on good nights doing a similar show from Chicago.

I haven't lived in the NY area since the'50s, but it seem from occasional visits that WOR is the Geritol champion of the airwaves. A few years ago I heard John A. Gambling doing a morning drive show that was originated by his father John B. before I was born. It had a live band before breakfast until the infamous musician's strike in the '40s ushered in the era of canned music. It must hold the record as the record for the longest show on radio: 40 or 50 years X 5 shows a week. Opera from the Met may be older, but they are only once a week and they shifted stations. Is Gambling still going?

Other long timers on WOR were Ed & Pegeen Fitzgerald and the real estate advisor Meltzer, who went for decades.

In a message dated 95-09-19 01:42:20 EDT, Mike LeBlanc writes

>Automation seems to have decimated the ranks of the broadcast professionals
>with VERY few exceptions. Is this the way of the future? How can a
>salesperson in a radio station on one coast sell time on a program
>that originates from another
>place thousands of miles away and doesn't even feature local talent?

Yes, it is the wave of the future. More and more stations means smaller and smaller slices of the revenue pie for each one. Outside of a handful of top-rated stations in most markets, nobody makes money if they have live talent 24 hours a day, or fully staffed news departments. With today's computer systems, even locally programmed stations can automate pretty successfully. You can lay down voice tracks for a four-hour shift in less than an hour, then go on and do something else while the computer puts your show together. It still doesn't sound as good as "live," but it gets the most out of a small staff.

You sell network programming the same way you sell any other programming. You sell it based on the audience it attracts, to advertisers who want to reach that audience. If it doesn't attract much of an audience, you just sell it cheap. That will also have the benefit of hurting those big guys, who might have to cut their rates to compete with your absurdly cheap spots, and then have to cut the quality of their station, so it becomes just as crappy as yours.

Does this give you a clue about why the state of the industry is what it is?

Steve Bishop was inquiring about ABC Direction and other news services...

Steve:

One of my AMs presently runs ABC Direction..and basically I'm satisfied with it...to a point. Its fed at :45...and offers 2 minutes of news, plus an additional :60 of network commercial inventory. We presently DB it to the top of the hour...which works out fine most of the time, but on occassion a hot story will break between the feed time and our air time. My main complaint with ABC these days is it appears almost no radio network anchor is exclusive to one network. Some of the people who do the news on my station through ABC Direction also wind up anchoring news on the ABC Information affiliate in town...or the ABC Entertainment or Contemporary affiliates in town. That bugs the crap out of me. Also, in the past several months, ABC has begun using the news feeds out of New York (Direction/Entertainment, etc.) on the Satellite Music Network...so the same anchors (and the same newscast in many cases) on SMN affiliates in our market. I continue to be bugged!

With some other changes happening with our AM...and the fact that our ABC contract is up soon, I'm seriously looking at CNN Radio News. It is produced at CNN in Atlanta..and distributed by Westwood One Radio Nets (805-294-9000). I believe CNN has some good credibility these days. CNN offers at top-of-the-hour cast that runs 6min, with a 3-1/2min optional breakaway...plus a 2min bottom-of-the hour cast...plus actuality feeds and reports.

Its something you might take a look at....

Over the past 5 to 10 years, I have been building my own small home recording studio. It isn't a multitrack, but it is 2 track mastering. This started out as a hobby, but now I want to know how I can put this equipment to use and earn some serious money from my production skills.

Does anyone have any ideas as to what I might look into doing or who I should talk to?

thanks!

To: Former radio personnel, career radio personnel, ex-jocks, and whomever knows any such people!

I'm eagerly looking for 45 rpm records from 1972 back to the beginning. NO QUANTITY IS TOO LARGE, and I especially want nonhits/"junk"/"stiffs," because I already have the hits. Is the radio station shed full of this stuff? Did you clean out the back room in 1978 to make room for the new FM station by putting a pickup-truck-load of records in your garage? I will compensate handsomely if you have what I seek--old, miscellaneous promo 45s! Any US/Canada OK. I'm in the central US, will consider traveling. Thank you!
Will reply to all.

Please reply to Frank, c/o tnoonan@macc.wisc.edu

Hmmm... guess I can feel young again... I started listening when my family moved to the Chicago area in '79 and they were simply positioned as "Music Radio" (no Most). Anyway, by 1984 they had evolved into a very personality-based Adult CHR, but still playing about 8-10 tunes an hour (less during Dahl and Meier's afternoon drive show, more at night). The personalities changed (major shuffle in early '86), but the format remained roughly the same until August of '89, when they finally went all-talk.

It's amazing to think about it: in a strange sense, WLS was doing in '84 what WLUP-AM started in '87 (and moved to the FM in '92). And I call their musical format adult CHR, even tho they were doing it in the mid-1980s.

# 2392. WRKO Aircheck avail.

Newsgroup: rec.radio.broadcasting
Date: 1995-09-20 00:00:00 UTC
From: jgallagh@interserv.com
Message-ID: <43nrse$9b2@vixen.cso.uiuc.edu>
Source record: 29242

I have an aircheck of WRKO, Boston in the (fairly) early years
of its Drake-consultancy.

The tape is of pretty good quality as I did it myself back
around 1969-1970 when I was in high school

Most of the tape features Johnny Williams, who at that time
was doing afternoon drive.

There's a few hours of" the Mover", along with a few talkups by
Dale Dorman and Joel Cash.

A few news intros by John Masters, the dean of the Top 40
Newsmen (who recently retired from WRKO which is now
a talk station).

I also have the complete WRKO-WROR jingle package
which was dubbed off a 15 ips master.

These are the ones with Bill Drake's voice saying:

"And now ladies and Gentlemen, Bobby Mitchell".....
---
Johnny Williams (real name Bill Todd) is outstanding on
this aircheck and must have been real psyched this day
because he even talks up the commercials.

This was in the days of Coke;'s campaign: It's the Real
Thing (sung by Vanity Fair and other groups with top 40
hits).

Shortly after I made this tape, Johnny Williams was
"promoted" to KHJ where he had to change his name
to Cat Simon because there was already a JW at the
big 93. No-one today seems to know the whereabouts
of Bill Todd.
---
Anyway, I'd be happy to trade a copy of this priceless
tape for any of the following airchecks from the
60's or 70's:

WABC
WLS
CKLW
KHJ
other WRKO jocks

any jocks on these stations will do but I'd prefer tapes of Dan Ingram, Harry Harrison, Frank Kingston Smith, Charlie Tuna, Cat Simon, KHJ's Johnny Williams, John Records Landecker, Shadow Stevens, the real Don Steele, Jerry Butler

As a college kid (at Umass in Amherst) I used to visit the big 68 WRKO in Boston and it was a most amazing place.

Although I once sat next to Walter Cronkite while he did the CBS EVening News (and John Hart when he did the CBS Morning New), I used to get a bigger kick out of visiting WRKO which was such a dominant music station in Boston in the late 60's.

In Airwaves Digest #89, Melanie Sands (makkalkb@mailbox.syr.edu) asks:

>I have been in radio for almost 4 years now and I am working for
>country station. I have learned A LOT since I have been where I am
>at, but it seems that no one really wants my help with anything.
>For the past 3 years I have done the satellite board operator drill
>and when I got to this station I finally had a chance at some on-air
>time, now the overnights on the weekends have gone satellite and I have
>lost that air time that I really enjoyed working on. The program
>director said that those who lost air time would be given more time on
>the weekend. Well, a new part-timer has been hired with the promise
>of a set show. Now it appears that I will be a board op for the most
>part at the station.

This sounds all too familiar. It happens to all of us. It happened to me. When it did, I started looking elsewhere for on-air work.

It was the right thing to do. I spent the next four years gaining valuable experience I wouldn't have gained had I persisted at the other station.

Try applying at one of the traffic services (Metro, Shadow) for work. It's not DJ work, but it's on-air work, you'll make connections, and you'll find it more rewarding than being a board op.

--Lynn
P.S.--Eventually the first station called ME back and asked me to do for them what I wanted to do for them in the first place.

## 2395. WHRB, Cambridge, Massachusetts

Newsgroup: rec.radio.broadcasting

From: umar@cybercom.net
Message-ID: <4404n4$ngv@vixen.cso.uiuc.edu>
Source record: 29052

WHRB has signed on from their new transmitting facility at One Financial Center, Boston. Instead of 3,000 watts ERP from 110 feet, they're now transmitting 1,700 watts from 600-odd feet (I forget the exact number, but it should be close to that of WERS, which uses the same site).

In suburban Needham, MA, the signal is, if anything, worse from the new site.

WHRB's format is basically jazz from 5 am to 1 pm, classical from 1 pm to 10 pm and rock through the night, and it operates on 95.3 MHz.

When I worked with Shadoe in L.A. he told me a funny story about being hired to work at WRKO. He drove cross-country, got to the station and the P.D. said "Oh, by the way, you'll be using a different name. The other guy I hired quit before he started and his jingle had already been cut so you'll use his name!"

Shad was almost to his car when the P.D. got a clue about what he'd done and reversed himself...

# 2397. Changes In Ventura County Radio

> Question for those of you who may have had experience
>with accuratings or any other alternative ratings sources. Is
>the data produced by these alternative sources taken seriously
>by national advertisers?

The numbers from AccuRatings are more stable-- fewer inexplicable ups and downs-- but the big agencies continue to base their buys on Arbitron, or so I'm told.

The agencies are locked into a cost-per-point mentality, and Arbitron numbers are easier for them to use. "Core listeners", on which AccuRatings bases its numbers, are easier to measure than time spent listening (which Arbitron uses to calculate AQH ratings).

Our PD asked Kurt Hansen a couple of years ago why classical stations seem to do better in Arbitron than in AccuRatings. Hensen guessed that Arbitron's written diaries introduce an automatic bias in favor of stations with more literate listeners.

Well Mel, it looks like you have run into what most of us have in the early part of our careers. You were hired.. you stunk at the time.. you've improved and now no one notices. Unfortunely they are not going to notice that you've improved either. Here is my advice:

Step #1. Someday when the station is linked to the bird, go in and get the phone on the air. Then take a cellular phone to your white Ford Bronco and do a live remote from it as you tool around town. Of course you'll only get about half way when the PD makes it to the station to pull you off the air. And, yes you'll probably get locked-up for theft or something.. but this process will put you in perfect position for the next step.

Step #2. Get a job somewhere else.

I hope that helps, Melanie. Now if you're short of time and just wanted to skip step 1 and send T&R's to every stick in the country, I guess that would work as well.

Either way, I wish you the best.

To whom it may concern,

I'm a young talk show host who is putting together a once a week show on a Chicago talk station. The bugger of it is that I need to sell my show. The sales department, let alone management, won't assist me because I'm young. Therefore, I'm selling my show all by myself. My question to the masses is: are there any advertisers who might be interested in buying some air time on a 50,000 watt AM station on a youth talk (read: Generation X. Hey, there are 47 million of us out there!) show? I have an excellent show and now I'm hustling to find sponsors. If you are at all interested in advertising to the next generation please write me back at this address:

bascom@ix.netcom.com

Please contact me if you are at all interested because it would not only benefit your business but it would also allow me to really take off in talk radio.

Sincerely Yours,

John B. Harris

>

I spent 15 years in the biz in Ca. .. and when I needed talen I picked from the pool I had. If I had a decent intern, I let HIM/HER do the board 'oppin until I thought they could manage a shift..

I know it sounds like the PD is being a pain, but understand it from his point of view... A PD is resonsible for the overall sound and image a station presents to it's listeners. When you're in the middle of a ratings book, the last thing a PD wants to do is mess with the "sound" of a station. In major markets, ratings points are gold, and if a station slips below the last book, then the advertising falls off. (and in radio, advertising is king..) When the ad's fall off, the GM gets nervous and things start changing, including the PD...

With that being said, the interns/PT's that I picked usually were the ones that pestered me the most. These were the types that came to the station remotes and helped out, or helped produce the morning show.. As a rule most of the time, these folks never got paid. But they were in the right place at the right time. Which in radio, is how most of us get promoted.

The other thing I suggest is AIRCHECK yourself as often as possible. Even on the Sunday morning shifts you at least get to do time and temp. AIRCHECK,AIRCHECK,AIRCHECK (I cannot stress this enough..) Ask the PD to critque the 'CHECKS, if he wont then ask one of the other jocks to help you. Anybody who's been in the biz has done this. If it looks like the situation is getting nowhere (and I mean after about 3-4 months or so...) then you might think about putting a resume together, and looking for another gig... Trust me, in radio it is not uncommon to bounce from station to station when you just start out. I peronally have been in the same station three different times, and under three different formats.

All I can say is keep the faith, this type of biz is really fun but it takes getting noticed to get you hired. I have had some great times in the biz, and have really done some cool things...

Remember radio is like your mom in a KMART, She may not know what she came in for, but when the blue light goes on, she's the first in line with a baseball bat to fend off the others....

Good luck!!!!

Melanie,

I commend you for being eager to do things at the station. There aren't many up and coming people who are truly excited about doing everything they can to learn this craft. Frankly, I'm surprised your program director has not taken you up on your offers to help.

I would suggest talking to your program director and telling him exactly what you explained in your letter. Good PDs recognize that it's hard to find willing part-time people to go above and beyond the call of duty.

Keep pushing. Your PD may be so involved in preparing for the fall book, he doesn't have time to think about anything else. If he or she is like other PDs, they are having to deal with sales, music, consultants, record reps, promotions, staff, remotes, meetings with the GM, and usually pulling an air shift; plus many other things that would take pages to write.

However, that's still no excuse for not taking you up on your offer. Hopefully, the PD will take you up on your offer if you keep being persistant.

I would suggest not going above the PDs head. Egos of PDs are easily bruised, not to mention, the GM would just report what you said back to the PD. It would appear to the PD that you don't respect his authority. It could cause problems internally for you.

Has the PD conducted any air check sessions with you? Maybe there is something about the way you sound that prevents him from giving you more time on the air. Ask him. If there is something wrong, ask him to help you improve. Regular sessions are imperative to improving your on-air presence.

If none of this is the problem and you still can't get through to the PD, you might consider moving to another station. Stay in contact with people you know in the industry. There are always jobs in radio for those who are serious like you appear to be. Most stations would scoop up anyone who shows real passion for radio.

If you are interested in leaving for another gig, let me know if I can help.

Good Luck!
Jimmy

# 2403. Ron Baile -- oops!

>From Seattle Post-Intelligencer, via AP, 9/22/95:

The former owner of a longtime broadcasting school was convicted
yesterday of embezzling $270,000 in student loan repayments.
Radio personality Ron Bailie, who owned the Bailie School of
Broadcast, was convicted of nine counts of embezzlement, false statement
and criminal conspiracy after a U.S. District Court jury trial. Bailie's
wife and daughter were also convicted of multiple counts.
The Bailie School taught radio and television courses at campuses
in Seattle, Denver, Spokane, Phoenix, San Francisco and San Jose.
The Bailies deposited many of the student loan repayments
directly into their business and personal checking accounts. Some 200
students did not receive credit for having made repayments. The Bailies
each face a possible five years in prison and a $250,000 fine for each count.
#

Comment: In 1963, at the age of 17, I desperately wanted to be a
professional dj. I'd already been doing shows on KZAM-FM (the
original one) for a year. At the time, Ron Bailie was very popular on
KJR, holding down a mid-day slot when the station was the number one
rock outlet in town. My mother took me down to Bailie's office to check
into his program. It all sounded pretty good until we got to the cost.
Bailie wanted $600 for his course, much of which was redundant for me.
Further, $600 was one hell of a lot of money back in 1963, especially
for a working stiff like my father who was responsible for a house full
of seven people, four of them kids. I reluctantly said no to Bailie.
In later years, Bailie's course costs mushroomed to thousands of
dollars, not all of which was attributable to inflation. Every time I
started to reconsider his program, the costs blew me out.
In the overall scheme of things, Bailie's monetary transgressions
are fairly mild. You want real weasels you gotta go to Michael Milken,
Ivan Boesky, Keating et al. Still, those of us in radio don't need this.
And old KJR fans certainly don't need it; we had a heaping helping a
decade or so ago, when Pat O'Day went into the tank.
On the other hand, having been a student once who had to bust my butt
pay back my loans, I find Bailie's action reprehensible. So much for
childhood icons.
Another one bites the dust.

Yes. The very same Barry Gray, still alive, well, and working in NYC.

## 2405. ISDN

Newsgroup: rec.radio.broadcasting
Date: 1995-09-23 00:00:00 UTC
From: general@Britain.EU.net
Message-ID: <4404m2$neq@vixen.cso.uiuc.edu>
Source record: 29158
Cross-posted to: uk.media,rec.radio.broadcasting,rec.audio.pro,alt.radio.uk,alt.radio.digital

ISDN is the buzz word of the ninties in UK radio stations.

Studio to studio links used to requires 72 hours notice to book lines.

Now with ISDN studio links can be esatblished at just a minutes notice.

To take advantage of ISDN you require.

(1) An ISDN Line
(2) Terminal Adapter
(3) Digital Audio Codec

The first two items are straight forward but the choice of codec requires some careful thought as their are at least five different, incompatible systems on the market.

At Metro FM in Newcastle, England, we use two different complementary ISDN Digital Audio Codecs.

For News, Sport and Programmes we use the aptX-100 codec developed by Audio Processing Technology of Belfast, England.

In Commercial Production we the use the MUSICAM codec developed by CCS of America. This system is also very popular with voice-overs and production companies within the UK

I am interested in any feedback from other ISDN users.

I also publish a User Guide & Directory for seasoned ISDN users.

## 2406. Barry Gray?-yes it is

The answer to Bob Kirk's question of whether current WOR talk show host Barry Gray is the same guy who was on WMCA 45-years ago is....Yes.

He's been around New York radio for a very long time, but I understand that he got a very early start in the business.

Also at WOR the Gambling morning show is still going. With the grandson of the original John B. holding down the fort.

However, most of the other WOR longtimers that I remember my parents listening to when I was a kid are gone. I believe Ed & Pegeen Fitzgerald passed away, and that Bernard Meltzer retired.

In response to Chris Abbate's request for World Band station e-mail addresses........

Radio Australia - roz@radioaus.org.au

Radio New Zealand - rnzi@actrix.gen.nz

Deutsche Welle (Germany) - dw@dw.gmd.de

Radio Netherlands - letters@rnw.nl

Couldn't come up with an e-mail address for the BBC, but it has a World Wide Web page at http://www.bbcnc.org.uk/worldservice/index.html

There is a great list of both domestic and international broadcasters at http://itre.uncecs.edu/radio/RadioCatalogRT.html.

You'll also find that the Radio Netherlands web page has links to other international broadcasters including France and Japan.

Hope this at least gets you started.

Hi!

Brevard Community College is interested in starting a cable FM radio station. Do any of you have information on how to go about doing this? Do you know of or have any articles on cable FM radio that you can send me? Would you also know if there is a list of colleges and universities that have cable FM radio stations?

Finally, do you know if CMJ...the College Music Journal has an e-mail address?

Please send answers via the e-mail to: shearer.r@A1.BREVARD.CC.FL.US

Thanks.

# 2411. Talk Show Hosts? Journalists?

Newsgroup: rec.radio.broadcasting
Date: 1995-09-23 00:00:00 UTC
From: The Mid-America Radio Page <kcradio@littleblue.com>
Message-ID: <4404lj$ndh@vixen.cso.uiuc.edu>
Source record: 29164

There's been some controversy this week over an interview talk station KCMO(AM) aired with a Kansas City, Kansas police officer convicted of murder.

Talk show host Rick Roberts interviewed former officer John Cheek on his September 13 afternoon drive-time program. Cheek, who is white, was convicted of the fatal shooting of security guard Milton Foster, who was black.

According to the Kansas City _Star_, Cheek asked for the interview to tell his version of the story. Cheek told Roberts, according to the newspaper, that he believed "some of the black jurors were walking in with preconceived notions." Moroever, according to the newspaper, Cheek said authorities "were scared to death of a riot" if Cheek were to be found not guilty.

The _Star_ article also described a meeting with KCMO GM Ron Carter and program director John Butler that was requested by several community advocacy groups. In response, Carter recorded an editorial saying KCMO has been "wrongly accused of playing the race card" but also apologizing for any offense given by the program.

Roberts told the newspaper he was surprised by the negative reaction to the interview. He said, "The major complaint I've been hearing is, 'You need to be a responsible journalist.' ... Well, first of all, I'm not a journalist. I'm a talk-show host."

There we snip and ask the question: is this, pardon the phrase, a cop-out?

Should talk show hosts expect the privileges of journalists without accordingly accepting the responsibilities of journalists? Or should they be held to a different standard? Can the listening public tell the difference between a newscast and a talk show?

I can see reasonable arguments in several directions regarding these questions. I can't evaluate the interview myself because I didn't hear it. On the *surface* it appears Roberts has a point, but he may also be arguing, "if it sounds good, do it," without thinking about his or his employer's sense of responsibility to their community.

I think it would be of interest to hear where other talk show hosts draw the line: are they journalists, semi-journalists, or something different altogether?

by the way do you recall that the highest numbers steve and garry ever had (they said) happenede on WLSAM when they were fighting with Larry. Stec and Garry were doing afternoons and complaining that Lujack was a dottering old fool....however he was getting bigger #s than them. So I still can remember the evening that Lujack stormed into their studio....threatened to break Garry's other arm (one arm ws in a cast) Steve said lets get out of here...S&G left the station and larry finished their shift. that was some of the best radio i have ever heard. S&G were not a flash in the pan they were around for a loooong time in radio years and they still spawn a lot of copy cat 2somes.

remember the time on boogie check when landecker was taking calls live and someone called up and yelled "F YOU!!" and Landecker said "NO" and went on to the next call.....hahahahahah no bleep on the air by the way

and even though i have been out of Chicagoland radio for a while i hear that Mancow Miller is beating Stern into the ground #s wise.

if you want a book on the WLS of the 60s....check out the book by Stew Salowitz.....it is great!!!!

WMAQ or "67-Q" was MOR (more an early form of Adult Contemporary than the Steve and Eydie thing) in the early 70s. I used to listen to them along with WLS & Super CFL when I was just getting into the radio biz. I think they may have been one of the first stations to salute other stations and personalities in the same city just before they switched to Country in the mid-70s (73-74?). Of course, many of their personalities had worked elsewhere in Chicago...the likes of World Famous Tom Murphy, Jimmy Stagg and Jerry G. Bishop.

Larry Lujack first worked nights at WCFL, switched to WLS where he became morning man for John Rook, went back to CFL a few years later (with Rook again? not sure...) to do afternoons, went back to WLS after CFL switched to beautiful music in '76 and was very successful doing mornings there into the 80s. I got to meet him briefly in the early

80s. Great talent and hard working, too! I'm not sure if he left the morning shift for another just before retiring.

He retired shortly after his son from his first marriage died in a traffic accident. WLS' numbers had been tanking before he left...the great exodus of listeners to FM was in full swing. I hear he is playing lotsa golf!<g>

From: "Roy S. Ford" <stdrsf@shsu.edu>
Message-ID: <4404lo$ndu@vixen.cso.uiuc.edu>
Source record: 29167

Well maybe I can help,

Right now I am a Junior in College and our station is Non-Commercial.

Non-Commercial = this means that the station holding this title does'nt play commercials. example: during a Stop Set there are no menitions of businesses and other national corporations, that buy paid advertising. there are some exceptions to this rule when it comes to "underwriting", but that's a little complicated.

Commercial stations are usually the ones that "sound real" and in most cases have more money than their counter-parts.

The FCC also set some time ago frequencies that run non-commercial and certain frequencies for commercial.

Non-Commercial===88.1 thru 92.1 (or there abouts)

Commercial=== starts where Non leaves off.

Remember, there are some differnces in how others regard a station as Commercial or Non. Some say it depends on what music you play, and others say it depends on whether the employees are paid or not.

-Roy

Reply-To: janne@vafalls.se

Does anybody know about a software for editing/broadcasting that works with linear digital audio? The one I've seen uses Musicam or simular coding. We are today using semi-profesionell software to be able to connect our computers i a network and be using linear digital sound. We are hiring Musicam contribution/distribution-links and after encoding/decoding many times it starts to sound bad. We would like to skip atleast one step coding and go linear instead (f.e. 44.1kHz/16 or 20bit). Our computer-network can handle it but where's the software?

>hiring criteria than talent and experience?

Hmmm, where to start... the EEO rules don't say anywhere that you have to hire less than the best candidate. Their purpose is to ensure that the stations are making their best effort to find the most qualified minority candidates to add to the pool being considered for a position.

The purpose of the rule is to ensure that past practices like word of mouth hiring and advertising positions in industry magazines only (who's readership is mostly white male) that were (usually unintentionally) discriminatory, are no longer relied upon.

Generally, you don't get hit with a short renewal or denial of renewal from having minorities under-represented. You get penalized from having years of non-minority hiring combined with minimal to no effort to find qualified minority candidates.

If I'm a GM I don't want my PD tracking EEO stats. It's too important to maintain that documentation to avoid getting slapped down if you become temporarily under-represented. Anyway, how many of you PD's want to do it?

>Top 40 demise you describe, with the exception of WOR-FM, were
>all AM radio stations. The "format" death you discribe is
>really the end of AM radio as a source for music.

All this talk of NYC AM radio has reminded me of some other AM
stations that were around in the 60s and 70s when I was a kid.
These stations were in Nassau County (Long Island), and played top 40:

1100 WHLI Hempstead
1240 WGBB Freeport

>Your real argument is in the area of beautiful music stations.
>And yes, they are gone. Radio, after all, is a business...and
>the demos of a pure beautiful music are 50 plus. No agency or
>advertiser places buys for those people.

I was leafing through a book called ELEVATOR MUSIC (Joseph Lanza,
author) yesterday that said as much. However, I wonder if there might
be more 50+ listeners (who are willing to buy advertised products) out
there, since the average lifespan has increased since the 60s.

This is true. However we sometimes forget that the sixties are thirty years ago and the 40 yearold BM listener is now 95!!!

Today's 50 yearold was 20 in 1965 and is probably more comfortabel with EZ stations or sixties-oldies stations than Frank Chacksfield or the Hollyridge strings. Also keep in mind that BM stations didnt contain much original music. Many had no original music but contained very bland intrumental covers (many recorded but never released to the public) intended as background music.

Much of the 'authentic' music of the period lives on in AS (Adult Standards) formats sometimes erroneously dubbed "Big Band" stations. If there is any value in reaching this audience, it will bethe AS formats not thye BM formats.

# 2425. 620 in Dallas

Newsgroup: rec.radio.broadcasting
Date: 1995-09-23 00:00:00 UTC
From: Frank Provasek <72127.1057@CompuServe.COM>
Message-ID: <4404m8$nf7@vixen.cso.uiuc.edu>
Source record: 29178

Driving around Dallas in various cars and locations, I notice
on KAAM 620 test broadcast a very strong beat signal from
KLIF 570 and KGBS 1190. Usually you don't see AM stations in
the same area on sum/difference frequencies of exisiting strong
stations. KAAM says they are working on it, but other than getting
one of those stations to go off, there's not a lot they can do.
Funny how KWFT 620, a pioneer Texas station got moved to the Dallas
area.. I talked to the owner about a year ago, guy named Don Won.
(says his Dad had a bad sense of humor) He said he
thinking one day that, golly, gee, he had been the owner of this
station for 30 years and just realized that Plano, a suburb of Dallas,
didn't have its own station, while Wichita Falls had several, and
golly, gee, it just wasn't FAIR. So when these investors offered to
HELP him move his station to the Dallas area, golly, gee, he just
COULDN'T turn down a chance to let all those north Dallas people
have their VERY OWN radio station. But once his station was moved,
he just MIGHT decide that he didn't want to own it anymore, and it
would only be fair to sell it to those nice men who put up the
money to move it.

The net is KTRT, KBIX (Muskogee), KADS (Elk City).

We are adding two more stations tba

The theory is that if you put enough small signals together, you get a medium sized signal that will
eventually cover a state. If it works, I'm smart. If it doesn't, we'll do something else. But at least we're
doing something.

KRLV in Las Vegas is programmed seperately but we feed it the Harvey Rubin show which is produced
by Taylor Satellite Talk for their own net. TST is a Tulsa company which has some of its control
facilities in our shop. Harvey Rubin is the Talknet Harvey Rubin.

# 2428. PHOENIX: KZON CHANGES FORMAT

Newsgroup: rec.radio.broadcasting
Date: 1995-09-23 00:00:00 UTC
From: Michael Hagerty <Michael_Hagerty@azfamily.com>
Message-ID: <4404mb$nfc@vixen.cso.uiuc.edu>
Source record: 29181

Sundance's KZON(101.5) flipped from AAA to alternative at
12:01 AM Thursday(9/21).
The change follows last month's dismissal of PD Dave Logan.
John Russell moves to mornings...AM Drive personality Mary McCann has
been sent to 7PM-12Midnight.
"The Zone" has lost about half its 12+ share since last fall.
This move pits the station against Resource Media's KEDJ
(106.3).."The Edge".
KZON has a superior signal and fatter pockets for the fight...
and, since "The Edge" carries Howard Stern from 4am-10am, it will be
the only FM station playing alternative music in morning drive.
"The Zone", which now bills itself also as "Arizona's
Rock Alternative 101.5", is softer musically and heavier on 80's cuts
than "The Edge", though this may be a transition tactic to avoid
blowing off too much of
its remaining AAA audience.
This is the fifth format for this signal in the past decade....
it was Classical KONC(Concert 101), went satellite-delivered
AC(Format 41)as KAMJ(Magic 101) in
1987, went live AC as KMXX(Mix 101)in 1989, and pioneered AAA in this
market as "The Zone" in 1992.
Odds are what is on today is a work in progress...no new PD has been
named yet to replace Logan...what's on now is the product of
consultants and management.

# 2429. Sound mixing on the Mac

Newsgroup: rec.radio.broadcasting
Date: 1995-09-23 00:00:00 UTC
From: David Baker <david@miro.demon.co.uk>
Message-ID: <4404mp$ngc@vixen.cso.uiuc.edu>
Source record: 29182
Cross-posted to: demon.tech.mac,comp.sys.mac.misc,rec.radio.broadcasting

I'm (still) looking for some sound mixing software I can use to edit and mix upto 4 tracks on a PPC 7200.

I have found SoundEffects which looks promising, but does anyone know of the latest versions of:

Mini Recorder (2.1 just crashes my machine at launch)
DigiTrax?

I think the latter is produced by Alaska Software.

Anyone know of a PPC version of the above or any other suggestions?

TIA

David

# 2430. PHOENIX: SPANIER, BOMBARD OUT AT KGME

Newsgroup: rec.radio.broadcasting
Date: 1995-09-23 00:00:00 UTC
From: Michael Hagerty <Michael_Hagerty@azfamily.com>
Message-ID: <4404md$nfd@vixen.cso.uiuc.edu>
Source record: 29183

Afternoon drive host
Arnie Spanier and reporter
Amy Bombard have parted ways with
Resource Media's sportstalk KGME(1360)"The Game".
Spanier returned from his honeymoon to find PD Chris Visser offering him overnights and offering Bombard a job as a board op. Both declined and are seeking work elsewhere.
KGME, which has been simulcasting the Howard Stern show with modern rock sister station KEDJ(106.3)"The Edge", will drop Stern beginning Monday(9/25). John Cannon and Bruce Jacobs will take AM drive, the Fabulous Sports Babe stays in middays and Mike Golic and Tim Liotta move to afternoons.
Stern remains on KEDJ, which itself is simulcast on the old KHOT(100.3).
PS...STRONG street talk that the Edge is about to face some stiff competition...early bets were on KDKB to take the plunge...early bets appear to be wrong...details may be only hours away.

## 2431. New WLUP-FM Line-Up?

Newsgroup: rec.radio.broadcasting
Date: 1995-09-23 00:00:00 UTC
From: cavanagh@scf.usc.edu
Message-ID: <4404me$nff@vixen.cso.uiuc.edu>
Source record: 29184

As a expatriated Chicagoan living in L.A., I've heard quiet rumors
that the line up at the LOOP-FM has been revamped. What's the scoop?
Did Kev Matthews crash & burn in the mornings? Why did Brandmeier become
"Johnny in the Morning" once again? What's the background gossip on why
the switch was made?

Also, does anyone have any idea of how Howard Stern is doing, rating-wise
on WCKG?

thanks

I don't know them. Since Veronica Broadcasting in the Netherlands is using a Mac application, maybe you could contact them. They have a huge website at

http://www.veronica.nl

There's a mail option on the site (don't know it right now), you should contact Unico Glorie (Programm director Hitradio Veronica). Or call them (+1 GMT) at +31 35 716716.

We have both ABC and CNN Radio here. The CNN service is pretty good, but certainly not as polished or "full service" as ABC. And, if you're concerned about anchors appearing on other stations, you might note that CNN Radio is NOT usually market-exclusive.

Regarding news services, I have automated the AP Radio Network news and have listened to their product. It is great. Not only do you not have to worry about commercial clearances, but you can pick and choose what you want from a full range of segments or just carry the thing bulk as an all news/no talk station.

They simply charge you a monthly fee and let you do the rest.

At least, this is my understanding.

Correct me if I am wrong.

# 2436. NHL Radio Notes (9/21/95)

Newsgroup: rec.radio.broadcasting
Date: 1995-09-23 00:00:00 UTC
From: jmac@gti.gti.net
Message-ID: <4404mj$nfu@vixen.cso.uiuc.edu>
Source record: 29189

WBZ kicked off it's first season of Bruins hockey on September 17 with a game from Detroit. Bob Neumeier, unfortunately, left very much to be desired. His style of calling was much more like he was on TV and not on radio. For example: During one play, I think it was Paul Coffey took a shot up and over the net. The puck did not leave the playing surface. Neumeier instead of telling us where the puck did go, he began to tell and antecdote (sp?) about Joe Louis. He has alot of potential, but he has to use it.
WWKB began it's first season of Buffalo Sabres hockey also on September 17 in a game from Buffalo vs the St. Louis Blues. Pete Webber, who seems to be only a rookie at calling hockey games, did a marvelous job. He was quick and thorough, and always stressed location. He has got alot of talent and just needs to tweak it.
As you are probably asking, who am I to judge the quality of these people's calls? Well, besides being a hockey broadcaster (on the super-local level) and a life-long NHL fan, I had the great opportunity to learn pointers from Bob Wolff (MSG Network's Rangers' voice in the 60's/early 70's), Spencer Ross (Devils' voice in the mid-80's) and Mark Katic (local sports in Rhode Island, now with ESPN Radio). Of course, I'm probably just babbling now :)

One again, I am trying to find out who the Flyer's new radio voice is. If you know, please let me know.

And before I forget:
The Colorado Avalanche will be on Denver's 950, KKFN. Norm Jones will do play-by-play while Mike Haynes does colour.

Happy DXing.

# 2439. the status of Dr. Don...

Newsgroup: rec.radio.broadcasting
Date: 1995-09-23 00:00:00 UTC
From: myers@West.Sun.COM
Message-ID: <4404mn$ng9@vixen.cso.uiuc.edu>
Source record: 29192

I didn't intend to start a controversy over the status of Dr. Don Rose; I simply recalled reading about his demise. Unfortunately, I can't remember exactly where. I called the Contra Costa Times editorial desk, and the editor said he had passed away. Now, there have been notes from people who say "Yeah, he's alive and I talked to him yesterday" and there has been at least one note saying "I asked Gary Owens, and old friend of his, and it is true that Dr. Don is gone".

I'm now very curious; are all of these people really taking about the same person? Is there some confusion between a living Don Rose and a dead Don Rose? Actually, "Rose" was a pseudonym, his real name is something like "Rosenbaum", but my recollection is hazy.

Does anyone have some insight with respect to this confusion? Is the living Don Rose said to be in Phoenix really the same Dr. Donald D. Rose that worked as an on the air personality at KFRC in the 1970s and on into the 1980s when KFRC switched to the "magic" format?

I'll probably call the Contra Costa Times back and see what more I can learn from them...

In article <43nrs6$9ac@vixen.cso.uiuc.edu>, robert573@dallas.email.net wrote:

|: Over the past 5 to 10 years, I have been building my own small home recording
|: studio. It isn't a multitrack, but it is 2 track mastering. This started
|: out as a hobby, but now I want to know how I can put this equipment to use
|: and earn some serious money from my production skills.

I started with a home-based studio with multiple 2tk machines. No reason why you can't do the same -- and be ready to upgrade to real equipment (which, today, means DAWs and DAT) as soon as you can afford it. Check my web page for details on my present home-based studio.

Now, when you say "my production skills" can I assume you're a hot radio producer/editor/mixer? If that's the case, you can probably start selling your services to the local ad community. You'll have to pound pavement six days a week in order to land a job for Sunday, but that's the nature of any startup.

If you don't have hot skills, forget it. There are already plenty of mediocre professionals with much better equipment than you have. The only way you'll be able to compete is by getting enough capital to get real hardware.

Now, when you say "serious money" can I assume you're talking poverty-level wages for at least the first year, and pouring everything you earn back into the studio? If you can't make that kind of commitment, keep your day job.

In fact if you're trying to get into production _just_ to earn serious money, forget it. The bread's not there unless you're lucky, talented, and dedicated.

This is no different from any other occupation.

Just a note that we have put The Guide to Talk Radio Programming online.

The Guide is a directory to syndicated talk, news and sports radio programming. Our first issue was mailed to stations this week.

Our web site includes the latest lineups and information from talk radio programming providers, an index of syndicated talk show hosts, a grid-style listing of syndicated programming avaiable by daypart, and an area listing other radio resources on the web. Our URL:

http://www.talkradioguide.com

We look forward to your comments and suggestions.

From: "Max Cacas, NPR News, Wash. D.C. (til 9/22/95)" <MCACAS@npr.org>
Message-ID: <4404kp$nc6@vixen.cso.uiuc.edu>
Source record: 29244

Item First: Bennett Zier, General manager of Colfax Communications' WTEM-AM (570, sportstalk) and WBIG-FM (100.3, 50s-60s Oldies), resigned last week, and will become a consultant for the station group. Tuesday's (8/19/95) Washington Post "On the Dial" (Radio) column recounts Zier came to D.C. and to Colfax to start WTEM three years ago. 18 months ago, he became GM of WBIG when Colfax bought WJZE and took it Oldies. WBIG subsequently forced WXTR (104.1/103.9 "Xtra 104") to shift from its long time "Oldies" format to "the Seventies Station". The Post reports that WTEM's 23-station network was "recently sold and folded into another service". (NOTE: No more details on this in the Post article. Anyone know what became of "the Team" network?) Rick Mack, who has honchoed top stations in Atlanta, will replace Zier. Colfax also owns classical music formatted WGMS-FM (103.5).

Item Second: Kenny King, the morning host on WJZW-FM ("Smooth Jazz, 105.9"), landed a short "walk-on" role in the upcoming NBC-TV pilot "Extremely Wierd", set to air on October 28th. The Post reports King landed the role after checking out the scene of some film shooting as he jogged in Alexandria, Va. He chatted up the casting director, and the next day, he was on the set. an actor scheduled to play a burn victim had a scheduling conflict, and King was pressed into service.

Item Third: The Post also reports that Peter Laufer, one of a long series of former Program Directors at Greater Media's WWRC-AM (980, Talk), has been named Berlin bureau chief for "Marketplace", the 30-minute business news show produced by Public Radio International. Laufer also recently published a book about his experiences in the radio talk show bid-ness.

Item Fourth: This one is personal. This will be one of my final postings to "Airwaves" from this perch here at National Public Radio. As seems to have become the sad case in this business, my position in News Operations has been RIFed as part of a network reorganization, and my final day is this Friday, the 22nd. I will be moving my subscription to "Airwaves" to one of my other online service accounts, so don't think of it as going away...just me moving to a new spot on the dial! <g> My best to all Airwavers!

So I'm cruising through my hometown (currently living in CT) of Northampton, MA and as I came through the notch by the oxbow I noticed a change that I would have never anticipated. WHMP-FM has changed their eclectic CHR format to a very hard edged modern rock format.

Don't get me wrong, I love modern rock (Hartford has a great station), but Northampton is a town of 35,000 that doesn't get many good signals from outside the market. The format they've chosen has quickly alienated my pre-teen neices and nephews (all switched to a static plagued WTIC-F from Hartford). The station probably says "so what", but now the 30-40 year old parents aren't listening either. I can't imagine too many local businesses are playing the station any longer either.

The plus side is probably a stronger presence in the considerable collegiate market (5 colleges nearby), but I can't imagine indigent, preset button pushing college students are going make the advertisers very happy. Hate to say it, but spots pay the bills.

IMHO

Pat Ryan

# 2450. Changes In New York City Radio

Newsgroup: rec.radio.broadcasting
Date: 1995-09-23 00:00:00 UTC
From: "Weatherboy ~ Michael J. Phillips / NYC & LA" <weather@cybercomm.net>
Message-ID: <4404kr$nc9@vixen.cso.uiuc.edu>
Source record: 29246

The leaves are changing colors (more because of the drought than the change of seasons) and so are the casts of radio programs in New York City.

John Lander left the Z Morning Zoo last Friday...now Z100's JoJo Morales is the host of the show...filling in until a more-permanent host is in place. It was rumored that co-"Zoo Keeper" "Elliot" Elliot Segal would leave too, but WHTZ GM Clancy Woods said that won't be happening anytime this year...since Elliot is under contract until next year. Over the last year, Elliot was promoted from producer to morning-drive talent of the Z Morning Zoo..and pretty much shared tasks of talent/producer when plans to get another producer were scrapped. The remaining Zoo people will also remain...so other than the departure of Lander, not much will change anytime soon.

And here's an "exclusive scoop" for the newsgroup since it hasn't hit the news yet...

Nick Gregory of Fox Television's Channel 5 has signed a deal to do weather for WLTW-FM's morning show. He was WQHT's weather-talent before Hot97 flipped from dance to urban and cancelled the dance-format's morning show. Nick will be providing live reports in the morning via an ISDN line from his home (WQHT had a similiar set-up when he was associated with them) and will produce carts for the remaining day parts. The deal, which will give Nick an estimated extra $60k/year (it pays to be wx talent in NYC, doesn't it? :D ), begins October 1.

Also in other NYC radio news, WOR-AM midnight man Bob Aaronson remains in a coma after an accident involving his racing bike last Thursday. Aaronson left WCTC-AM earlier in the summer to work for WOR-AM. He suffered severe head injuries and, according to the central New Jersey "Home News" newspaper, remains in critical condition at Morristown Memorial Hospital in the itensive care unit. New Jersey police are also investigating this accident...and are trying to seek out any witnesses.

Here's what is going on in the San Diego radio market:
9.22.95. [important e.mail news at the end of this report]

HUGH 'NO LONGER AT KFI' HEWITT: Sunday marked the last day for the popular conservative on KFI [640 50kw/50kw]. As announced, Hewitt will be concentrating on a law series at KCET [TV28, LA, PBS]; and felt that he couldn't do the radio and television commitments.

Hewitt's accomplishments besides the popular radio show, included getting convicted felon, Mr. KFI, released from prison. This made possible the move of Mr. KFI to weeknights on the 50,000 watt blowtorch. [Mr. KFI was convicted of embezzling from his on checking account and was on a work release program at the Century City Prison.]

He promised to call into the Mr. KFI show -- to check up on his client, and to give him some needed right wing-ribbing. What will be missed by most is the continuing slue of Hugh Hewitt monikers, made famous when Mr. KFI was originally on Sunday night. "He is a man so nice, they nearly named him twice," Mr. KFI often says on his show, and now the last moniker may be, Hugh "I'm on PBS" Hewitt, or Hugh "My show will last longer than Bill Handel's" Hewitt.

NIGHT-MOVES: Stephanie Miller's long awaited night time TV show premiered last Friday in the LA market. She was previously on KFI from 7 to 9 p.m.

Her show is being distro'd by Buena Vista [Disney] television.

IS THERE A DIFFERENCE?: Here's my un-scientific view on the new KUPR, the ex-KKOS. [KUPR signed on last Friday, promising a change in the way radio is listened too.] The station has kept the old personalities, but have a fresh view, on the challenges ahead. Still licensed to Carlsbad, a majority of the ads are based in North County. The interaction between the host, traffic, and weather reporters is now upbeat and -- well, refreshing from the KKOS of old. I haven't caught any of the long timers stumbling on KKOS vice KUPR. [KUPR, 95.7, 7.2kw ERP, antenna at Mount Soledad].

PROMOS: Noted in this market, long-time icon, and still popular, Shotgun Tom of KCBQ has ads on all major SD stations promoting a new car dealer in North County. Likewise, ex-KFMBer and now GM of KPRZ [San Marcos] Mark Larson is promoting a new windows on his old station, and others in town. [look for Shotgun's promo at: http://www.kcbq.com ]

Larson is heard in the afternoon from 5 to 6, and is on over 350-stations around the world with David Jeremiah on the popular Christian program,

"Turning Point." The show airs from the San Marcos station three times daily, 8:30 a.m., 6:30 p.m., and midnight.

News from the Beach: KKBH's Jeff Davis replaces Coe Lewis in the nighttime from 7 to midnight. Jeff comes to KKBH from Metro in LA. He has worked with him morning man, Hal "9000" Abrams in LA at Power 106.

Did anyone hear the "Mark & Brian" bit on the necrophiliacs in LA. Totally disgusting -- both the act and the bit. [KLOS LA 95.5] It was on Wednesday.

Hats off to David Tanny for another San Diego radio page: check it out at: http://www.geopages.com/Hollywood/1715 . The more the merrier!

Ok folks, my famous San Diego and Los Angeles Radio log is back on line at http://www.geopages.com/RodeoDrive/1102 , or you can check David Tanny's too. Plus, I am moving my e.mail account AGAIN next week. This account will expire on Tuesday! I'm going to be the lead technical writer at a major manufacture in the San Diego metro area.

Good luck to long-time friend, Steve Scoville, who is leaving Pacific Recorders and Engineering, to enter the digital age. :-)

# 2452. Sacramento Radio News - 9/19/95 (and a *bit* of Seattle, too)

Newsgroup: rec.radio.broadcasting
Date: 1995-09-23 00:00:00 UTC
From: mward@crl.com
Message-ID: <4404ku$ncc@vixen.cso.uiuc.edu>
Source record: 29248

Wasn't I just here, you think? :)

Lots of news has happened in the couple of weeks since I posted the last update from Sacramento. Let's get into it.

* "The Point" is no longer...KQPT-FM 100.5 is now calling itself "The Zone", and has moved from Bands You've Never Heard Of to Alternative Bands Adults Know Well. (OK, so that's not their official slogan. ;) Looks like "The Zone" is positioning itself slightly older than young-leaning alternative KWOD-FM 106.5. I'm not a music programmer, so I don't know what a lot of this means. ;)

* Long-Awaited Dept.: KFBK-AM 1530 ("News Radio 1530", and my employer :) has announced a replacement for afternoon drive news host Rick Van Cise, who left the station to become program/news director for KOMO in Seattle. Jeff Bell takes the reins later this month. He's coming to KFBK from KCBS/San Francisco, where he's been a weekend news host. He joins long-time afternoon show anchor Kitty O'Neal.

* Sports station KMJI-AM 1380 ("SportsRadio 1380/The Score") has a new program director. He's Tony Cox, who's actually coming back in a way - he used to work for sister station KSFM-FM 102.5 ("FM 102" CHR/Urban). It appears that "The Score" is still in the hunt for a PM drive live local host... and a certain newspaper columnist seems to think that KHTK-AM 1140 ("Hot Talk 1140") PM drive host and Ch. 31 sports director Grant Napear is a prime candidate for the 1380 job. I just don't see it. Unless Tony waves a lot of bucks in front of Grant, why would he jump?

If I remember right, Tony also did voice work for KSAC-AM 1240, the market's previous all-sports station.

* And finally - by the time you read this, if it hasn't happened already, KHYL-FM 101.1 ("Cool 101" Oldies) will be broadcasting from the 1440 Ethan Way facility that houses sister stations KFBK and KGBY-FM 92.5 ("Y92" Hot AC). (I don't know if the switch has been made yet, since I've been out of town for two days and haven't been back to the station yet.)

One feature of the new Cool 101 studio that you won't hear on air - there's a pulsing light bar with constantly changing color around the edge of the studio table. We want one for us! ;)

I just came back from a 2 day visit to Seattle, by the way. I didn't get to see any facilities in the market (it was mainly a personal visit). But I did get a listen to some of the stations and what they're doing. The talkers didn't seem to be giving a lot of airplay to the day's election, featuring two high-profile referendums (to build a new baseball stadium and to start a new in-city park called "Seattle Commons"). But one of them, sports-talker KJR

("Sports Radio 950"), put a lot of effort into pushing the stadium issue. They broadcasted live, local sports talk continuously from the Kingdome and from a nearby sports bar/restaurant, starting at noon Monday and continuing all night and all day until the election was finished Tuesday night. As you might expect from a station tied heavily to sports, KJR was unabashedly pro-stadium.

Since it was on my way into downtown, I stopped by the KJR remote and took a look at their remote van.

Mike (the views and opinions expressed are my own)

Jeff Lamb and Mark Benson were both fired from WXKR (94.5) last July and it looks as if the popular duo is back on the station they began with, WIOT. Last Monday Kevin Carlson and Pete McKenzie, the morning team at WIOT for two years, announced that they were leaving their morning spot for another job in another market. On Thursday Kevin Carlson and Pete McKenzie and introduced the new morning team at WIOT as Jeff Lamb and Mark Benson. Jeff and Mark began together at 104.7 WIOT, a classic Rock station and then jumped ship to cross-town rival, WXKR (94.), another classic rock station. This jump prompted a lawsuit by WIOT, suing Jeff and Mark and WXKR for a bumper sticker that was made to look like a WIOT sticker with a WXKR sign printed over it.

OTHER NEWS:

Andy Stewart, GM of WVKS, WSPD, WLQR wrote an editorial in Toledo's only newspaper, The Blade. Stewart commented on all the changes happening on WSDP (NewsRadio 1370 AM) such as a 3 hour news program starting at 3PM. Other changes are dropping the "Ask Your Neighbor" program and adding G. Gordon Liddy, adding Jim Rome's synidcated show, adding Billy Wagy (a former TV sports reporter) to do a sports talk show and also adding Jerry Anderson as the morning-drive host.

Craig D. Warner--Quote of The Week!

Up & down the dial in the #40 market:

*The "Iron" man crosses the border...

"Iron" Mike Bensson,who spent 6 years at WUFX(103.3 the Fox)until he(as well as most of the air staff)got blown out in late June as its new owner, Mercury Broadcasting,switched it to a modern-leaning AOR as WEDG (103.3 the Edge),has returned to the air...across the border. Bensson started on Wednesday as the new PM driver on St.Catharines' CHTZ(97.7,AOR;97.7 HTZ FM), replacing John "Gonzo" Mark-who moves to nights(7pm-mid.,after Music Notes at 6,its music news show). (One of my tipsters-who told me about the hiring-thought it was a bit odd,since Gonzo had done very well,ratings-wise,in PM drive.) IMO,it was just a matter of time before someone snapped Bensson for its air staff-he was one of the better jocks in the area.
Speaking of 103.3 the Edge,Rich Wall-who handles 10am-2pm-now adds music director duties.

*WYRK's Breakfast Club(Tom Campbell,Gail Ann Huber & Dale Mussen)appeared on Ralph Emery's Nashville Network show yesterday. Also,Campbell is appearing in ads for Wilson Farms(a local convenience store chain)' gourmet coffee. Actually,it's his second go-round in those ads-WHTT's(Oldies 104) Danny Neaverth and the hosts of WBEN's(NewsTalk 930)Good Morning Show,Bill Lacy & Kevin Keenan-also pitched the coffee in ads earlier this year.

*Fall is upon us...and a good way to notice it is to see all the radio station ads played on TV,Canadian specifically.
4 Toronto stations(so far)have jumped into the fray:CJEZ(EZ Rock 97-3)with, basically,the same type of ads they had when they jumped to EZ Rock;CKFM(99.9, hot AC;Mix 99.9)playing up the fact that they play "today's hits & yesterday's classics",and CBL(740;CBC)promoting Andy Barrie as Metro Morning's new host. But the topper has to be for CHUM(104.5,hot AC;104.5chumfm)-with the return of "The Naked Guy"(as he's been referred to),who this time pops up in a staid office-and I think you can guess what happens near the end.

*Also of note:Jane Hawtin,noted in a previous watch,is now handling AM drive at Westcom's CHOG(640,CHR/talk/Argos;AM 640)along with Gene Valaitis, in addition to doing the aformentioned gabfest on CHCH.

*A tip of the microphone of WGRF(classic rock;97 Rock)-who recently held a radiothon for the Make A Wish Foundation. For $5,whoever was on air would say hello to whoever you wished;for $20,the donor could make a request. $32,000 + was raised for the charity(oh,it also included general admission tickets to the Buffalo Bisons playoff games that week).

*Contrary to what I recently reported,Pete Weber & Darrian Chapman will
_not_ return to the Bisons broadcasts next year on WGR(NewsRadio 55). It was
noted during the Bisons last playoff game that it would be their last game.
Pete,or course,is now the Sabres radio voice of WWKB(The Big 1520),while
Darrian is now doing sports at WRC(or,NBC 4)in Washington,D.C.

*How can you tell Tony Violanti's back with his radio column? When he rips
my stuff off,that's how.
In his column yesterday,he made mention of WBFO's hiring of Mike McKay
as a reporter/producer. True believers(and readers of Airwaves)will recall
that yours truly reported this in late July(check the archives). I also got a
piece of e-mail from someone on AOL mentioning that Violanti had trashed-one
last time-ex-CKEYer Kerry Gray. Gee,what a surprise.:>

# 2455. Chicago Radio Watch 9/23/95

Newsgroup: rec.radio.broadcasting
Date: 1995-09-24 00:00:00 UTC
From: JJB92@aol.com
Message-ID: <444fd4$75e@vixen.cso.uiuc.edu>
Source record: 29055

Since that didn't work, let's try this......

Top rated full service WGN-AM (720) is going through some fine tuning. Corey McPherrin, a television sports anchor on the local Fox outlet, has parted ways with GN. Corey had been handling the morning sports report since the departure of Chuck Swirsky. No replacement has been named although it is likely that the replacement will be found from within the hallowed halls of GN.

Also at WGN, Thom Brennaman who has been doing play by play for the Chicago Cubs will be parting ways with the station at the end of the current season. Apparently, WGN was not enamored with Thom's outside work with Fox Network football. Thom was not enamored with WGNs attitude. Poof, there he goes.

WTMX-FM (101.9) has modified its format. The station had been playing the favorites from the 70's, 80's and 90's. The station now features "light rock" favorites. Had to try something; the station has been in the high ones, low twos with the 70-s'-90's format.

Moves and promotions......

Speaking of WTMX, long time Chicago radio worker bee Brian Kelly has resigned as assistant program director at the station. Brian has landed as program director at WMYX-FM in Milwaukee.

Kathy Hart has a new contract and will continue on the morning drive at the station WTMX.

Light rock leader WLIT-FM (93.9), owned by Viacom International, has embarked on a massive ad campaign with a twist. The station mailed out 8 and 1/2 minute videotapes to some 250,000 women in the 35-44 year old demo. The videotapes features station personalities and behind the scenes looks at the station operations.

How the mighty have fallen.......

Gary Deeb, once one of the most influential media writers in the United States, has parted ways with WLS-TV. Gary had been the "media critic" for the station for the past twelve years. Actually, he wasn't a critic at all; rather he did fluff pieces on ABC network shows. It is very pathetic since Gary made his name lampooning similar goofball activities in the television and radio world.

Award corner....

At the recent Marconi awards, Johnathon Brandmeier mornings on entertaining talker WLUP-FM (97.9) was voted personality of the year in the major market category. Huh??

This says something about the awards: Rush Limbaugh was also voted personality of the year in the syndicated talk category.

Talk station WLS-AM/FM was named talk station of the year. No comment from this corner.

If I were in other markets, I would demand a recount or just plain quit if Johnny, Rush and LS are the best in the country.

Oops award...

In the last Radio watch, I noted that Dave McNeil (PD at country WUSN-FM) had reupped with the station. Proper name: Dean McNeil.
Sorry about that.

Joe Bonk
JJB92@aol.com

# 2456. Dallas/N. Texas Radio Watch (brief)

Newsgroup: rec.radio.broadcasting
Date: 1995-09-24 00:00:00 UTC
From: Tom Desmond <wsu@mimi.itg.ti.com>
Message-ID: <444fd5$75h@vixen.cso.uiuc.edu>
Source record: 29056

The Dallas Morning News reported today (Saturday 9/23) that Infinity is buying Alliance Broadcasting. Since this news will certainly gain national coverage, I'll note here that the local impact will be to give Dallas its first "quadropoly", or whatever the proper term is. Infinity currently owns AC KVIL(FM), 60's Gold KLUV(FM), and satellite Nostalgia outlet KDMM(AM) (incorrectly reported in the article as KKDM; the article also incorrectly stated that these stations were bought for $55 million from Bonneville--both the purchase price and seller are incorrect). Alliance's outlets are Young Country KYNG(FM) (the original Young Country outlet) and "EZ" Country KSNN(FM), which were the first duopoly in the Dallas market. Obviously, this is all contingent on broadcast ownership deregulation happening before the closing. The article also notes that no format changes are planned.

In other news, recent Urban to Urban AC convert V-100's new call letters are reported to be KRBV. Old calls were KJMZ.

KAAM (620, Plano) has been running transmitter tests again in the last few days (as previously reported by someone else), and in fact appears to be running a silent carrier almost constantly right now. Hopefully, this means that regular transmissions are due to begin soon, returning English language broadcasting to Collin County.

Sherman, TX based KWSM has received a 90 day extension on its authority to remain silent, which now runs through December 8. Needless to say, this station is currently silent. Owner Davis Family Trust also has an approved rulemaking to moving this station to Sanger, as previously reported.

Finally, a friend who listens regularly to "The Edge" 94.5 KDGE reported to me that this "alternative" outlet (part of a Bonneville owned duopoly with Classic Rock KZPS) has been running a "censored" version of Alannis Morrisette's current hit "You Oughta Know" on an intermittent basis. Aside from the standard radio edit of the "f-word", they have also deleted a sexual reference in the song about "going down" on her former boyfriend in a movie theater. If this sort of corporate censorship is going to be an ongoing problem at this station (which also was rather hasty about dropping Jill Sobule's "I Kissed A Girl" from their playlist several months back), I can't help but wonder how this will effect their competitive position in a market where they are increasingly sharing a greater percentage of their playlist with AOR outlets KTXQ and KEGL. It should be noted that KDGE currently outrates both of these stations, but also is operating with a less than competitive signal.

Tom Desmond

# 2457. Frt Wayne Radiowatch

Source record: 29057

It's been a long time since I've written anything here. I've
been busy with work, etc. (haven't been reading Airwaves like I should)...
so i figured I'd catch you up on the latest events:

* WKQM (96.3) has switched from "The Soft Sounds of the City" (read: ez
listening) to "96.3 The Edge...Fort Wayne's Modern Rock Alternative" The
sweepers sound like Q101 out of Chicago...hmmm...Jacor is consulting this
gig. All automated at the moment...will hire a PD and airstaff soon. Sounds
real nice so far. I've got an unscoped aircheck of the change if anyone's
interested.

* WMEE (97.3) has fired Tyler and Toni (Chris Tyler and Toni Kyumi). Charley
Butcher is now doing mornings solo. Ron Gregory replaces Butcher at WOWO
in the afternoons (Butcher did 1-3 pm at WOWO-AM)

* WOWO (1190) debuts Jay Walker (weathercaster at WPTA-21 [ABC]) on October
8. Should be interesting...Rick Hughes (from WQHK - K105) is doing mornings
in the interim.

* WDJB (106.3) has Phired Phlash Phelps. (oops...got carried away again).
My prediction is that Phelps (real name: Steve Phelps) will show up
on the Edge or completely disappear from the market (rationale on the
disappear part: His real name [Steve] was published in the paper...something
he protected from his listenership *very* well) Scott Thomas (PD) and
Susan (forget her last name) are now doing mornings. They sound similar
to Tyler and Toni *grin*...little more lafter and some better jokes, though :)

* WBCL (90.3) The PD left (don't have the name offhand). No replacement
has been named.

I think that's about all *phew* If anyone is interested in the abovementioned
aircheck, e-mail me. I should have a revised aircheck of all Ft. Wayne
stations up soon. Till then....

Blaine

## 2458. Seattle Frequency Swap

Newsgroup: rec.radio.broadcasting
Date: 1995-09-24 00:00:00 UTC
From: johnross@halcyon.com
Message-ID: <444fd7$75n@vixen.cso.uiuc.edu>
Source record: 29058

After what seems like endless business and enginerring negotiations, Seattle AM stations KNWX and KRPM traded frequencies today (Saturday, 9/23).

KNWX (ex-KINF, ex-KING-AM, ex-KEVR, ex-KEEN, ex-KVL) is now on 770. KNWX is a duopoly with KIRO (710), so the two stations are able to do "adjacent promotion". KNWX is an all-news operation using AP Radio.

KRPM (ex-KULL, ex-KXL) is now on 1090. KRPM-AM simulcasts KRPM-FM, a fulltime country and western format.

# 2459. Advertisers

BA>I'm a young talk show host who is putting together a once a week show
BA>on a Chicago talk station. The bugger of it is that I need to sell my
BA>show. The sales department, let alone management, won't assist me
BA>because I'm young. Therefore, I'm selling my show all by myself.

John,
This sounds like a typical brokered time deal. Are you buying the
time from the station? It has nothing to do with your age. I'll bet
they're not paying you to do the show.

BA> My
BA>question to the masses is: are there any advertisers who might be
BA>interested in buying some air time on a 50,000 watt AM station on a
BA>youth talk (read: Generation X. Hey, there are 47 million of us out
BA>there!) show? I have an excellent show and now I'm hustling to find
BA>sponsors. If you are at all interested in advertising to the next
BA>generation please write me back at this address:

There may be 47 million of you, but 46.9 million of you don't know
AM radio exists. AM Talk isn't an advertiser's first choice for 18-24
demos. 35+ yes. If you expect success from AM Talk (at least for the
forseeable future) you'll have to broaden the show's demographic appeal.

"Young" talk on AM rarely dominates a market.

Rich

BA>bascom@ix.netcom.com

BA>Please contact me if you are at all interested because it would not
BA>only benefit your business but it would also allow me to really take
BA>off in talk radio.

BA>Sincerely Yours,

BA>John B. Harris

BA>

Does anyone remember Jack Eigen on WMAQ?

He claimed to have invented the talk show format while at WNBC in the 40's. His WMAQ thing was on M-F from 10:30 pm until 1:00 AM, done live at MAQ and sometimes at the Chez Paris night club.

Studio audience, opening monologue--plenty of sponsors.

Fred Allen used to joke about him on his shows, and Nichols and May immortalized him as "Jack Ego" in their "Disk Jockey" skit.

> 1. Am I correct to assume that in the sixties and early seventies, the kids listened to WLS (and John Landecker's 'Boogie Check') while the adults choose WGN and Wally Phillips? With Black oriented WVON, those three stations made up close to a majority of the Chicago listening.

What are you basing that on? Do you have ratings from back then?

As a teen in the early 70s, I listened to WCFL a lot more than WLS (at least before it became "The New CFL", which was a step down IMHO for the format). Of course, I should mention <g>: I did all this from DC, via (trivial <g>) DX'ing. Was WCFL that far behind WLS in the ratings that caused you to not mention it at all?

Larry did switch time slots shortly before his retirement. In late '85, WLS moved him to afternoons and replaced him in morning drive time with Fred Winston. Steve & Garry were ostensibly going to do middays, but they bailed out and went to the Loop. WLS's switch was a disaster. Larry couldn't hold Steve & Garry's audience, and Fred couldn't hold Larry's audience.

Speaking of Chicago DJ's, anyone know what happened to Sky Daniels? He was at the Loop in the late 70s/early 80s and then wound up at San Francisco's KFOG for a few years. I remember Steve did a wicked impression of Sky when there both on the Loop.

I can't give you the definition of ecletic music but I can speak on the difference between commercial and non-commercial radio. First, I work radio in the Washington D.C. market (area). Until June I was at a top 5 FM commercial station in this market. I was an AFTRA (American Federation of Television and Radio Artists) jock (on-air personality). I primarily worked weekends at this station. At the same time I landed a production job at National Public Radio on Monday-Friday. So for the last 5 years I was doing on-air and production in commercial and non-commercial radio. I think the difference comes down to money and security. On the commercial FM I averaged 20 grand a year for weekend work. At the non-commercial network the money wasn't even close. At NPR my co-workers always talked about how they loved the stability of non-commercial radio. They would tell me how cut throat commercial radio is. Which it is. I lost my commercial FM gig when the station was sold. New owners came in and brought an all-new airstaff with them. But after Newt Gingrich and company decided to look at public broadcasting NPR started re-organizing and I, in my safe non-commercial job found myself unemployed (two months after I lost my commercial gig).

I'll add this too. In commercial FM I was hired by a man who is reportedly making a seven figure salary for being a morning deejay. That is motivation for me. It's very encouraging to see another person sitting in the same chair that I sit in and earns loads of money for doing the same job that I do. That was plenty of incentive for me. I knew that if I worked hard I could do it too. On the other hand, at NPR the top salary cannot exceed something like 100 grand (don't quote me on that). If you're the low man on the totem pole and the top man can only get 100 grand there is not too much hope for financial independence in this kind of organization.

So it all depends on what you want. If you're the type who wants to have fun, make great money and work a few hours a day commercial radio

may be the route to go. But if you're content with a more modest lifestyle and take pride in being sort of a public servant than you may want to consider non-commercial radio. But I found that BOTH was the right mix for me. I kept up on Bosnia and all of the world's events on Monday through Friday and just when I got tired of being well informed the weekends rolled around and I got to be a real jock, I kicked the studio speakers up as loud as they could go and played the music. I screamed as loud as I could with the music blasting, I took calls and made people's weekends by giving them concerts tickets and money. I played relationship doctor and gave basic advice about love. I had backstage tickets to major concerts and I met lots of women. I hung out in the Caribbean and made lots of new friends. I even bought my first house. I couldn't have done all of that on either salary so like I said both were right for me.

I wish you the best.

>(Bob, Dana, Friends of DDR:

As one who helped contribute to the controversey over what I, too, was told by a large metro "Big City" newspaper regarding Dr. Don's Demise, I can only tell you that since I wrote his Obit, if you will, on this page, here's the latest that I know and I believe is gospel: Dr. Don Rose of KFRC, WFIL, WQXI, TV stations and whatever nifty things Don did IS ALIVE and WELL!

Soon after my heartfelt (and I won't retract a word of it because I have been a admirer of Don's for 35-years,) tribute due to what Dana, myself and others were either told or led to believe, I got a call from a friend of Don's in Portland who worked with Don at KFRC. He told me to report back to you that "As of 2:14 pm PDT, DDR is alive and well and doing his rental-house thing in Phoenix. I just got off the phone with him." This guy from K-103 told me that Don, in fact, has an e-mail address on AOL, but didn't know it off hand.

The key point to believing the update to me, however, was when he mentioned Don's adoring wife, Kay. That's when I felt the story was genuine, because Kay's some lady and has been at Don's side for many years, quietly, in the background. I was also told that Don, while laughing this off, did appreciate the kindness and warmth from all who remember him and, supposedly, Don said, "Nope. Still here when I last checked. Enjoying the sunshine."

And the guy who called long distance to plead his case didn't call collect. He had to do some work just to find me. Our station's only been on a few weeks. I believe Dr. Don's doing OK.

Thanks,

Joe Benson

How about Session, from Digidesign? It will handle up to 16(!) tracks on
Power Macintoshes. 4 tracks during recording, but up to 16 on playback.
Has some very powerful mixing and editing capabilities. It's also OMS
compatible so you can use it with MIDI sequencers.

Just a thought...

|: the latest versions of:...

|: DigiTrax?
|: I think the latter is produced by Alaska Software.

DigiTrax has been taken over by Opcode. The current version, 1.2, is good
for editing and mixing on a Mac. On my 8100, it gives me 6 tracks plus:
a) full parametric eq on each track
b) automated, editable mixdown
c) direct import of audio from sfx or music CDs thru the Mac's CD-ROM player.

They've promised version 2.0 soon, including some "dsp" effects.

Of course _no_ mouse-based system can be anywhere near as fast as
something like the Orban DSE, which I use for my professional production.
But if you've got lots of time and very little money, DigiTrax and an
existing computer can give you excellent production.

|: network and be using linear digital sound.

The Orban DSE7000 digital editor uses 16 bit linear internally. It also networks directly to station hard disk systems (no additional terminal necessary), and if the master control cart-replacement system is linear will talk to it in that format.

I think ENCO has a linear option on their cart replacement system.

This is fully professional, plug-and-play hardware/software stuff. It might not be possible to get what you want in a do-it-yourself software-only version.

David,
I use a PPC 6100 bumped up to 80Mhz. DigiTrax 1.02 is good for 6 tracks,
Deck is out there too without the need for a sound/av card....version 2.2
will do 6 tracks, but wait for the new version 2.5 which should be out any
day now.
But, I do keep finding myself going back to SoundEdit 16. Besides built-in
effects, it lets you add as many tracks as you have memory for. And
SoundEdit 16 is by far the easiest to set up and use.

>the EEO rules don't say anywhere that you have to hire less than the best candidate.

This is true. But indirectly, EEO often does have the effect of causing the station to hire less than the best candidate. The stations end up hiring by quota in order to protect themselves from frivolous lawsuits and license renewal protests by over-zealous minority-rights groups. Been there, seen that, been victimized by that.

I bought a Marantz PMD-series variable speed cd player for my
studio, along with their wireless remote-control option.

This is supposedly pro equipment, right? Rack mount, s/pdif and XLR
outputs, cue to music...

but the installation sheet for the remote receiver _instructs_ you to go
out and buy a Radio Shack wall wart! It won't work without it.

Now, don't you think it would be a bit more professional to up the price
and include an OEM power supply -- Mouser lists one that would work, for
$10 in single quantities -- than to make me go to the mall and buy the RS
version for $12?

For most of my adult life, people have routinely asked me if I was a "disc jockey" or an announcer because of the way my voice sounds and the way I speak. In fact, since I recorded the announcements for a voice mail system I developed and sold for my company, people have been constantly telling me, "You're in the wrong business." (They were referring to my employment as an engineer with this voice, not that it was a crappy voice mail system!)

Anyway, I'm always open to other sources of income, and maybe I do have a saleable talent. Perhaps I could get some work doing voiceovers, not necessarily live on-air. How would I pursue this? What kind of money is there to be made?

I guess I don't see the problem. The letter is straightforward, honest, and
most importantly, was sent in the first place. At least he/she did you the
courtesy of a reply. I would much rather get a letter like this than day
after day of an empty mailbox and unreturned phone calls.

Would you prefer to be misled about your prospects? The guy says he's not
interested in what you're selling. Sure, he could have used a little more
tact, but nobody's perfect and at least now you know the name of somebody you
wouldn't care to work for. Move on.

RA>you can be considered, so don't become discouraged.

There are many "professionals" who don't write very well. It sounds like someone who's brutally honest and lacking in the finer points of tact. If he had said "there are many applicants who are better suited for the position" it would have landed softer.

I get dozens of resumes a month. If I don't hire someone it doesn't mean they're bad, just that they don't fit what I need. That's probably what he meant.

copied a rejection letter s/he got:

|: Thanks for your interest in joining XXXX. I have reviewed your materials
|: and unfortunately, I do not wish to hire you at this time. There are many
|: applicants for this position and the competition is just a little better
|: right now. In the future another position may become available for which
|: you can be considered, so don't become discouraged.
|:

and added

|: I will refrain from any commentary. I'm interested in what you think.

I think the writer may have been slightly harsh, but not unrealistic. If
you were the best applicant, you'd have gotten the job.

You don't need to be told if you have potential -- you should know if you
do or not, by now, and that's not the employer's job anyway.

A letter that says "the competition is better" should encourage you to
brush up your own skills and cut a better demo tape. If you'd have just
gotten "you're good, but not what we're looking for" then you'd stay at
the same level, and keep on sending that old demo to other stations.

KC>Or should they be held to a different standard? Can the
KC>listening public tell the difference between a newscast and a talk show?

A talk show host isn't a journalist and doesn't have the privileges of one. Ethics requires accuracy and honesty, but a talk show host probably would be required, for instance, to divulge a source, where a journalist would have a reasonable expectation of protection.

Basically, it is a cop out. While a talk show is an expression of opinions, a host is still required not to lie or distort the facts, in my opinion. What this host is saying is that he doesn't have to be responsible, he's a talk show host. As far as I'm concerned, that's unacceptable.

Rich

" Should talk show hosts expect the privileges of journalists without
" accordingly accepting the responsibilities of journalists?
" Or should they be held to a different standard? Can the
" listening public tell the difference between a newscast and a talk show?

Regardless of newscast versus talkshow, I think it's dangerous to hold "journalism" to high standards. Why? Because the public begins to trust journalists. I believe this is a mistake because then audience are suspending judgment. The suspension of judgment is a dangerous thing in a democracy.

Perfect case in point is the San Francisco Chronicle, one of America's 10 largest newspapers (and assumed by many to be an example of valid journalism simply by its large size). In the current mayor's race, they are continually manipulating their news coverage to favor the incumbent mayor. They recently ran a public opinion poll on urban problems, purposely skewing the poll to show that the respondents were more concerned about the mayor's pet issues than other issues.

At least in newspapers the blatant opinion pieces are put on the editorial or op-ed pages, or flagged as advertising, or set off in a different type face from the main news section. Broadcasting does not enjoy this -- especially when talk hosts sometimes do double duty as news reporters.

So, I feel the error is not in talkhosts being confused with reporters, but in the public thinking that either type of broadcaster leaves her/his biases at the door. Nonsense.

In <4404lj$ndh@vixen.cso.uiuc.edu>, The Mid-America Radio Page
<kcradio@littleblue.com> wrote:

: There's been some controversy this week over an interview talk station
: KCMO(AM) aired with a Kansas City, Kansas police officer convicted
: of murder.

Gosh, controversy? In Talk Radio? Imagine! (grin)

: Talk show host Rick Roberts interviewed former officer John Cheek on his
: September 13 afternoon drive-time program. Cheek, who is white, was
: convicted of the fatal shooting of security guard Milton Foster,
: who was black.

: According to the Kansas City _Star_, Cheek asked for the interview to tell
: his version of the story. Cheek told Roberts, according to the newspaper,
: that he believed "some of the black jurors were walking in with
: preconceived notions." Moroever, according to the newspaper, Cheek said
: authorities "were scared to death of a riot" if Cheek were to be found not
: guilty.

Given the statements made in years past by SOME members of the Kansas City
Black community, I can understand the feeling.

: The _Star_ article also described a meeting with KCMO GM Ron Carter and
: program director John Butler that was requested by several community
: advocacy groups. In response, Carter recorded an editorial saying KCMO has
: been "wrongly accused of playing the race card" but also apologizing for any
: offense given by the program.

Hmmm...why should a station apologise for allowing someone to tell his side of
the story? Is that wrong?

: Roberts told the newspaper he was surprised by the negative reaction to the
: interview. He said, "The major complaint I've been hearing is, 'You need to
: be a responsible journalist.' ... Well, first of all, I'm not a journalist.
: I'm a talk-show host."

...here's someone who obviously doesn't know what the hell he's doing!

: There we snip and ask the question: is this, pardon the phrase, a cop-out?

No. Roberts is obviously an idiot.

: Should talk show hosts expect the privileges of journalists without
: accordingly accepting the responsibilities of journalists?

Talk hosts are responsible for the following:
1) Holding an audience
2) Telling the truth <as they see it, of course>

: Or should they be held to a different standard? Can the
: listening public tell the difference between a newscast and a talk show?

Remember "War of the Worlds". Our listening public hasn't progressed one iota since then.

: I can see reasonable arguments in several directions regarding these
: questions. I can't evaluate the interview myself because I didn't hear it.
: On the *surface* it appears Roberts has a point, but he may also be
: arguing, "if it sounds good, do it," without thinking about his
: or his employer's sense of responsibility to their community.

The responsibility to the community is to allow access to a reasonable point of view. Certainly this has been a major story in the area. Certainly it deserves coverage.

For the record, on my news programs I do NOT air any OJ material. I can use the minute or so to talk about something that isn't getting any air time on CNN!

: I think it would be of interest to hear where other talk show hosts draw the
: line: are they journalists, semi-journalists, or something
: different altogether?

The line is, as far as I'm concerned, report the story, put on the newsmaker. If it bothers some people, there's something wrong!

Suppose the story were reversed...that it was a BLACK officer shooting a WHITE person. These same community leaders would be DEMANDING that the officer be allowed to tell his side of the story....

## 2483. WHRB-FM/Cambridge, MAs

Newsgroup: rec.radio.broadcasting
Date: 1995-09-24 00:00:00 UTC
From: "PETER Q. GEORGE, N1GGP" <PGEORGE@WELLESLEY.EDU>

Source record: 29083

I can concur with Rob Landry from WCRB-FM/Waltham, MA, the new WHRB signal from One Financial Center in Boston is less than to be desired. One problem is is that the WHRB antenna is lower than some of the larger skyscrapers in Downtown like the Prudential Center, The Hancock Building and others. I am sure the multipath is probably horrendous. Part of the reason co-located WERS (88.9) gets out better is there is no first or second adjacent station within 35 air miles of Boston to interfere with some of the lousy front ends of the radios that are out in the market. WHRB has first adjacent WBRU with its' 50,000 watt signal less than 30 miles away and also has a co-channel station right up the seacoast in Kittery, Maine to contend with. It has been known that WHRB had an opportunity to transmit from the old WEEI-FM site on Medford Hillside back in the late seventies. But, the alumni who have overseen the operation of WHRB (in the past) allegedly had no interest in serving anywhere beyond the confines of Cambridge, Massachusetts. As a result, WHRB has had the unenviable situation of being wedged in the middle of an already overly crowded Boston market with nowhere to move. I listening to "Hillbilly At Harvard" this morning, the signal was not impressive in Easton, MA, 20 miles to the south of Boston...well within the Route 495 perimeter that the improvement was to provide service to. I am sure, however that the signal WILL improve things for those work and listen to WHRB in the Hub of Boston. Outside of 128, well who knows. I am a regular listener to HRB' for over 20 years and I unfortunately have not seen an improvement in the signal from the new site, in fact it's worse. Has anyone else noticed any improvement in HRB's signal ? 73's.

>>.As a expatriated Chicagoan living in LA, I've heard quiet rumors that the line up at the LOOP-FM has been revamped. What's the scoop? Did Kev Matthews crash and burn in the mornings? Why did Brandmeier become "Johnny in the Morning" once again? What's the background gossip on why the switch was made?

>> Does anyone have any idea of how Howard Stern is doing, rating wise on WCKG?

WLUP made a series of changes effective right after Labor Day. Kev was moved to middays, Danny Bonaduce to afternoons and Johnny returned to his morning slot. The main reason behind the moves was waning ratings. WLUP had fallen into the mid-teens. The morning show with Kev had fallen out of the top ten for two consecutive quarters. Kev went through news/sidekicks at a rapid pace as the station tried a number of combinations to jump start his show.

Kev's decline coincided with the rise of Mancow Muller on sister station WRCX. Mancow made Kev his favorite target ripping him at every turn. Some of his criticisms were valid-some not. Kev looked and sounded like a beaten man. On a local television show featuring morning hosts, Kev sounded like he tired of the "battle".

Why did Johnny return to the morning? I don't think Evergreen wanted its flagship Chicago station to be an also ran in the morning advertising race. They have a good chunk of their target morning listeners with Steve Dahl and Bruce Wolf on sports talker WMVP-AM 1000 and the aformentioned Mancow on rocker WRCX-FM (103.5). While there is some thought that Johnny might draw listeners from Steve rather than bring in "new" listeners to the Evergreen camp, the powers that be decided to go with a proven winner in the key time slot.

In the last Arbitron book, Howard was in the low 2 rating range. He was up slightly from his previous book but was in the mid teens in the morning drive. According to the recently release AccuRatings, Howard was up 33% in their most recent book which would put him somewhere around a 3 share. Considering the station doesn't do a whole lot of advertising for him, that's not too bad. He still has a way to go to catch rival Mancow who continues his march to the top of the morning ratings heap.

# 2488. The Silence of the (KC) Rimshot

Newsgroup: rec.radio.broadcasting
Date: 1995-09-29 00:00:00 UTC
From: The Mid-America Radio Page <kcradio@littleblue.com>
Message-ID: <44g01r$7eu@vixen.cso.uiuc.edu>
Source record: 29088

Last week, I mentioned finding no evidence that silent KZTO(FM) had built a new tower in a promised effort to rimshot the Kansas City market with a modern-rock format.

An article in the Kansas City _Star's_ gossip column today (Sept. 28) helps fill in some of the blanks. According to the column, KZTO owner Frank Copsidas has put his Kansas City plans on hold.

The reason cited is the need for Federal Aviation Administration approval of the new tower, in Leavenworth County, Kansas, northeast of Lawrence. KZTO, licensed to Ottawa, presently is licensed to a site west of Lawrence. KZTO has been off the air since January 1994.

KZTO is limited in how close it can move to Kansas City both by co-channel KWWR(FM) from Mexico, in central Missouri at 95.7 mHz, and by IF separation with KCIY(FM) at 106.5 mHz.

Copsidas told the newspaper that a possible target date for reviving KZTO is "this spring."

Copsidas' "Channel Z" chain has stations near Springfield, Missouri and Augusta, Georgia. The prospective Kansas City rimshot would have faced competition from new-rock KISF(FM) and Lawrence-based modern rocker KLZR(FM), as well as some crossover tunes on KQRC(FM).
****
A TV note (forgive me): Kansas City CBS affiliate KCTV is the first TV station in the market with a Web site: <URL: http://www.kctv.com/>.

I was saddened to hear of the death of Allison Steel.

In 1968 the Army assigned a small town boy from Oregon to the New York City area. I discovered the Night Bird, WNEW, The Mothers of Invention, the New York Rock and Roll Ensemble and others.

I think the first time I heard WNEW and, I think, Allison, she played a 15 to 20 minute set based upon the Lone Ranger. I had never heard anything like that and instantly lost interest in the commercial, TOP 40 stations of the day. Here was something and someone that SPOKE to me in a way that few stations and personalities ever had and, sadly, few have done since then.

God, what a voice! It is inextricably woven through my memories of those years.

-- [ From: Jerry Walker * EMC.Ver #2.10P ] --

I was saddened to hear of the death yesterday of Alison Steele. Anybody who grew up in the New York area in the '60's will remember Alison as not only the pioneer in broadcasting that she was but will admire her talent as well. I remember listening to her on WNEW-FM circa 1966. Once the novelty of her gender wore off I could appreciate exactly what she did. Even though I hated the aor music, I listened because who could resist her sultry voice, her windchimes and her poetry (which I didn't get half the time). Not only was she the first female jock, she didn't need sidekicks, phone calls, song parodies or other "crutches" to "bounce" of off. She could keep a radio audience entertained on her own. The true sign of talent.

Jerry

Ahh, the old CONELRAD system. I'm sure there are those in engineering here
who'll speak with more detail, but the original EBS system established those
two frequencies as the transmission spots in the event of attack...and, yes,
stations were to alternate frequencies to avoid lock-on by the enemy. Only
certain stations were allowed to transmit on those frequencies...as I remember
they were the 50,000-watters primarily.

The whole thing stopped when the new EBS system was developed...about the time
people quit building bomb shelters.

> the 60s]

Use of the two frequencies was under the old emergency notification
plan called CONELRAD, an acronym which stood for something like
"CONtrol of ELectromagnetic RADiation," i.e., broadcast signals. It
was designed mainly to warn U.S. citizens in case of nuclear attack.
CONELRAD was replaced by EBS, the Emergency Broadcasting System,
which was refined by EANS, which is being studied by the FCC and soon
will be replaced by another system of emergency notification. Now
the notification system is used mainly in connection natural
disasters, not enemy attacks.

Civil Defense Symbols on Radios
---

This is in response to a question from Chris Carmichael in #1564 Airwaves Radio Journal.

After WWII the US government instituted an emergency radio system to be activated in case of nuclear attack-- a very real possibility at the height of the cold war. The idea was to provide a way for the President or other high government officials to rapidly communicate with the public.

It was called Conelrad and involved designated AM stations all over the country switching to either 640kHz or 1240 kHz. The radios of the period were manufactured with small triangle-in-circle symbols at those two points on the dial.

The idea was to prevent enemy bombers from using known AM radio stations for navigation. In the New York City area the 640 kHz frequency was shared by several of the 50kw facilities, switching from one to another every few seconds for further confusion.

Conelrad tests were held every so often. The last one I remember was in 1961 or 1962 when I was an undergraduate at Rutgers University in New Brunswick, NJ. At that location the 640 kHz frequency was readable. However, the 1240 kHz transmission occupied simultaneously by WNEW's transmitter with 50kw and New Brunswick local WCTC with one kw. The interference on 1240 was so intense the programming was inaudible.

Conelrad eventually gave way to the Emergency Broadcast System as inertial guidance and missles rendered the idea of the enemy homing in on AM radio signals obsolete. EBS has the added feature of regional and local activation capability and is used principally for weather and other natural emergencies such as earthquake.

Although Presidential messages enjoyed top priority in the old Conelrad system as they continue to do in the EBS system, as far as I know the system has never been activated on a national basis and has never carried a Presidential message other than in a test mode.

The EBS system is now being reworked to include cable systems as well as broadcasting stations in the alerting chain.

## 2497. Radio contests using the Internet "5th e-mail wins a CD"

Newsgroup: rec.radio.broadcasting
Date: 1995-09-29 00:00:00 UTC
From: wa2ise@netcom.com
Message-ID: <44g02a$7fo@vixen.cso.uiuc.edu>
Source record: 29097

I haven't seen (or heard!) it yet, but I imagine some stations in computer literate areas (like Silicon Valley) might do a variation of the usual call in contest. Like: "The 10th e-mail message we recieve with the phrase "Banana Jack & Joe-Joe" in it will win concert tickets to this weekend's Pearl Jam concert!". Making listeners type in a previously secret phrase into the e-mail means they can't just keep mail-bombing the station automatically. Change the phrase each time.

Or would the Internet "near" the station get overloaded and crash?

One would think that the TIS stations could move to 1710. Is TIS so
important that it should deny broadcasters access to spectrum that
international treaties reserve for broadcasting?

> already established TIS outlets.They also said they did not take into account
> the broadcast treaties with Canada. I don't know if there is a problem with
> Canada's plan for the frequencies, or if the FCC forgot about Canadian
> allocations on adjacent 1600 khz.

They forgot about an entire country, the second largest in the world?
That's amazing, if it prove true.

In general I think the FCC has done a poor job of regulating the broadcast
spectrum. Major mistakes of recent years have included Docket 80-90, the
AM stereo "marketplace" decision, allowing the overpopulation of the AM
band, failure to properly address the AM splatter issue, and inadequate
enforcement of technical rules, especially with regard to directional
antennas.

I wonder if we wouldn't do better with a Commission made up of
communications professionals instead of lawyers.

Bill,
Today they're impressed with formulas. Most of what I hear seems to have the same rhythm track, the same recording styles, the same processing, the same miking - the same everything, except the names on the labels.

Actually, what killed BM was the age of the audience compared to the age of the media buyers and salespeople. A 22 year old media buyer had no interest in the format and didn't buy it, claiming that the demos were wrong. Instead, they attempted to sell Cadillacs to 18 year olds in other formats. In my experience, the audience had no part in the death of BM. Stations found they could make more money, more easily, with young formats with more inventory than BM would allow (generally 8-12 units, not minutes).

Why knock your head against a wall when you can make as much, or more, money by jumping on the youth bandwagon. Bandwagons are the favored mode of transportation in the broadcast industry.

Rich

I disagree. Beautiful music did not kill itself. Instead the
intensity of demand for adults 25-54 on the part of advertisers killed
it.

Content in the mass media always chases revenue. The demise of
beautful music stations in America is largely the result of radio
broadcasters chasing the largest possible revenues. When beautiful
music as a format no longer was much of a factor at adults 25-54 it
disappeared.

There is still a large audience for beautiful music but that audience
is not of much interest to advertisers (read too old), so it will not
be served. That is the inevitable consequence of an advertiser
supported medium like commercial radio. This is not an indictment,
simply an observation.

As a matter of public policy it is undoubtedly better for commercial
radio to serve the mercantile interests in the society rather than be
dominated by government, religious institutions, educational
instutions, private foundations or others with money and a unitary
point of view.

Regards,

JHB

NewCity Communications of Syracuse, NY, which owns WSYR-AM, WYYY-FM (Y94FM) and WBBS-FM (B104.7) is proud to announce that we've made it to the World Wide Web.

"Sybercuse" is the site we've created, which is a virtual city containing information about Syracuse. The URL is http://sybercuse.com . Within Sybercuse are the station home pages, http://sybercuse.com/wsyr, http://sybercuse.com/y94fm, and http://sybercuse.com/b1047.

One feature we're proud of is the updating of local news and sports on the WSYR page, with information entered right from our own news room.

Having read this newsgroup for almost a year, I know the group well and highly respect the opinions of the members. I would value your opinion of our site and welcome constructive criticism. Please feel free to email me with your comments.

Oh and "GO ORANGMEN" with a 3-1 record so far this season... : )

From: BROCKRADIO@aol.com
Message-ID: <44qvfg$qim@vixen.cso.uiuc.edu>
Source record: 28952

I belive WQXR was chosen to match W2XR, the station's experimental call letters.
They were one of the first to operate on the then "Hi-Fi" am band (1510-1600 khz). These stations were operated to take full advantage of the high frequency response available by am when both adjacent 10 khz channels are not assigned,and thus a wider,
less selective bandwith may be used by the radio resulting in better detection of the high frequency audio contained in the sidebands. One of these stations, in Kansas City, was where the legendary John Hammond heard Count Basie for the first time, on a car radio in Chicago.

# 2509. Would you PLEASE help me with a radio/VCR problem?

Newsgroup: rec.radio.broadcasting
Date: 1995-10-03 00:00:00 UTC
From: scurvygm@crl.com
Message-ID: <44qvfh$qin@vixen.cso.uiuc.edu>
Source record: 28953

I am a radio/audio novice, and I am desperate for some help. My problem is probably a trivial thing to a radio buff. I will be forever grateful if you would take the time to give me some help/advice:

I work in a large office building which has notoriously poor radio reception. However, my desk location next to a window provides me a decent FM signal. I have been listening to FM radio at work for years, and I am now addicted to it.

Last week, my desk was moved away from the window and I now sit right in the center of the building. My radio reception is now almost non-existent! I could tape some stuff at home on cassettes and have 1 or 2 hours per day of taped programming, but this is not enough for me. I need to be able to record 4 to 6 hours of FM radio onto a single audio tape!

This is what I would like to do: 1) Attach a line from the audio-out on my home FM receiver. 2) Connect the line to the audio-in on my VCR. 3) Set my VHS tape speed at extended play, allowing for 6 hours of audio recording on a single VHS tape. 4) Use my VCR timer to automatically record FM radio onto the VHS tapes. 5) Use a VCR at work to playback the recorded audio VHS tapes, using headphones connected to the audio-out to listen to the playback.

Will this work? Does anyone currently do this, and if so, are there any tips that you could give me? Is there a better or more efficient way to utilize a VCR as an audio recorder?

Can I use the connecting wire from my 8 MM video camera to connect my FM receiver to my VCR, or will I need a specific type of connecting wire?

I will be taping talk radio, so I won't care too much about the sound quality of the playback on the VHS tape. I will not care that I won't have the mobility of a walkman - I am more or less anchored to my desk during the work day.

Thanks, in advance!

# 2511. Chicago Radio Watch:Howard Stern

Newsgroup: rec.radio.broadcasting
Date: 1995-10-03 00:00:00 UTC
From: JJB92@aol.com
Message-ID: <44qvdm$qcr@vixen.cso.uiuc.edu>
Source record: 29107

Howard Stern has left Chicago-again. Classic rocker WCKG-FM (105.9) and Howard have decided to part ways. WCKG terminated its relationship with Howard based on discomfort with some of the shows' content. The parting was reportedly amicable-a far cry from the messy divorce from Evergreen broadcastings WLUP-AM (1000) (now WMVP-AM).

The summer ratings are due out later this month; preliminary results are expected to show that Howard had improved from a 2.1 share to an approximate share of 3.0-a substantial improvement.

The station has decided to concentrate on music during the morning drive for the next few weeks.

Rumor has it that Howard may next resurface in Chicago on Infinity's WJJD-AM (1160).

# 2513. The Silence of the (KC) Rimshot

Newsgroup: rec.radio.broadcasting
Date: 1995-10-03 00:00:00 UTC
From: The Mid-America Radio Page <kcradio@littleblue.com>
Message-ID: <44qvdo$qd9@vixen.cso.uiuc.edu>
Source record: 29109

Last week, I mentioned finding no evidence that silent KZTO(FM) had built a new tower in a promised effort to rimshot the Kansas City market with a modern-rock format.

An article in the Kansas City _Star's_ gossip column today (Sept. 28) helps fill in some of the blanks. According to the column, KZTO owner Frank Copsidas has put his Kansas City plans on hold.

The reason cited is the need for Federal Aviation Administration approval of the new tower, in Leavenworth County, Kansas, northeast of Lawrence. KZTO, licensed to Ottawa, presently is licensed to a site west of Lawrence. KZTO has been off the air since January 1994.

KZTO is limited in how close it can move to Kansas City both by co-channel KWWR(FM) from Mexico, in central Missouri at 95.7 mHz, and by IF separation with KCIY(FM) at 106.5 mHz.

Copsidas told the newspaper that a possible target date for reviving KZTO is "this spring."

Copsidas' "Channel Z" chain has stations near Springfield, Missouri and Augusta, Georgia. The prospective Kansas City rimshot would have faced competition from new-rock KISF(FM) and Lawrence-based modern rocker KLZR(FM), as well as some crossover tunes on KQRC(FM).
****
A TV note (forgive me): Kansas City CBS affiliate KCTV is the first TV station in the market with a Web site: <URL: http://www.kctv.com/>.

Funny how, even having worked in radio for so many years, when someone like Allison Steel dies it still affects me like I was a little groupie of a big rock band...

I have so many great memories of lying in my bed falling asleep to her signining on at 10:00 p.m. on WNEW-FM... "Come, fly with me, Allison Steel.... the Night Bird.."

Peace, Allison. May those of us who remember you continue to be challenged by your love of the medium and the music.

I was saddened to hear of the death of Allison Steel.

In 1968 the Army assigned a small town boy from Oregon to the New York City area. I discovered the Night Bird, WNEW, The Mothers of Invention, the New York Rock and Roll Ensemble and others.

I think the first time I heard WNEW and, I think, Allison, she played a 15 to 20 minute set based upon the Lone Ranger. I had never heard anything like that and instantly lost interest in the commercial, TOP 40 stations of the day. Here was something and someone that SPOKE to me in a way that few stations and personalities ever had and, sadly, few have done since then.

God, what a voice! It is inextricably woven through my memories of those years.

-- [ From: Jerry Walker * EMC.Ver #2.10P ] --

I was saddened to hear of the death yesterday of Alison Steele. Anybody who grew up in the New York area in the '60's will remember Alison as not only the pioneer in broadcasting that she was but will admire her talent as well. I remember listening to her on WNEW-FM circa 1966. Once the novelty of her gender wore off I could appreciate exactly what she did. Even though I hated the aor music, I listened because who could resist her sultry voice, her windchimes and her poetry (which I didn't get half the time). Not only was she the first female jock, she didn't need sidekicks, phone calls, song parodies or other "crutches" to "bounce" of off. She could keep a radio audience entertained on her own. The true sign of talent.

Jerry

From: dk@crl.com
Message-ID: <44qve0$qea@vixen.cso.uiuc.edu>
Source record: 29114

Julian H. Breen wrote the quoted material below:

" I disagree. Beautiful music did not kill itself. Instead the
" intensity of demand for adults 25-54 on the part of advertisers killed
" it.

The world's first beautiful music station, McLendon's KABL in Oakland (and KABL-FM San Francisco "...in the air EVERYwhere over San Francisco..."), was a station I followed for years. KABL lived from 1958 to about 1985, was "freshened" with more mainstream music, then finally died a few years ago with the installation of 1970s rock oldies.

They had good numbers at one time, but as Julian writes, the advertisers fled the format. Later, KFRC switched from rock to an easy listening 1950s format (live personality announcers) and rose to #4 overall. Same thing: advertisers wouldn't buy. It seems that about 1985 or so advertisers decided that they simply didn't want to sell to certain age groups, no matter how many people were in the group.

With the demise of the beautiful music format, MOR personality DJs, and the TV variety show such as Carol Burnett and Ed Sullivan, a more genteel way of life also died. Today, there's no time for civilized radio or TV, it seems. Get a young audience in front of the set any way you can, sell them anything, count your cash, walk away from it -- no moral complications.

I'm not in radio, just a listener, but I have to make a couple
comments about "BM" and its history/demise. At the same time, a few
comments about the death of Bob Chandler, of WGAY in Washington, DC
and a little revisionist history reported in the Washington Post and
elsewhere.

Since 1991 I founded and published a newsletter for the Percy Faith
Society, a small but dedicated group of die-hards who actually liked
"Beautiful Music" or "Mood Music" or whatever. Chacksfield or the
Hollyridge Strings were not in the original scheme of things, though
they did have some good selections. Faith, Kostelanetz, David Rose
and a few others had something in common, they continued the Paul
Whiteman tradition and made the most of popular tunes/ballads in
instrumental form, emphasis on strings. Faith and Rose had much
experience "on the air" long before the Lp, and then when radio
orchestras (e.g., Carnation Contented Hour) died, then they moved to
the Lp and recorded some wonderful albums.

Interest in this kind of music is rare, but not unheard of. For example, JVC in Japan has contracted a series of four CD's of new recordings of note-for-note Percy Faith arrangements; something I'd like to think could happen here, but Americans tend to discard popular music like tissue paper, then people in Japan and other countries continue to enjoy it years later (Ray Conniff, still very much alive, continues to enjoy tremendous interest... in countries other than the USA. Due to economic difficulties, I just folded the Percy Faith Society newsletter and will continue to publish articles in the Robert Farnon Society's magazine, which is based in London and continues to celebrate "popular music for orchestra" (my term, for a difficult-to-pin-down concept, they call it mood music).

I'm not quite sure who was on the mark first with the radio format that became known as "beautiful music" but two pioneers were undoubtedly WGAY (then promoted as WQMR, the AM outlet) in DC and WPAT in NY. This relates to the aforementioned stories about Bob Chandler. Chandler joined WQMR/WGAY in 1965, when the station was going "full tilt" with the format (15 minute "clusters") and had just moved to new studios and shortly thereafter became DC's first 50kw stereo station. Bob Chandler deserves immense credit for continuing the format and pushing hard to maintain a high quality sound that syndicators picked up on in later years. However, Chandler didn't "start" the format; it was solidly in place since 1960, and was started in '59 by Ted Dorf and Ed Winton who gave the station an incredibly strong identity and loyal listenership. They were about 90% instrumental, even hit on light classics in the evening downtime, and were HEAVY on Broadway/Hollywood selections; during the Winton/Dorf era they played many obscure selections from movie soundtracks, some gorgeous stuff. Bob Chandler cut away at that, wanting to make everything "recognizable." Unfortunately in 1972 to keep with the politically correct trend he started to phase out anything that wasn't a chart tune at one point or another, but this was an extremely gradual transition.

Those were the days! Interestingly enough, in the Winton/Dorf pioneering days, WGAY was practically a banished call letter. The station went on the air in 1947 as WGAY, and was purchased by Mr. Connie B. Gay (really!) in '59 - the call letters had nothing to do with his last name... but these gentlemen changed the call letters to WQMR (Washington's Quality Music Radio) and pushed that hard, and in '61 added a 20kw FM outlet named WGAY once more, but *never referred to it*. However, as the mid-60's approached and the FM outlet went to 24 hour operation, and soon after stereo, WGAY was "it" and WQMR's call letters became the forgotten ones. In the mid (?) 80's the AM operation was renamed WGAY (and was sold shortly thereafter, since FM was everything).

Now, sadly, Greater Media announced in paper only days after Chandler's death that a new-new regime was in place and the call letters would soon change, dropping reference to EZ (which it hadn't been for several years).

Anyway, there are indeed a few of us scattered throughout the earth who still like "slushy strings" and actively support reissues through the record companies (I've worked on one) and through correspondence. It's dead as a radio format, but it's not gone!

One final thing, the term Elevator Music was used in a recent book by an acquaintance Joseph Lanza, who explores, in a rare glimpse, some of the history of this type of music.

On 28 Sep 1995 05:41:14 GMT William Pfeiffer (rrb@clm.aiss.uiuc.edu) wrote:

: When BM was big, the adult standards (30's 40's and pre-rock 50's)
: formats were seen as 'old hat' and there were not as many of them.

It wasn't called adult-standards; it was called MOR.

Back to "beautiful music"....
: I am sure there are some people who truly love that music and will not
: transfer to any other, even the originals from which the instrumental
: covers were taken, but all-in-all, BM was mostly fake music (I won't
: use the term Muzak, because it is a trademark and because today's
: MUZAK is not anything like the old BM).

I write this as someone who utterly detested the EEEEEEEE-ZZZZZZZZZZ
stations of the 70s and early 80s (yes, there really *was* a KCEZ or, more
phonetically, KCEEEEEEEEEEZZZZZZZZZZ) -- it's KCMO-FM again now.

Yet I think a line is being drawn here that maybe oughtn't be drawn -- or
maybe isn't being drawn in the right place.

There *is* a direct line of descent from Muzak (and even Transit Radio and
"functional" programming) to the SRP and Bonneville EZ formats to a whole
diverse set of formats and genres today:
NAC, "smooth jazz", and even techno/ambient.

What they have in common is their attempt to set a mood, to be listenable
yet unobtrusive, to make sense as a continuous flow instead of a series of
musical pieces taken in isolation.

Much of radio is designed to do this, when you think about it.

Right now, as I type this, I am listening to KCUR, a public radio station,
and its nightly jazz program. It sets a mood for me, augmented by that
smoothest of voices, Deborah Johnson's. It is decidedly *not* background
music, but the programming, as it flows together, stimulates the auditory
sense and pleasantly tilts one's frame of mind.

The only difference between this type of flow and "beautiful music"
and its successors is that the latter set of formats are much more explicitly
constructed and designed to set a mood.

: I have commented to a few of my colleagues that there is a certain
: wistfulness to the passing of the BM (no pun) era, but all-in-all it
: was BM that killed BM.

Not necessarily. Beautiful music stations, even while racking up good
numbers, had a *great* deal of difficulty selling advertisers. They

perceived it as "background" music within which their messages would be lost. For instance, this is why KARO (now KPLA) in Columbia, Mo. dropped beautiful music in March of 1986, in favor of an adult-contemporary format.

Not that I ever listened to the stuff. But KCEZ and "Oldies 95" (what KCMO-FM is today) each are background music for different sets of people and different purposes. KCEZ was just more explicitly constructed to be that way.

The ambient show on KLZR, "Nocturnal Transmission," is very much a weekly experiment in ambient flows of music, with individual selections submerged into the segues that the host, Ray Velazquez, has put together. "Generation X" beautiful music? Not exactly but, again, it *is* music and programming explicitly constructed for setting a mindscape.

By the way, it tells you something about Kansas City when you learn that, for a couple of years in the late 1970s, KTRO-FM (now KQRC) was programmed as a "beautiful country" station.

There is still, by the way, a beautiful-music station that I can barely receive: KVSV-FM out of Beloit, Kansas at 105.5 mHz.

Sure, Stuart, go ahead and scare me to death like that! ;-)

I just checked, and the Boston Radio Archives are still very much alive
and well (not to mention recently expanded). I think Stuart just
didn't have the complete URL, which is...

ftp://radio.lcs.mit.edu/radio/bostonradio.html

Check it out...we're always open to comments!

Jay:

I love you like a brother, and you know I have infinite respect for you from our conversations and emails. But in this case I must jump in and say that on this newsgroup, one has the right to express her/his opinion such as Joe did without haveing to be a life long broadcaster. Just being a listener entitles Joe to feel the way he does and express it without being flamed. The only reason I even posted such a flame is because of my respect for you, Jay.

WLS is not everyone's choice for talk radio. It serves its audience well, and your show is certainly the exception to the rule on WLS which is mainly a right-wing talker with you as the sole (last time I heard) balance of opinion.

I dont see Joe insulting you. Note that he also has no apparent love for Brandmeier either. I respect Joe AND you, Jay, and hope you can understand that despite the heat you sometimes take in chi.media, here you are a revered friend and so is Joe.

Peace Gentlemen.

When I was a grade-schooler in the 70's, my father used to drive a 1964 Cadillac. The radio included the CD symbols (little white logos with upward-pointing arrows avove the "CD") The owner's manual mentioned these and refered to them as "Conelrad" frequencies.

Anyone else have more info?

Ahh, the old CONELRAD system. I'm sure there are those in engineering here
who'll speak with more detail, but the original EBS system established those
two frequencies as the transmission spots in the event of attack...and, yes,
stations were to alternate frequencies to avoid lock-on by the enemy. Only
certain stations were allowed to transmit on those frequencies...as I remember
they were the 50,000-watters primarily.

The whole thing stopped when the new EBS system was developed...about the time
people quit building bomb shelters.

> the 60s]

Use of the two frequencies was under the old emergency notification
plan called CONELRAD, an acronym which stood for something like
"CONtrol of ELectromagnetic RADiation," i.e., broadcast signals. It
was designed mainly to warn U.S. citizens in case of nuclear attack.
CONELRAD was replaced by EBS, the Emergency Broadcasting System,
which was refined by EANS, which is being studied by the FCC and soon
will be replaced by another system of emergency notification. Now
the notification system is used mainly in connection natural
disasters, not enemy attacks.

# 2527. Conelrad (fwd)

Newsgroup: rec.radio.broadcasting
Date: 1995-10-03 00:00:00 UTC
From: Don Mansfield <dmansfie@CapAccess.org>
Message-ID: <44qved$qfp@vixen.cso.uiuc.edu>
Source record: 29123

I remember well the old Conelrad system. It was designed to prevent enemy bombers from using broadcast radio signals for navigation (something that we learned after Pearl Harbor). You would have a pair of stations sharing the same frequency (640 or 1240). The transmitters would switch on and off in a synchronized manner so as to prevent a constant location for radio direction finding.

The station where I was working was paired with another station 20 miles away. We were on 850 and they were on 620. We both had modified 1-kw transmitters that could be switched to 640 kHz. There was a metal disk turned by a synchronos motor at both transmitter sites. The disks had cutouts that opened or closed a microswitch turning the transmitter on and off. Our disk was supposed to be in sync with the paired station. When their transmitter was on, ours was off and vice versa. Since we were to be transmitting a common program, the listener was to supposed to only notice a small difference in level. However the enemy bomber was seeing the location of the transmitter he was using for navigation change.

I remember seeing a report of a test done with the Air Force. Using a B-49, they were unable to navigate to New York City successfully when the Conelrad system was operating.

The real hoot was that there was a relay chain of AM radio station that was supposed to broadcast the CD information should the ATT system fail during an attack. I remember the chain for the station where I was working: WCAP (Washington, DC --I think WTOP now--) got the audio from the White House. Their signal was received by WRVA (Richmond, VA); then to WBT (Charlotte, NC). At WKIX (Raleigh, NC) we were to rebroadcast WBT. Even with those few hops, the audio would have been close to worthless. I can imagine how it would sound by the time it got to Florida or the West Coast.

Do you mean, "Did _lots and lots_ of stations either switch to or stay on 640 or 1240" when Conelrad was tested/activated? The answer is, as I recall, yes. I was a kid working at a station on 1360 in SIoux City, IA back in the 1950's when the day came for a test of Conelrad (tests were very rare). We were not a Conelrad station so our role in the test was to simply go off the air for the fifteen minutes (I think) that the test ran. Another station in town, KMNS (then KCOM) on 620 was the Conelrad station for the area, so they switched to 640 and ran the test programming--so we couldn't check 640 to see who else was on because KCOM, naturally, was the only one that could be heard. But I did check 1240..and there were lots of stations coming through--well, four or five, anyway, and the test was in the daytime.

Not much help to you, I'm afraid, but halfway interesting (naw, I'd say maybe quarterway interesting) anecdotal material FWIW.

Cheers.

I haven't seen (or heard!) it yet, but I imagine some stations in computer literate areas (like Silicon Valley) might do a variation of the usual call in contest. Like: "The 10th e-mail message we recieve with the phrase "Banana Jack & Joe-Joe" in it will win concert tickets to this weekend's Pearl Jam concert!". Making listeners type in a previously secret phrase into the e-mail means they can't just keep mail-bombing the station automatically. Change the phrase each time.

Or would the Internet "near" the station get overloaded and crash?

Did any Bay Area radio fans catch Sunday's SF Examiner story about Infinity's announced purchase of KYCY and KFRC? The article mentioned the possibility of Howard Stern moving from KOME to KYCY, as well as competitors' potential reactions.

What's the inside scoop on possible format changes? Any chance that Infinity will move not only Stern but also the Alternative format from KOME to KYCY to go head-to-head with Alex Bennett and Live 105? KYCY has a much better signal than KOME, so it wouldn't surprise me if the two frequencies changed formats.

The article also mentions the low ratings of KBGG and its 70s ("and more!") format. It seems to me that station is ripe for a format change.

If anyone knows of any gossip or rumors, I'd like to hear it!

One would think that the TIS stations could move to 1710. Is TIS so
important that it should deny broadcasters access to spectrum that
international treaties reserve for broadcasting?

> already established TIS outlets.They also said they did not take into account
> the broadcast treaties with Canada. I don't know if there is a problem with
> Canada's plan for the frequencies, or if the FCC forgot about Canadian
> allocations on adjacent 1600 khz.

They forgot about an entire country, the second largest in the world?
That's amazing, if it prove true.

In general I think the FCC has done a poor job of regulating the broadcast
spectrum. Major mistakes of recent years have included Docket 80-90, the
AM stereo "marketplace" decision, allowing the overpopulation of the AM
band, failure to properly address the AM splatter issue, and inadequate
enforcement of technical rules, especially with regard to directional
antennas.

I wonder if we wouldn't do better with a Commission made up of
communications professionals instead of lawyers.

Bill,
Today they're impressed with formulas. Most of what I hear seems to have the same rhythm track, the same recording styles, the same processing, the same miking - the same everything, except the names on the labels.

Actually, what killed BM was the age of the audience compared to the age of the media buyers and salespeople. A 22 year old media buyer had no interest in the format and didn't buy it, claiming that the demos were wrong. Instead, they attempted to sell Cadillacs to 18 year olds in other formats. In my experience, the audience had no part in the death of BM. Stations found they could make more money, more easily, with young formats with more inventory than BM would allow (generally 8-12 units, not minutes).

Why knock your head against a wall when you can make as much, or more, money by jumping on the youth bandwagon. Bandwagons are the favored mode of transportation in the broadcast industry.

Rich

>wdp@airwaves.com * wdp@wwa.com * airwaves@woodtech.com
>Web: http://radio.aiss.uiuc.edu/~rrb/

I disagree. Beautiful music did not kill itself. Instead the
intensity of demand for adults 25-54 on the part of advertisers killed
it.

Content in the mass media always chases revenue. The demise of
beautful music stations in America is largely the result of radio
broadcasters chasing the largest possible revenues. When beautiful
music as a format no longer was much of a factor at adults 25-54 it
disappeared.

There is still a large audience for beautiful music but that audience
is not of much interest to advertisers (read too old), so it will not
be served. That is the inevitable consequence of an advertiser
supported medium like commercial radio. This is not an indictment,
simply an observation.

As a matter of public policy it is undoubtedly better for commercial
radio to serve the mercantile interests in the society rather than be
dominated by government, religious institutions, educational
instutions, private foundations or others with money and a unitary
point of view.

Regards,

JHB

## 2538. Sound files of station ID's?

The referenced text was after the conclusion of the material quoted
from the morning news, so I will take responsibility for the error,
which originated as follows:'
1. I tend to use the terms "adult standards" and "big band" inter-
changeably, as do many folks. What is meant in this particular
case, I guess we'll find out soon (hopefully).
2. The original KAAM at 1310 carried most of their programming from
satellite...it has been reported in local media that the new KAAM
was to carry similar programming, leading to the parenthetical
comment about SMN's format. Sorry that I did not make it clear
that this was guess work on my part, based on previous history in
the market.
I am pleased that folks came forward to correct my impressions on this
though; I learned something new...

>local news and sports.

>Tom Desmond

I talked with a friend of mine at KAAM 620 the other day. (he was installing the PA system at the time) He told me that the station will in all likelyhood
be on the air by the end of October. However, the programming will be all live - NO satellite! Now, on the weekends, I don't know if they are going to take some special shows from SMN or not, but they have decided not to do any satellite monday-friday. Furthermore, they will offer local news in morning drive only from what I hear. They are currently looking at TSN or Mutual News for the rest of the day's top of the hour news broadcasts. I don't know what sort of sports programming they have in mind.
The main hang up in getting the station on the air has been the unusually wet weather this past spring and recent rains hampering their field-strength testing. They only have two guys doing the field-strength tests.

As for other Dallas radio news...D Magazine reports in their latest issue that a group of investors is trying to put a conservative talk formatted station on the air. They want to call it KPNT "The Point." No word on what signal or what their actual status is on acquiring a station.

The folks at Young Country and Sunny 95 are excited about joining Infinity broadcasting. After seeing what Infinity did with KLUV when they bought them a while back (they didn't change a blessed thing!) the folks at KYNG/KSNN feel like it will be nothing but a positive.

RUMOR has it that the sale of KGBS-AM to Salem Broadcasting is in jeparody because the current owner of KGBS is hedging on making some $200,000 worth of improvements to the station that he promised to Salem. Considering they are going to pay him almost $5 million, one would assume that ultimately he will find a way to get it done.

RUMOR has it that KLIF is dropping the Michael Reagan show from it's evening line up. In recent trends, KLIF dropped into the mid 1's for the full day. It may very well be just the summer listening that's hurting them, but some of their recent programming moves do not appear to be catching on

very well. The Mike Fisher sports talk show from noon to 3 is getting a little above a 1 share and is losing out to The Hard Line and Rhyner and Williams on The Ticket. John Rody's show in the same period last year was drawing about twice the audience.

They are rumors...take them for what they are worth...

WBAP-AM has dropped Sports Byline USA in favor of a new local issues-oriented talk show from 9pm to midnight hosted by Al Wisk. Al has been around Dallas radio for more than 20 years off and on. He started Sports Central on KRLD in the late 70's and was a play-by-play and color commentator for the Dallas Cowboys for a time as well. He is a lawyer and has filled in for WBAP morning talk host Mark Davis numerous times. By the way, I am Al's producer. :) Sports Byline was a good companion for the Texas Ranger baseball games while WBAP had both, but running opposite the Rangers on KRLD proved to be a losing proposition.

Tom Desmond typed a story from the Dallas Morning News regarding the start date of KAAM, Plano.

I think that story has a couple of errors thoygh, from what I have been told.

I don't know if this is part of the actual story, or just Tom's own words, but:

>it will carry and adult standards format (probably SMN Stardust, on at least a part time basis...<

I have been told the format will be big bands, and will be all local, no network music programs.

Reply-To: JOHND@kidstar.com

My name is John Dodge and I'm the Program Director of KidStar Interactive, the new children's multimedia network based in Seattle. We're opening the first station in our expanding chain on October 12--KDFC, AM 1220 San Francisco--and we'll advance through the rest of the top ten markets in 1996. We have a four-part model featuring KidStar Magazine, KidStar Online (available through the new Microsoft Network), an interactive telephone system called the PhoneZone, and my area of responsibility, KidStar Radio.

I need a personality morning show that kids 8-12 will love and adults will listen to even after the kids are outa the room. Creative is mandatory, different is good, diverse is great, yesterday is my deadline.

Currently, you might be a producer, voice-over talent, famous CHR or AOR jock, receptionist, palm reader, poodle groomer, I don't care. You might live in Lajitas, Texas and have 20 minutes of experience or Los Angeles, California and thinking about ditching that big TV career in favor of something more enjoyable. If you're Pee Wee Herman reading this, call me. I forgive you even if the industry didn't. Whoever you are, you can consistently crack kids up, you have the tapes to prove it, and you're intrigued by the idea of doing network radio in Seattle. It's a cool town.

So think it over and Email me at johnd@kidstar.com. Thanks for your time, so long. JD

>From: Bay Area CISPES <sfbaycispes@igc.apc.org>
>Newsgroups: alt.music.prince
>Subject: NEWS:SERIOUS O(+> DEATH SCARE IN SF

SCARE IN SAN FRANCISCO- PRINCE REPORTED AS DEAD BY POPULAR RADIO
STATION SHOW

All the postings on the conference today about the death of
Prince are a direct result of irresponsible reporting on a popular
hip hop/R & B radio station based in San Francisco. "Wild" 107.7FM,
one of the 3 or 4 most listened to stations in Bay Area, reported
during their very popular morning show that Prince was dead.

Their reporting was done in a very serious way ("We have just
confirmed the earlier report we had received that Prince did indeed
die last night", etc) and in a manner that suggested they were
reporting a fact. They were even playing Prince music frequently
during the show and saying it was a tribute to him. "It's a shame
he is dead, his fans will miss him, he was so prolific."

They continued reporting his death in a way reminiscent of the
death of Kurt Cobain for over one half hour. Even when people
started calling in expressing their grief and crying, the DJs
continued with the charade and consoled the callers. NONE OF IT WAS
FUNNY OR PROMOTIONAL IN ANY WAY- IT WAS VERY FUCKED UP.

The reporting came right during rush hour (from 8:15- 9:00AM),
and it was only after they took the third or fourth caller in to
the program expressing their grief that the DJs finally gave it up
and admitted it wasn't true. IMMEDIATELY AFTERWARD the station was
flooded with calls and faxes from people expressing their anger and
upsetness with the program and the DJs. Some people, however,
probably had gone in to work thinking the news was still true.

At first the DJs played the calls and faxes off as just people
with sore feelings form a prank, but as the messages continued,
they started to lose their cool a bit. They were forced to put
callers on the air expressing their anger, and even eventually
admitted if they could take back what they had done, they would.

Eventually, they said they had received "about a thousand" calls and faxes, and they seemed to get very nervous. They were joking half heartedly about losing their jobs and even admitted they were hearing from management about the situation. THEY THEN attempted to blame the man himself for the situation, saying the station had received a fax from Warner Bros on behalf of TAFKAP the night before, requesting the station stop referring to him as Prince. The fax said "Prince is dead, long live TAFKAP".

This was a very thin excuse for their behavior, however. They in no way were reporting his death as a promotional or a joking thing, and they conveniently left off the second part of the message from Warners. It was obvious the DJs had no affection for Prince, and were even doing the prank out of disrespect and ridicule.

If there was any good to come out of the incident, it was the swift and voluminous response from the public. PEOPLE GENUINELY CARE ABOUT THIS MAN, and were calling from all over to express their grief and their anger to the radio station. One caller even said he was an official at a Junior College, and he was pissed because their irresponsible reporting had depressed so many students that the school was having trouble functioning. Other people were angry and said "Now they couldn't work straight." One woman had dressed for work in purple and lace in memorial. It made thousands of people realize that their lives would be missing something without TAFKAP.

It is possible that the station will take disciplinary action against the DJs- in the meantime, don't believe what people tell you- in the Bay Area at last, people still love Prince dearly, and even if recent records haven't sold as much, he is still close to the hearts of millions. LONG LIVE TAFKAP!!

>starts to sound bad.

This problem is known as "cascading" of conecs and/or compression
algorithms. When you have an audio chain (i.e. more than one A/d and
D/A device) linear digital audio is the best solution. My station RMF
FM is a nationwide radio network in Poland. We have decided not to use
compressed digital audio at all, and to use MUSICAM for
contribution/distribution only.
We are using three types of digital audio cards:
1.Simplest SoundBlaster for audio monitoring (play only)
2.Turtle Beach for important audio monitoring (play only)
3.DynaBit for recording and broadcasting (record and play)
DunaBit Audio Card is manufactured by DynaBit Co. located in Cracow,
POLAND. You can hear to this sound when tuned to MTV Europe from ASTRA
1A satellite (audio 7,74 and &7,92MHz - RMF FM sound). All jingles,
promos and commercials are played from DynaBit Audio Card.
Software is very special. There are four main parts of it - recorder,
simple editor, waveform editor, and cart player. There is also a simle
scheduler. User interface was designed by technical staff of RMF FM
and after that was written by DYNASOFT - polish software company.
In fact, this software was designed "by broadcasters for
broadcasters".
Software works with NOVELL network, transferring of file is simple.
You can also play cues from local disk or from server.
You can have many different cards in your system. Defining of card to
work with is from DOS level. DynaBit Card can provide recording from
8kHz mono to 48kHz stereo. DynaSoft recorder have AutoStart with
adjustable level, Optimize, Real Time VU and many others.
Customized versions are available.

# 2553. Seeking former staff/ownership of WQQQ, Easton, PA

Newsgroup: rec.radio.broadcasting
Date: 1995-10-03 00:00:00 UTC
From: bob.frable@phil.node99.com
Message-ID: <44qvfd$qii@vixen.cso.uiuc.edu>
Source record: 29149

This week WNYW Channel 5, the semi-flagship of the vaunted FOX network in New York City, has been subbing for their regular female anchor on "The 10 O'Clock News" with someone named Linda Schmidt.

Based only on her voice and her eyes, I am wondering if this is the same Linda Schmidt who at one time in the '80s was associated with the former WQQQ (FM 99.9, "Q-100," a CHR) and its sister AM WEEX (1230, may have been a talker at the time with Rush et al.), of Easton, Pennsylvania, both then majority-owned by Wilks-Schwartz.

The latter Schmidt (on-air name = Scooter) did sports inserts (over a cheesy "Cavalcade of Sports" theme) on the Uncle Bob morning show, as well as news drop-ins on 'EEX under her real name.

Since I don't know anybody at either Wilks-Schwartz, who are still very much in business, or the FOX-owned stations group, I am seeking any information you can supply linking Ms. Schmidt's career since W-S sold the Easton stations (they have changed hands at least three more times since).

I will also ask the local print media (the paper and the radio stations were previously owned by the same company) if they have any ideas.

A former general manager of the stations was until recently an executive of an Allentown station, altho' I am not sure where he is now either (his name is Jim Shea).

Send or post any info you can find. Thanks.

# 2555. Conelrad (fwd)

Newsgroup: rec.radio.broadcasting
Date: 1995-10-05 00:00:00 UTC
From: Don Mansfield <dmansfie@CapAccess.org>
Message-ID: <44vn5t$fhu@vixen.cso.uiuc.edu>
Source record: 28955

I remember well the old Conelrad system. It was designed to prevent enemy bombers from using broadcast radio signals for navigation (something that we learned after Pearl Harbor). You would have a pair of stations sharing the same frequency (640 or 1240). The transmitters would switch on and off in a synchronized manner so as to prevent a constant location for radio direction finding.

The station where I was working was paired with another station 20 miles away. We were on 850 and they were on 620. We both had modified 1-kw transmitters that could be switched to 640 kHz. There was a metal disk turned by a synchronos motor at both transmitter sites. The disks had cutouts that opened or closed a microswitch turning the transmitter on and off. Our disk was supposed to be in sync with the paired station. When their transmitter was on, ours was off and vice versa. Since we were to be transmitting a common program, the listener was to supposed to only notice a small difference in level. However the enemy bomber was seeing the location of the transmitter he was using for navigation change.

I remember seeing a report of a test done with the Air Force. Using a B-49, they were unable to navigate to New York City successfully when the Conelrad system was operating.

The real hoot was that there was a relay chain of AM radio station that was supposed to broadcast the CD information should the ATT system fail during an attack. I remember the chain for the station where I was working: WCAP (Washington, DC --I think WTOP now--) got the audio from the White House. Their signal was received by WRVA (Richmond, VA); then to WBT (Charlotte, NC). At WKIX (Raleigh, NC) we were to rebroadcast WBT. Even with those few hops, the audio would have been close to worthless. I can imagine how it would sound by the time it got to Florida or the West Coast.

>
>*When did the practice of placing the symbols stop? [I believe in the 60s]

Do you mean, "Did _lots and lots_ of stations either switch to or stay on 640 or 1240" when Conelrad was tested/activated? The answer is, as I recall, yes. I was a kid working at a station on 1360 in SIoux City, IA back in the 1950's when the day came for a test of Conelrad (tests were very rare). We were not a Conelrad station so our role in the test was to simply go off the air for the fifteen minutes (I think) that the test ran. Another station in town, KMNS (then KCOM) on 620 was the Conelrad station for the area, so they switched to 640 and ran the test programming--so we couldn't check 640 to see who else was on because KCOM, naturally, was the only one that could be heard. But I did check 1240..and there were lots of stations coming through--well, four or five, anyway, and the test was in the daytime.

Not much help to you, I'm afraid, but halfway interesting (naw, I'd say maybe quarterway interesting) anecdotal material FWIW.

Cheers.

## 2560. Orenthal and his verdicts...

Newsgroup: rec.radio.broadcasting
Date: 1995-10-05 00:00:00 UTC
From: Lance Ballance <lballanc@ix.netcom.com>
Message-ID: <44vn7n$fnb@vixen.cso.uiuc.edu>
Source record: 28960

Today was obviously a very busy day in Los Angeles radio, as the Not Guilty :( verdicts came down
in the OJ Simpson trial..

For example, nearly every station in L.A. broadcast the verdicts live, from KLOS to KOST to KFI
and KNX.. The AM news-tawkers pretty much gave a blow-by-blow description of the aftermath, from
the press conferences, to OJ's homecoming. KFI was a non-stop opinion machine, with John Kobylt of
the John and Ken show livid about the verdicts and screaming at anyone who thought that they were
correct. KNX and KFWB went straightinto a "as we find out about it, you'll hear about it" mode..

On FM, the mood was much more subdued,. However, many of the morning shows stayed on past the 10am
verdicts to get reaction, and to collect on bets made earlier in the morning..

What happened in other markets? Just curious.. I know that there were other stations covering the
verdicts, but I was pounding my head against the wall and couldn't hear them...

# 2561. The Radio Verdict in Southern California

Newsgroup: rec.radio.broadcasting
Date: 1995-10-05 00:00:00 UTC
From: "cHRIS O. Carmichael" <102776.224@compuserve.com>
Message-ID: <44vn85$fp0@vixen.cso.uiuc.edu>
Source record: 28961

Here's what stations in Southern California did for the
last day of the trial.

Live broadcasts: A majority of stations were live from the
LA courthouse. Included: KNX, KFI, KMPC, KABC, & KFWB
[all LA]. KFMB, KOGO, KKLQ A/F, KCBQ A/F, KPBS-FM,
XETRA-AM [Xtra Sports], and XEX [San Diego/Tijuana]

Bill Handel of KFI did a live remote in the morning from
the courthouse; followed by John and Ken at 9 a.m. to noon.

Jeff and Jer of KKLQ A/F had one reporter at the scene called
"Little Tommy." He reported [apparently] by cell phone.

Reaction filled the airwaves in the afternoon on KFMB's Stacy
Taylor Show, followed by Ted Leightner. At 5 p.m., after an
extended newscast, Berger and Prescott took calls until 8 p.m.,
and then a special three hour special until 11 p.m. [KFMB
760 5/50kw]

KSDO's Roger Hedgecock expressed his reaction to the verdict
during his 12:20 to 3 p.m. show. However, the popular money
show on KSDO was also filled with San Diegan's reactions
to the announcement.

Chris Carmichael | I normally put a good .signature line
San Diego | here. But, somehow, I couldn't think

I belive WQXR was chosen to match W2XR, the station's experimental call letters.
They were one of the first to operate on the then "Hi-Fi" am band (1510-1600 khz). These stations were operated to take full advantage of the high frequency response available by am when both adjacent 10 khz channels are not assigned,and thus a wider,
less selective bandwith may be used by the radio resulting in better detection of the high frequency audio contained in the sidebands. One of these stations, in Kansas City, was where the legendary John Hammond heard Count Basie for the first time, on a car radio in Chicago.

Up & down the dial in the #40 market:

*Edge v.Edge in the courts...film at 11

CFNY(102.1,modern rock;102.1 the Edge)has debuted a new series of ads,but with a difference. The new ad,seen on WUTV(ch.29;Fox/UPN),shows a computer screen with an unseen person typing. It notes that due to a court order,it can't call itself the Edge on WUTV-with the guess being that WEDG(103.3,modern-leaning AOR;103.3 the Edge)got the order. 'FNY went so far as to put the "censored" sign over the Edge part of the logo and bleeping the word. This is good for a few laughs-almost as many as when WGR & WWKB battled in 1993 over 'KB's calling itself The Big One;Jacor-'GR's consultants-slapped a cease & desist order on 'KB calling itself the Big One.

*Plans for CHOG(640,CHR/talk/Argos;AM 640)'s switch to talk are beginning to come into place.
Roy Green,who currently works at Hamilton's CHML(900,full service),is said to be heading to CHOG(now known as Talk640)as of October 11th-next Wednesday. Bill Carroll(currently hosting Toronto Talks-from 9am to noon)is expected to move into PM drive(specificially,4-6pm)-however,Carroll was tried out in mornings in late August. Green's show is expected to be simulcast on CHML;however,that is expected to be the extent of the tinkering on 'HML. AM640 tried simulcasting its 12noon-3pm show on CHML in August,only to have the show getting yanked inside of 2 weeks. The theory was if one wanted to listen to Toronto radio,that's what they'd listen to.

*The battle over what would be the format on Toronto's CKYC(1430) seems to be over,according to Peter Goddard's Sept.30 column in the Toronto Star. It's expected to be a multicultural format,with the emphasis on Chinese programming(in Cantonese & Mandarin dialects)airing 12 hours per day,with the rest of the time on weekdays and weekends taken up with programming in other languages. Kenneth Kwan,head of the Vancouver,B.C.-based Fairchild Holdings(the expected new owners),believes that the Toronto market is underserved in terms of multicultural programming(notwithstanding CHIN-1540/100.7)and that a format mostly in Chinese could become a cultural force and make money. (His thinking works like this:Vancouver has a station with a Chinese emphasis,as well as a station in Calgary.) The company has been buying time on 'KYC for the past 2 weeks,broadcasting in the late afternoon. When the sale goes through,Toronto listeners will hear something similar to what those in Vancouver hear-shows catering to youth & women,lifestyle & education programming at night,and talk geared for men in late night. Only a small part of its programming will come from Hong Kong-some shows may be the same ones that those in Vancouver,but will be mostly be geared to the Toronto audience.

Telemedia,forced to moved CKYC after moving CJCL(The Fan)to 590,has
agreed to the Fairchild offer if the CRTC gives the OK to it. Don Pagnutti of
Telemedia said the company was looking for the best economic offer,as well as
give an application that the CRTC would agree to.
One offer for 1430 was for a business format,termed "promising" by
Goddard.(Certainly it would be another first for Canada-but it hasn't worked
in Buffalo;twice it's gone down in ticker tape.)

# 2564. Chicago Radio Watch:Howard Stern

Newsgroup: rec.radio.broadcasting
Date: 1995-10-05 00:00:00 UTC
From: JJB92@aol.com
Message-ID: <44vn4h$fgn@vixen.cso.uiuc.edu>
Source record: 28964

Howard Stern has left Chicago-again. Classic rocker WCKG-FM (105.9) and Howard have decided to part ways. WCKG terminated its relationship with Howard based on discomfort with some of the shows' content. The parting was reportedly amicable-a far cry from the messy divorce from Evergreen broadcastings WLUP-AM (1000) (now WMVP-AM).

The summer ratings are due out later this month; preliminary results are expected to show that Howard had improved from a 2.1 share to an approximate share of 3.0-a substantial improvement.

The station has decided to concentrate on music during the morning drive for the next few weeks.

Rumor has it that Howard may next resurface in Chicago on Infinity's WJJD-AM (1160).

It'll work great. Use an RCA cable. Many community radio stations use VCRs to log their signal as required by government. 3 machines with 8 hour tapes = 24 hours a days recording with better sound than most reel to reel loggers. Plus you can add the video from your security camera.

On 28 Sep 1995 05:41:14 GMT William Pfeiffer (rrb@clm.aiss.uiuc.edu) wrote:

: When BM was big, the adult standards (30's 40's and pre-rock 50's)
: formats were seen as 'old hat' and there were not as many of them.

It wasn't called adult-standards; it was called MOR.

Back to "beautiful music"....
: I am sure there are some people who truly love that music and will not
: transfer to any other, even the originals from which the instrumental
: covers were taken, but all-in-all, BM was mostly fake music (I won't
: use the term Muzak, because it is a trademark and because today's
: MUZAK is not anything like the old BM).

I write this as someone who utterly detested the EEEEEEEE-ZZZZZZZZZZ
stations of the 70s and early 80s (yes, there really *was* a KCEZ or, more
phonetically, KCEEEEEEEEEEZZZZZZZZZZ) -- it's KCMO-FM again now.

Yet I think a line is being drawn here that maybe oughtn't be drawn -- or
maybe isn't being drawn in the right place.

There *is* a direct line of descent from Muzak (and even Transit Radio and
"functional" programming) to the SRP and Bonneville EZ formats to a whole
diverse set of formats and genres today:
NAC, "smooth jazz", and even techno/ambient.

What they have in common is their attempt to set a mood, to be listenable
yet unobtrusive, to make sense as a continuous flow instead of a series of
musical pieces taken in isolation.

Much of radio is designed to do this, when you think about it.

Right now, as I type this, I am listening to KCUR, a public radio station,
and its nightly jazz program. It sets a mood for me, augmented by that
smoothest of voices, Deborah Johnson's. It is decidedly *not* background
music, but the programming, as it flows together, stimulates the auditory
sense and pleasantly tilts one's frame of mind.

The only difference between this type of flow and "beautiful music"
and its successors is that the latter set of formats are much more explicitly
constructed and designed to set a mood.

: I have commented to a few of my colleagues that there is a certain
: wistfulness to the passing of the BM (no pun) era, but all-in-all it
: was BM that killed BM.

Not necessarily. Beautiful music stations, even while racking up good
numbers, had a *great* deal of difficulty selling advertisers. They

perceived it as "background" music within which their messages would be lost. For instance, this is why KARO (now KPLA) in Columbia, Mo. dropped beautiful music in March of 1986, in favor of an adult-contemporary format.

Not that I ever listened to the stuff. But KCEZ and "Oldies 95" (what KCMO-FM is today) each are background music for different sets of people and different purposes. KCEZ was just more explicitly constructed to be that way.

The ambient show on KLZR, "Nocturnal Transmission," is very much a weekly experiment in ambient flows of music, with individual selections submerged into the segues that the host, Ray Velazquez, has put together. "Generation X" beautiful music? Not exactly but, again, it *is* music and programming explicitly constructed for setting a mindscape.

By the way, it tells you something about Kansas City when you learn that, for a couple of years in the late 1970s, KTRO-FM (now KQRC) was programmed as a "beautiful country" station.

There is still, by the way, a beautiful-music station that I can barely receive: KVSV-FM out of Beloit, Kansas at 105.5 mHz.

From: bob.frable@phil.node99.com
Message-ID: <44vn90$fq2@vixen.cso.uiuc.edu>
Source record: 28970

This week WNYW Channel 5, the semi-flagship of the vaunted FOX network in New York City, has been subbing for their regular female anchor on "The 10 O'Clock News" with someone named Linda Schmidt.

Based only on her voice and her eyes, I am wondering if this is the same Linda Schmidt who at one time in the '80s was associated with the former WQQQ (FM 99.9, "Q-100," a CHR) and its sister AM WEEX (1230, may have been a talker at the time with Rush et al.), of Easton, Pennsylvania, both then majority-owned by Wilks-Schwartz.

The latter Schmidt (on-air name = Scooter) did sports inserts (over a cheesy "Cavalcade of Sports" theme) on the Uncle Bob morning show, as well as news drop-ins on 'EEX under her real name.

Since I don't know anybody at either Wilks-Schwartz, who are still very much in business, or the FOX-owned stations group, I am seeking any information you can supply linking Ms. Schmidt's career since W-S sold the Easton stations (they have changed hands at least three more times since).

I will also ask the local print media (the paper and the radio stations were previously owned by the same company) if they have any ideas.

A former general manager of the stations was until recently an executive of an Allentown station, altho' I am not sure where he is now either (his name is Jim Shea).

Send or post any info you can find. Thanks.

Message-ID: <44vn9v$fs6@vixen.cso.uiuc.edu>
Source record: 28974

Missouri's capital city has another country-music signal -- which it already sort of had anyway.

After a day-long countdown, interspersed with country and rock music, KATI(FM) threw the switch on its new transmitter at 3 pm today (Oct. 4). The station, calling itself "Cat Country 94.3", has moved to a transmitter site closer to Jefferson City, sharing a tower with oldies station KJMO(FM). KATI also increased power from 2,000 to 50,000 watts.

Brill Media, owner of KLIK(AM) and KTXY(FM) in Jefferson City, purchased KZMO-FM earlier this year after KZMO-AM/FM owner Ray Rouse decided to sell the stations he had built in the Moniteau County town of California. KZMO(AM) had gone off the air late in 1994 because of persistent technical problems.

The AM, a 500-watter at 1420 KHz, returned to the air in July under new local ownership. The stations had always been country-music outlets, and Brill continued the format on the FM, including a brief period during which it simulcasted KLIK.

For some time, Columbia and Jefferson City market observers have been speculating about Brill's plans for KATI. The consensus was for the station to continue its country format, targeting Columbia-based KCLR(FM). "Clear 99" derives a substantial portion of its revenue from the Jefferson City market, according to some observers.

KTXY(FM), with a hit-driven adult-contemporary format, has had increasing success penetrating the difficult Columbia market, the larger of the two Mid-Missouri markets. There are no CHR stations in or near Columbia, despite the presence of a university and two smaller colleges.

(Thanks to Scott Brinker at the University of Missouri for reporting the format change to me, as well as the next item....)
*****
Spring flooding along the Missouri River knocked KSLQ(AM) off the air. Within the past few days, KSLQ has returned to the air from its two towers in the Missouri River bottoms in the southeast corner of Warren County.

KSLQ, licensed to Washington, Missouri, is temporarily broadcasting at half its licensed 500 watts during the day. The station plans to resume broadcasting at full power shortly.

Co-owned KSLQ-FM has remained on the air during this time. Both stations are adult-contemporary, full-service stations.
****

In our Welcome Relief department....

" This is what I would like to do: 1) Attach a line from the
" audio-out on my home FM receiver. 2) Connect the line to
" the audio-in on my VCR. [....]

Yes, this would work. Some VCRs require a video signal to be present so
that the VCR's speed is controlled properly. Just in case, you might
tune the VCR to a good strong TV signal. But yes, this audio arrangement
does work and is used by a lot of people who listen to lots of radio.

" there any tips that you could give me? Is there a better or
" more efficient way to utilize a VCR as an audio recorder?

I think a VCR is more efficiently used as an audio recorder than for
recording, say, episodes of Rosanne.

# 2576. AIRWAVES FCC Database has been UPDATED!!!

Newsgroup: rec.radio.broadcasting
Date: 1995-10-06 00:00:00 UTC
From: wdp@uiuc.edu
Message-ID: <452v0l$dvi@vixen.cso.uiuc.edu>
Source record: 28976
Cross-posted to: rec.radio.broadcasting,rec.radio.shortwave,rec.radio.info,chi.media,ba.broadcast,misc.misc,rec.video.satellite.tvro,rec.video.satellite.misc,rec.video.cable-tv,alt.radio.pirate

AIRWAVES AM Radio Search page (a web interface to the FCC AM database) has been augmented to include a color map showing the location of the transmitter for all *Continental USA* stations. It won't work on Canadian stations.

To use the map, just click on the call letters of the station in question, when you get the search results. It takes a little longer, and the map server is on a small pipe to the net, but it is real nice.

The URL is still http://radio.aiss.uiuc.edu/~rrb/fccdb.html

Here is the general info if you havn't seen it yet.

AIRWAVES now has free, easy-to-use World Wide Web page for searching the FCC's AM radio Database.

You can search by frequency, City, State, Province, or by region (several USA Metro areas are pre-selected or you can enter your own lat/long).

Search shows calls, city, state/province, frequency, day power, night power, critical-hours power (if used) and antenna specs such as DA-1, DA-2, DA-3 DA-D DA-N or ND-1 .... etc.

To use this you must have a forms-capable browser. I suggest using netscape 1.1N since much of the formatting is Netscape Enhanced (tables, backgrounds, centering etc). It doenst look good on lynx at all. If anyone wishes to code an html page that works better with lynx, please do.

Please let me know if you like the service, and please try to keep traffic as low as possible during business hours (8AM - 5PM central US time).

# 2577. FCC Allows Unattended Operation

Newsgroup: rec.radio.broadcasting
Date: 1995-10-09 00:00:00 UTC
From: Jeff Tellis <jtellis@mhv.net>
Message-ID: <45ahb7$m82@vixen.cso.uiuc.edu>
Source record: 28977

The FCC has finally allowed stations to be operated unattended and has eliminated the requirement that operators have the Restricted Radiotelephone licenses.

Here's the official notice from the Commission:

Report No. DC 95-123 ACTION IN DOCKET CASE October 6, 1995

COMMISSION WAIVES RULES TO PERMIT UNATTENDED OPERATION
OF BROADCAST STATIONS; UPDATES BROADCAST STATION
TRANSMITTER CONTROL AND MONITORING REQUIREMENTS
(MM DOCKET NO. 94-130)

The FCC has waived its rules in order to permit unattended operation of broadcast stations and to update broadcast station transmitter control and monitoring requirements.

Specifically, pursuant to Section 318 of the Communications Act of 1934, as amended, the Commission waived the requirement for duty operators at broadcast stations. Further, the Commission eliminated the need for station operators (where optionally employed) to hold the Restricted Radio Telephone Operator Permit (RP); and updated the rules relating to transmitter monitoring to bring them up to date with respect to the capabilities afforded by modern electronic technology.

The Commission noted that in many areas of broadcast operation, automation is seen as affording more accurate and controlled operation than that performed by humans. Additionally, unattended operation is seen as permitting the more effective use of financial resources to enhance other station operations and services. Such operations, the Commission stated, is seen as potentially improving the viability of financially marginal stations.

Commission stated that the new Emergency Alert System (EAS), unlike the EBS, is designed for automatic operation and therefore does not require human involvement. However, because of the numerous petitions for reconsideration of the EAS Report and Order, the availability of EAS equipment has been delayed. The Commission believes it should afford licensees the maximum possible latitude in satisfying present EBS and future EAS responsibilities, having in mind the ingenuity that can often be brought to bear in resolving such problems.

Accordingly, the Commission will permit unattended operation in advance of implementation of the EAS, provided that licensees implement an effective method of complying with current EBS

requirements and responsibilities. The Commission cautioned licensees that the implementation of an informal method or methods of automating the EBS is not a substitute for implementation of the EAS. The Commission encouraged licensees who currently participate in local EBS lerts to continue to do so through whatever means they may employ to partially or fully automate their EBS functions.

Action by the Commission October 2, 1995, by Report and Order (FCC 95-412). Chairman Hundt, Commissioners Quello, Barrett, Ness, and Cho .

Must've been a bit later than 66, or else it wouldn't have
been a novelty. As I understand, she started at WNEW-FM
before its album rock format, during an all-female-jock
format, but was the only one of that format's jocks to
stay on through the switch in 67 sometime to album rock
(and thus was only the "first female jock" at the album
rock format there, not the station itself).

>to get it at the library, but who wants to leave the house?
>I thank you and my fat ass thanks you.

Hmmmmm....
I doubt you're going to have much luck because you're
looking for proprietary information owned by Billboard Magazine.
You might want to do a search every few weeks to see if things
have changed (say a "Billboard Online), but I wouldn't be too
helpful.
There's an Internet Daily Top 20 chart at

http://www.cas.american.edu/~todd/daily.html

but I can't vouch for it.
Joel Whitburn put out a top ten book (with every chart of
top ten songs) a few years ago. That's one of the few I didn't
buy.
Years ago, I went to libraries at Yale and Wesleyn to
phgotocopy every chart from 1958 to the present. I then went
back to 1938 and copied articles. It cost a fortune, but was
time well spent. If Billboard ever does go online, you'll want
to go to their site.
I hope that answers your question.

Bill . . .

I like the idea and, yes, there is indeed some out of date data, but something is
better than nothing. Thanks to you and those who did the programming to get
this translated into usable data for "the rest of us".

Is FM (both commercial and noncommercial) coming soon?

Jeff Tellis

at.

It's aimed at us middle agers who try to deny that we remember
it, let
alone liked it, when we were children listening along with our
now aging or
deceased parents. We can't deny the talent of the performers,
or the
beauty of listening to real acustical instruments. The songs
and melodies
are indelibly placed in our memories.

********** End of Forwarded Message **********

Sorry for a somewhat late response on this one, I have been out
of town. Not only middle-agers, but younger people as well. Our
two kids, both in their twenties, are fans of big band, jazz,
Sinatra, etc. They have tapes, listen to it on the radio, etc.
So, there is an increase of interest in "American "Standards
type music among a young adult generation. --Ken MacHarg

It isn't so much a matter of being driven by advertisers as it is a simple matter of survival.

It is a fact that more and more of us are entering the 50+ crowd every day. It is also a fact that older Americans have more spendable income than ever before. It is also a fact that advertisers want to reach people with money to spend.

But just how much money is an advertiser going to spend to support programming for people who refuse to respond to the advertising?

As an example, Sprint, MCI, Wilcom, Americom, etc., could underwrite radio stations for seniors until the cows come home and the older folks will still hang onto AT&T with a death grip.

If seniors want service from others they will have to decide to be part of the economic reality instead of making continual demands for things to be handed to them on a silver platter.

Grant

>way of life also died. Today, there's no time for civilized radio or TV,
>it seems. Get a young audience in front of the set any way you can, sell
>them anything, count your cash, walk away from it -- no moral
>complications.

Scott Lewison Responds:

Rest asured there are hundreds of public radio stations accross the country that are still engaged in "civilized" radio. Contrary to the opinions of some, we are not programming to the elite in the society, but all of us average joe and josephines. You can still find community service and intelligent discussions about every facet of our culture on most public radio stations.

The sad fact is that most public radio stations are being pressured to hop on the ratings bandwagon in order to survive. How long will it be before public radio will be programming "popular" formats in order to get adequate amounts of listener support when CPB funds are gone? Will this mean that public radio stations will have to compete with commercial stations for audience when public radio will have to become aggressive and capturing more of the local dollar?

A small FM station WJUX "Juke box radio" has been around for some years now. Appears to be aimed to the over 50 audience, and is playing commercials for resturants, breast exam clinics, car dealers and such. Looks like this station went after a "ninch" market instead of being yet another soft rock outlet.

WJUX is that small station in Bergen County, NJ that bought out some high school station, and also owns a translator in Fort Lee. The translated signal is on 103.1 as noone can hear the main signal.

# 2588. Chicago Radio Watch 10-8-95

Newsgroup: rec.radio.broadcasting
Date: 1995-10-09 00:00:00 UTC
From: JJB92@aol.com
Message-ID: <45ahb6$m80@vixen.cso.uiuc.edu>
Source record: 28988

Fallout from Howard Stern

As noted in the posting last Monday, classic rocker WCKG-FM (105.9) and Howard Stern parted ways. Howard's exile from Chicago radio lasted one day when Infinity owned hot talk WJJD-AM (1160) turned the morning drive over to the self proclaimed king of all media. WJJD, which has experienced a significant rating deterioration since switching from big band to hot talk, moved current morning hosts Ed Vrdolyak and Ty Wansley to the afternoon drive. Former Chicago personality Don Geronimo, who teamed with Mike O'Meara on an afternoon syndicated show were dumped by the station to make room for Eddie and Ty.

Change is in the air....

Ratings leader WGN-AM (720) (full service, Bears, Cubs) has shuffled the deck for its daily lineup. Roy Leonard, a twenty eight year veteran of the station has been shifted to weekends only. Roy will be on Saturdays from 7am till noon and Sundays from 9am till 1 pm. Roy had been on evenings.

Judy Markey and Kathy O'Malley enjoy extended hours as their hours expand to 1pm to 5pm daily. Ian Punnett gets the 5pm to 9 pm shift.

Long time radio personality Dean Richards, most recently of smooth jazz WNUA-FM (95.5), can be heard from 1pm till 4pm on Saturday and Sundays at GN. However, you won't hear much from Dean on Sundays until the Bears season ends. The Bears programming eats up most Sunday afternoons.

Scapegoat found.....

Jim McNicholas is out at all 70's WYSY-FM (107.9). Susan Sulling, most recently at WSB-AM in Atlanta has been brought in to replace Jim. Apparently, the station didn't see its repetitive format as the problem-they blamed it on of the messengers.

A huge round of applause please......

All news WMAQ-AM (670) has performed a huge public service by picking up "When Radio Was..." a syndicated program featuring classic radio programs. Not a fan of the show? There is still something in it for you. "When Radio Was...." will be heard nightly from 11pm till midnight. That means (hold your applause) that the worst sports talk show in America gets reduced from 7 till midnight to 7 till 11pm. That, friends, is a public service. (The show has three main hosts-Tom Greene (by far, the only one who has even an average knowledge of sports) Steve Olken and Chris Cross. Listen to the show and pity Tom being forced to spend time with the other two.)

Fall ratings out this weel-be back with the happy numbers on Tuesday.

Joe Bonk

# 2589. Southern California Radio Watcher: 10.6.95

Newsgroup: rec.radio.broadcasting
Date: 1995-10-09 00:00:00 UTC
From: "cHRIS O. Carmichael" <102776.224@compuserve.com>
Message-ID: <45ahb7$m83@vixen.cso.uiuc.edu>
Source record: 28989

(c)1995, Chris Carmichael
Here's the latest in radio waves from Southern California:
[contributions by David Alpern, Los Angeles]

Los Angeles:

Sports Choice. XETRA-AM is not the only sports choice in the southland. The San Diego-based [Rosarita, BC-broadcast] station used to have a relay at 670 in Simi Valley. LA Radio Watcher, David Alpern, told me earlier this week that KWNK [5kw/1kw DAN] has picked up a syndicated sports talk package from back east.

This addition brings to three full-time sports outlet for the LA area: XETRA-AM [690 50kw/50kw DA, to be 77kw DA]; the trio of stations at 107.1 called K-MAX [KMAX, KBAX, & KAXX] and KWNK.

WIN-WIN: KABC announced their entry in to the World Wide Web: http://kabctalkradio.com . This in addition to their area on America On Line [go: ABC Radio], and their e.mail address: mailto: kabcradio@aol.com .

KMPC [710 50kw/10kw DA] has started to replay the Tom Lekyis show. Why? Cross-town, and also co-owned KABC now has the Art Bell syndicated show at nights. It seems that long-time favorite IRA FISTELL was fired after his hit-and-run car accident became too much of a burden to CapCities/ABC. Also canned is SUZI LANDOLFFI's sex talk show. With Disney being a potential owner, is CapCities/ABC cleaning house before the change over?

But for Leykis-junkies, the replay was and now again, is a bonus. Leykis' show starts at 3 p.m., when some potential listners are still working. Also, could it be that San Diego's KOGO passed something to Chancellor Broadcasting, the syndicator of the show [probably not, but speculation is, and KOGO was mum on this]. I see this as a win-win situation: LA has a local Art Bell station [KABC] and Leykis-junkies still have their cake with replays on 710 Talk, KMPC, starting at midnight.

SAN DIEGO: With the trial FINALLY over, normal programmng has returned to KOGO [600 5kw/5kw DA]. G. Gordon Liddy is back in the daytime at 9 a.m., and Roger Fredinburg [another Chancellor offering] is on prior to the Art Bell night feast.

Noted earlies this week by me, and in print in the Escondido Times-Advocate: KOGO promos said it was the O.J. station. But this jury sees the honors to KFMB [San Diego 760 5kw/50kw DA] and KFI [640 50kw/50kw]. The phone lines ripped at both stations, and they complied: Letting the anger vent on what is seen as an unjust verdict. Stacy Taylor [KFMB] hit the airwaves after the announcemnt and stayed on until 3 p.m. Three San Diego television stations [KNSD, KGTV, and KFMB -TV] used Taylor in their respected reports on reactions in San Diego. Cross-town rival, Roger Hedgecock, was apparently on his way to Italy.

Stacy had his hands full, but his years of working the phones, and sanity, was a plus in the backlash by some callers.

Followed by Ted Leightner, Berger and Prescott, San Diego listners to KFMB got an additional three hours at 8 p.m., when a special analysis by SD lawyers was broadcast.

Meanwhile, Los Angeles' KFI again demonstrated that it has the best news coverage of any station from the basin. It started with Bill Handel broadcasting live from 5 a.m.; followed by John Kobylt and Ken Chiampou. As columnist Ken Leighton put it, the Southland wanted to talk about it, and KFI became the web. It continued through out the night with Marlyin Kagen to 9 p.m., and with Mr. KFI.

Hats off to KFMB and KFI: both stations served their intended market by giving news, entertainment, and a pipeline for listners to talk about THE VERDICT.

MUSIC: What was reported as a "falling, falling, falling" station, has increased an ad campaign on TV. San Diego's Rock Mix 103.7 [KMKX - San Diego] has continued it's ads on the four commercial network stations. Blues Brother Dan Akyroyd's "House of Blues" starts this Sunday at 7 p.m.

Falling no more? I believe so. When the change occured from ex-KJQY as a soft-AC, sister station, KyXy became the clear winner as the number one listened to station in San Diego. The ratings may have hit the basement for KMKW, and the elevator ride up is letting listners know that the station is there.

Yet another sign is that during the past two weeks, I've heard these stations in- and around business' in the UTC area of San Diego: KiFM [Jazz FM98] KKBH [The Beach], and KMKX.

MORE NEWS: starting with this report, David Alpern, from Los Angeles, is helping me with the Southern California Radio Watcher. David's fresh outlook will help this report have a more diverse outlook. LA Qs? mailto: alpern@bus.usc.edu

Just a mention about CHFI... It is now also on the SAP (Second Audio Program) of CFMT-TV here in Ottawa (channel 60, cable 14). I presume that it is also being carried on CFMT's two other transmitters - in London and Toronto.

Up until last week, CFTR (680 News) had always been on the SAP on CFMT's Toronto transmitter, but Rogers was forbidden by the CRTC to carry CFTR on the Ottawa transmitter. (Rogers tried when the transmitter first came on the air - and CFTR later vanished.)

Rogers is probably allowed to broadcast CHFI on the SAP in Ottawa because CHFI has been available North America wide on the Anik satellites for years.

Personally, I would prefer to have 680 News, but the CRTC doesn't always give us what we want, do they? :-(

>programming(in Cantonese & Mandarin dialects)airing 12 hours per day,with
>the rest of the time on weekdays and weekends taken up with programming in
>other languages.

This is interesting in that the CRTC denied a similar application by
Angelo Cremisio late last year to purchase CJCL-1430 on the basis that
"the applicant has not demonstrated that adequate untapped advertising
revenues or sufficient audience for the proposed ethnic service exists
in the Toronto region at this time." (Decision CRTC 94-929,
http://www.crtc.gc.ca/eng/bcasting/decision/files/D94929.TXT)

Fairchild is going to have to do a much better job of convincing the
CRTC that such a station is viable before this sale would go through.

## 2596. College radio... Why is it such a bad thing?

Newsgroup: rec.radio.broadcasting
Date: 1995-10-09 00:00:00 UTC
From: brocuba@ix.netcom.com
Message-ID: <45ahbi$m8j@vixen.cso.uiuc.edu>
Source record: 28996

Why, may I ask, is college radio experience not considered valid by most radio professionals? It seems to me that program directors and others responsible for hiring disc jockeys and other on-air staff members shy away from hiring people whose experience comes mostly from a college radio station.

Why is it such a bad thing to have experience at a college radio station? I'll concede the fact that some college stations aren't run in a professional manner by people who don't really know what they're doing. But these same people aren't really looking to make broadcasting their career of choice. All they want is a chance to have some fun and maybe impress their friends.

However, there are those of us who went into it with a different approach. Sure, we wanted to have fun and impress our friends, but the main thing was that we also wanted to get experience that would help us get a job after college. It was a learning experience. It was also a chance to find out what we could do and if we really wanted to be in radio.

In the time that I spent at Northwest Missouri State's KDLX-FMca/Maryville, MO, I saw a lot of people come and go. I saw a lot of people stay with it for just one semester, not wanting it as a career or getting frustrated easily, whatever the reason. I was with the station for five semesters, more than a lot of people. I also spent 3 semesters with the NPR affiliate at Northwest, including a year as the jazz music director (classical music was handled by the station manager). I stayed with it because I've known that broadcasting was what I wanted to do for as long as I can remember.

Some people may be thinking that college radio isn't valid because, in a lot of cases, the staff is strictly volunteer. At Northwest, since we got class credit for being on the air (the class was called Radio Practicum), we not only didn't get paid, but _we_paid_them_ for the opportunity. Because of that, pretty much everything I did at KDLX was done in a professional manner. I say "pretty much" because I was the co-host of a morning show for more than one semester. But everything else was done in a very professional manner from calling both ends of a basketball doubleheader to my interview with jazz guitarist Richard Smith (which I did for the NPR affiliate). To say that my work at Northwest is invalid because it is a "college" radio station is, in a way, unreasonable because the overriding factor in all of this should not be the location or the type of station at which the work was done, but the attitude and the manner in which it was performed.

Because of my own experience, and stories related to me by friends who have gone out and tried to get jobs in radio, I have avoided telling people that KDLX was a college station. While I was there, we won the 1992 Marconi Award for College Station of the Year. I tell people that we won the Marconi, but at the same time I don't say what it was for, afraid that it will be held against me.

Well, this has gone on long enough. I tend to ramble when I get angry and this has been building up for quite some time. I would appreciate any and all responses, either as a private e-mail or as a post to the group. I would also appreciate any job search advice that anyone would be able to pass along. I already know about the Airwaves Job Services web page (I have an ad there already). Thanks for taking the time to read all this.

In article <44qveg$qfv@vixen.cso.uiuc.edu>, "'David Allan Boucher'" <dboucher@tiac.net> says:

>
>
>Does anyone know the current whereabouts of Dick Summer?
>
>He is a former Boston & New York personality.
>
>Having worked at WBZ, WMEX, WNBC, WYNY, WNEW...among others.
>
>If you can shed some light on where he is now, I'd appreciate it!

I replied directly to David already, but in case it joggs anyone else's memory ....

I do remember hearing Dick Summer on the radio late one night, within the last year.

It sounded like a syndicated program that was being carried by one of the Boston area radio stations. But for the life of me I can't recall which station or anything else that would help identify the source. I was very surprised to hear him after so long ... last time I heard him must have been the late 60's.

I always imagined Dick as having a big smile when he spoke. His voice just sounded that way to me.

## 2598. Re: Tina Delgado is alive?

Hello. We're building relationships with people interested in a niche we call New Music/Artist Development Programming(tm), the essence of which is helping rock/pop artists find a place for themselves in music while putting a real face on the nature of the business.

Each day a thousand web surfers are taking part in this next phase in the evolution of music programming. The entity creating the momentum is a new species of music programming company, Vision Broadcasting Network, which brings together superstar artists, exciting newcomers and successful behind the scenes professionals, to celebrate and encourage the joy and freedom which is the pursuit and special appreciation of pop/rock music artistry.

For more information, please dial up our website. thank you!

sincerely,
floyd vasquez

Well, since nobody else has replied, I guess I'll try
to field this one. The market depends an awful lot on where
you are. If you already have DJ experience, ask the local
radio stations if they need anyone for weekends or overnights.
Many stations fill these times with automation and aren't prime
listening times anyway. You probably won't get much money (the
50kW here pays about $6/hour) but you'd get experience and you
can keep your day job.

If you are in a major market, chances are slim that you
will get air time without having a decent level of DJ
experience beforehand.

If you want to DJ, then you can probably be a good DJ!
Like everything else, if you put in the time and bang your head
into the wall enough times, you can do it.

Although, I would think the reason for this test is not determine
changing the format, but to find out what music you play that your
listeners think you shouldn't (and what you're not playing that they
think you should).

>ground wire on the -21v input?

It does not sound like a good idea. It would probably kill some control circuitry or something. Both items probably have their "grounds" in common, through grounded power cords or chassis connection, or maybe an audio interconnection. Your idea would "short out" the -21v power source. If the two units were electrically isolated, it might "work", but the voltage difference could pose a hazard.

An electrically minded person could build you a little relay circuit for a few bucks, to tack onto the tone detector, which would provide the necessary isolation.

Andy

## 2608. Radio Broadcast Engineer

Newsgroup: rec.radio.broadcasting
Date: 1995-10-12 00:00:00 UTC

Can anyone please help me?

On the weekend of October 21st the Scout movement is involved in the Jamboree On The Air (JOTA). We at the Phoenix Venture Unit (Kenton & Kingsbury District) North West London, had arranged for a licenced radio operater an a few of his collegues to use our Unit Den as a base for a radio station. We have made all the arrangements for masts and wires to be strung for aerials telephone lines etc. but he has just been given the completion date for moving house and it is that weekend, therefore we are without a licenced operator. Is there anybody or a radio group that would like a change of venue with opportunities for new contacts that would be willing to help us out, time is of the essence with regard to arrangements and licences etc. If you can help or require any further details please reply asap.

# 2614. KPLX Format Change

Newsgroup: rec.radio.broadcasting
Date: 1995-10-12 00:00:00 UTC
From: david627@dallas.email.net
Message-ID: <45i0cn$rq9@vixen.cso.uiuc.edu>
Source record: 29014

In response to the question that Rob Bass asked in a recent Airwaves... he asked if Dallas/Ft. Worth Country Station KPLX was on the verge of a format change.. since the station is owned by Sesquehana and is sister station to Talk Radio 570AM KLIF... I had to find out somethings about this.. so I have heard on the street that KPLX has been tinkering with the idea of going Alternative Music... which would put it in competition with KDGE the EDGE... sounds pretty risky to me.. but since there is already three other country stations in the market.. KPLX made it 4... this would elimate some of the clutter on the airwaves in Dallas/Ft.Worth...

There are other rumors afloat around the 7th largest market in the US... on this subject.. we have heard that Infinity might be making a change in middle management at the oldies station KLUV but this is strictly speculation.. and this has been going on for almost a year now... and also hearing that FINALLY!!! KAAM 620 will be up and on the air by end of month... Sports Radio 1310 the TICKET has a NEW PD... their 3rd in 18 months.. with the departure of Danny Owen... SFX has brought in Mike Thompson from Atlanta to run the show at the TICKET... welcome to big D Mike and good luck with the station...

Other moves in might see some other changes coming at the begining of the New Year... so we will keep an eye and ear out for those changes for you.

Dave Michaels
Dallas, Texas

## 2615. New talk format doesn't help KLSX-FM, Los Angeles (much)

Newsgroup: rec.radio.broadcasting
Date: 1995-10-12 00:00:00 UTC
From: "Harvey M. Spencer" <hspencer@igate1.HAC.COM>
Message-ID: <45i0co$rqa@vixen.cso.uiuc.edu>
Source record: 29015

The switch from rock classics to all talk (MON-FRI talk, still music on weekends) didn't do much for the ratings of KLSX 97.1 in L.A. It only increased
its audience share 0.1% to 2.3%, or 18th place out of 80 stations.
Hip-hop music station KPWR-FM retained first with 5.3% and spanish language
KLVE-FM and hard-rocking KROQ-FM were second and third. KLSX-FM, however, moved into first place in morning drive with Howard Stern, but as their dismall overall rating shows, everyone tunes out after Howard. Nevertheless, the station manager proclaimed victory with "We're all very pleased here".

# 2616. "Local" radio from 1000 miles away

Newsgroup: rec.radio.broadcasting
Date: 1995-10-12 00:00:00 UTC
From: Michael Grogan <m_c_0007@frank.mtsu.edu>
Message-ID: <45i0cp$rqd@vixen.cso.uiuc.edu>
Source record: 29016

I am inquiring on the effects of what I call "local radio from 1000 miles away". What do you think the effects of the 24-hour syndicated music formats provided by companies such as Unistar to mostly medium/small market stations will be?

While they are saving money by choosing the network's music and jocks over their own, I believe that stations that choose the network programming are only hurting themselves in the long run. With the advent of services like DMX (Digital Music Xpress on many cable systems) and similar pending broadcasting services similar to it, local stations will need localism in order to compete with the non-advertising music services.

If a station is already airing a nationally syndicated music format, they will lack the localism that will be necessary for survival. The only difference between a service like DMX and the station on syndication will be DMX's lack of commercials. Which do you think the average listener will choose?

Back in the mid 80's there was a DJ on WSPK "K104" in Poughkeepsie, NY whose on air name was Dr. John Barron- the Deacon of Love. Does anyone know where he is now? I'm not sure when he left there, but last year I while visiting Myrtle Beach, I thought that I heard his voice on a local station. If anyone has any information, please post! Thank you. Alicia_Ignacio@Interep.Com

## 2620. Clear channel AM stations

Newsgroup: rec.radio.broadcasting
Date: 1995-10-12 00:00:00 UTC
From: EDNSTRASSBERG@cahners.com
Message-ID: <45i0bj$rne@vixen.cso.uiuc.edu>
Source record: 29020

This is in reply to a question from Knisley@awod.com

The US clear channels are

640 KFI Los Angeles
650 WSM Nashville
660 WFAN New York
670 WMAQ Chicago
700 WLW Cincinnati
720 WLS Chicago
750 WSB Atlanta
760 WJR Detroit
770 WABC New York
780 WBBM Chicago
820 WBAP Fort Worth
830 WCCO Minneapolis
840 WHAS Louisville
870 WWL New Orleans
880 WCBS New York
890 WLS Chicago
1020 KDKA Pittsburgh
1030 WBZ Boston
1040 WHO Des Moines
1100 WWWE Cleveland
1120 KMOX St Louis
1160 KSL Salt Lake City
1180 WHAM Rochester
1200 WOAI San Antonio
1210 Can't recall current call letters Philadelphia

These are the class IA stations. All operate with 50 kW full time using antennas tall enough to produce an effective field strength of at least 225 mV/m/kW. Until the late 1950s, none of these stations except WABC had another station operating on their frequency at night in the 48 contiguous states. KOB Albuquerque (now KKOB) was assigned to 770 in 1940 after the channel to which it had been assigned (1030) was lost to US use in New Mexico. WABC battled the

assignment of KOB to its channel in the courts for over 30 years.

The class IB clear channels are

680 KNBR San Francisco
710 WOR New York/KIRO Seattle
810 WGY Schenectady/KGO San Francisco
850 KOA Denver
1000 WMVP Chicago/KOMO Seattle
1060 KYW Philadelphia
1070 KNX Los Angeles
1080 WTIC Hartford/KRLD Dallas
1090 WBAL Baltimore/KAAY Little Rock
1110 WBT Charlotte/KFAB Omaha
1130 KWKH Shreveport/WBBR New York
1140 WRVA Richmond (call letters may have changed)
1170 WWVA Wheeling/KVOO Tulsa (call letters may have changed)
1190 KEX Portland/WOWO Fort Wayne (WOWO's owners, who also own daytimer WLIB New York, have applied to downgrade WOWO to a Class II station and upgrade WLIB to full-time operation.)
1500 WTOP Washington/KSTP St Paul
1510 WLAC Nashville/KGA Spokane
1520 WWKB Buffalo/KOMA Tulsa
1530 WSAI Cincinnati/KFBK Sacramento
1540 KXEL Waterloo IA
1560 WQEW New York/KNZR Bakersfield, CA

Mexican clear channels are 730, 800, 900, 1050, 1220, and 1570. Until sometime in the 1960s I believe, no US stations were allowed to operate on Mexican clear channels at night except by treaty. Two 50 kW fulltime stations that have long been assigned to Mexican clear channels are WEVD New York on 1050 and WKNR Cleveland on 1220.

Canadian clear channels are 690, 740, 860, 990, 1550, and 1580. At one time, except for two stations on 990 (in Philadelphia and Knoxville TN), all US stations operating on Canadian clear channels at night had to be located

more than 650 miles from the nearest point of land in Canada.

1540 is shared as a clear channel by the US and the British West Indies (Bahama Islands)

All of the US Class IB stations except KNZR operate with 50 kW full time. KNZR uses 25 kW Day and 10 kW Night. KNZR increased its day power (from 10 kW) only in the last couple of weeks. The same requirements on antenna efficiency as apply to the Class IA stations apply to Class IBs.

During the daytime, there is no significant difference between a Class IA and a Class IB. Both are protected from co-channel (but not adjacent channel) interference to the 0.1 mV/m contour. Class II and III stations are protected to the 0.5 mV/m contour during the day. Class IV stations are protected to the 1 mV/m contour during the day.

At night, Class IB stations are protected from co-channel interference to the 0.5 mV/m 50% skywave contour. All of the Class IB stations except the following use directional antennas at night: KNBR, WGY, KOA, and KNX. The directional antennas protect the co-channel Class IB station. In addition to the Class IB stations, Class IB channels have been used for fulltime Class II stations that protect the co-channel Class IBs. There are many 50 kW fulltime Class II stations on Class IB channels. Here in Boston, examples are WRKO on 680, WEEI on 850, and WNRB on 1510.

All of the class IA stations except WBZ and WWL operate nondirectionally. WBZ and WWL use directional antennas both day and night to restrict their signals from the Atlantic Ocean (WBZ) and the Gulf of Mexico (WWL).

In the 50s or 60s, the FCC assigned Class IIA stations to about half of the IA clear channels. The FCC considered, but ultimately decided against, allowing the remaining IAs to operate with powers higher than 50 kW. 750 kW was considered. Class IIAs were located in sparsely populated areas, mostly in the west. For a time, they were the only stations other than the IAs that were permitted to operate at night on their channels. Their nighttime interference-free contours were determined by the 10% skywave signals delivered by the co-channel IA station. Later the FCC allowed additional fulltime Class II stations on all of the IA clear channels. These stations are at least 750 airline miles from the co-channel IA stations. Originally, these Class II stations were restricted to 1 kW night and had to protect the dominant (IA) station and any IIAs on the channel. Then the FCC began easing up on the 1 kW restriction, allowing stations more distant from the IA than any IIAs on the channel to use higher nighttime powers. Now, many Class II stations on IA channels use nighttime powers higher than 1 kW. In addition, restrictions on US stations operating at night on Canadian clear channels were relaxed. In return, Canada assigned multiple Class II fulltime stations to most of the US Class IA channels.

Clear channels were controversial. They represent the vast majority of the AM channels yet, even now, are home to a minority of the AM stations. The argument for breaking down the clear channels (allowing multiple stations to use them at night) was that they were an anachronism and represented the waste of a scarce resource. Nevertheless, in sparsely populated areas (even some parts of Pennsylvania and New England) at night, when you are driving along the

highways, the only stations you can receive clearly are the clears. The pity of the current situation is that so many clear channel stations are simply downlinking their nighttime programming from some satellite, depriving radio of its distinctive regional character.

# 2622. College radio... Why is it such a bad thing?

Newsgroup: rec.radio.broadcasting
Date: 1995-10-12 00:00:00 UTC
From: richwood@commspec.com
Message-ID: <45i0bn$ro8@vixen.cso.uiuc.edu>
Source record: 29022

BR> Why, may I ask, is college radio experience not considered valid by
BR>most radio professionals? It seems to me that program directors and others
BR>responsible for hiring disc jockeys and other on-air staff members shy away
BR>from hiring people whose experience comes mostly from a college radio
station.

Alan,
Probably because it isn't real life (in commercial radio terms).
Non-commercial college stations have no pressure to make money or win
ratings. That's the lifeblood of commercial radio. There's a tendency
in college radio to indulge one's own preferences. In commercial radio
we need to serve the needs and whims of listeners, so shows have to be
tailored to the audience rather than the talent. There's already a
dearth of great, compelling, experienced talent on commercial radio. We
don't have the luxury of having not-so-great inexperienced talent.

Radio is a business. Very few college stations appear to be run
that way. Are you taught how to deal with clients? How about the sales
department? Do college jocks understand the traffic department? Since
none of the above are part of college stations, I'd guess not. Do
college jocks understand promotion, marketing and merchandising?

In most major markets, the days of talent as artistes are long
gone. Nowadays they have to schlepp themselves around with the sales
department to help sell their shows. God only knows why, but
advertisers love to meet folks on the radio. Personalities always
complain about having to have lunch with some advertiser who bored them
silly. The only thing comparable in non-commercial radio is having to
have tea with some blue haired matron with a promiscuous checkbook.

Try KVEG-840 out of Las Vegas. That is if you haven't got an interfering station (830-850 close by). I've heard him on KVEG in the evenings (and quickly switched stations, he he). Can't stand the guy. He was originally on the old SEN Network, then moved to Atlanta (I believe). Don't know what network originates his show now. Give KVEG a try.

# 2624. Putting DAT on Disc at a low cost

I have a need to have a few DAT tapes dubbed onto CD's. At the present time, I cannot afford to run out and buy a CD recorder, given the price tags on those things.

However, I am wondering what the ballpark cost range would be, to have someone do this for me. I have seen ads in the back of trades for companies that will do this, but they only do it in mass quantity. I only need 1 to 3 copies of these DAT tapes to Disc. Also, some of the material I have on these DAT's is copyrighted.

This is for my own personal use, I am not seeking to make a profit from having these DAT's dubbed onto Discs.

Anyone know where I might be able to find someone who can do this for me at a reasonable cost?

Better yet, does anyone know when CDR's will be more affordable???

thanks

Rob Bass

I am Journalism student at the University of Regina in Saskatchewan, Canada.
I am researching the possible journalistic uses of Digital Radio in the future for a class presentation. I was wondering if anyone in this group might be able to help me out. Some questions I have:
Will Digital Radio affect radio journalism in the future?
Who will be able to access Digital Radio?
Will almost anyone with the technology be able to put out their own digital radio broadcasts?
What implications will DR have on the future of radio? of Journalism?

Any help would be greatly appreciated. Please post posts here or email to: stoffel@harrier.sasknet.sk.ca

Thanks again,

Derek Stoffel

There's an old Raytheon hobbyist book, called ``Things to do with the CK-722'' or something, that describes a transistor radio powered by a crystal set. There's no reason the crystal set has to be tuned to the same station you're listening to; in fact, an army of crystal sets, tuned to the local tower, might suck off enough energy to run a toaster.

Hi,
I am managing a radio-station located close to an AM tower
(transmitting programs of other station). I have many problems with a
electromagnetic field generated by this tower.
- audible programming over phone lines
- problems with fire-detectors
- problems with my computer network (on longer connections)
- and audible AM programming over some connections in my audio system.
There are some ways to fight with these problems (filters, extra
shields, etc.), but it means costs.
Here in POLAND we have 2 Volts/meter maximum level of electromagnetic
field generated by such towers in places where people can enter.
My location is about 1,5 V/m.

I'm searching for a former co-worker of mine. Glen Boychuck is originally from Winnipeg, Manitoba having worked at CFRW and CITI-FM here. In the late 80's, he went to Burlington, Vermont to work at a CHR top 40 station. Next, he moved to Phoenix to do mornings at an FM station and was replaced by Charlie Van Dyke. After that, who knows? Sorry, I don't know what the call letters of his American employers were. If any can tell me where he is at, please email me. Thanks.

Brent

>computer, etc.

I manage a 50 kw am station on the border of Israel and Lebanon. We also have a 10 kw shortwave and a 25 kw shortwave, but the am transmitter is what we feel affects from. The main problem we have here in a town of 1000 about half a mile from the towers is continuous audio signal on the phone line. The level varies from house to house, but in some cases the background level is rather high. Not loud enough to drown out the conversation, but clear enough to discern every word of the program. On the other hand, it has never caused me problems with my modem or fax that I know of. We also have a microwave link to some phones nearby and these lines have no special problems other than the one noted above.

In short, unless the phone company did or will do some good work shielding your cables, you will probably have some background music on the phone. But I doubt you will suffer much on your modem connections. Of course we have poor ground conductivity here and your situation may be quite different. Hope your station will provide some easy listening music!

>A local radio station wants to build six 350 foot transmission towers >about .5 mile from my neighborhood.

I live in Needham Heights, Massachusetts, an area dominated by four 1200-foot TV and radio towers spewing out megawatts of everything from FM radio to cellular phone transmissions. The only practical consequences of living here is that some FM stations transmitting from elsewhere are hard to receive.

In my old apartment in another part of Needham I used to get Rush Limbaugh on my phone. To keep him and his ilk out of my modem I used an RFI filter like the ones Radio Shack sells.

I believe radio transmitter sites are pretty benign as far as neighbors go. They don't pour smoke into the air or dump chemicals into the water. They don't attract large trucks at 6 am or clog the roads with traffic. And big directional AMs like the one you describe take up a lot of land that would otherwise get parcelled out and occupied with houses or condos.

Radio stations are required to resolve interference problems involving telephones or radio/TV reception near their transmitters AT THEIR EXPENSE. I suggest you and your neighbors talk to the owners of the station before calling out the lawyers. The radio people may be very accomodating.

Up & down the dial in the #40 market:

*Those fretting over not having Canisius or Niagara U.college basketball
on the radio may have some hope,according to a report by Jim Fink in the
October 9th Business First. Canisius sports information director John Maddock
said that the two schools were trying to get a joint package with a station,
and hoped that it will be finalized before the hoops season starts next month.
The station appears to be in Canada.(Prediction:Could it be The Fan 590?)
St.Bonaventure fans can listen to the Bonnies games on WHDL/1450 in
Olean,as well as WPIG/95.7(which does enter the Buffalo area,albeit not very
well).

*More on the Edge v.Edge battle:Jim Fink had another article in the same
issue about the tussle. Seems that Mercury(WEDG's owners)had made an
agreement with CFNY's owners,Shaw Communications,to have itself listed in
Arbitron ratings only by WEDG and not by the CFNY/Edge listing. However,when
CFNY(102.1 the Edge)aired a series of ads playing up their station and
moniker,WEDG(103.3 the Edge)got a ceast & desist order on Sept.15 against
'FNY. 'EDG GM Charlie Banta was quoted as saying that it was "a matter of
properly protecting the rights that we paid for." 'FNY PD Stewart Meyers,
however,was quoted as saying that "it's not like we're going after the
Buffalo market"-'FNY only draws 2% of its annual gross sales from the Buffalo
area.
As I said before,it's good for a few laughs.

*CFMX(96.3/103.1,Cobourg/Toronto;classical)has gotten CRTC approval to
use a SCMO(Subsidary Communications Multiplex Operation)channel to distribute
a Tamil-language service on its Toronto transmitter,according to a October
2 decision.
The CRTC dismissed arguments from CIAO(530,Brampton),CJMR(Mississauga)
and CIRV-FM in Toronto,who all said that it would result in a programming and
revenue loss-saying that CIAO & CJMR's signals are weak in downtown Toronto &
Scarborough,where the majority of the Tamil-speaking community resides.

*CHOG(640)will switch from AM640 to Talk640 at midnight tonight. Roy
Green's midday show will be done from the studios of CHML(900,Hamilton)and
be fed to Talk640-it's being done that way because CHML's signal doesn't
get full coverage in parts of the Metro Toronto area.
Bill Carroll hosted a listener party in the lobby of the station this
morning during the final AM edition of Toronto Talks-with free food.

# 2634. New England Radio Watcher: WHIM, WEVO, and more

Newsgroup: rec.radio.broadcasting
Date: 1995-10-12 00:00:00 UTC
From: fybush@world.std.com
Message-ID: <45i0b6$rlv@vixen.cso.uiuc.edu>
Source record: 29034

*Providence's "WHIM Country" has moved off its longtime 1110 frequency for the second time. Regular observers of the radio scene in the Ocean State (and I'm sure I'll find one eventually) will remember that the country format and "Whim" slogan disappeared from WHIM-1110 East Providence in 1992, when that station became all-news WWRX, "1110 CNN." "Whim" took up temporary residence at Pawtucket's WICE (550), but when 1110 CNN folded, the country format and WHIM calls returned to 1110. Now they're gone again, this time to 1450, the former WKRI in West Warwick. WKRI had been standards during the week, and Spanish on the weekends. The Spanish has moved to 1110, which will be known as WPMZ once the call change goes through. 1110 will be sold to Video Mundo Broadcasting; 1450 to Providence Broadcasting Co., which I believe is the same Philip Urso-owned group that also owned 1110. The 1450 signal does not have great coverage into Providence, and I wonder how well WHIM will be able to compete there.

Very very longtime observers of the Providence radio scene will recall that WHIM was the only country station in Rhode Island for years -- until 1989, when WMYS 98.1, a 50kw FM in nearby Fall River, Massachusetts went country as WCTK. WHIM once had an FM on 94.1, the present-day WHJY. The 1110 transmitter is still at the studio location of WHJY-FM and its current sister AM, 920 WHJJ.

*Newport RI could have a new classical signal soon. An application is pending at the FCC for a new 55-watt translator there on 96.5, for WCRB 102.5 Waltham-Boston. Classical music is in short supply in Newport, since it's very much in the fringes of WCRB, and even the 100kw signal of Boston's WGBH 89.7 is spotty in areas.

*New Hampshire could have much more classical music on the radio within a few years. New Hampshire Public Radio wants to expand to a second network. Currently, they operate WEVO 89.1 in Concord, with satellite stations WEVN 90.7 Keene and WEVH 91.3 Hanover, along with WEVO translators in Nashua and Dover. Now they're getting ready to apply to the FCC for a new FM to serve the Concord-Manchester-Nashua area, to be the flagship of a news-and-information service, allowing WEVO to become an all-classical outlet. There's not much FM space left, although since the 88.3 CP in Nashua was deleted last year, NHPR might make a bid for that channel. Southern New Hampshire already gets good signals from Boston's WGBH 89.7 and WBUR 90.9, the Seacoast is served by Maine Public Radio's WMEA 90.1 Portland, and Vermont Public Radio's WVPR 89.5 Windsor covers much

of the western part of New Hampshire...so the new service would really be a third or fourth service for most listeners. NHPR is also trying to improve its WEVO service to northern New Hampshire, with an application for 102.3 in Lancaster NH. That channel was once home to the now-defunct WLGW-FM. At least one other competing application has also been filed.

*Wickford, Rhode Island's little WKFD-1370 has been dark since 1990...but the M Street Journal reports it will be back on the air in November. The 500/160 watt station was destroyed by a fire, and when I was last by their old site on Updike Ave. in Wickford, the tower was gone and the building was heavily damaged (there was also a nasty-looking wasps' nest there, so I didn't inspect too carefully.) I don't know whether they'll return to the old site, or find a new one.

*Not quite New England, but you'd never know it to listen after dark: WPTR in Albany, the 50kw signal on 1540, is about to get rid of its historic calls, the only ones the station has ever had. Crawford Broadcasting has closed on its purchase of the station from Albany Broadcasting (WROW-590/WFLY-92.3/ WYJB-95.5), and the new calls will be WDCD. Crawford has a history of trashing historic calls...they killed off the WFBL calls in Syracuse in 1993, turning the 1390 signal there into WDCW. The WFBL calls dated back to 1922. Thankfully, they found a home on the former WSEN(AM) 1050. Perhaps someone in Albany is already planning to resurrect the WPTR calls. One can hope...

*Oh yeah, that Simpson guy: I was at work in the newsroom when the verdict came down, and unlike Mike out at KFBK, our newsroom is so deep inside the concrete-and-steel building that no RF penetrates. I know WBZ carried the verdict live with ABC coverage, and I'm told almost every other AM in the market carried it as well. Me? I was listening to ABC's SEDAT feed of our sister station, KFWB in Los Angeles :-)

Hopefully this is the first time this is posted:

Black Radio: Telling It Like It Was is a 13 part series that will air on PRI affiliates as part of a 52 week series strip with Harlem Hit Parade starting in January 1996. The series will explore the role of radio during great milestones of Black American Culture and the history in this country, as well as the state of black radio today.

Radio Smithsonian is looking for airchecks for its new series, Black Radio: Telling it Like it Was. The Smithsonian is asking collectors and the public to help locate airchecks of radio personalities and programs. The receipt of all contributions will be acknowledged. If the aircheck you contribute is used in the program, uou will be listed as a contributer in a letter distributed during the series airing, and you will receive duplicate copies of this letter of acknowledgement. If you have airchecks for the radio personalities and/or programs listed below, please submit them to:

Jaquie Gales-Webb, producer
Radio Smithsonian American
History Building, 12th and
Constituion Avem MRC 645, NW
Washington, DC 20560

WISH LIST

any KWAM, KWEM West Memphis in the '50s
any KDIA San Francisco '70s
Vivian Carter, WWCA Chicago '50s
Jack Cooper, WBSC and/or others Chicago '40s, '50s
Frankie Crocker, WWRL, WLIB New York '60s, early '70s
Yvonne Daniels, WVON Chicago '60s, '70s
Daddio Daylie, WVON, WGN, WAAP Chicago '60s
Dizzy Lizzy, KYOK Houston early '60s
Jack Gibson, WERD Atlata, '50s
Jocko Henderson, WOV, WADO New York '50s
Hal Jackson, WOOK, WWRL Washington DC, NY '50s, '60s
Herb Gent (The Cool Gent) WVON

Telling It Like It Was is also looking for the following:
Civil Rights Coverge:

1. Oscar Brown's 1950s radio show from Chicago, The New Negro Front
2. Gatemouth Moore from Birmingham, Al in 1952
3. Al Bell (Isbell) from Little Rock, AR market in 1954-57
4. WBBO Augusta, GA during 1968 riot
5. PSA's made by James Brown to Calm citizens from WLIB, WOL, WOOK, and others

6. Georgie Woods airchecks, especially any that relate to the civil rights movement

Other Specific Programming:

1. Jack Cooper's The All Negro Hour and The Missing Person's Program, Chicago
2. Soap Operas: Romance of Helen Trent and Our Gal Sunday with Franklin Brown
3. Any Paul Robeson programming from the 1930s, including Shell Chateau, hosted by Al Jolson with Mr. Robeson playing the part of African Chief.

National Commercial for Cosmetics, Cigarettes, Beer, and Food geared toward a Black Audience.

Any photos of black radio personalities.

For further information or to ask questions regarding materials being sought, contact Jacquie Gales-Webb at 202-357-4072 ex 192.

>not PC.

Just to make a clarification here:

There is no such thing as ``Mac format'' or ``PC format'' sounds;
there are translation utilities for almost every sound-file format on
Earth for almost every sort of computer. The sound files at the URL
listed above happen to be in `AIFF' format, a common format on
non-Intel personal computers and on Silicon Graphics workstations.
Generally speaking, however, it is better to use a more standard
format; not all the world is a PC or Macintosh! All the sound files
in the Boston Radio Archives are stored as mono, 8-kHz mu-law sound
files in the Sun/NeXT format. (This is not really a contradiction;
the useful feature of the Sun/NeXT format is that the header is very
short and all at the beginning of the file, so if the header is played
as if it were sound data, it doesn't make much difference.) This
representation is the practical minimum format for sound playback on
computers out there: every machine, without exception, that has sound
hardware is capable of playing back these sounds. It is also the
format used by North American ISDN phones. It is also the only audio
format with an Internet Standard media type, `audio/basic'.

I point my users to ftp://ftp.cwi.nl/pub/audio/index.html as a good
starting point in looking for programs to translate audio files from
our format to one that their computer likes better. In particular,
you can find the `sox' program, which is a universal audio format
translator.

Stan Campbell <scamp@freeway.net> wrote:

>Does anyone have experience with sending/receiving audio on internet or aol?

You will probably get lots of replies from various people flacking
their own proprietary software as a means to send audio over the net.
On the whole, I would suggest to everyone out there that the best
approach is to wait. Most of the designs that I have seen or heard
about are really quite poorly suited for the Internet that actually
exists, and the technology to do Internet audio /right/ is still in
the early stages of trickling out of the research laboratories and
into the commercial world. I would not invest more than a few cents
in the technology that's commercially available right now, because I
don't believe that it will be a cost-effective distribution mechanism
in the future, and a lot of users are going to get burned by having to
completely replace systems that they do buy.

There is a large group of people in research institutions who have
operational experience using this technology for conferencing,
including the people I work for. Carl Malamud's Internet Multicasting
Service uses the same technology, in a model much more familiar to
traditional broadcasters.

(IMS uses the European GSM cell-phone codec design, which is
theoretically capable of delivering telephone-quality audio over
9600-bps links, but you had better not try to do anything else over
the same link. It is also very CPU-intensive.)

I wanted to mention that there is a discussion list that covers the art and technique of PBP Sports. PBP-L is designed to cover critique, news, jobs, hints, new equipment, and other items related to the art of PBP. If you are interested, you can subscribe to the list by sending an email message to: Listserv@listserv.syr.edu and in the body of the message type Subscribe PBP-L Firstname Lastname where Firstname Lastname is your name.

That is it. The list is open to professionals, students, fans, and others who want to discuss the art of PBP sports. It is not meant to be a sports discussion list in general, but a focus on the PBP aspect of broadcasting. I hope you will give it a try.

Do you remember a series of albums (pre CD by a long way) called Cruisin - A History of Rock & Roll Radio? If not, basically they were a series of albums, one per year, featuring a different radio station, one of their Jocks and the years hits. Some of radios legends were included, Dick Biondi, B Mitchell Reid and Dr Don Rose amongst them.

Cruisin 1965, released in 1973, featured the famous Robert W Morgan at Boss Radio 93 KHJ, Los Angeles. The Real Don Steele was at KHJ at the time and is mentioned on the sleeve notes and on the album.

The sleeve notes say: Tina DelGado is alive!!! a lady would shriek mysteriously, prompting a shower of exclamation pointed high velocity, loosely-rhymed ejaculations from The Real Don Steele.

On the album Robert W mention that The Real Don Steele is out and about in the Boss Mustang GT and talks to him on the phone during the final link. He then says: "Well, be sure and tune in this afternoon at 3 on Boss Radio and find out if Tina DelGado is still alive. In the mean time that wraps it for Robert W, Frank Terry is next with more magic key finalists, and Ill see you again tomorrow Morgan at 6.5 central time , have good day and thank you Los Angeles.

Incidentally the album also features an appeal to school kids from Sonny & Cher, Be cool - go back to school, and the number one song in Boss Angeles and the most requested hit this Morgan, Eve of Destruction - Barry McGuire.

Im sorry that this doesnt answer the question, who is the mysterious Ms DelGado?, but it shows that shes been around for at least 30 years.

# 2646. The Avant-Garde with Scott Sommers - Sundays, 10 PM - Midnight - KPFT 90.1 Houston and KEOS 89.1 College Station/Bryan

The Avant-Garde program with Scott Sommers features the new music of this century and the next. For almost 20 years, Pacifica Radio in Houston has presented this show which highlights Houston composers and musicians along with their national counterparts. The Art Guys, Voice of Eye and Tom Bickley are featured as prominently as Philip Glass, Laurie Anderson and Pauline Oliveros. Tune in Sunday evenings from 10 PM to Midnight to KPFT 90.1 FM, Houston or KEOS 89.1 FM, College Station/Bryan to hear what is new in new music.

HOUSTON AND COLLEGE STATION COMPOSERS - CALL FOR RECORDINGS: The second and fourth programs of each month are open to the new musicians from our community. Contact Scott Sommers if you would like to have your music presented on the air. Call (713) 526-5738 during the program hours or write to Scott Sommers c/o KPFT-FM, 419 Lovett, Houston, TX 77006.

Oh, wow. This is stunning, what a burn to seniors that they are laden
with spendable money but won't respond to advertising. Long distance
companies at that. Please. The LD companies might want to look into
service and let all Americans get on with their lives instead of
endless commercials touting their version of the latest most wonderful
LD scheme of 'discounts.' Advertise when they have something to say
other than that their "plan" is the greatest. Somewhere in my tiny
little brain there is a voice that says "why don't advertisers who
WANT to target 50+ SUPPORT this group in tangible products and
services which their age group is particularly interested?

>If seniors want service from others they will have to decide to be part
>of the economic reality instead of making continual demands for things to
>be handed to them on a silver platter.

Part of economic reality? Silver platter? Where is this coming from?
Radio can target any group it chooses to. It looks like that's too
much trouble so it's not even tried. If it's not absolutely the
biggest market, then it's not pursued.

I've done some work for a company that targets music CD's to 50+
buyers with a carefully controlled marketing scheme, and has done
well. Broadcast radio has lost the ability to garner a market and run
with it.

# 2649. New England Radio Watcher: Triopoly Arrives

Newsgroup: rec.radio.broadcasting
Date: 1995-10-14 00:00:00 UTC
From: fybush@world.std.com
Message-ID: <45nl0k$2hu@vixen.cso.uiuc.edu>
Source record: 28900

*Boston is getting its first FM triopoly, as soon as Congress approves the rule change to allow it (apparently at this point it's "when" and not "if," alas). Fresh from its purchase of Pyramid Broadcasting (locally, CHurban WJMN-94.5, CHR WXKS-107.9, and satellite-standards WXKS-1430), Evergreen has signed a deal to buy country WKLB-105.7 from Fairbanks Broadcasting. WKLB was the last stand-alone class B FM left available for purchase in the Boston area. CBS's WODS-103.3 is a stand-alone for now, but will be paired with Westinghouse's WBZ-1030 when that deal closes. And Charles River Broadcasting's classical WCRB-102.5 is a stand-alone class B, but is not legally available for purchase.

So what does it all mean? WKLB has been locked in a brutal format war with Greater Media's WBCS 96.9 since April, 1993. Perhaps Evergreen will withdraw WKLB from the country wars and go after someone else, though just about every known format is covered in the market already.

Not included in the (reportedly $30 million) deal is Fairbanks' talker, WKOX 1200 Framingham. The hot rumor around town has WKOX joining the American Radio Systems lineup (talker WRKO-680, sports WEEI-850, 70s WEGQ-93.7, and hot AC WBMX-98.5) as soon as triopoly is approved.

In terms of major players, here's how Boston now breaks down, in order by Summer '95 12+ market share:

ARS - 680 WRKO, 850 WEEI, 93.7 WEGQ, 98.5 WBMX
Evergreen (including WKLB) - 1430 WXKS, 94.5 WJMN, 105.7 WKLB, 107.9 WXKS
Infinity - classic rock 100.7 WZLX, modern rock 104.1 WBCN
Westinghouse/CBS - news/talk 1030 WBZ, oldies 103.3 WODS
Greater Media - ethnic 1150 WMEX, country 96.9 WBCS, AC 106.7 WMJX
Granum - AAA 92.9 WBOS, soft AC 99.5 WSSH

And right there you have EVERY commercial class B FM in town, except for the special case of WCRB, and a few minor rimshotters from 30 or more miles out of town. I wouldn't bet much money on Greater Media or Granum staying independent for long, either.

*The DJ Shuffle Goes On: Ken Shelton, late of WZLX, and before that a veteran of years as midday guy on WBCN, has landed on his feet after being fired from WZLX. Shelton will start as WBOS's morning man November 1, the day his non-compete clause from WZLX expires. And JR, the former morning jock on WJMN, is returning

to Boston from a brief exile to Texas. He's starting soon on 70s WEGQ "Eagle 93.7."

*A follow-up on Albany's 1540: WPTR is silent tonight. The word from the National Radio Club and "DX News" is that the station will return as religious WDCD on Sunday October 15. I'm...just... thrilled.

*From the Radio With Pictures world: WMFP-TV 62 Lawrence-Boston (which transmits from downtown Boston and puts almost no signal at all over its city of license) has a new owner. Parent company Shop-At-Home has been sold to home-shopping magnate Lowell Paxson. No programming changes are expected, alas.
And WSBK-TV 38, seen on cable throughout New England and parts of Canada, has launched its new 10pm newscast, produced by New England Cable News.

-=Scott Fybush - fybush@world.std.com=-

# 2650. Boston Radio Watch 10-12-95[Part 1 of 2]

Newsgroup: rec.radio.broadcasting
Date: 1995-10-14 00:00:00 UTC
From: Mark Shneyder 2-4219 <nhmas@gauss.med.harvard.edu>
Message-ID: <45nl0l$2i1@vixen.cso.uiuc.edu>
Source record: 28901

* Evergreen wins 'KLB sweepstakes! :

What do Boston's popular morning shows -- Matt Siegal
on CHR WXKS 107.9FM, Baltazar Ilbanez on CHUrban WJMN 94.5FM,
and Lorren Owens+Wally Bryne on C+W WKLB 105.7FM -- all have
in common? In a matter of few months(and pending FCC approval),
all of them will be working for nation's second largest radio
chain -- Evergreen Media Corp. out of Dallas,TX.

On Thursday, Oct. 12, Evergreen announced its purchase of
C+W WKLB 105.7FM from Fairbanks Commuications for $35 million.
On July 17, Evergreen acquired 12-station Pyramid group for
$306.5 million. Pyramid's stations in Boston include :
CHR WXKS 107.9FM, CHUrban WJMN 94.5 and BB WXKS AM 1430.

Fairbanks' other Boston area station, NewsTalk WKOX AM 1200,
was not involved in the sale.

In addition to Evergreen, there were other major radio
heavyweights in the hunt for WKLB-FM. American Radio Systems
and Westinghouse's Group W were among the favorites to end
up with 'KLB.

'KLB's price tag seems to be clearly overinflalted for
a struggling country+western station which
usually gets high 1's and low 2's in the overall 12+ group.
However, there's a very good explanation for such a high asking
price : WKLB was the last available strong FM signal up for sale
in the Boston market. With 4 existing FM duopolies and, as
of yesterday, 1 FM triopoly, the pickings on the Boston FM dial
are not what they used be 3-4 years ago.

* OJ Talk....:

In Boston, just like in almost every other market around the country,
talk radio was the king during the week when OJ's verdict was announced.
For an all-talk WRKO AM 680, which happens to be the only full-time
talker in the primary Boston market, this should only bring some
more fantastic Arbitron numbers for the fall qtr.

Callers to all-talk WRKO AM 680, all-sports WEEI AM 850, news/talk
WBZ AM 1030, NPR WBUR 90.9FM flooded talk shows on the day of
O.J. Simpson's acquittal.

On WRKO,especially on Howie Carr's(3-7p) and Chuck Adler's(7-10p) shows,
majority of callers' opinions were split mostly along racial lines.
OJ's thing even made for some interesting on the air situations

at WRKO : Jerry Williams extended his usual 10a-12p gig well after
the verdict was announced; he was joined in the studio by his
former protege...Boston Herald columnist Howie Carr who usually
follows Rush at 3pm. It prompted one 'RKO caller to give this tagteam
a funny name : "The Dean and The Doughnut Boy"...:-)
WRKO even blew out some of its regular night(Sex Talk with Phyllis
Levy) and overnight programming(reruns of Rush and best of Carr)
and opened up talk-lines to callers who couldnt get enough of OJ
mania. 'RKO's Saturday morning host and fill-in Moe Laussier took
calls from 12a-5a on the night before and after the verdict.

WBZ AM 1030 carried David Brudnoy Show in its regular
time-slot(7p-12a) on the night of OJ's acquittal.[Earlier in
the day, WBZ once again proved why it has the best newsroom
in town -- it provided first-rate OJ coverage]
However, on the night before WBZ had pre-empt top-rated Brudnoy's
show because the station was contractually obligated to carry the last
meaningless Bruins exhibition game.[Another Bruins conflict
is scheduled to take place on one of the most important nights of
the year for WBZ -- Election Day on Tues, Nov.7. WBZ already announced
that it will carry the game]

* New players on 'RKO :

Well, WBZ AM 1030 wont be the only station pre-empting its
regular talk programming with sports for the next
7-8 months. All-talk WRKO AM 680 has quietly joined the local
radio sports club by transferring NBA's Celtics contract
from its corporate sister-station all-sports WEEI AM 850.
The Celtics owners were not happy with WEEI for a couple of reasons :
multiple conflicts with Red Sox broadcasts in April and May;
negative reactions/criticism by 'EEI's on-air staff
which only adds to team's on-going woes...
That's not what fickle Celtics bosses had in mind when
they signed a 5-year deal which made 'EEI a new flagship last
year...WRKO appears to be somewhat of a loser in this situation :
it doesnt have any lead-in sports programming
to make people stick around and listen to this absolutely
horrible sports product(the Celtics); Celtics' games will
be followed by Phyllis Levy's 'Sex Talk' [Ed.: Oy!];
Celtics will also pre-empt Chuck Adler's nightly show(7p-10p) which
is still in the process of establishing itself on the Boston
talk radio scene...Sister-station all-sports WEEI AM 850
is a definite winner here : it disassociates itself from a
loser franchise; it gives a better flow to its newly revamped
month-old talk line-up...6-hour 'Ted Nation'(6pm-12a) with host
Ted Sarandis(just renewed for 2 more years with WEEI) can build a
strong following until the Red Sox return in the spring....

In switching stations, the Celtics also decided to switch radio
play-by-play voices this season. They told current

WEEI PD and afternoon talkshow host Glenn Ordway back in May
that he wouldnt be welcomed back behind the mike because of his
open on-air criticism of the team during last season.
As I reported in my last month's Radio Watch, there was a good
possibility that a local sports broadcaster Doug Brown would get
the nod. But, the Celtics decided to distance themselves from
any local connection and went outside the market to get their
man -- Spencer Ross, 54, who's handled TV/radio play-by-play for
almost every metro NY sports team will handle the Celtics radio call.
Ross is leaving SportsChannel NY which has been going through
some serious housecleaning lately...Ross will be joined by former
Celtic Cedric Maxwell, who'll handle analyst's duties.
American Radio Systems which owns WRKO, still has 4 years left
on the Celtics' deal. Ross' and Maxwell's pacts are only for this year.

In other 'RKO news, Saturday mid-day(10a-2p) afternoon
voice Mike Wiley has been sent to the beach in favor of
"Two Chicks Dishin'" which moved from its Sunday night slot.
In place of the 'Two Chicks', a two-hour political show
'SpinDoctors' hosted by Michael Goldman(Democrat) and Charley
Manning(Republican) now airs from 6p-8p. At 8pm, member of
OJ's Dream Team Alan Dershowitz has his own gig on 680...

* NewsTalk 1200 launched and Gene Burns finally 'returns' to Boston :

Gene Burns began broadcasting his mid-day(10a-2pm) Boston show from
his home in San Francisco on Monday, October 2. The show airs
on Framingham's WKOX AM 1200[station's signal gets a decent reception
during the day when its broadcasting at 10,000 watts; the signal
virtually disappears at night when 'KOX lowers its power to 1,000
watts; Fairbanks which owns 'KOX plans to upgrade the signal
to 50,000 watts in the non-too-distant future]. Until yesterday,
when Fairbanks sold its WKLB 105.7FM to Evergreen, WKOX staff
was planning to relocate from Framingham studios to Fairbanks'
regional offices at the Prudential Center. More likely, WKLB-FM
will move out to join its new sister-station WXKS-107.9FM,
WJMN 94.5FM, and WXKS AM 1430 in Medford and WKOX-AM will take over
'KLB's current studios at the Pru. Stay tuned...

Gene is planning to relocate back to Boston later in the year.

Currently, Burns' show is followed by syndicated Dr.Laura
Schlessinger's show.(2p-5pm) Following Schlessinger's show is a local
sports show which precedes hockey(Bruins), basketball(Celtics),
baseball(Red Sox) or whatever else is playing that night...

Starting on Monday, October 16, WKOX will try to live up to its
NewsTalk moniker by introducing a local AM-drive newsblock
which will include the following newsanchors :

WKOX/WKLB morning newsperson Len Mailloux;
former newsanchor at the old all-news WEEI AM 590 Nick Mills,

who is a preofessor at Boston University's College of Communications.
News reporters will include Joni Siani(WKLB), Gene Molter,
Scott Gibbons and Molly O'Brien(formerly with WBOS). The same newstaff
will provide updates for the 'Lorren+Wally' morning show on
country+western WKLB.

That's it for now...Oh boy, my hands are tired from all this typing...:-)
Part2 Coming Tomorrow : Summer Ratings, familiar voices returning to the
Hub airwaves, and other Boston happenings

-Mark

# 2651. Buffalo/Toronto Radio Watch(10/13)

Newsgroup: rec.radio.broadcasting

Reply-To: ag365@freenet.Buffalo.EDU (Carl K. Gorney)

Up & down the dial in the #40 market:

*CHOG became Talk640 at midnight on Wednesday. Kenny(the Hit Man)Caughlin had the honor of being the last jock on what was AM640,and ended its career at 10pm with Don McLean's "American Pie"(with the lyric "the day the music died"). Caughlin,however,isn't going too far for his next job...just down the hall to its sister station,CILQ(107.1,AOR/Maple Leafs flagship;Q 107; http://www.q107.com). In his last show,he had gotten the OK to break format and let the listeners request what they wish and play what he wanted;chatted with ex-AM640er Jeff Chalmers(whom he'll be joining again at Q 107),and gave a heartfelt goodbye to the staff(including PD Danny Kingsbury,and some past PDs-who he said resisted the urge to fire him),and said he'd probably check in to the new format. Caughlin had been at AM640 for 5 years,when it was known as AM 640 The Hog-eventually jumping from a rock format to a CHR one,becoming known as The Beat of Toronto.

Talk640's lineup looks like this:

5:30-9am:Wake Up Call(Jane Hawtin/Gene Valaitis)
9am-noon:Talk Line(Roy Green;show is done at fellow Westcom station CHML(900,Hamilton)and fed to Talk640-which is ahead 5-15 seconds of 'HML)
noon-1pm:The Fabulous Sports Babe
1-2pm:Jane Hawtin Live(audio simulcast of CHCH/WIC TV show)
2-4pm:Karen Horseman/Marsha Liederman
4-7pm:Bill Carroll
7-10pm:Sex,Lies & Audiotape(Shelley Klink)
10-11pm:replay of Jane Hawtin Live
11pm-mid.:replay of the Sports Babe

Odds are Talk640 will have to use some syndicated talk at night-however, I couldn't find out what they're using(since I'm not a night owl :) ). One of my tipsters wondered why the Sports Babe was on the station,saying that's why The Fan 590 is there. IMO,the Babe would be a better fit there-and Talk640 could have done a news hour at noon. He added that CHOG had begun to make inroads with its CHR format until Westcom pulled the plug on it. Most of the DJs(Tarzan Dan among them)had apparently left on Friday,though Chris Eagle did a shift on Monday(a holiday up there).

*Rochester's WNVE(licensed to S.Bristol,95.1/95.5,modern rock/Stern; The Nerve)has entered into a sales agreement with veteran AOR powerhouse WCMF(96.5). The deal allows 'CMF's owners,American Radio Systems,to eventually buy the station.

*Mercury Broadcasting,owners of WGRF(classic rock;97 Rock)and WEDG (modern rock;103.3 the Edge),have added a major-market station to their portfolio. An uncredited item in the Oct.16 Business First notes that Mercury has agreed to buy Philadelphia's veteran talker,WWDB-FM(96.5)from Panache Broadcasting for $48 million,in a deal announced October 9(Monday). WWDB does relatively well in the City of Brotherly Love,getting top 5 12+ Arbitrons on a regular basis. The deal gives Mercury entry into the #5 market, with radio revenues at $172.83 million,according to Radio Business Reports.

*Crawford Broadcasting,owners of WDCX(99.5,religious),are now programming its 4th outlet-Albany's WDCD(1540),which was WPTR. It now gives Crawford 4 station in the state-the other 2 being WDCZ(102.7)in the Rochester area and WDCW(1390)in Syracuse.

*WKSE(Kiss 98.5) AM drivers Janet Snyder & Nicholas Picholas returned to the airon Monday...turns out they were only given a 1-day suspension for giving out a Neiman-Marcus cookie recipe(which they charge $250 for)on the air. But, they're not letting it die down...Snyder plans to give out copies of the recipe tomorrow during an appearance.

*WJJL(1440,Niagara Falls;oldies)names Bill Yuhnke its promotional & PR director. The WBUF and WWOL veteran will be responsible for coordinating broadcasting and community projects. Lennie Rico was also named as a sales and programming consultant-he currently hosts the Casa Rico program on the weekends,which his parents started in 1933.

# 2652. D.C. Radio Watch / 12 October 1995

Newsgroup: rec.radio.broadcasting
Date: 1995-10-14 00:00:00 UTC
From: Max Cacas <76476.2472@compuserve.com>
Message-ID: <45nl0m$2i4@vixen.cso.uiuc.edu>
Source record: 28903

Author's note: First, I want to thank all of you who sent very nice notes saying how much you missed my contributions to AIRWAVES in this little period between getting laid off at NPR, and now. I've used the time to accompany the missus to Germany on a business trip (and temporarily escape the land of unemployment!), and get my ducks in order for the big job hunt push. Ok...

ITEM FIRST: the Washington Post's "On the Dial" (Radio) column for Tuesday, Oct. 10th, 1995 notes the passing of WTOP-AM (1500) newscaster Jamie Bragg. He dies of prostate cancer Oct. 8th at his home in Bethesda. The 68 year old newsman (whose real name was Caspar James App), had been with the station for nearly 38 years, working as a disc jockey, and call-in host, before becoming an anchor when the station flipped to all-news in 1969. Before WTOP, Bragg also worked for WWOD in Lynchburg, Va., and WHP in Harrisburg, Pa.

The Post's article notes his poularity with staff and listeners. When the current management of the station sought to push him into a late-evening shift (a graveyard shift on this station because of the Orioles broadcasts), listeners and colleagues protested, and he was placed back on afternoon drive (where he remained until his retirement due to his health problems this past March).

The Post had rememberances from various staffers, including former midday anchor Pam Coulter, who recalled Jamie Bragg crying and helping her to her car with her belongings when she was fired a few years ago. He also served as a mentor to the many young people getting their start in the business. In recognition of his dedication to training WTOP Radio, in conjunction with the University of Maryland's School of Journalism, recently created the "Jamie Bragg WTOP Scholarships", to be awarded to the News Director and Assistant News Director of WMUC AM-FM, the campus radio stations at Maryland's College Park campus.

A memorial service is scheduled for this Saturday (October 14th, 1995) morning, 11am, at St. Luke's Episcopal Church in Bethesda, Md. Jamie Bragg was one of the best, and will be missed.

ITEM SECOND: the Post also reports that former Redskin Hall of Famer Sam Huff (also color analyst for Redskins broadcasts ) has been in talks with recently dismissed sports-talker Ken Beatrice, who did his last "Sports Call" show on ABC o&o WMAL-AM (630) last Friday. Beatrice's show has been replaced by syndicated business talker Bruce Williams, last heard in this marker over WWRC-AM (980). WMAL has determined (perhaps not inaccurately) that the market for sports talk in Washington is diminishing.

About five months ago, Huff started the "Middleburg Broadcasting Network", which currently produces and distributes several sports-related programs. The Post article suggests Huff may be approaching Beatrice about taking his show to the satellite.

ITEM THIRD: The Post reports that "The Radio Zone" (WKDL-AM 1050 Washington / WKDV 1460 Northern Virginia / WKDH 1570 Baltimore) gathered more then 57,000 entires from D.C. and Balmer area students for its fall "Back to School" promotion. The station, which features a live children's oriented program in morning drive, and the syndicated programming of the Minnesota-based "Radio Ahhs" during the rest of the day, would broadcast its morning show live from the winning school's cafeteria. The school also gets $500 worth of computer software.
(Author's note: Its amazing to me that ARBITRON can't be creative enough to measure the audience for this 3-signal station...those kids *have* to have some influence on the buying decisions of their parents, right? Same indictment to ARBITRON [and the ad buyers] for what I consider a gross failure to measure the audience on college campuses. Anything they try to do to explain away a lack of significant measurement for young audiences is lame in the extreme. <stepping off soapbox>)
---
Elsewhere in D.C.: Hot AC Mix107.3 (ABC o&o WRQX-FM) has begun gradually introducing new jingles into the "mix", along with a new flight of tv spots. Greater Media's "Bright 99.5" (dunno if they have their new calls yet, otherwise they are still WGAY-FM) has their new TV spots on the air, as well, featuring the lovely Terri Garr.
However, "Bright"'s spots engage in that tired old approach of lamely trying to create
some brand ID for their station by trashing the others (Mix, WASH-FM, and, interestingly, the "old WGAY"). Its pretty desperate if a station, right out of the box, has to define itself by cheap shots on the competition. But then, as I've noted before, these are the guys who have continually been unable to make a go of WWRC-AM as a talker.

Anyway, that's it for now...more next week!

# 2653. Mid-America Radio (?) Watch (13-Oct-1995)

Newsgroup: rec.radio.broadcasting
Date: 1995-10-14 00:00:00 UTC
From: The Mid-America Radio Page <kcradio@littleblue.com>
Message-ID: <45nl0o$2ij@vixen.cso.uiuc.edu>
Source record: 28904

One of Kansas City's broadcast landmarks got a facelift this week, with the installation of a new antenna for KCTV (channel 5).

Yes, I know, this is about a TV station. But the thousand-foot self-supporting tower on Union Hill, one of the world's tallest such towers, has been a source of both pride and controversy.

KCTV, formerly KCMO-TV, began operations at the site on 31st Street between Oak and Main in 1953. For most of the week, Channel 5 broadcast with the station's original antenna on about a 200-foot tower.

The present tower was built in 1956.

On Wednesday (Oct. 11), a sky crane named "Bubba" hoisted the old batwing antenna off the top of the tower, then dropped in a new six-bay circularly-polarized antenna into a 16-foot-deep "inkwell" at the top of the tower.

Because of winds generated by the helicopter, several blocks along 31st were cordoned off during the 10 am operation. The Springhurst apartment building, just south of the base of the tower, was evacuated.

Also evacuated was public station KCPT, which now occupies the studio building at the base of the tower. KCPT continued on the air, using KCTV's present studio facilities in Fairway, Kansas. KCPT's tower is located on the eastern border of the city, next to Independence.

The move of the studios and offices of what was then KCMO-TV (along with KCMO(AM) and KCEZ(FM)) to the Kansas suburbs in 1977 was the cause of considerable controversy, with Kansas City's city council asking the Federal Communications Commission to order the tower torn down as an eyesore in the heart of the city.

The council even asked that KCMO-TV's city of license be changed from Kansas City, Missouri. The FCC refused.

The KCMO combo was broken up in 1983 with the sale of KCMO and KCEZ radio (now KCMO-FM) to Fairbanks Communications. The Meredith Corporation retained Channel 5, purchasing the KCTV calls from a station in San Angelo, Texas.

I do not know whether KCMO-FM and KQRC(FM), which have transmitting antennas just below the TV antenna pylon, were able to stay on the air during the installation. I suspect they were not able to operate from the Union Hill site, however.

Channel 5 says the new antenna should improve reception for city viewers using indoor antennas.

Naturally, KCTV devoted quite a bit of coverage to this project; it also made the front page of the _Kansas City Star_ the next day while most other media ignored the event.

*****

Speaking of the _Star_, a Kansas City weekly newspaper reported this week that the broadcasting conglomerate ABC/Capital Cities had put the newspaper up for sale. The _New Times_ said the sale plans were a consequence of Disney's acquisition of Cap Cities.

The _Star_ denied the report in a small article buried in the lower
right corner of the second page of the business section of today's
newspaper. Hmmmmm.....
The _Star_ is Cap Cities' largest daily newspaper.

# 2654. NYC Ratings - Summer '95

Newsgroup: rec.radio.broadcasting
Date: 1995-10-14 00:00:00 UTC
From: TRRadio@aol.com
Message-ID: <45nl0p$2io@vixen.cso.uiuc.edu>
Source record: 28905

Here's the latest ARB numbers, printed in the NY Post and NY Daily News:

12+

Hot 97/WQHT 6.6 CHR/Hip Hop
Kiss-FM/WRKS 6.1 Urban A/C
WCBS-FM 4.8 Oldies
Lite-FM/WLTW 4.7 Lite Rock
Mega 97/WSKQ 4.7 Spanish
Z-100/WHTZ 4.2 Modern CHR
WPLJ 3.7 Hot A/C
WABC 3.6 Talk/Yankees
WQCD 3.5 NAC/Jazz
WINS 3.5 News
WCBS-AM 3.3 News
WBLS 3.2 Urban A/C
K-Rock/WXRK 3.1 Classic Rock/Stern
WMXV 2.9 Hot A/C
WOR 2.8 Talk
WQXR 2.5 Classical
WYNY 2.4 Country
WPAT 2.3 A/C
WFAN 2.3 Sports/Imus/Mets
WQEW 2.0 MOR
Q-104/WAXQ 2.0 Pure/Hard Rock
WNEW 1.9 Modern Rock
Comments: The Emmis stations flip at the top, and the total of Hot & Kiss give them 13% of the listeners in the market. On WNEW's decline since changing to Modern Rock, one anonymous PD said "It's a fiasco--You don't know what you're going to get when you turn them on." (NY Post)

25-54
Kiss-FM still on top with an 8.0, followed by CBS-FM, WSKQ & WLTW (Tied), WPLJ, WQCD, K-Rock, WBLS, Hot 97 & WMXV

AM Drive
Stern still #1, but down 16% from last summer. He's at 7.0, followed by WINS, WCBS-AM, Hot 97 (Dr. Dre/Lover), Kiss, CBS-FM (Harrison), WSKQ, WABC, WOR (Gambling) & WPLJ (Scott & Todd).
The BIG story here is Lionel's rise into the #8 spot, ahead of Imus, but the I-man stayed ahead and moved up into #3 on the men 25-54 audience. This is WABC's best showing in AM Drive since their music days.

PM Drive
Hot 97 at #1--the rest of the top 10: Kiss-FM, WLTW, CBS-FM, WPLJ, Z-100, WSKQ, WQCD, WABC, & WMXV.

Once again, WABC is the big story here--Bob Grant taking a big hit (along with Rush). WABC programmer Phil Boyce blames the OJ Trial for slippage, but he's not concerned. You'll recall Grant was #1 last fall.

It may be the larger University stations are getting more "image" conscious, and tend to hire "pros" ... but there are a significant number of stations that still have staffs whose
primary question is "what hours can we broadcast obscenities?"

I'd submit that aside from Infinity's attraction to Stern's billing, few owners want to put a multimillion dollar station (even smaller market FMs now pull this kind of cash) at risk for
the sake of a 20 year old's idea of being "cool".

# 2657. Cyber Radio 1 - Internet Radio Broadcast Software

Newsgroup: rec.radio.broadcasting
Date: 1995-10-14 00:00:00 UTC
From: jselbie@cis.ufl.edu
Message-ID: <45nl19$2km@vixen.cso.uiuc.edu>
Source record: 28908

[ Notice to moderator: I am reposting this again. In the original post, I failed to mention what types of computers and platforms were supported. ]

WREK Atlanta 91.1 FM, the Georiga Tech student radio station, has been experimenting with Internet broadcasting for the past year. The project has been called WREK-NET, and it's been a big success.

I am pleased to announce the availability of Cyber Radio 1, the complete source code to all of the WREK-NET software. Now anyone with the proper resources can start their own Internet radio station.

Cyber Radio 1 is a UNIX client/server system. The server continually reads digital data from the audio device (e.g. /dev/audio) and multiplexes it out to any number of connected clients. Connected clients, in turn, receive the digital audio data to play out of their audio device.

The Cyber Radio 1 system has been tested to work with any Sun Sparc, Linux, or BSD system with an audio device. The client program has been extended to work on any SGI workstation as well. It's reported that it should work on HP/UX workstations as well. It could potentially work on NeXT machines and other UNIX systems with minimal hacking. There is no reason why a Windows version couldn't be made.

The source code package includes both the server and client programs, various server utility programs, the WWW demo code, and other support code and information.

Cyber Radio 1 is intended for radio stations with a fast connection to the Internet to broadcast their sound on. It is especially hoped that other computer hackers that work in college radio will attempt to use it and perhaps improve it.

Cyber Radio 1 is being distributed under the GNU General Public License. The GNU GPL is gives everyone the right to have access to the source code, the right to modify, and redistribute under the terms of the GNU GPL.

For more information on Cyber Radio 1, consult the CR1 WWW page at:

http://www.cis.ufl.edu/~jselbie/cr1.html

The FTP site for the system is at

ftp.gatech.edu - look in the /pub/wrek/CyberRadio directory for CyberRadio1.tar.gz

(be sure to read the README and INSTALL file before typing "make")

There are frequent ads on rec.music.marketplace (and related groups) for
one-off CD-R's at about $40 per disc. What's "reasonable cost" for your
budget?

Check the back of Mix magazine. There are a lot of places that'll do
one-offs for about $60 each.

|: ...Also, some of the material I have on
|: these DAT's is copyrighted.

IANAL. As I understand it, you can make a copy for your own engineering
convenience, or to sequence cuts for your own entertainment. But you can't
make a copy to replace buying another disc in commercial purposes.

|: Better yet, does anyone know when CDR's will be more affordable???

I paid just under $4k for a Marantz about a year ago. Phillips has started
shipping a second-generation recorder (also available, with various
add-ons, from Marantz and Studer). This means the first-gen ones will
probably start showing up cheap.

Discs are going for under $8 in moderate quantities now, and will probably
come down from there.

Among other things, news gatherers will have to also be audio editors. The CBC is starting to equip some of its field reporters with laptop audio systems for their actualities. Instead of phoning them in to Toronto for editing there, the journalists edit the entire piece on their own and modem it over.

For more info, see sidebar in my article on new audio technologies in the May 95 Digital Video magazine.

I was wondering if anyone out there could help me out on this one. I would like to know where a personality by the name of Dr. Drex is. He used to be the morning show jock here in Detroit on our rhythm outlet before it switched to alternative.

Also, the same outlet employed Bo The Jammer who most likely would be in a UC or rhythm format.

Where are these two? Can you help? Thanks in advance.

Item Subject: cc:Mail Text

>From issue #1581:
"*Providence's "WHIM Country" has moved off its longtime 1110 frequency
for the second time. Regular observers of the radio scene in the
Ocean State (and I'm sure I'll find one eventually) will remember
that the country format and "Whim" slogan disappeared from WHIM-1110
East Providence in 1992, when that station became all-news WWRX,
"1110 CNN." "Whim" took up temporary residence at Pawtucket's
WICE (550), but when 1110 CNN folded, the country format and
WHIM calls returned to 1110. Now they're gone again, this time
to 1450, the former WKRI in West Warwick. WKRI had been standards
during the week, and Spanish on the weekends. The Spanish has
moved to 1110, which will be known as WPMZ once the call change
goes through..."

Oh great. Now instead of having to put up with evening country
interference from the old WHIM, plus all-night country interference from CKTY in
Ontario, both of which frequently blot out WBT Charlotte from here in Boston, I
have to now tolerate evening Spanish broadcast interference from WWNH in
southern New Hampshire, plus more Spanish broadcast interference from this new
WPMZ (which was rendering WBT mostly unlistenable last night as late as 9:00PM
EDT). Does this new 1110 station get an all-night license? I thought the old
WHIM had to sign off at local sunset? If you're a New England fan of WBT
Charlotte, this stinks.

Source record: 28918

WebPress is proud to announce a new RealAudio site on the web: Fred Fletcher's Fairy Tales (http://www.capitolnet.com/fletcher). Mr Fletcher describes the site in his own words:

"A long long time ago in the early 1940's a radio announcement on WRAL Radio in Raleigh, NC began a new feature on its daily program called Fred Fletcher's Fairy Tale Time. It was presented at 8:00 in the morning, opposite the world news on NBC. He did voices, sound effects, comments on the story and characters, and had more fun than anybody. It was contagious. His ratings went up and up and Fairy Tales was networked to many radio stations across NC through the Tobacco Network. Strangely enough, and maybe some would say fortunately, many of the Fairy Tales broadcast on this series were recorded on tape. Fred Fletcher kept them, and is now able to broadcast them again to his old fairytale listeners, and a great new potential of children and their parents. WebPress is presenting this series anticipating the parents and the crop of little ones will want to tune in again. In the new old times and new times. So here goes..."

# 2668. New talk format doesn't help KLSX-FM, Los Angeles

Newsgroup: rec.radio.broadcasting
Date: 1995-10-14 00:00:00 UTC
From: richwood@commspec.com
Message-ID: <45nl1j$2ll@vixen.cso.uiuc.edu>
Source record: 28919

HS>The switch from rock classics to all talk (MON-FRI talk, still music on
HS>weekends) didn't do much for the ratings of KLSX 97.1 in L.A. It only
HS>increased its audience share 0.1% to 2.3%, or 18th place out of 80 stations.

Spencer,

I initially read this to say that KLSX increased FROM a .1 to 2.3. If
that had happened it would have been nothing short of a miracle. It
seemed so bizarre that I did some research on my own and then reread
it.

My response is still, basically, the same. The station's first full
book will be the Fall ARB. Only a small part of the Summer book would
reflect anything to do with the new Talk format. Listening patterns
don't change overnight and, more often than not, ratings go down in the
first book after a format change. After all, the station blew off
existing listeners (who will leave instantly) before giving new ones
time to find the station and become comfortable enough to settle in to
listen and aware enough to remember to write it in a diary. Unless, of
course, the station does such massive promotion that it buys the market.

No one can make a call this early. It'll be at least two more books
before any significant changes are likely to happen and four books
before a serious pattern can be detected that relates to the new
format. Right now, we're wallowing in statistical error.

Rich

>KJQY(540) flipped to news lasted about
>12 minutes....1260 and 540 are now simulcasting the news
>format....leaving KLAC(570) and KGRB(900) alone in adult
>standards....KGRB(or are there new calls?) has a marginal signal in
>much of L.A.

KGRB's been around doing the standards format for decades. It's
licensed to and located in West Covina and it's FM side (similar
format) has my favorite calls: KBOB. Yeah, the owner is named Bob. It's
the last of the L.A. Mom & Pop stations, as far as I know. Anyone
remember KRHM? Named for Ruth & Henry Matsorkis. Now? Oh, it's little
ol' KIIS-FM.

## 2670. "Local" radio from 1000 miles away

Newsgroup: rec.radio.broadcasting

M_>If a station is already airing a nationally syndicated music
M_>format, they will lack the localism that will be necessary for
survival.
M_>The only difference between a service like DMX and the station on
M_>syndication will be DMX's lack of commercials. Which do you think
the
M_>average listener will choose?

The average listener will choose whichever pleases him/her the most. I don't find much local flavor in most music radio, anyway. The music isn't local and the jocks are probably talking about celebrity stuff (which isn't local). The real local service comes in news, public affairs, traffic, weather and community involvement.

DMX is completely, utterly, UNlocal. Take the TV model where the vast majority of shows are on tape and originate elsewhere. Any network relies on the quality of the local station's newscasts to get their prime time off to a good start. Without local involvement, no one expects much success.

# 2674. [FREE!] AIRWAVES RADIO JOB SERVICE

Newsgroup: rec.radio.broadcasting
Date: 1995-10-16 00:00:00 UTC
From: EDITOR@airwaves.com
Message-ID: <45st97$7ks@vixen.cso.uiuc.edu>
Source record: 28924
Cross-posted to: rec.radio.broadcasting,rec.radio.shortwave,rec.radio.info,rec.radio.noncomm,alt.news.media,sci.electronics,chi.media,ba.broadcast,alt.radio.networks.npr,alt.radio.college,alt.radio.talk

Rec.radio.broadcasting and AIRWAVES MEDIA WEB have begun a free job placement service.

This service is open to anyone seriously seeking employment in radio broadcasting ... OR ... Anyone offering employment in radio broadcasting.

This includes all facets of the industry from Air Talent and Board Ops to Program Directors, General Managers Sales Reps and Engineering Staff. You can still post these to the newsgroup, but you can also send them to the service which is accessible via the AIRWAVES web page...

---

Here is the deal...

1. Send email to EMPLOYMENT@AIRWAVES.COM.
2. Use a descriptive subject that says one of the following...
o A) Help Wanted: Brief Description of opening.
o B) Position Wanted: Brief Description.

Note: You must use one of the above (A or B) as the beginning of your subject line or your message will be returned. This is required for proper sorting of messages for easy retrieval. Obviously Help Wanted means you are offering a position, Position wanted means you are looking for work. Be sure to list *what sort of job you are seeking or offering as part of the Subject: line*.

Example...

- Help Wanted: Air Talent, New York City area
- Position Wanted: Engineer, 20 years Experience

3. Letter should be no more than 100 - 300 words (I won't do a word count, but brief and to-the-point will give the best impression)
4. Include your....

o A) Full Real Name
o B) Postal Address (provided it will not cause problems to do so)
o C) Voice and/or Fax Phone (voice preferred)
o D) Email address
o E) If offering a job, your company name and title.

5. No resumes, but you can include a URL to your web or FTP site if there is material there (resume, picture, sound clips etc) that might be of assistance.

6. If and when you fill your request, write and have your listing removed. It will be removed in 30 days anyway.

7. To look at the listings... point your Web Browser at..
http://radio.aiss.uiuc.edu/~rrb/job.html

Note: This service is *only* for QUALIFIED individuals who are SERIOUSLY seeking employment in radio broadcasting and bona-fide employers in need of qualified help. This is NOT a "Gee it would be cool to play Megadeth on the radio" list. any listings that don't appear serious and qualified will be discarded. However I take no responsibility for the legitimacy or qualifications of any poster to this service, that is your job when contacting someone.

In case it needs saying, this is a publicly accessible database. Please use caution in all dealings with people who may contact you via this service. If this is too big a risk for you, don't use it. We take no responsibility for any contact made via this service.

If that's OK, then take a look at what is already online and then send in your Help otr Positions wanted article. I hope you are successful.

Several years ago, they were putting up some buildings not far from the 50KW AM transmitter site where I worked. The steel structural girders had a tendency to give the construction workers shocks. I also think there was something unique about the buildings, like they were very close to a quarter-wavelength tall at our frequency!

Later, I worked for an electronics company that got its start in the Needham Heights, MA area (mentioned previously), in the shadow of those huge TV towers. I'm told they continually had to battle interference in the lab. Of course when you're looking at sensitive signals with 200+ MHz oscilloscopes, you'll see everything.

It's important for the broadcasters to keep the transmitted signal very clean. Watch those harmonics, and track down and eliminate any other spurious signals. If harmonics land on top of desired signals, someone will complain.

I think the phone company can provide a filter unit to put into your phone if you experience RF interference. I probably read this in an old ARRL book, so I don't know if they still do it.

One of the best ways for interference to happen, is when metals don't make excellent contact. The poor contact turns into a weak diode, which acts as a demodulator in the presence of strong signals. Bad connections happen everywhere but often go unnoticed ... until a transmitter comes into town. But it can be fixed. Sometimes all it takes is a screwdriver to tighten those connections.

You can burn out a radio (so that it doesn't work so well anymore) if it's tuned to the very strong local signal. I've seen it happen. You do have to be pretty close to the transmitter site for this to happen.

# 2676. WWW AM Radio Search Page Now Online

Thanks to the hard work of a net-friend, AIRWAVES now has free, easy-to-use World Wide Web page for searching the FCC's AM radio Database.

You can search by frequency, City, State, Province, or by region (several USA Metro areas are pre-selected or you can enter your own lat/long).

Search shows calls, city, state/province, frequency, day power, night power, critical-hours power (if used) and antenna specs such as DA-1, DA-2, DA-3 DA-D DA-N or ND-1 .... etc.

In addition you can see a color map of the transmitter location by clicking on the call letters of any Continental USA station in the search results window. Note that the maps are generated by the US Census bureau and are sometimes quite slow.

To use this you must have a forms-capable browser. I suggest using Netscape 1.1N since much of the formatting is Netscape Enhanced (tables, backgrounds, centering etc). It is usable on Lynx, but is bely cumbersome and not pretty.

The URL is http://radio.aiss.uiuc.edu/~rrb/fccdb.html

Please let me know if you like the service, and please try to keep traffic as low as possible during business hours (8AM - 5PM central US time).

# 2677. Halifax Radio Watcher Report (Oct.13, 95)

Newsgroup: rec.radio.broadcasting
Date: 1995-10-16 00:00:00 UTC
From: Wayne Harrett <harrett@mail.isisnet.com>
Message-ID: <45st74$7f4@vixen.cso.uiuc.edu>
Source record: 28927

Reply-To: harrett@ra.isisnet.com

Hello From Canada's Ocean playground (Nova Scotia)
Here's The Latest from the Halifax Metro area.....

Q104 Disc Jockey J.C Douglas has a knack for appearing on major U.S networks (as Well as the local stations.)
Earlier this year when Douglas and compatroit Anna Zee made a split second on- camera appearance on The Late Show With David Letterman. Douglas & Zee---who were in the studio audience----managed to get Dave's attention by giving him a can of "Big Ass Clams"
It would take too long to explain the story in detail....
The last week of September, Douglas made a CBS again, this time on The Late Late Show with Tom Synder. It seems Synder had asked viewers for his jazzy theme song. Not missin a trick, Doulglas send in a comic version of the song, crooned by Douglas himself.
In It, Douglas sang in praise of Syder's return to TV while making fun of the sweat on his upper lip. Snyder loved it, playing it in its entirly. He also mentioned Dartmouth/Halifax twice!
(*source- Ian Johnston-The Halifax Daily News)

-Oldies 96/CHNS is nervously looking forward to the next BBM listener-survey rating to find out what really going on with its morning show since Frank Cameron & Doug Saunders took over as hosts from Jerry Lawrence. Apparently the reaction to the former CBC cheerful clowns has been decidedly mixed, listeners either loving them or loathing them. December's rating book will tell the story.
(*source - The Metro Weekly)
oldies 96/CHNS had the Top 300 Oldies of all time over the Thanksgiving weekend. Starting with...ElvisPresley-Suspicious Minds at number 300, to the number one song.....Hey Jude-The Beatles...

-780/KIXX Country may be in for some changes in the near future, depending upon the results of BBM listeners surveys to be held in December. If the ratings are bad, it is likely the station will approach former Country 101 FM star, Ken Packham to take over the morning show. Packman has been off the air for over a year since his little misunderstanding with CHFX, Country 101 management, so would probably be receptive to an offer. If the ratings are good however, it is likely Gary Evong will continue to double up hosting the morning show.
(*source-The Metro Weekly)

-There's alot of of favourable reaction to CJCH new News/Talk format.There's stories that the station is uneasy with the local morning programming namely John Biggs & Kelly Richard from 6 to 9 and

Brain Phillips from then until the bouncy and popular Lowell Green Show. Rumours has it that, unless the next ratings show major improvements. Phillips, will be moved into Bigg's slot and veteran news man, and somtime rabble rouser Harris Sullivan will be brought in to take "The Hot Line" talk show.
(*source- The Metro Weekly)

-780/KIXX Country is sending a lucky listener to see "Brooks & Dunn" in concert at the Calgary Saddledome. Listeners just have to hear the touchtone, weekday mornings to qualify. Over at Q104 listeners have to hear the sound of the Q-jet to qualify to see "Eric Clapton" in Mexico. C100 is sending a few listeners to spend time with "The Breakfast Club" for a week in Bermuda, where the morning show will broadcast for a week. Mean while listeners with 96.5/SUN FM have to hear the Cruise Horn for a chance to win one of four tips for two on board a Carnival Cruise Of The Caribbean.

-CHFX Country 101 presents " Tim McGraw" with opening guest "Blackhawk", and a vocal quartet called "4 Runner" at the Halifax Metro Centre November 8th.

Message-ID: <45st75$7f5@vixen.cso.uiuc.edu>
Source record: 28928

I had seen in a posting a long time ago, an AOL member give this address, etc. for Man from Mars Productions:

159 Orange Street
Manchester, NH 03104

(603) 666-4878

I dialed the number, got an answering machine, left a message and received no response. I was wondering if the "big" aircheck companies deal with the private aircheck collecters (of which I am one...I'm not working at a radio station). I have found several airwaves members who I do trade tapes with, but it's not big enough. I have several tapes from a company called "Mr. Radio's Creative Productions" (a.k.a. Mr. Radio's Airchecks or "The Power Poodle"), but that company seems to have disappeared. Any advice?

Thanks, as always, in advance...

Blaine

>ratings.

No, but they are under pressure to raise money, enough at least to
keep the station on the air.

>That's the lifeblood of commercial radio. There's a tendency
>in college radio to indulge one's own preferences. In commercial radio
>we need to serve the needs and whims of listeners, so shows have to be
>tailored to the audience rather than the talent.

There is a lot of debate as to whether commercial radio is really
serving the needs of listeners. This is not to say that
non-commercial (college) radio is necessarily better in this regard,
but some stations at least try to present an alternative.

<<<<Too many college stations I've heard don't seem to offer much training in

basics like effective communication, proper enunciation, intonation, etc. Program directors at many college stations don't seem to offer much direction. In the commercial radio universe the jocks are all part of a team, and the PD is their coach. If he does his job well, and the members of his team want to sound good, the result will be a consistently excellent sounding radio station. In the college stations I have known, each jock runs his own show and treats it as if it were his own personal radio station. Nobody tries to impose any order, and the jocks never get any coaching, so most of them never develop a good on-air sound.>>>

Most colleges, as an educational tool, have a student PD, which blows the critique style out of the water. And yes, the student d.j.'s do their own thing for the most part. But the good Radio programs have a format to follow and the air staff is expected to conform (After all, that's what happens in the real world, right???).
My experience was this--Of the 20-30 on-air students, only 4-8 went on to work in radio after college. Those are the ones who airchecked themselves and strove to do better. Of those students, one is a PD in Buffalo and has been for a number of years, and I work in the Big Apple as an air personality.

One more comment, while college radio experience is looked down upon by most in the radio biz, it is EXPERIENCE, something which never hurts.

GD> Even at the best college stations, jocks
GD>are not going to come out medium- or major-market ready, especially in
GD>terms of the particular skills you're asking for below.

Greg,
In my experience, college radio has never been a source for
anymarketready talent. There certainly have been many great talents who
also did college radio at one time or another, but they never credited
their time in college radio with anything more than self indulgent fun
and a way to gather horny groupies.

GD>On the other hand, *should* college radio be run purely as a business?

No. College radio should be anything the college wants it to be. I
just don't buy the concept that it's a great training ground. Unless it
represents what the student will find in real life radio, it'll fail as
a training vehicle.

GD>promotions. One area that I will surely concede to be sorely lacking at mos
GD>(but not all) stations is an effective programming coach. Unfortunately, th
GD>nature of most colleges and universities is such that activity of that kind
GD>by a faculty member is seldom rewarded.

Unfortunately for them, programming is our bread and butter. It's
the only product we have to sell. I don't have time to accept excuses
for why the person applying to me for a job can't do the job.
Competition in New York is simply too fierce to run a broadcasting
school.

RW>The only thing comparable in non-commercial radio is having to
RW>have tea with some blue haired matron with a promiscuous checkbook.

GD>Are you serious?? Or just lumping all non-comm's together, from
GD>unsupervised student-operated stations to large professional stations

No. I actually have great respect for PBS and NPR. I was among
the original crew at WGBH, Boston, who conducted the initial networking
experiments between WGBH-FM and WETA-FM that resulted in NPR in the
early 70's. I was also one of the folks who brought Tom Bodett from NPR
into commercial radio with his "End of the Road" show in the late 80's.
Trust me, I've had my collisions with blue-haired matrons.

The original question dealt with college stations, not
professional non-commercial ones. The real difference is where we get
money to operate. Promiscuous checkbooks are good things.

As a job seeker, don't hesitate to mention your college radio experience. It is training, regardless of the caliber. What makes college radio so different from the real world is:

#1 If you're in a rated market, you live and die by the ratings.
#2 When commercials are your only revenue source, it's a totally different paradigm.

All else being equal, it comes back to these two areas. How important is that next seque when the book could depend on it? How will you handle an advertiser complaint when your paycheck depends on it? You don't really have experience in commercial radio until you are in it. Period.

As long as college students realize that the real world may be vastly different, and don't assume that they "know it all", eveything will be fine. My hiring problems have occured when this open-minded attitude is replaced with one proclaiming "been there-done that" when they haven't.

Ken

# 2685. Re: Cyber Radio 1 - Internet Radio Broadcast Software

: extended to work on any SGI workstation as well. It's reported that it
: should work on HP/UX workstations as well. It could potentially work
: on NeXT machines and other UNIX systems with minimal hacking. There is no
: reason why a Windows version couldn't be made.

As a pioneer of 'Netcasting' music programming on the Internet, I have discovered that if you cannot provide a Windows client, you can't seriously play the game. I know there is backlash against the commercial efforts such as RealAudio and StreamWorks, but consider the source. I have found that there is a definate audience out there clammoring for my iRock Radio Netcasts. They can't hear what I play on conventional broadcast radio. But they can hear it on their PC's running Windows, Mac OS or Unix, because Xing has covered all bases with StreamWorks.

Now, on the other hand, I think the new real serious contender is Internet Wave from VocalTec. The sound is incredible for low bitrate transmission. The client interface is really cute and easy to use. If you have a 28K pipe, we have shows available at a higher bitrate that sound even better.

iRock is running shows over Internet Wave and StreamWorks. Currently, there are mondo problems with our StreamWorks netcasts for the WIndows client, but the Mac and Unix clients pick up iRock just fine. Whatever your client platform is, you can listen. All the clients are free and your can find them from our web page links. If you're curious, then http://www.iRock.Com and listen for yourself.

What about RealAudio? Well, we could have bought their server software for about $13,000 with support and maintenence, but we didn't.

# 2687. EAS Answers EAS Petitions for Reconsideration

Newsgroup: rec.radio.broadcasting
Date: 1995-10-16 00:00:00 UTC
From: Harold Hallikainen <hhallika@slonet.org>
Message-ID: <45st7e$7g9@vixen.cso.uiuc.edu>
Source record: 28937

EAS is on again! The FCC has answered the petitions for
reconsideration on EAS. A news realease can be found at
gopher://fcc.gov. I also have pointers to relevant documents at
http://slonet.org/~hhallika/ .
In summary,

1. The FCC declined to include RBDS implementation into the EAS
rules. EAS is permitted, but not required. Further, implementation
standards for EAS are not included.
2. The FCC declined to modify the FM rules to accomodate RBDS.
Several petitioners had requested higher modulation limits for stations
running RBDS.
3. The FCC disagreed with the NAB petition that automatic
interruption of CATV programming by EAS violated the copyright laws
(which require carriage of a copyrighted broadcast program to be made
with no modification, such as interruption). The FCC will therefore not
require CATV system to install "selective override equipment".
4. The implementation deadline for broadcasters has been moved back
from July 1, 1996 to January 1, 1997. NAB had suggested a one year
delay, making it coincide with the CATV deadline. I had suggested a 1
year delay, since the petitions for recon had delayed us about a year.
They went for six months.

I hope to see the Memorandum Opinion and Order on this shortly.
When I find it, I'll put a pointer to it on the above mentioned web
page. Note also that this relatively speedy implementation of EAS (14
months from now) will likely mean it is not worthwile coming up with some
way to automate EBS and seek necessary (in my opinion) waivers to do
unattended operation. May as well just get the EAS equipment ASAP.
My next Insight on Rules article in Radio World details the EAS
petitions to deny. The one after that discusses the details of the new
unattended operation rules.

Hi folks....

RadioInk has asked me to write an article for an upcoming Internet special. I'm
going to be addressing web sites....and how radio is using them. If you're running
one for your station, I'd appreciate your responses to the following questions:

Q: Why are you doing web sites?
Q: How are you doing them? (yourself, hiring someone)
Q: What is it doing for you and your station?
Q: What did it cost you to do your web site?

Please send replies to my email address: COREYD7470@aol.com

Thanks!

# 2689. KFMZ Faces License Revocation Hearing

Newsgroup: rec.radio.broadcasting
Date: 1995-10-16 00:00:00 UTC
From: transvox@crl.com
Message-ID: <45st7j$7gs@vixen.cso.uiuc.edu>
Source record: 28939

KFMZ(FM) owner Michael Rice could lose the station he built and put on the air 25 years ago in Columbia, Missouri as the result of license revocation proceedings announced by the FCC this week.

Rice is presently serving concurrent prison terms after his felony conviction in July 1994 on four counts of sodomy and eight counts of deviate sexual assault, all involving teen-age boys in St. Charles County, Missouri.

Rice was sentenced on August 31, 1994 to prison terms totalling 84 years, to be served concurrently. The longest sentences, eight years, were for each of the sodomy counts.

Under the FCC's character policy statements adopted in 1986 and 1990, Rice's felony convictions could disqualify him from station ownership.

Aside from KFMZ, companies owned by Rice control KBMX(FM) in Eldon, as well as construction permits for KFXE(FM) in Cuba and KAAM-FM in Huntsville, all in central or south-central Missouri, plus three stations in Terre Haute, Indiana, WBOW(AM) and WZZQ-AM/FM.

KSLQ-AM/FM (Washington, Mo.) owner Kenneth Kuenzie has a minority share of ownership in the Eldon and Cuba stations, as well as an application for a new station at Bourbon, Missouri. The FCC proceeding, announced October 10, does not affect KSLQ.

The FCC action came in response to objections filed to an extension of KAAM-FM's construction permit. Moberly stations KWIX(AM) and KRES(FM) argued that Contemporary Broadcasting, one of the companies controlled by Rice, had failed to start construction on KAAM-FM and hence was not entitled to an extension of its CP.

KWIX, Inc. also alleged that "as a result of Michael Rice's conviction, CBI (Contemporary Broadcasting, Inc.) lacked the character qualifications to remain a Commission licensee."

KWIX also alleged that "CBI's reported representations that Rice was completely excluded from the management and operation of KAAM since his arrest in 1990 were false, as evidenced by certain letters written by Rice in 1993 and 1994 relating to the station."

Huntsville is the county seat of Randolph County, while nearby Moberly is the county's largest city. KWIX also has an application pending for a new station at 97.3 MHz in Moberly. A competing application has been filed by the other Moberly broadcaster, KZZT(FM).

The FCC rejected KWIX's request to deny the extension of the CP, because of routine delays in FCC approval of a series of upgrades to the original allocation and construction permit.

Still, the FCC order found the need for a hearing regarding the character qualifications of Rice to remain a licensee. In the words of the FCC order, "The misconduct of which he was convicted took place while he was the principal owner of these licensees. The crimes for which he was convicted, involving principally sexual abuse and sexual assualt on

a number of children, are extremely serious and, indeed, may come within that category of crimes which 'shock the conscience.'"

Rice's companies argued that Rice had not exercised effective control of the stations since he entered a hospital for treatment after his arrest and preliminary hearing. According to the FCC order, his companies argued, "'Since Mr. Rice's hospitalization on April 3, 1991, has had absolutely no managerial, policy, or consultative role in the affairs of the three broadcast corporations in which he has ownership interests and officer positions.'"

However, KWIX pointed to three letters written by Rice in 1993 and 1994 written on company letterhead about a possible sale of some of Rice's stations as evidence he was continuing to exert control.

The FCC also noted that letters submitted by Rice's companies from character witnesses also suggested that Rice continued to be involved in station operations.

Furthermore, the FCC order said, if "representations regarding Rice's exclusion from the management, policy, and day-to-day operations of the stations are true, a question is raised as to whether Contemporary/Lake has engaged in an unauthorized transfer of control of the stations."

"Contemporary/Lake" was the FCC's reference to all three of Rice's companies involved in station ownership.

A date for the hearings has not been set. Issues to be addressed include (1) the effect of Rice's convictions on the qualifications of his companies to be broadcast licensees, (2) whether his companies misled the Commission about Rice's involvement in station operations after his arrest, and (3) whether Rice engaged in an unauthorized transfer of control of his companies.

The Commission also ordered that, even if Rice's licenses were not revoked, he could be fined up to $250,000 for the possible unauthorized transfer of control of his stations.

Rice put Columbia station KFMZ on the air August 1, 1971. At the time, he was also the owner of St. Charles station KIRL(AM), which he sold in the late 1970s.

KFMZ is widely considered to be the cash engine of the Rice chain, with a low-overhead album-rock format in a rapidly growing college town and no debt service whatsoever to contend with.

More recently, KBMX and the owner of Columbia station KPLA(FM) have filed mutually exclusive applications for power increases. After KPLA's co-owned KFRU(AM) reported on Rice's conviction last year, KPLA's owners said KFMZ made an effort to terminate KPLA's lease for antenna space on the KFMZ tower. That matter has since been resolved, and KPLA continues to rent tower space from KFMZ. However, it spurred KPLA's decision to apply for a new site that would also allow it to increase power.

The FCC proceeding freezes all other actions regarding Rice's stations, including the Bourbon, Mo. application, a power increase for WBOW(AM), and the upgrade and extension of the KAAM-FM construction permit.

## 2690. :"Local" radio from 1000 miles away

Newsgroup: rec.radio.broadcasting
Date: 1995-10-16 00:00:00 UTC
From: "cHRIS O. Carmichael" <102776.224@compuserve.com>
Message-ID: <45st7k$7h3@vixen.cso.uiuc.edu>
Source record: 28940

Rich Wood, pointing out the obvious, wrote in Airwaves about radio:

>The real local service comes in news, public affairs, traffic, weather and
>community involvement.
>
>Any network relies on the quality of the local station's newscasts
>to get their prime time off to a good start. Without local involvement, no
>one expects much success.

And that, my friends, separates the wheat from the chaffe; the winners from the whinners; and the best from the rest.

I've been harping that in this market, KOGO [600 5kw DA] made that promise when it started its "Hot Talk" forge into the San Diego market. It started with three local live shows in the afternoon-eve hours. Now, nearly two years later, the weekdays are filled with only ONE local show. An out of market station, KFI [Los Angeles, 640 50kw/50kw] consistantly beats KOGO. Why? Local commitment! In the SD market, two other stations fit that mode too: KSDO, and KFMB. KFMB, with a great signal, has over 12-hours of local live service.

Syndi shows -- music or talk -- are cheap. But, in my opinion, a good combo of syndi and local shows give a better balance to the community the station serves.

George Achaves asks:

>Anyway, I'd love some "illumination" about BRIGHT 99.5. What's the
>deal? And will it make any difference?

According to Billboard magazine, WGAY/Star 99.5 got tangled up with a Southern Maryland station calling itself Star 98.3 (or some such)... rather than let the lawyers have at it, they changed names again to Bright 99.5. Apparently, they are still searching for appropriate calls, but the format they were going to use as Star 99.5 will be the one they use as Bright 99.5.

Not at all uncommon...especially when you consider that CFTR brought several Westinghouse (WINS' owner and -disclaimer time- my employer) folks up from New York to help create the 680 News format a few years back.

There are only so many sounder packages out there -- another common one shows up on a lot of ABC stations, including KGO in San Francisco and WLS in Chicago, among others. That package showed up here in Boston in the last all-news-morning incarnation of WHDH in 1994.

I spent a year and a half in the news department at WBRS-FM, the 25-watt voice of Brandeis University....and I wouldn't have missed it for the world. It gave me a chance to create a news department essentially from scratch, and by the end of my term as news director we had a daily news magazine that was the only daily news coverage for the campus _or_ our city of license. We even did all-night live election night coverage, with reporters at all the statewide candidates' headquarters, broadcast over an ad hoc statewide college-radio network. WBRS gave me a chance to learn the mechanical aspects of radio, and to build a demo tape that landed me a part-time job doing news at a suburban Boston AM. A replacement for commercial radio experience? Never. A useful adjunct? You bet.

As for the people who worked for and with me, one is now a producer at WHDH-TV here in Boston, another is an anchor at WRKL in Rockland County, NY, and I've been at WBZ for more than three years now.

By the way, Brandeis did not then and does not now have a communications school. Everything we did at WBRS, we taught ourselves. In the classroom, most of us were English or history majors.

In article <45i0bn$ro8@vixen.cso.uiuc.edu>, richwood@commspec.com says...

> Radio is a business. Very few college stations appear to be run
>that way.

It need not be that way. All it takes is for some dean to say to the kids running his university's radio station: "you can do anything you want, but you'll have to pay your own bills."

There are some student-run radio stations which operate as commercial businesses. Probably the best known are Dartmouth College's WDCR(AM) and WFRD(FM), which if I understand correctly was where the original Sconnix partners got their start.

# 2703. Crazy prices for FM stations

Newsgroup: rec.radio.broadcasting
Date: 1995-10-19 00:00:00 UTC
From: jgallagh@interserv.com
Message-ID: <464nep$o5l@vixen.cso.uiuc.edu>
Source record: 28806

The recent announcement that Boston's WKLB is being
sold for $ 35 million to Evergreen is truly shocking.

You need to sell a lot of spots for $ 70-80 a pop to justify
that kind of price-tag (which is what I hear :60 second
spots can be had on the Boston country station lately).

In talking with a few other people in the VC finance community
recently, there is a consensus that the high priced days of
FM properties is over as everyone is waiting to see what
effect the new technologies will have.

I read Stereo Review magazine each month, and in every
issue someone takes a shot at FM radio with a comment
like: "in a few years FM stations may disappear as
satellite signals dominate home listening...".

The relatively poor quality of the FM signal vs. the
CD-quality of C-band and DBS satellite transmissions
makes the playing field very uneven as consumers are
quickly turning to the satellite technology.

(A friend of mine who installed my c-band dish a few
years ago tells me he is now booked three months
in advance for installations of the both the 18" dish
and 10' dish systems.)

While it will take a little time for the automobile market to
change, can FM stations survive with car listeners only?
Very very doubtful.
---
I understand Fairbanks paid something like $ 1.5 million for
the old WVBF back two decades ago, so the $ 35 mil makes
for a pretty good capital gain.

Today's buyers of FM stations will someday be likened to
those who bought condos in the Boston real estate boom
of the 80's.

Many FM stations are speeding their own demise by playing
commercial sets with four sixty second spots in a row.

As an advertiser, do you really want to be the last spot of the
four? Is anyone really staying tuned for 240 seconds worth
of commercials?

John Gallagher/Boston

Reply to Rob A Bass@aol.com, or Robert573@dallas.email.net

I have a few items of which I no longer have a need for. So I
am putting them up for grabs, and will take the b/o on the following
items:

1. Teax X1000R Open Reel Tape Deck (needs work)
2. Optimus Cassette Deck (needs work)
3. Rack mount ears for Otari MX5050 Series decks (in fair conditon)
4. Radio Shack 10 band / channel graphic EQ
5. Ruslang Rack Mount Shelf (approx 14" deep... has minor scratch)
6. Technics 7 band / channel graphic EQ
7. Pioneer PD-M435 6 disc CD changer with one 6 disc magazine.
(I have a few spare 6 disc mags for about $2.00 ea.)
8. Assorted reels of duplication tape (on both 7" and 10 1/2"
reels) some with splices. (you can always dump the tape
and buy fresh hubs of your fav brand to replace) Also some
empty 10 1/2" reels (grey and light brown) All reels are
plastic only.

Also not up for grabs just yet, but I am possibly considering selling
an Ampex ATR 700 open reel deck, sometime in the near future.
However I will accept bids on it, just to see who might be interested.
It is in very good working order, although the tape counter is jammed
(probably easily fixable). Otherwise it still works, but probably
needs to be calibrated. I have had the reel turntables modifyed
to Otari type tables. Heads replaced about 2 years ago. Runs
at 7 1/2 / 15 ips., and when calibrated correctly, sounds great!!!!

Please leave e-mail with your offer for any of the above items.
If you have any questions about any of these items, do not
hesitate to ask.

Any items you wish to pruchasem you will also need to pay
for shipping.

thank you

In the NAB Radio Show sessions I attended, the consensus seemed to be building that personality, rather than music, should be the cornerstone of one's radio programming. The music mix, after all, can easily be duplicated by anybody who knows how to program an automation system, but the entertainment value of your air talent can't be so easily copied.

One speaker even went so far as to say that you can play any record at all in your show as long as it's entertaining.

Mind you, I haven't yet heard anybody try to actually put this into practice on the air.

Hello,

I invite you all to explore the (nearly finished) www pages
of KAGAN and the KAGAN CALENDAR.

The first is an industrial & gothic radio show on local college
radio station called Radio Scorpio in Leuven, Belgium. In the near
future you can expect the playlists here.
The address: http://www.esat.kuleuven.ac.be/~daeleman/kagan.html
or http://www.euronet.nl/users/timkul/kagan.html

The Kagan Calendar is a two-weekly updated newsletter. Well the WWW
pages have only got a discription of the newsletter so far, but the
newsletter itself will go online real soon. The newsletter is also
published on paper and concerns the Industrial & Gothic scene in
Belgium & the Netherlands. You can find tour & concert dates and cd
& concert reviews in it just to keep yourself up to date.
The address: http://www.esat.kuleuven.ac.be/~daeleman/kagcalen.html
or http://www.euronet.nl/users/timkul/kagcalen.html

So I'll see you all there!!!!

Cheers,

I want to * Tim Daeleman * I want to
fly the * aka * eye the
arc of * Timmie * ancient
the angels * is moving mars * of ages

I don't know about Bell Atlantic, but NYNEX *will* pass caller ID on 800
numbers upon request.

800 service has had "caller ID" for years - but it is called "ANI." There
used to be a number (1-800-MYANIIS) which would automatically return your
number via ANI, but it is now (sadly) password protected.

You could take your 800 service directly from AT&T on a T1 line.
Bell-Atlantic would not then switch or process the call, but would just
provide the transmission pipe. In that case, the info you want would
surely be passed - in ANI format. You would need a channel bank to turn
the T1 into standard analog pots lines.

# 2709. Joe Halstead, a legendary Texas Radio Man!

Newsgroup: rec.radio.broadcasting
Date: 1995-10-19 00:00:00 UTC
From: Cannon@onramp.net
Message-ID: <464nev$o5v@vixen.cso.uiuc.edu>
Source record: 28812

Joe Halstead, who worked daily as a Texas News Director for over three decades, died Monday evening, October 16, of a heart attack at his home.

It's easier to recall where Joe DIDN'T work; from the mid-60's to the mid-90's, he was at KXOL, KFJZ (now defunct calls) and WBAP in Ft. Worth; KLIF, WFAA, KRLD, the Texas State Networks, KSNN and KYNG in Dallas, as News Director.

Several of us who worked with him have commented that Joe is the first of our generation of newsfolks to die of "natural causes", his death has set off a series of resolutions to "shape up", and "take better care of ourselves." He came from a generation of broadcasters who didn't worry about ratings or consultants, he knew what was news for his audience, and he collected and reported it effectively.

He'd also mentioned organizing a "radio news reunion" for Dallas/Ft. Worth, something we put off doing, his death should be an incentive to this and other markets ... don't put it off any longer. In this, as any other top-10 market, there's a couple hundred veterans of radio news from the days when EVERY station had at least eight or ten newsfolks, had to, to keep their FCC license.

One of Joe's hobbies was cooking chili; he outfitted the "break room" at WBAP as a restaurant, and started work on his "bowls of Red" early each morning ... after anchoring the morning news, getting the day started, he'd disappear to the back and check on his gallons of chili that he served to anyone who stopped by, listeners, advertisers, truckers, police, bums, any donation accepted. This went on into the mid-80's, certainly a unique effort at any radio station.

# 2711. KIEZ 540 AM(Salinas,Ca) VERY STRANGE!!

Newsgroup: rec.radio.broadcasting
Date: 1995-10-19 00:00:00 UTC
From: markj@got.net
Message-ID: <464nf2$o62@vixen.cso.uiuc.edu>
Source record: 28814
Cross-posted to: ba.broadcast,rec.radio.broadcasting

As I reported earlier KIEZ 540 Salinas is insolvent due to gross mismanagment. This was announced in a station memo from investors to staff. Most of the air/news/production staff was let go.

KIEZ was being LMA'ed by Cypress Communications of San Mateo ,Primary investors were Aaron Harber and Robert Winter. KIEZ is owned by Central Communications and Jose Diaz.

Over the weekend(Oct-14) a notice was placed on the door at the KIEZ studios on Garden road in Monterey,Ca. The notice demanded the return of studio equipment to Diaz at once. The notice lso says tht KIEZ/Cypress communications is in Default.

Where did the money go so quickly?????
Some former employees think that the money went to BMW's and other questionable items...The man controlling the funds IS Jeff Yordy. Yordy reportedly diverted more than $60,000 of corporate funds from escrow accounts that *WERE* to be used to fund the purchase of KIEZ from Diaz. Yordy *REMAINS* on the staff of the now defunct KIEZ(don't ask why).

Now the strange part.......
KIEZ has been off the air for almost two weeks.....KIEZ has no studios....It appears KIEZ has just enough money to pay the employees that were let go.....KIEZ has no equipment as of Oct-17.

But KIEZ has told local TV stations to keep running the commercials!!!!!
It appears Aaron Harber and Investors THINK they will still be able to purchase KIEZ.

I called KIEZ studios to get a comment from Yordy,Harber or Winter but the phones have been disconnected.

Save your cans and bottles boys.....It really looks like this one is over.

And another Montery Bay AM station bites the dust.

Mr.News
markj@got.net

Note: Cypress communications is *NOT* related in any way to Cypress Broadcasting the owners of KCBA TV 35.

Chris and Rich are absolutely on target. The trick is being willing to take the hickey economically and
not panic. Which is why I'm not willing to crap on a station which has at least not changed its format.

We went through some pretty lean times in the early 90's and we did what we had to to stay on the air.
But we never lost our focus.

I would add that a good signal helps, but it is not always necessary. Put programming on the air that
people want to listen to and they'll fiddle with the dial to tune you in.

Michael Grogan (m_c_0007@frank.mtsu.edu) wrote:

: While they are saving money by choosing the network's music and jocks
: over their own, I believe that stations that choose the network
: programming are only hurting themselves in the long run. With the advent
: of services like DMX (Digital Music Xpress on many cable systems) and
: similar pending broadcasting services similar to it, local stations will
: need localism in order to compete with the non-advertising music
: services.

: If a station is already airing a nationally syndicated music
: format, they will lack the localism that will be necessary for survival.
: The only difference between a service like DMX and the station on
: syndication will be DMX's lack of commercials. Which do you think the
: average listener will choose?

Well there are two things he Radio station has that DMX does not, Local
News and Information, weather and It's Free to the Listener. DMX yuo
have to pay to play nad you can't take it with you...

Whn was the Last time DMX Broadcast the Friday Night High School Football
Game, Sunday Morning Church Service for the Local Church, Did a Remote
from the County Fair. I think spending time in the community and letting
the Network Play the music is a much better approach than spending money
to have Somone play music in the Control Room.

The Satellite format allows the station to devote it's resources to
keeping the station on the air. Many Small markets can not afford to
hire a staff, You can't get much in the way of a Jock for Min. Wage these
days. For $500/Month you get Music & Jock with out having to have
Staff, CD's Players, and other Studio stuff, Plus none of the related
hassels of keeping someone onthe Board.

It's legally available for purchase, but the trust which controls Charles River Broadcasting is forbidden by the terms of the founder's will to sell WCRB or to change its format.

There is an "escape clause" to the effect that the station may be sold if it can be shown not to be financially viable. Of course, no one here wants that to happen, so we work very hard to make sure it stays viable.

>Of course, she doesn't live in DC, so she can't even if she wants to.
>But we'll let that go for now.
>

Don't you just love radio station advertising?!?!?!?!?!?

Basically what happened was that a station in Southern Maryland was calling itself "Star 98.3" and "98 Star." When WGAY made its format switch to the Star thing, the station picked up their pressure on WGAY to drop the Star call. WGAY wouldn't and the station in Southern Maryland sued and got a ruling that WGAY had to stop using the Star thing. Apparently, WGAY had been in negotiation with this station to no avail. The station manager of Star 98.3 said you can take my listeners, but you can't steal my identity. Score one for the little guy (Yeah!).

The preceeding was reported in the Washington Post several weeks back.

>Anyway, just a few minutes ago, I saw the same Teri Garr telling me about
>BRIGHT 99.5. So I guess all the call letter combinations that were close
>to STAR had been taken. I'm reminded of the childhood poem, "Star light,
>star bright, first star I see tonight." WRQX (Mix 107.3) morning man
>Jack Diamond was probably noticing all this as well, when he commented
>that they're "not very bright at 99.5." It seems that Teri Garr was a
>bit nasty in her comments about Mix on the TV ad. Just another fall

This was elluded to in another post, but why hell do stations take cheap shots at each other. Do they seriously think they will get respect for this type of behavior? The bully in the schoolyard didn't and why should any radio station.

+> about BRIGHT 99.5.

+The "STAR" positioner was already being used by a station in the suburbs of
+DC

Ah, so that's what happened! The only other "Star" station I was aware of in the Balmer/Washington market was a "Star" AC in Baltimore (which has since flipped to some hot/urban format last year, I believe). I don't have it right at my fingertips, but I believe Star 98.3 may be licenced to Leonardtown, Lexington Park, or Prince Fredrick, all in Southern Maryland.

In my opinion, it says an awful lot that the management of this station failed to properly research other stations in this area (or at least within easy reach of cable tv, newspapers, etc.) that might already be using the "Star" positioner. What it says exacty, I will leave to the individual interpretation of the readers of this group... <g>

>If harmonics land on top of desired signals, someone will complain.

It seems that spurious signals other than harmonics aren't talked about much,
even though they can cause severe interference. One little-known cause of AM
radio station splattering that I've read about is "modulation arcing."
Modulation arcing occurs when the lighning arrestor gap at the antenna is not
properly adjusted so that arcing occurs at positive modulation peaks.
I've also noticed that AM signals can contain incidental phase modulation. If
the incidental phase modulation is severe enough, the phase modulation
sidebands will cause splatter. I haven't heard much about the causes if
incidental phase modulation. I was once told that this phenomenon occurs at
the transmitter's oscillator. Is this always the case? Can incidental phase
modulation be caused by poor neutralization or modulation arcing?

Reply-To: mgarrett@prairienet.org (Mark A. Garrett)

I want to personally thank all the peole who posted a response to my
recieving WKRP 1460 in North Vernon, Indiana. I did hear it with a lot
of skywave around 11 pm at night and with only 92 watts that is really
something even from one state away.
WKRP is running a satilite derived format ( I am not sure of the name or
supplier ) and what was weird about the whole thing is that a local station
in Rantoul, IL was running the very same format on 1460 until it went dark
in late July and they also ran a night authorization. I origionally thought
that WBAN had returned to the air but was recieving a lot of skywave
interference that evening.
Sorry to hear that Johnny Fever and Venus were not spinning records/Cd's

Thanks again

From: vision@panix.com
Message-ID: <464nfg$o78@vixen.cso.uiuc.edu>
Source record: 28828

The full text of WNEW mention in a NY ratings report story on 10/11/95 by New York Post writer Josef Adallan.

"WNEW (102.7) and its new modern rock format bombed with listeners in a big way. The station eliminated many staples of its music rotation and watched its year-to-year audience share drop from an already low 2.5 to a disastrous 1.9. Overall, WNEW finished in 22nd place, behind even country station WYNY (103.5).

"It's a fiasco," said one local programmer. "It's an unfocused form. Is it a rock station? Is it an alternative station? Is it a classic rock station? You don't know what you're going to get when you turn them on"

You mention that with its power increase XETRA 690 khz (77kw DA-U) is now the "strongest" station in North America. While I've always been impressed by their coverage at 50kw, I don't think an increase to 77kw will result in their being the"strongest" in terms of coverage or power. Since the transmitter of XETRA is in Mexico, I think it is safe to include both Mexico and Canada ( and even Cuba ) in the definition of North America.

In terms of power, I'm not sure what XERF 1570 khz ( at one time 250kw) and XEROK (at one time 150kw) are running now, but I do know that XEW 900 khz has operated with at least 100kw for years ( listed at 250kw, but it doesn't sound like it)
and XEWA 540 Khz is listed at 150kw. I can't confirm this, but they are loud in Hawaii.

Cuba has at least two 150kw transmitters in operation. At one time they were on 590 khz and 600 khz and sure sounded like it daytime in Florida. One of these is still on 600 khz and the other is on 710 khz to block reception of anti-Cuban WAQI 710 in Miami. Both of these carry the "Radio Rebelde" (Rebel Radio) Network, as they did on their old frequencies in the 60's and 70's.

Closer to home, their were reports that the Radio Marti/ Voice of America transmitter in Marathon Key, Florida (1180 Khz 3 tower DA to Cuba) Had upped its power to 100kw.

In terms of coverage, by the nature of their lower frequency ( and thus greater ground wave coverage) I would imagine that XEWA on 540 khz and CBK in Canada (540 khz-ND-U) even at 50KW would have greater ground wave coverage. Of course having a directional antenna will give XETRA a power increase over 77KW in some directions, but the same could be said about WWZN in Pine Hills, Florida with 50KW on 540 khz and a directional antenna.

Of course, coverage is based on many factors such as Earth vs. Water paths. Mountain vs. Flat terrain, ground conductivity, co-channel, and adjacent channel stations ect. Reception is in the ear of the beholder. I grew up in Tampa, and could hear
1KW stations in Louisiana in the daytime, because it was a clear salt water path.
One of the best daytime AM DX locations is the outer banks of North Carolina, where a good car radio would bring in WBZ Boston, and CMW Havana at 12:00 Noon.

I like your "North Pole to Hula Bowl" slogan, but in reality, for XETRA to be heard in Alaska, it must overcome CBU 690 khz 50KW DA to the north, in Vancouver, BC.
In Honolulu home of the Hula Bowl, 690 khz has a 24 hour local (KQMQ

10KW-ND-U) and when it goes off the air CBU is way above XETRA as is the het.
from JOAB (693 khz 500KW-ND) in Tokyo.

I do not mean to in anyway diminish your pride in the "Mighty 690", and
I enjoy your
reports on the San Diego market.
Brock Whaley WH6SZ
Honolulu, HI

[Moderator's Note: Another matter to consider is land versus water
coverage. It is my understanong that KFYR in Bismark N.D has the
greatest land coverage by day, of any station in the USA. It is 5kw
on 570. Bill]

*The demolition crews go to work Thursday morning, October 19, on what remains of the old rhombic antenna system of the late WBOS shortwave. WBOS was the shortwave outlet of WBZ, and operated from WBZ's transmitter site at Hull, Massachusetts from about 1940 until shortly after World War Two. The actual antenna wires are long gone, but the telephone poles that supported the antenna have been sitting undisturbed in the swamp next to the WBZ towers for half a century. But...all things must pass, and it seems the town of Hull got nervous about these towers falling and hurting someone. So after much political pressure, the poles are being removed. I took some photos of the poles earlier this year, and I hope to have them available soon on the Boston Radio Archives:

ftp://radio.lcs.mit.edu/radio/bostonradio.html

For what it's worth, some of the old WBOS transmitter logs are still sitting in the attic of the Hull building. I hope to help find them a safe, permanent home as part of BZ's 75th anniversary celebration next year.

Here's another entertaining story from the Boatanchors email list by one of our subscribers; she's the chief engineer at an unnamed station...
Jeff NH6IL
---

>From: "Roberta J. Barmore" <rbarmore@indy.net>
>>Subject: BANG!

Hi, gang!

"Bang" might not be the proper title for this--maybe "crackle-crackle."

Anyway, I'm going to be *real* scarce for awhile. Last night around 7:45-8:00 EST, the A-side 8kV/10A power supply at work caught fire. I got called in at 8 with one side off-air and the other side at low power and kicking off, and by the time I was in the car and on the celphone, status was "a working fire at the transmitter."

Think I've mentioned in the past, the big rig at work is a parallel unit, two 25kW transmitters into a combiner. Anyway, my boss showed up about five minutes before I did, and by the time I was up the lane, he'd killed the generator breakers, then gone in the smoke and yanked the 800A main disconnect. Fire Department could *not* find the source of the smoke (building was full!) 'til finally they got close to the PSU cabinet, which was glowing red-orange!!!

With *exactly* enough water (oh, *bless* them, it could have been such a mess!), they doused the thing, but the inside is a total loss. It looks like the plate transformer (10kV/30A max, 440V primary, three-phase) suffered catastrophic failure of one phase's secondary winding, arcing to the cabinet, *melting* the plate contactor *shut,* ditto al the OL relays in that box, and cooked until the breaker on the PSU kicked out.

We had to take apart the PA cavity of the other side of the transmitter and do a total rebuild with all new socket & tuning contacts. Though we managed that eight-hour job in two hours (teamwork and a lot of hands--GOOD hands), it was 4:30am before we had one side up, limping along at 40% of what we usually run. Most of the delay was getting enough smoke out of the building to get the Fire Dept. happy about allowing us in, followed by negotiating with the Fire/etc. officials to get permission to turn the power back on.

We've found a good/used PSU (thing is 8' tall by 4'x4', and HEAVY) over in PA, and it'll be here about midnight tonight. ...Paid ten grand with a smile; don't talk to me about Collins prices 'til you've had to fix an RCA pro boatanchor. About $30K of PA cavity parts are on order and should

be on-site when I go back in tonight, too. (The lost ad revenue, 'tis said, adds up to considerably more than what we've spent on parts, too--that's the problem with doing RF for money! <grin>)

Since the side with the smoked PSU seems to have the *least* damage to the RF (the blowers in it shut down aboput the time the smoke really began to roll), getting that replacement PSU in and running will be highest priority and it's going to take some serious amounts of time. I fully expect to be working at least 18 out of every 24 hours for the next week, maybe two.
Soooo, I'll try to keep up with list and mail, but bear with--my replies are liable to be real short if any!

...This just in; I was on the other phone line with the Corp. Dir of Eng, and they've got the plate transformer out of the fried unit. The windings check OKAY with a low-voltage ohmmeter--but the fiberglass bar that held the terminals is -gone- in the middle section. Starting to look like one of those Unfortunate Mouse-caused failures....

Eeeesh! Having *some* fun now...!

73,
--Bobbi

# 2731. D.C. Radio Watch / 19 Oct. 95

Newsgroup: rec.radio.broadcasting
Date: 1995-10-20 00:00:00 UTC
From: Max Cacas <76476.2472@compuserve.com>
Message-ID: <4687q3$slt@vixen.cso.uiuc.edu>
Source record: 28831

Item First: The Summer Arbitrons are out. The headlines from the Washington Post's "On the Dial" (Radio) column for Tuesday, Oct. 17th:

- Urban/adult WHUR-FM (96.3) is at the top of the 25-54 "adults" demo, with a 6.8 share, up two points from the spring book. Urban/contemporary WPGC-FM (95.5) follows at 6.1, with country WMZQ AM-FM (1390/98.7) in third with a 5.7, and Hot AC "Mix 107.3" (WRQX-FM) in fourth at 5.4. Tied in fourth place with "Mix" is AC WASH-FM (97.1), which moved up eight-tenths from the Spring. "Oldies 100" (WBIG) took advantage of the market's traditional affinity for 50s-60s oldies, plus abdication of that segment of the market by "XTRA-104" (WXTR-WXVR)'s change to 70s, in moving up a half-share to 5.0 and sixth place in 25-54. Black AC WMMJ-FM (102.3) tied with talk-jazz WJFK-FM (106.7) for 7th place with a 4.6. "Smooth Jazz 105.9" (WJZW-FM) appears to have found its plateau in the summer, having lost three-tenths of a share to a 4.4 and ninth place in 25-54.

Item Second - Sitting at the bottom of the Washington ratings race is sports-talk WTEM-AM (570), "maintaining" its 0.7 share from the Spring. The Post reports that the station last week began recycling the 10am-Noon sports show of Post Sports columnist tony Kornheiser at 5pm. While a former staffer believes the station is "showing the white flag" by replaying Kornheiser, WTEM GM Bob Snyder told the Post otherwise, saying "its an attempt to put Tony where more people can hear him." One of the problems with this strategy popped up last Wednesday, when Kornheiser began talking about what OJ Simpson would say during his upcoming appearance on NBC that evening. That afternoon, Simpson "canceled". The first hour of Kornheiser's show aired, outdated by events; the second hour, the station scrambled to fill with an attorney discussing Simpson's cancellation. Snyder says afternoon-drive talk show host Dan Miller remains in the studio to update as needed. (Author's note: If its that important to expose more people to Kornheiser, one of the very few remaining reasons at all to punch up "The Team", then why not move him to afternoons in the first place?? Why have a talk host serving as a board op and emergency back-up? Its often hard to believe that these are the same people who also run "Oldies 100" and classical WGMS-FM (103.5).)

Item Third: A notice from the family of the late Jazz programmer Felix Grant took note of the recent dedication of the "Feliz Grant Jazz Archives" at the University of the District of Columbia. Grant, who for years programmed an evening jazz program on WMAL-AM (630) and then WDCU-FM (90.1), left his entire collection of jazz recordings to WDCU and the University of D.C.

Item Fourth: A Washington area radio landmark recently bit the dust when the long-time home of WINX-AM (1600) in Rockville, Md. was demolished. There's no word on what's planned at the site at the corner of Route 355 and Viers Mill Road; the station for the last several years has been broadcasting its mix of

oldies/big band/high school sports from studios at the transmitter.

And so it goes...

From: "Blaine E. Thompson" <thompsob@CVAX.IPFW.INDIANA.EDU>
Message-ID: <4687q4$slu@vixen.cso.uiuc.edu>
Source record: 28832

Fort Wayne Radio News for the Week:

* WKQM is apparently close to being on air w DJ's.
The sweepers that are running now say "You've found 96.3 The Edge,
apparently our air personalities haven't" and: "Our air personalities
got mixed up and ended up in Fort Worth. This is Fort Wayne's 96.3
The Edge"...we'll see what happens. Going along with the PD, the
expected lineup is a bunch of former University of Illinois College
DJ's *sigh*

* WGL is slotting it's morning shows after the time change:
6 am to 10 am.

* Charley Butcher, of the WMEE-FM show appeared on NightShift.
Not very funny. (Nightshift is a comedy program).

* It is rumored that Richard Strahm, the News Director of
WOWO-AM wants out. *sigh* WOWO is going down the tubes fast...Chris
Roberts, Richard (possibly), Ron Powers, etc. etc. are leaving...
Welp, personally, this hurts me. I don't like seeing Americana ruined
by the mighty FCC (Read: Power reduction), but this ain't classy either.
Tony Richards (GM - WOWO) is running the station terribly and needs
to concentrate his focus on WQHK-AM (which isn't exactly doing well
either) and WMEE-FM which needs help also.

Okay...I'm jumping off of the soapbox now. That's all for this week...
till next time...

It's been slow.

---
The Program Director of WIBC (1070), Bobby Hatfield, will not be returning to the station when his contract expires. All sides apparently agreed not to renew Hatfield's contract. Hatfield leaves the station amid persistent rumors that he did not work well with airstaff.
---
Carlos Diaz has left his post on the WZPL (99.5) morning show to assume duties on the WRZX (103.3) morning show. This unusual crosstown shift places Diaz in the news chair for the modern rock station.
---
WGGR (106.7), licensed to Greenwood, has changed format from oldies to adult urban contemporary. You may recall that the station switched to oldies from country just over a year ago, after the Emmis Broadcasting station at 93.1 FM changed format/calls from oldies/WKLR to 70's rock/WNAP. The new WGGR, which calls itself "The Touch 106.7," has terminated most of its airstaff in favor of programming from a satellite service. Positioners indicate that WGGR wants to draw older listeners away from WTLC (105.7), which skewed its urban programming much younger in the past year.

CapCities/ABC's new O&O KMPC-710Talk continues its dual role as
Tom Leykis' flagship station
Tom Leykis' worst affiliate

The would-be KFI killer continues to pre-empt Leykis during
drive-time for sports events, even though KMPC's prior incarnation
as an all-sports station (under Gene Autry's Golden West B'casting)
was a ratings disaster,

Sister station KABC has not confirmed that KMPC's semi-continuation
of its doomed format is proof that its management is related to
KFI's legendary PD Dave Hall.

Meanwhile, KFI's John&Ken continue to triumph in a time slot whose
only REGULARLY SCHEDULED competition is KOGO's Weissbach. If CC/ABC
*really* wants to challenge KFI, they'll consolidate ALL of their
sports programming at KMPC and give Leykis a shot at reviving their
flagship's moribund PM drivetime. Industry observers expect KABC to
exhibit such intelligence at about the same time it is announced that
the birthplace of long-running chatter Michael Jackson is ackCHOOlee
Brooklyn

Country KNIX(102.5) night jock Shotgun Kelly(NOTE:
NO RELATION TO SAN DIEGO's SHOTGUN TOM KELLY OR TO L.A.'s MACHINE
GUN KELLY)was arrested
by Mesa, Arizona police at the KNIX studios just before
his Tuesday(10/17)night airshift.
Police accuse Kelly, whose real name is John Gutting, of
performing oral sex on a 16 year old boy who they say spent the night
at the DJ's Mesa home the weekend of October 1.
Gutting's parents posted $25,000 bail and Gutting was
released late Wednesday(10/18)afternoon.
In a statement released through his attorney, Gutting says he
cannot discuss the allegations, but thanks everyone
for their thoughts and support.
KNIX PD Larry Daniels said his staff is "devastated...on the
verge of tears"...and said Gutting had been "a great performer for
us" in the year and a half he's been at KNIX.
Arbitron ratings released just hours before the arrest
showed Gutting's show as the #3 program in its 7-Midnight time slot
in this 50-signal market
Arraignment is set for next week on the criminal charges.
Mesa Police told KTVK-TV's "Good Evening Arizona" that
Gutting's celebrity status did not affect their investigation one way
or the other.

You heard right. In reality, we didn't really increase power though.
Just added a combiner tieing the two 50kw xmtrs together.. But make that
a four tower in line DA since 1989.

Interesting sidebar to 100kw operation. While walking in the antenna
field a few weeks back, I had my old 35mm camera with the non functioning
light meter along. It suddenly began to show a reading !!!!!!

There'll be no more children in this family.

>incoming 800 lines.

Most 800# won't. We have an 800# from Consolidated Communications and it
DOES pass ANI to Caller-ID (works from almost all of USA/CANADA... till
we moved to a non-caller-id area). Wiltel might also offer ANI to Caller-ID.

>
>IF YOU GET Caller ID info on your incoming 800 lines I'd like to know where

>to anywhere in the US. Wondering if this is true and if it applies to
>incoming 800 lines.

Not sure about 800#'s. Wiltel already passes long distance caller-id.
Call someone with "10555-1-202-555-1212" and they should get your
caller-id.

# 2739. Bruce Williams pre-empted on WEVD in NYC

Newsgroup: rec.radio.broadcasting
Date: 1995-10-20 00:00:00 UTC
From: yt50@panix.com
Message-ID: <4687qd$smb@vixen.cso.uiuc.edu>
Source record: 28839

I've been listening to Bruce Williams for years in Chicago, Washington, New York and on the road. I know that he often is pre-empted by sports.

But WEVD is something else! They pre-empt him for a three hour infomercial on sports betting every week. For a talk show for Jamaican expatriates. For a forum on alternative medicine.

Some of the shows which pre-empt Bruce are in foreign languages that I can't even identify.

At the same time, they promote his show every hour and have posted his face on billboards and on every city bus.

Bruce is on, maybe, 2 nights a week. What gives?

Well, there are many...the rise (and coming fall) of the suburb, media
and societal fragmentation, the introduction of MTV, the wiring of the
planet, the increasing sophistication of young consumers, etc...

>(ii) how might CHR programming have itself changed
>listeners' values causing larger societal changes through CHR's own actions?

I don't think it's that easy to pinpoint. CHR and radio in general
are pop culture institutions. And pop culture mirrors societal values
as well as shapes them. It's sometimes impossible to figure out which
is influencing what.

>Although I'm trying to focus on CHR, any music-based format's information
>would prove helpful.

I've had a difficult time finding this kind of information in most
radio publications. (There are the occasional exceptions, so put down
your flamethrowers. :) I look mostly to work about society trends in
general and try and figure how they relate to radio.

Since radio is first and foremost a business, I'm always interested in
learning more about consumer society and consumer thinking. An
excellent place to start is Guy DeBord's 1968 masterpiece "The Society
of the Spectacle." (Available on line at
http://www.nothingness.org/SI/index.html) I found out about this book
from Greil Marcus' "Lipstick Traces: The Secret History of the 20th
Century."

Marcus' book is dense but provides a wonderful take on the 70's punk
movement. And, although it was written before Nirvana broke,
"Lipstick Traces" provides the answers to the "Why?" and "How?"
questions of the current "alternative" music craze.

Also, check out Marshall McLuhan's "Understanding Media" for a good
overview of the effects of different media on society.

You should also call Bowling Green State University Popular Press in
Bowling Green, Ohio. BGSU has the only degree program in Popular
Culture available and their press produces some really cool books
about different aspects of pop culture. They might just have what

you're looking for.

>Thanks for any help and information! I'm attempting to write a paper on
>this.

Good luck. It's a pretty daunting task with such a wide focus. I'd
be interested in hearing what you find.

Source record: 28842

I take with some offense the bad press that college radio stations are less
than desirable occupants of the airwaves. BULL ! You cannot find a better
LOCAL public servant than your local college radio station. Case in point...
WSKB-FM in Westfield, Massachusetts (formerly 91.5, now 89.5). This is
where I started from 1978-1980. At that time, SKB' was a 10 watt stereo
station designed to serve Westfield State College and the Greater Westfield
area (some 75,000 potential listeners in the coverage area). In the fall
Mayoral elections of 1979, WSKB-FM was the ONLY station that provided up-
to-the-minute election results throughout the night with remotes at
strategic locations at City Hall and both Campaign Headquarters. We had
the concession speech live and the FIRST interview with the Mayor-elect.
We proved that inspite of our small stature, everyone in Westfield stayed
tuned to us. It helped us get our 100 watt increase and showed people
what LOCAL service is all about. I was proud to be the stations' Program
and Production Director in those two exciting years. At that time, the
City of Westfield had a local AM station (WLDM/1570) that only operated
daytime and us (WSKB-FM/91.5). Needless to say, I am sure that some folks
at the AM station (now WNNZ/640 in SPRINGFIELD) were a bit miffed that a
10 watt FM college station beat them in providing election returns. What
a time.

>GD> Even at the best college stations, jocks
>GD>are not going to come out medium- or major-market ready, especially in
>GD>terms of the particular skills you're asking for below.

Yes, but we are working to correct this.

>Greg,
> In my experience, college radio has never been a source for
>anymarketready talent. There certainly have been many great talents who
>also did college radio at one time or another, but they never credited
>their time in college radio with anything more than self indulgent fun
>and a way to gather horny groupies.

NO, I don't think so. I definately didn't join WPCR to get
little freshmen girls. I joined because radio was always something I
wanted to attempt. Believe it or not, that's why most of the college
world joins college stations. If they wanted sex they'd go greek.

>GD>On the other hand, *should* college radio be run purely as a business?
>
> No. College radio should be anything the college wants it to be. I
>just don't buy the concept that it's a great training ground. Unless it
>represents what the student will find in real life radio, it'll fail as
>a training vehicle.

Our program log reads as follows:

:00 Legal ID (Can be Live or Recorded)
:15 NEWS/Weather (Rip and Read or call the Meteorology lab)
:30 Image Sweep (Legal ID - Usually recorded)
:30 PSA (Usually Live - I'm still in the process of making new PSA carts)
:30 Promo (A live show or station promo)
:45 Campus Quickie or Filler (a Campus PSA or Area event)
:50 Request Filler (Live or recorded)
:-- UEG (Underwriting - Only when our lovely Program Dir says so)

DJ's have to comply with these time within a margin of plus or
minus three minutes. Failure to do so results in a warning which must be
worked off. Two warnings for the same offense results in suspension.
Continued failure to comply results in expulsion.

Any warnings not worked off sends you to the bottom of the heap
come show draw.

>GD>promotions. One area that I will surely concede to be sorely lacking at mos
>GD>(but not all) stations is an effective programming coach. Unfortunately, th
>GD>nature of most colleges and universities is such that activity of that kind

>GD>by a faculty member is seldom rewarded.

Our advisors just make sure we are not going overboard. Our
Exec. Board has pretty much been our own watch dog. Our promotions guy
does a damn good job at getting underwriting. The extra monet goes back
into the budget so we can keep up with repair costs. (At a college
station...hmmm, imagine that.)

> Unfortunately for them, programming is our bread and butter. It's
>the only product we have to sell. I don't have time to accept excuses
>for why the person applying to me for a job can't do the job.

Yes, Dick Summer and his Shrewsburies. I could tune WBZ in from my bedroom in Illinois, about the time Dick came on, after WCFL had shifted their pattern and just to the right of KDKA. And don't forget David Rich Atchinson, the forgotten president of the United States. Or how about The Highwayman, and the Lovin' Touch poetry. Dick Summer was a big influence on me, and on my record collection. That's the first place I heard Phil Ochs, Country Joe and the Fish, Mamas and Papas, Simon and Garfunkel. And then, one night, he was playing Strangers in the Night. WBZ had changed formats.

It seems that spurious signals other than harmonics aren't talked about much,
even though they can cause severe interference. One little-known cause of AM
radio station splattering that I've read about is "modulation arcing."
Modulation arcing occurs when the lighning arrestor gap at the antenna is not
properly adjusted so that arcing occurs at positive modulation peaks.
I've also noticed that AM signals can contain incidental phase modulation. If
the incidental phase modulation is severe enough, the phase modulation
sidebands will cause splatter. I haven't heard much about the causes if
incidental phase modulation. I was once told that this phenomenon occurs at
the transmitter's oscillator. Is this always the case? Can incidental phase
modulation be caused by poor neutralization or modulation arcing?

# 2747. Crazy prices for FM stations

Newsgroup: rec.radio.broadcasting
Date: 1995-10-20 00:00:00 UTC
From: jgallagh@interserv.com
Message-ID: <4687qm$smr@vixen.cso.uiuc.edu>
Source record: 28847

The recent announcement that Boston's WKLB is being
sold for $ 35 million to Evergreen is truly shocking.

You need to sell a lot of spots for $ 70-80 a pop to justify
that kind of price-tag (which is what I hear :60 second
spots can be had on the Boston country station lately).

In talking with a few other people in the VC finance community
recently, there is a consensus that the high priced days of
FM properties is over as everyone is waiting to see what
effect the new technologies will have.

I read Stereo Review magazine each month, and in every
issue someone takes a shot at FM radio with a comment
like: "in a few years FM stations may disappear as
satellite signals dominate home listening...".

The relatively poor quality of the FM signal vs. the
CD-quality of C-band and DBS satellite transmissions
makes the playing field very uneven as consumers are
quickly turning to the satellite technology.

(A friend of mine who installed my c-band dish a few
years ago tells me he is now booked three months
in advance for installations of the both the 18" dish
and 10' dish systems.)

While it will take a little time for the automobile market to
change, can FM stations survive with car listeners only?
Very very doubtful.
---
I understand Fairbanks paid something like $ 1.5 million for
the old WVBF back two decades ago, so the $ 35 mil makes
for a pretty good capital gain.

Today's buyers of FM stations will someday be likened to
those who bought condos in the Boston real estate boom
of the 80's.

Many FM stations are speeding their own demise by playing
commercial sets with four sixty second spots in a row.

As an advertiser, do you really want to be the last spot of the
four? Is anyone really staying tuned for 240 seconds worth
of commercials?

# 2751. Joe Halstead, a legendary Texas Radio Man!

Newsgroup: rec.radio.broadcasting
Date: 1995-10-20 00:00:00 UTC
From: Cannon@onramp.net
Message-ID: <4687qr$sn3@vixen.cso.uiuc.edu>
Source record: 28851

Joe Halstead, who worked daily as a Texas News Director for over three decades, died Monday evening, October 16, of a heart attack at his home.

It's easier to recall where Joe DIDN'T work; from the mid-60's to the mid-90's, he was at KXOL, KFJZ (now defunct calls) and WBAP in Ft. Worth; KLIF, WFAA, KRLD, the Texas State Networks, KSNN and KYNG in Dallas, as News Director.

Several of us who worked with him have commented that Joe is the first of our generation of newsfolks to die of "natural causes", his death has set off a series of resolutions to "shape up", and "take better care of ourselves." He came from a generation of broadcasters who didn't worry about ratings or consultants, he knew what was news for his audience, and he collected and reported it effectively.

He'd also mentioned organizing a "radio news reunion" for Dallas/Ft. Worth, something we put off doing, his death should be an incentive to this and other markets ... don't put it off any longer. In this, as any other top-10 market, there's a couple hundred veterans of radio news from the days when EVERY station had at least eight or ten newsfolks, had to, to keep their FCC license.

One of Joe's hobbies was cooking chili; he outfitted the "break room" at WBAP as a restaurant, and started work on his "bowls of Red" early each morning ... after anchoring the morning news, getting the day started, he'd disappear to the back and check on his gallons of chili that he served to anyone who stopped by, listeners, advertisers, truckers, police, bums, any donation accepted. This went on into the mid-80's, certainly a unique effort at any radio station.

: While they are saving money by choosing the network's music and jocks
: over their own, I believe that stations that choose the network
: programming are only hurting themselves in the long run. With the advent
: of services like DMX (Digital Music Xpress on many cable systems) and
: similar pending broadcasting services similar to it, local stations will
: need localism in order to compete with the non-advertising music
: services.

: If a station is already airing a nationally syndicated music
: format, they will lack the localism that will be necessary for survival.
: The only difference between a service like DMX and the station on
: syndication will be DMX's lack of commercials. Which do you think the
: average listener will choose?

Well there are two things he Radio station has that DMX does not, Local
News and Information, weather and It's Free to the Listener. DMX yuo
have to pay to play nad you can't take it with you...

Whn was the Last time DMX Broadcast the Friday Night High School Football
Game, Sunday Morning Church Service for the Local Church, Did a Remote
from the County Fair. I think spending time in the community and letting
the Network Play the music is a much better approach than spending money
to have Somone play music in the Control Room.

The Satellite format allows the station to devote it's resources to
keeping the station on the air. Many Small markets can not afford to
hire a staff, You can't get much in the way of a Jock for Min. Wage these
days. For $500/Month you get Music & Jock with out having to have
Staff, CD's Players, and other Studio stuff, Plus none of the related
hassels of keeping someone onthe Board.

Ron Cole

>Its sister station is heritage rocker 96.1 KZEL Oregon's Classic
>Rock, which programs an uptempo 70's based classic rock format...

Wow! I grew up listening to "K-zel 96, Oregon's Best Rock" back in the 80s. Has anyone heard of Clark and Kanner?. I've been at school here in Seattle the last few years, so it's been difficult to keep up with my stations in Oregon. However, when I've visited my parents back home, I have noticed a complete lack of "modern rock" on the air until recently. Not too long ago (less than a year I believe) the first "modern rock" FM station appeared in Portland (94.7 NRK). Now Eugene is getting one, too. It is about time. Seattle has had "107.7 the end" for at least 3 1/2 years. I think this has been brought up in this group before (someone was listening to AM970 "the beat" in Portland).

My only concern for the two stations (NRK/Portland and NRQ/Eugene) is signal. Both of these stations are weak. 94.7 in Portland is probably weak to not interfere with 94.5 KMGE in Eugene. Likewise 95.3 in Eugene is probably weak to not interfere with 95.5 KXL in Portland. The two cities are about 100 miles apart on either end of the Willamette Valley. From my parents home between Portland and Eugene in the NW corner of the Willamette Valley, both stations are virtually unlistenable even though most of the other stations from the Valley are listenable. So if there are ratings problems, that might be a contributing factor. I hope things do go well and at least one of the two boosts the signal a bit so I can listen when I go back home.

Along the same vein as the college radio thread, I've been asked to give a short talk on "How to get a job in Broadcasting" to a college audience. The college has a commercial AM/FM combo that is student run, with non-student sales people. There is no communications department, and all labor is volunteer hands-on by the students. They cannot get credit for internships, since there is no program.

What resources are out there to help them with their job search? I am familiar with R&R, Broadcasting & Cable, and a few other trades. Are there other internet resources besides Airwaves and TV Net?

What advice would you give these students, who will be looking to continue their broadcasting careers after school?

Thanks for any suggstions

FY>his non-compete clause from WZLX expires.

What will happen to current AM driver David O'Leary? Will he return to the comfort of PM drive? Also, has anyone noticed the new slogan at 'BOS (A Different Kind of Rock Station) as well as a noticeable change in both temp and "loud"ness of the playlist??

Last I checked, WBT's signal wasn't SUPPOSED to be protected in New
England, particularly given the FCC's stance through the 80's and 90's.
In other words, you no longer have the right to listen to Charlotte (et
al) radio in New England! LOCAL operators get preference, particularly
with daytimers going fulltime.

> From: jgallagh@interserv.com

> I understand Fairbanks paid something like $ 1.5 million for
> the old WVBF back two decades ago, so the $ 35 mil makes
> for a pretty good capital gain.

That's not all, John. According to the Business Wire,
there are a few clauses in the WKLB sale which would balloon
$30-plus mill pricetag into a nice mid-40's neighborhood. The
major one : the station shows strong ratings gains in all improtant
demos over the next 6 months(or by the time this deal is officially closed).
Before it's all over, WKLB-FM just might own the record for
the most money paid for a single radio station in the Boston market.

So, all those countless WKLB spots[yeh, the ones with ABC's 'Murder One'
actress who plays the sister of the murdered victim] currently
airing on all Boston local TV stations and Loren+Wally's spots which
began airing on WBZ-AM about 4 weeks ago are all there for one good
reason : to drive up 'KLB's final sale price. And, dont let the Boston
Globe mislead(..again :-) you that it's an indication that there's
any sort of committment on the part of the old(Fairbanks) or the new
(Evergreen) owners to keep country music around for much longer.
I think it's time we start speculating on what new profitable
format is coming to 105.7...:-)[The Bosto Herald's gossip column
this week mentioned 'young talk' -- just what Evergreen has on their
Chicago station, WLUP-FM -- with a possibility of syndicating
LOOP's morning show here...Hmm]

WKLB's crosstown rival WBCS96.9FM(Greater Media) has issued another
blank check for a million dollars(the first one expired) which will
go to the first person who calls WBCS with the news that it's dropping
country music format...It's a safe to say that they'll never have to give
it away...:-)

By the way, I'd bet WKLB-FM's revolutionary 4-week buy on WBZ-AM
to promote their morning team of Lorren and Wally cost
them a fortune -- I doubt the #1 station in the city is
charging $70-80 for a 60-second spot...:-) Also, the
spots are written in such a way that Lorren and Wally really end up
promoting the great New England tradition(WBZ) more than
they do their own struggling country+western station.[it
goes somthing like this : "'BZ is our souce for information and
news...always was, always will be..."]

Best Regards,

-Mark

# 2767. XETRA's 77kw signal clarified

Newsgroup: rec.radio.broadcasting
Date: 1995-10-20 00:00:00 UTC
From: "cHRIS O. Carmichael" <102776.224@compuserve.com>
Message-ID: <4687rf$so3@vixen.cso.uiuc.edu>
Source record: 28867

There has been some confusion about my postings on the 'new" 77kw signal that is from XETRA [690 DA II] Tijuana.

First off, while I have a many contacts in San Diego and LA stations [including XETRA], I, like all reporters, rely on official station releases or queries to the stations.

As reported, the saying, "From the North Pole to the Hula Bowl," and the most-powerful AM station in North America were either from XETRA-AM/Nobel or three of San Diego newspapers. [San Diego Tribune, Escondido Times-Advocate, and the Oceanside Blade-Citizen.]

I too know -- but didn't post -- KQMQ Honolulu [690] and one from the Canadian provinces [also 690]. [When I lived in Hawaii 1989 - 1993, KQMQ was giving KSSK a good run for listeners.]

So, my fellow friends in the fourth and fifth estate, let's not make this any more confusion. I, like yourselves, take great pride in my reports. I always get two independent confirmations on all reports, and rumors are reported as that: rumors.

I too, was under the impression that the VOA station had more power; and Mexico City, D.F., still has some real kickers.

Thanks!

>
>

Chris,
No disrespect intended. But be cautious of "station releases". If
a ten watt educational station sent out a press release claiming to be #1 12+
in the ARB's, I'm sure you would greet it with some skepticism even if
another source confirmed it.

I don't know what got into me. Just adding my two cents worth

I think the blame should fall upon the FCC. It seem that every rinky dink community with a population of over 4 has their own radio station. The main blame should fall upon the FCC.

Most small market stations can not afford to have live jocks 24 hours a day. If a city of under 50,000 has more than 5 radio stations, the advertising revenue is cut 5 different ways. Stations run syndicated networks because they simply can't afford it.

Take a look at the Wausau market. Market #150, we have 11 radio stations in the city of Wausau alone. You can blame the FCC on this one.

WELL it also means you might not hear WBT if you are even reasonably close.
I'm 80 miles away, and someone (WHIM) (???) was causing interference to
WBT which I had to tolerate almost ALL the way to Charlotte recently. I had
to get UNDER 20 miles not to hear it at objectionable levels.

The other evening some station in Alabama forgot to cut power during
critical hours and their 10,000 watts blew WBT away until they signed off.
Then I heard that other junk I mentioned to under WBT's signal.

Not only a lot, but not legal. Joel has the exclusive rights to compile
data from Billboard's charts, and has to date refused to put it in any
electronic form exactly because of fears that someone would just post it
all online!

Any word on when GROUP W takes over WSCR, and what that portends for WMAQ's night time sports block {minus the SOX in '96}. On the same thread, is MVP promoting the new noisy SCOTT FERRELL [from Infinity] show?

1 sports station can do very well in a large market [see WFAN, KNBR]. But 2, especially 2 that cancel each other out, seem counter productive

}
} I take with some offense the bad press that college radio stations are less
} than desirable occupants of the airwaves. BULL ! You cannot find a better
} LOCAL public servant than your local college radio station. Case in point...

Peter, I don't believe that this thread has anything to do with college radio being 'less than desirable occupants of the airwaves'. It had to do with whether they provided training that was important to the 'real world' broadcasting environment.

This is the big dilemma in college radio, as I see it.

The question boils down to '...Should college (read: student-run) radio function as a training grounds for commercial radio *OR* should it function to provide its community with an alternative to the bland, anything-for-a-buck reality of commercial radio?...' Herein lies the rub. I suppose there is another question that says "Should commercial radio be so tightly controlled...?" but that is for another thread.

If college radio is there as a training grounds for commercial radio, then it should be more formatted, have a tighter sound and adhere to many of the same conventions that the talent is going to have to face later in their career. If this is done, the output (talent wise) of the station/program will be more respected by the commercial stations later, but the community may lose its *only* alternative voice. (Note: alternative means simply that, an alternative to the more tightly formated reality of commercial radio,m and not to indicate any specific format...).

If college radio is to function as an alternative broadcasting outlet, where those who are bored with Jurassic Rock, Hot Country, Lite Rock and Hate-Talk, can go and hear something that is actually different, unusual or new, then the output of that station is not as likely to have the training that is required (outside of actual operational ability) to go directly into commercial radio.

Herein lies the basis of whether college radio experience can be a valuable asset to a future in the rigidly controlled world of corporate commercial radio.

William Pfeiffer
